

ENG 2000

The Art of Literature

Mark Tjarks, Ph. D.

The Art of Literature introduces students to multiple ways of interpreting literature, selected from a variety of literary genres such as poetry and songs, drama and movies, and fiction and myth. Texts to be explored will be drawn from multiple cultures and time periods.

This section will have a thematic focus, looking at:

Coming of Age and ***Falling in Love***
Finding One's Identity and ***Facing Suffering & Death***.

In addition to studying and applying interpretative strategies, students will have an opportunity to apply literary techniques by writing a creative response to one of the texts studied.
