Since its founding in 1965, Hawai‘i Pacific University has become Hawai‘i’s leading urban independent university. With three distinctive campuses, including the vital downtown Honolulu campus, the picturesque Hawai‘i Loa campus, and the Oceanic Institute of HPU, one of the world’s leading aquaculture research facilities, HPU provides rich opportunities for integrated service learning, field, internship, clinical, and classroom learning. The university offers a wide range of academic programs, leading to associates, bachelor’s, and master’s degrees.

Matching the rich history of diversity in the Hawaiian Islands, HPU makes a special effort to bring students from Hawai‘i, every other state in the U.S., and nearly 100 countries around the globe. Reflecting this same diversity, HPU’s distinguished teaching and research faculty members are global in their composition and outlook. HPU is recognized as one of the most culturally diverse universities in the U.S.

HPU’s student body includes traditional and adult age students, members of the military, and practicing members of the professional communities of Hawai‘i. Thus, we strive to offer flexible support services that meet the needs of all groups. We keep our classes small so that our faculty and staff can get to know each and every student. HPU’s commitment to student learning is absolute—student learning comes first. Accordingly, we expect students to be as dedicated to their academic and professional development as we are.

The rich diversity of life in Hawai‘i combines with a strategic location at the very center of the Pacific region and the caring flexibility of a private university to produce a unique learning laboratory. This combination gives our graduates a competitive advantage in an increasingly diverse and Pacific-oriented world.

The HPU community recognizes that Hawai‘i is a special place to live and learn. With this, the university commits to use responsibly our community resources while advancing its mission.

Aloha, and welcome to the university where the world comes to learn.

Geoffrey Bannister, Ph.D.
President
CONSUMER INFORMATION

Hawai‘i Pacific University, in compliance with the Higher Education Act of 1965, as amended, is required to disclose consumer information to interested parents and students. This information is available in a variety of formats: e.g., HPU’s website, catalog, student handbook, financial aid handbook, registration material, mailers, and government reports. “Student Right-to-Know Information” and other consumer information about the University, such as campus security statistics, drug and alcohol abuse prevention and/or graduation rates, can be found at:

www.hpu.edu/About_HPU/3-Student_Right-to-Know_Information.html

Hawai‘i Pacific University reserves the right to revise the contents of this publication. No contract is implied by this catalog. Current information can be found at the HPU website: www.hpu.edu.

ASSESSMENT INFORMATION

Hawai‘i Pacific University is committed to providing quality education and to assuring students gain the knowledge and skills necessary to be successful. Assessment of student learning provides the information HPU needs to make improvements in program structure, course content and pedagogy. To this end, information is collected at the classroom, college and institution levels. All student performance data are aggregated and confidential. If you have questions or concerns about program assessment of learning, please contact:

Honolulu, HI 96813

NON-DISCRIMINATION NOTICE

Hawai‘i Pacific University admits students without regard to sex, race, age, color, disability, religion, sexual orientation, or national or ethnic origin to all programs and activities generally accorded to or made available to students at the University.

As provided for and to the extent required by state and federal laws, the University provides educational opportunities without regard to, and prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity or expression, national or ethnic origin, or any other characteristic protected by applicable law in the administration of its educational programs, policies, admissions policies, scholarships, activities, loan programs, and athletic and other University-administered programs. Complaints or concerns should be filed with the University’s Title IX coordinator (go to www.hpu.edu/studenthandbook) for details

This statement is intended to be consistent with the provisions of applicable local, state and federal laws and covers admission and access to, as well as participation and treatment in the University’s programs, activities, and services. With regard to employment, the University is committed to equal opportunity in all personnel actions, policies, procedures, and practices. Inquiries regarding equal opportunity policies, access for disabled persons, or complaint procedures, may be directed to:

Hawai‘i PACIFIC UNIVERSITY

is an independent, coeducational, career-oriented, comprehensive university with a foundation in the liberal arts. The University offers degrees in the Bachelor of Arts and the Bachelor of Science in a variety of disciplines as well as the Bachelor of Social Work and Bachelor of Education. Graduate degrees are offered in the arts, business administration, education, the sciences, and social work. HPU also offers associates degrees through the College of Extended and Interdisciplinary Education, home of Military Campus Programs.

Hawai‘i Pacific University is:

• Accredited by: The Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, (510) 748-9001; the Council on Social Work Education, 1725 Duke Street, Suite 500, Alexandria, VA 22314-3457, (703) 683-8080; the Council for the Accreditation of Educator Preparation (CAEP), 2010 Massachusetts Avenue NW, Suite 500, Washington, DC 20036, (202) 223-0077; and the Commission on Collegiate Nursing Education (CCNE) One Dupont Circle, NW Suite 530, Washington, DC 20036, (202) 463-6930.

• Designated as a State Approved Teacher Education (SATE) institution by the Hawai‘i Teacher Standards Board.

• Approved for veterans’ benefits and authorized to enroll nonimmigrant alien students.

• A cooperative education institution offering a variety of career-related work experiences and internships as an integral part of the curriculum.

• Located on three distinctive sites: an urban campus in the heart of downtown Honolulu; a rural residential campus on the windward side of O‘ahu; and a scientific research and teaching institute in East Honolulu. Programs and courses are also offered on O‘ahu military installations and online.

Please refer to the Hawai‘i Pacific University website at www.hpu.edu for the latest updates on academic programs and university policies.
MISSION
Hawai‘i Pacific University is an international learning community set in the rich cultural context of Hawai‘i. Students from around the world join us for an American education built on a liberal arts foundation. Our innovative undergraduate and graduate programs anticipate the changing needs of the community and prepare our graduates to live, work, and learn as active members of a global society.

LOCATION
Hawai‘i Pacific University has three distinctive campuses located on the island of O‘ahu. Additionally, HPU offers programs and courses on O‘ahu military installations and online.

Downtown Honolulu Campus
The urban campus is in the heart of Honolulu’s downtown business and financial district, within the center of the state’s capital district. This campus is home to the College of Business and the College of Liberal Arts. Students have ample opportunities to make the transition from student to professional in the various business offices, not-for-profit organizations, government agencies, financial institutions, and accounting firms and law firms in the area. Many of the university’s adjunct instructors are practitioners at the top of their professions who bring contemporary, real-life experiences into the classroom.

The downtown campus is within walking distance to stores, shops, and restaurants. ‘Iolani Palace, the only palace in the United States, is a few blocks away, as are the State Capitol, City Hall, other government buildings, and the Blaisdell Concert Hall and Arena. The Honolulu Museum of Art, Bishop Museum (the State Natural and Cultural History Museum), the Mission Houses Museum, Waikiki Aquarium, Honolulu Zoo, Waikiki Shell, and many other cultural and recreational areas are easily accessible to students.

Hawai‘i Loa Campus
The Hawai‘i Loa campus is located in Kāne‘ohe and is nestled at the base of the beautiful Ko‘olau Mountains. The campus is the site of the College of Health and Society and the College of Natural and Computational Sciences. It has the latest equipment to study biology, nursing, marine and environmental science, pre-med and other sciences.

It is an easy eight-mile ride between the Hawai‘i Loa and downtown campuses on the free HPU shuttle. Various shopping malls, restaurants, beaches, and historic and scenic sites also are within reasonable distance and accessible by Honolulu’s public transportation system.

The Oceanic Institute
The institute is known for the development of technology designed to increase aquatic food production, restore marine fisheries, and protect ocean resources. Opened in 2013 is an Ocean Learning Center — with technology and resources to educate and expand a high-tech workforce — along with aquatic feeds research, microbiology and chemical analytical facilities.

The Oceanic Institute of Hawai‘i Pacific University is located at the scenic Makapu‘u Point. It is an internationally renowned applied research facility, with a growing reputation for its work in aquaculture, especially shrimp husbandry and finfish breeding.

With its successes in aquaculture and food security, the institute is the ideal place for
education, research and hands-on opportunities in the marine, environmental and life sciences, and additional multi-disciplinary areas of the university. Students can take advantage of unparalleled access to natural habitats as well as extensive research and educational facilities.

**HISTORY**

Recognizing the need for an independent, nonsectarian liberal arts college in Honolulu, four prominent and public-spirited citizens—Eureka Forbes, Paul C. T. Loo, Elizabeth W. Kellerman, and The Reverend Edmond Walker—applied for a charter of incorporation for a not-for-profit corporation to be called Hawai‘i Pacific College. The state of Hawai‘i granted a charter of incorporation to Hawai‘i Pacific on September 17, 1965.

In September of 1966, Honolulu Christian College merged into Hawai‘i Pacific College, and a new charter was granted by the state of Hawai‘i.

In 1967, Dr. James L. Meader became Hawai‘i Pacific College’s first president. President Meader, in consultation with community leaders, developed a comprehensive educational program to meet various higher educational needs for the state of Hawai‘i.

When Dr. Meader retired on June 30, 1968, the Board of Trustees elected The Reverend George A. Warmer as Hawai‘i Pacific’s second president. Under President Warmer’s leadership, the college implemented academic programs in the liberal arts and cooperative education.

In 1972, Hawai‘i Pacific College graduated seven students in its first commencement class and in the same year established a School of Business Administration. Chatt G. Wright became the founding dean of Hawai‘i Pacific’s new School of Business Administration.

In 1973, the college received full accreditation from the Western Association of Schools and Colleges. The following years saw the creation of the Division of Special Programs, which later became the College of Extended and Interdisciplinary Education, home of Military Campus Programs, administering off-campus instruction at the various military installations on O‘ahu.

In 1976, Hawai‘i Pacific introduced the Associate of Science degree in management program at Schofield Barracks. HPU has since expanded to offering several associate, baccalaureate, and master degrees on O‘ahu’s military bases. A vibrant online program extends worldwide.

President Warmer retired in 1976, and Chatt G. Wright became Hawai‘i Pacific’s third President. Under President Wright’s leadership, Hawai‘i Pacific saw rapid and continuous expansion. Augmenting its thriving undergraduate program of baccalaureate and associate degrees, Hawai‘i Pacific successfully launched its first graduate program, a Master of Business Administration (MBA) in 1986. Now, there are more than a dozen graduate programs in a wide variety of disciplines.

Hawai‘i Pacific continued to expand and develop throughout the 1980s, and in 1990 became Hawai‘i Pacific University.

In 1992, Hawai‘i Loa College, a small, independent, liberal arts college located on the windward side of O‘ahu, merged into Hawai‘i Pacific University. This historic merger has brought together the strength of two academically strong institutions, and has helped to expand Hawai‘i Pacific University’s role as a leader in higher education for the state of Hawai‘i.
Hawai‘i and the Pacific Basin.

On July 1, 2003, The Oceanic Institute, a scientific research organization located on O‘ahu that is dedicated to the development of aquaculture, food security and fish breeding technologies, became affiliated with Hawai‘i Pacific University. This successful affiliation — marked with enhanced learning and research opportunities in the natural sciences for HPU faculty and students — led to a merger on January 1, 2014. The Oceanic Institute of Hawai‘i Pacific University provides valuable links to outstanding programs in marine biology, environmental sciences and oceanography, at a facility with a growing reputation internationally.

President Wright retired in 2011, and Dr. Geoffrey Bannister became Hawai‘i Pacific University’s fourth president. Dr. Bannister is a strong advocate for international and study abroad education and his extensive experience in these areas complements Hawai‘i Pacific University’s global mission.

ACCREDITATION

Hawai‘i Pacific University is accredited by the Accrediting Commission for Senior Colleges of the Western Association of Schools and Colleges (WASC).

The School of Nursing Programs (BSN and MSN) are approved by the Hawai‘i State Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE).

The Social Work programs are accredited by the Council on Social Work Education (CSWE).

The School of Education has received state approval status from the Hawai‘i Teacher Standards Board (HTSB) and the Council for the Accreditation of Educator Preparation (CAEP).

VISITORS

Anyone interested in touring HPU campuses may schedule an appointment either online at www.hpu.edu/campustours or by calling the Office of Admission at (808) 544-0238 or 1-866-CALL HPU (1-866-225-5478).

Please give two weeks’ notice of your arrival, if possible. Administrative offices are open Monday through Friday, 8 a.m. to 5 p.m.

HPU ON THE INTERNET

HPU’s website, www.hpu.edu, provides overviews on academic programs, course descriptions, the academic calendar, admission, planned visits to various cities and countries by HPU’s admission staff and student services, and other information of interest to prospective and current HPU students. The university’s Intranet, HPU Pipeline, is an information and communication web portal available exclusively to HPU students, faculty and staff. It provides easy access to campus email, learning management system, and other internal HPU services. Important announcements, college news and events, as well as university policy and procedures, are posted to HPU Pipeline. For technical assistance with HPU Pipeline, please call the Service Desk at (808) 566-2411 or email helpdesk@hpu.edu.
DISTANCE EDUCATION

Hawai‘i Pacific University’s distance education programs provide individuals from around the globe the opportunity to take HPU courses leading to a degree or certificate. These programs replicate existing on-campus programs but are delivered via the Internet.

Successful distance learners tend to be goal-oriented, good readers and writers, able to work independently, prioritize their workload, and are comfortable with technology.

Most distance education courses are highly interactive and, while time requirements for individual courses may vary considerably, a typical distance education course will require at least the same amount of time as a traditional classroom course. Students are expected to complete all course requirements within the established period that the course is offered.

Most distance education courses can be completed entirely online; in which case, students will not be required to come to campus. Some distance education courses may require that students report to an approved testing site periodically to take an examination or for other requirements.

Students interested in taking online courses or pursuing a degree online should consult with an academic advisor for assistance. International students living in the United States, traveling on an F-1 VISA, have limitations on how many online courses can be taken in a given semester.

STUDENT BODY

Combined student enrollment for all Hawai‘i Pacific campuses in Fall 2014 was nearly 7,000 full- and part-time students. The diverse student body is composed of students from every state in the U.S. as well as nearly 80 countries from around the world. Enrollment in the graduate programs exceeded 1,100 in Fall 2014.

FACULTY AND STAFF

Some 1,100 men and women make up the faculty and administrative staff of Hawai‘i Pacific University—individuals who share the university’s mission as an institution of higher learning and its credo of personal and individualized attention and service to both students and the community. Staff and faculty are seen as a team of professionals working together to actualize the institution’s mission and goals, as well as educational and career objectives of students, faculty, and staff. Administrative staff and faculty members jointly serve on key committees and task forces of the university. Administrators and faculty have credentials from major universities in the United States and around the world, including Harvard, Yale, Princeton, Stanford, Michigan, Berkeley, Columbia, Pennsylvania, the Sorbonne, and Cambridge.

Augmenting the career faculty are leading practitioners in the arts, government, the not-for-profit sector, business, technology, accounting, and law, who provide students with a contemporary and pragmatic orientation to their respective fields. Although a great majority of faculty have international reputations as scholars, all are primarily classroom instructors, because teaching and learning constitute the principal responsibilities of HPU.
ADMISSION,
FINANCIAL AID,
AND TUITION
ADMISSION: GENERAL

Admission to Hawai‘i Pacific University and to any of its degree programs is based primarily upon a combination of academic ability and motivation. All applicants are reviewed without regard to sex, race, age, color, disability, religion, sexual orientation, national or ethnic origin. A student’s previous academic records, grade point average (GPA), extra-curricular involvement, and work experience are all used to determine eligibility for enrollment.

FIRST-TIME FRESHMEN: U.S. CITIZENS AND PERMANENT RESIDENTS (For most majors)

GPA

Students are preferred to have a 3.0 GPA or above in high school college preparatory courses. The greatest weight is given to courses taken in the junior and senior years. Students with a GPA lower than a 3.0 may be considered for admission but will be requested to interview with an Admission Counselor, provide first semester senior year transcripts, and a personal statement describing their educational and personal objectives. HPU encourages students to take Advanced Placement (AP), International Baccalaureate (IB), or other honors courses.

TEST SCORES

Students should have results from the Scholastic Aptitude Test (SAT) or American College Testing (ACT) sent to the Office of Admission if the results are not on their high school transcripts. While strong scores enhance a student’s chances of admission, low scores alone do not prevent acceptance.

LETTERS OF RECOMMENDATION

Letters of recommendation are required of all students.

TRANSCRIPTS

“Unofficial” transcripts may be submitted with the application for admission purposes. However, upon enrollment all “official transcripts must be received. Official transcripts must be sent to the HPU Office of Admissions directly from the school registrar or institution’s records office. Official documents should not be faxed or photocopied, and must contain an original signature, stamp or seal.

All international transcripts must be accompanied by an official English translation.

ESSAY

Students are required to submit an essay with their application stating personal and educational objectives.

RECOMMENDED HIGH SCHOOL COURSES

In preparation for undertaking academic studies at the University, it is recommended that applicants have completed at a minimum the following courses:

4 years English
4 years History or Social Science
3 years Mathematics
2 years Science
2 years Modern or Foreign Language

ADMISSION REQUIREMENTS FOR HOME- SCHOoled APPLICANTS

• Completion of the HPU application form.
• Submission of SAT or ACT exam results (SAT II subject exams recommended).
• Submission of transcript/record of grades and statement describing home school structure and mission.
• A writing sample in addition to the personal statement on the application for admission.
• Two letters of recommendation (other than parent or relative).
• An interview with a member of the admission committee.
ADVANCED PLACEMENT OF FRESHMEN STUDENTS
Students who have taken the Advanced Placement Examinations of the College Board (AP) or the International Baccalaureate Program (IB) should have the official results forwarded to the Office of Admission. These results will be evaluated for proper advanced standing and/or college credit.

FIRST-TIME FRESHMEN: INTERNATIONAL STUDENTS
Students are required to submit “unofficial” transcripts with the application for admission purposes. However, upon enrollment all “official” transcripts from their high school or international equivalent (HKCEE, SPM, SMA, GCE “O” and/or “A” level results) must be received. These results will be reviewed along with other relevant academic and work experience information provided by the student.

ENGLISH PLACEMENT EXAMS
The University requires international students to submit English placement results in order to be accepted. For more information, please visit www.hpu.edu/englishtest.

TRANSFER STUDENTS

24 or more transferable credits
Students seeking to transfer to HPU with 24 or more transferable credits are preferred to have a 2.75 GPA or higher.

23 or less transferable credits
Students seeking to transfer to HPU with fewer than 24 transferable credit must also submit their official high school transcripts, GED or their international equivalent (HKCEE, GCE, “O” levels, etc.) for review. A combination of both secondary and post-secondary transcripts will be reviewed, with greatest weight given to post-secondary transcripts. A student should have a 2.75 or above at the post-secondary level and a 3.0 or above at the secondary level.

Applicants transferring from U.S. schools must submit official transcripts from each regionally accredited college or university attended in order to be considered for transfer credit. Applicants transferring from schools located outside of the U.S. must also submit official, English-translated transcript(s) and course descriptions.

For applicants who have been out of school for several years, Hawai‘i Pacific University makes a comprehensive assessment by examining not only their prior academic performance but other factors as well. Work experience and a student’s motivation to succeed are taken into consideration along with letters of recommendation.

All transfer students must complete at least 30 credit hours at Hawai‘i Pacific University immediately preceding their graduation from the University (exception: SOC students).

Transfer students must complete at least 12 credit of major course work in residence in order to attain a major in a baccalaureate program, and 6 credit hours in the degree concentration for associate degrees.

Academic Foundation Program (AFP)
International students that meet the academic criteria to attend HPU, but do not have the English proficiency necessary to take regular HPU courses will be admitted to AFP. In order to matriculate into full-time regular courses, these students would need to successfully complete AFP.

AFP 1 English Requirements:
TOEFL ibt 47-60 or IELTS 5.0AFP 1 consists of one semester of full time intensive English courses. No credits will be earned. Upon completion of AFP 1 students can transition into AFP 2.
AFP 2 English Requirements:
TOEFL ibt 61-79 or IELTS 5.5AFP 2 consists of one semester of 3 intensive English courses and one designated HPU course. Upon successful completion of AFP 2, the student will earn 12 General Education credits and be able to matriculate to HPU’s full-time program.

PLACEMENT TESTS

Certain classes at the University require assessment prior to enrollment so that the student may be placed in the appropriate level of course work. The most common example of this would be in writing, math, and modern language courses. For placement into writing and math courses, SAT, ACT, TOEFL, IELTS, CAE, CPE exams, PTE Academic, and/or prior university coursework are among the items considered for exemption from HPU placement exams and for direct placement into courses. If a student does not achieve qualifying scores on the above exams, he or she will sit for HPU’s placement exams during the registration period. Those students who have had previous modern language course work experience may choose to take placement exams prior to taking modern language courses at HPU. Modern language placement exams may be arranged by contacting an academic advisor in the appropriate Academic Advising Center.

BACKGROUND CHECKS

All students should be advised that Hawai‘i Pacific University offers courses of study in many different fields, some of which prepare students for professional careers that require licenses from the various states where our graduates might find employment. Many of these states condition the granting of licenses based on criminal background checks to determine whether the applicant has felony criminal convictions. Also, some of the courses offered at Hawai‘i Pacific University require that criminal background checks be conducted prior to placement in field-based activities or acceptance of students into the clinical type courses which are conducted off-campus in community agencies. As students decide to enter various degree programs here, they should carefully read the specific program handbook and confirm the requirements for post-graduate employment.

ADMISSION TO MARINE SCIENCE AND ENVIRONMENTAL SCIENCE MAJORS

ADMISSION OF FRESHMEN

Freshmen admitted with “regular status” to these scientifically rigorous majors must have a secondary school record that clearly demonstrates both ability and motivation. In addition to satisfying all regular Hawai‘i Pacific University requirements, students must also have completed three years of high school science courses including biology and chemistry (physics is recommended) and mathematics through trigonometry (calculus is recommended), with a cumulative GPA of 3.0 or better in these courses. Exceptionally high scores on either the SAT or ACT examinations may allow students to be admitted with “regular status” even though they do not meet the above criteria.

Students not accepted into the marine biology or environmental science majors may have an opportunity to enroll in these majors at the end of the freshman year, after demonstrating the ability to successfully complete college-level science and mathematics courses. Students should work directly with their academic advisor.

ADMISSION TO NURSING

ADMISSION OF TRANSFER STUDENTS

Any transfer student seeking admission into the nursing program, who was previously pursuing a nursing degree at another college/university must submit a letter of good standing from the dean of that college or university program prior to receiving an evaluation for possible transfer nursing credit by Hawai‘i Pacific University. The letter of good standing must be an original letter, printed on the school’s letterhead, and include the dean’s or school official’s name, signature and legible contact information sent directly to the Office of Admission.

Transfer Students who have completed their prerequisite course work at an accredited
university or college other than HPU must apply to both the university and the BSN program for admission. Only those applicants who are deemed admissible to the university will be considered for admission into the BSN program. See www.hpu.edu/nursing for more information.

**EARLY ENTRY**

High school juniors and seniors with above average academic records, who have exhausted the appropriate academic course-work at their high schools, and who can demonstrate that they would benefit from a university environment, may apply for early entry into the University. An assessment and recommendation from a high school counselor is required.

**SPECIAL STATUS (NON-DEGREE SEEKING STUDENTS)**

Students who wish to take undergraduate credit courses at Hawai‘i Pacific University, who are not seeking a degree or participation in the cooperative education or federal financial aid programs, may apply directly with the Admission Office. Non-native speakers of English may be asked to demonstrate their English proficiency. Credit taken in this category is limited to 15 credit hours. These credits may be applied to a degree program should a special status student apply for admission as a degree-seeking student.

**ADMISSION TO COLLEGE OF EXTENDED AND INTERDISCIPLINARY EDUCATION**

See College of Extended and Interdisciplinary Education section, pages 59-60.

**VISITING STUDENTS PROGRAM AT HAWAI‘I PACIFIC UNIVERSITY**

A visiting student is defined as a student currently attending another university who wants to attend HPU for a predetermined period of time and take university level classes that have been pre-approved by the student’s home institution for a maximum of two. To establish status as a visiting student, one must apply directly to the “Visiting Student Program at Hawai‘i Pacific University” using the appropriate application form and be accepted directly to the program. In addition the student must submit an official transcript and course descriptions translated into English of all courses taken at the home university. Visiting students will be allowed to register for classes that have been approved by both their home university and by Hawai‘i Pacific University. (For upper-level subjects, HPU will require that the student has successfully undertaken previous study in that discipline).

If a visiting student later decides to become a degree-seeking student at HPU, he or she will be required to submit a degree seeking application and abide by the University’s catalog requirements for the student’s major. In this case, a transcript evaluation will be completed to determine the amount of transfer credits awarded.

**HEALTH REQUIREMENTS**

In order to register for courses at HPU, students must submit proof of health clearance.

**Tuberculosis Health Clearance**

The State of Hawai‘i requires written evidence of health clearance from tuberculosis (TB). A certificate of TB examination is required before attendance in any course of study longer than six months. The tuberculosis skin test must be given within 12 months prior to first attending Hawai‘i Pacific University. This clearance may be obtained free of charge at several state testing clinics on O‘ahu. Students residing off-island and taking online courses only are exempt from this requirement. Please contact the Admission Office at (808) 544-0238 for more information.

**Measles, Mumps and Rubella Health Clearance**

The State of Hawai‘i requires written evidence of health clearance from measles, mumps and rubella (MMR) prior to enrolling in classes at Hawai‘i Pacific University. Two doses of measles-containing vaccine are required, with at least one of the two being the measles,
mumps and rubella (MMR) vaccine. Student born prior to 1957 are exempt from this clearance requirement. Also, students are exempt if they submit written documentation from their physician confirming diagnosis of the disease

Health Insurance

We strongly urge all HPU students to have medical insurance. If you are a student from the U.S. mainland or an international student, contact your insurance carrier regarding the scope of coverage in Hawai‘i. For more information go to www.hpu.edu/healthcare.

All full-time international students are REQUIRED to have health insurance and must meet the following minimum coverage requirements:

- Valid coverage dates for the entire term
- Coverage for outpatient care, hospitalization, emergency room, accidents, medical and surgery in Hawai‘i
- Medical benefits of at least $100,000 per accident or illness
- A deductible not to exceed $500 per accident or illness
- At least 75% coverage for each accident or illness
  - Repatriation of remains in the amount of $25,000
- Expenses associated with the medical evacuation of the exchange visitor to his or her home country in the amount of $50,000
- Plans includes behavioral health coverage

If students have coverage, they need to submit the international student health insurance waiver. Once the waiver is processed the medical insurance verification fee will be cleared from the student account. For details go to www.hpu.edu/healthcare.

APPLICATION FORM

Undergraduate applicants apply using the Common Application available at www.commonapp.org or via HPU’s Admission Application at www.hpu.edu/apply. The application fee is due at the time of application for admission.

All students, should submit their application and supporting documents to:

Hawai‘i Pacific University Admission Office
One Aloha Tower Drive,
Honolulu, HI 96813-9887
TEL (808) 544-0238
FAX (808) 544-1136
Email: admissions@hpu.edu
Web: www.hpu.edu

FINANCIAL AID: GENERAL

The financial aid program at Hawai‘i Pacific University is designed to help students supplement their financial resources and those of their parents or spouses in financing their education. Since the responsibility for education lies first and foremost with the student and the student’s family, each is expected to contribute financially toward the educational expenses of the student according to ability. Such factors as income, assets, number of dependents, etc., are taken into consideration. The University recognizes that a family may not be able to meet all of the student’s educational expenses and has a strong commitment to awarding financial aid.

HAWAII PACIFIC UNIVERSITY FINANCIAL AID HANDBOOK
Visit www.hpu.edu/financialaid for details about financial aid. Information such as the student’s rights and responsibilities, how the selection, notification, and disbursement of funds process work, terms and conditions of awards, the federal refund policy and so forth are found on the website.
FINANCIAL AID OFFICE
The Financial Aid Office located at the downtown campus, is open Monday-Friday (except holidays), 8:00 a.m. to 5:00 p.m., and may be reached by calling (808) 544-0253, or toll-free (U.S. and Canada) 1-866-CALL-HPU (225-5478) or emailing financialaid@hpu.edu.

APPLICATION PROCEDURES
To be considered for federally funded financial aid at Hawai‘i Pacific University, an applicant must:

1. be a U.S. citizen or eligible noncitizen;
2. have a high school diploma, GED, or equivalent certification, or two years of credits toward a baccalaureate degree;
3. be enrolled as a regular student in a degree-seeking program; financial aid is not available for certificate programs;
4. have filed a Free Application for Federal Student Aid (FAFSA);
5. have submitted all verification documents required by the Financial Aid Office;
6. be making satisfactory academic progress toward a degree (continuing students);
7. not be in default on a loan or owe a refund on a federal grant;
8. have a demonstrated financial need or otherwise be eligible for an unsubsidized loan program;
9. be registered with Selective Service, if required;
10. comply with federal Anti-Drug Abuse Certification requirements and agree to use student aid only for education-related expenses.

The FAFSA is available online at www.fafsa.gov. A paper FAFSA can be obtained by calling 1-800-433-3243. Financial aid is not automatically renewable from one year to the next, so a FAFSA or Renewal FAFSA must be submitted each year after January 1. Submission of the FAFSA serves as the one-time annual application for all federal financial aid programs; subsequent corrections may be required.

The process of applying for financial aid takes about six to eight weeks to complete. Students with a processed FAFSA by March 1 will be given first consideration for all forms of financial aid. The University will make offers of financial aid beginning in mid-March to all applicants who have been accepted for admission and for whom the University has received processed information from the federal government’s central processor.

FORMS OF FINANCIAL AID
Grants and scholarships are direct gifts that do not normally require repayment. Federal grants are available to students who have demonstrated exceptional financial need through the processed FAFSA, which undergoes need analysis computation by the federal government.

Loans are borrowed money which must be repaid with interest. Most loan programs allow students the opportunity to defer repayment for their education until they have graduated from the University. Student loans generally have low interest rates and allow for long term repayment. Most loans administered by the University are sponsored by the federal government.

Federal College Work-Study (FWS) is awarded to students who have demonstrated need through the FAFSA analysis. Students work part time in various University departments, or in community service jobs off campus, up to the limit of their established need and are paid bi-weekly.

Please note: Guidelines and provisions for financial aid are based on federal legislation. As such, programs may change as legislation is changed (e.g., introduction of a new loan program, new loan limits, application changes, etc., necessitated by the Reauthorization of the Higher Education Act). For the latest information concerning financial aid, contact the University’s Financial Aid Office.
FEDERAL FINANCIAL AID

The majority of funds awarded by Hawai‘i Pacific University come from the federal government and are awarded primarily on the basis of demonstrated financial need (and, in some cases, when no need has been determined by the federal government). The federal programs include:

Federal Pell Grant
A need-based award available to students who do not have a prior bachelor’s degree. The actual amount of the grant award is determined by the Expected Family Contribution (EFC), which is calculated on the basis of federal methodology (includes analysis of income, assets, family size, number in college, etc.). For the 2015-2016 academic year, the Pell Grant award may range from $400 to $5,775 depending on the EFC calculated and enrollment status.

Federal Supplemental Educational Opportunity Grant (FSEOG)
A supplemental need-based award available to students who are eligible for a Pell Grant and do not have a bachelor’s degree. Award maximum is $2,000 per school year based on the availability of funds.

Federal Perkins Loan
A low-interest loan for which an undergraduate student at HPU may borrow at a current maximum level of $2,000 per academic year, up to an aggregate total of $20,000. Interest is at five percent. Repayment of the loan begins nine months after the borrower graduates or ceases to be at least a half-time student. Note: The federal statutory provisions for the Perkins Loan ended on September 30, 2014. Under very limited circumstances, students who have already received a Perkins Loan may receive funds for a limited time unless congressional action is taken, no new Perkins Loans can be made after September 30, 2015. Contact the Financial Aid Office for specific information.

Nursing Student Loan (NSL)
Available to nursing students who demonstrate financial need. Maximum awards of $4,000 per year, or up to the student’s remaining need, are made to nursing students enrolled in the final two years of their bachelor’s program. Interest is five percent, and repayment begins nine months after the borrower graduates or leaves school.

Federal College Work-Study (FWS)
Available to students enrolled in an undergraduate program of study. Students may be offered work-study up to 19 hours per week depending upon financial need and the availability of funds. Awards range between $1,500 to $3,000 per year.

WILLIAM D. FORD DIRECT LOAN PROGRAM

Federal Direct Subsidized Stafford Loan
Need-based, fixed interest loan made through the Department of the Treasury to undergraduate and graduate students. Generally, repayment begins six months after the borrower graduates or ceases to be at least a half-time student. Interest rate is capped at 8.25 percent. The federal government pays (subsidizes) the interest on the loan while the student is attending school. First year dependent students may borrow up to $3,500; second year students up to $4,500; undergraduate students who have completed two years up to $5,500. Aggregate loan limit is $23,000 for undergraduate students.

Federal Direct Unsubsidized Stafford Loan
This is a non-need based loan. With the introduction of the Unsubsidized Stafford Loan, all students, regardless of income, are able to obtain a student loan. Interest payments begin on the day the loan is disbursed; however, students may allow interest to accrue during in-school and other deferment periods. If accrued, interest will be capitalized by the lender and added to the loan principal. Repayment of loan principal begins six months after the student graduate or ceases to be enrolled at least half time.

Eligible independent students (24 years of age, married, etc.) may also borrow $6,000 for the first two years of undergraduate study. Independent students who have completed two years
of undergraduate study may borrow up to $7,000. Graduate students may borrow up to $20,500 per year. Aggregate loan limit for undergraduate students is $57,500. Graduate and professional students may borrow a combined amount of $138,500 (including loans borrowed at the undergraduate level).

**Federal Parent’s Loan for Undergraduate Students (PLUS)**
This is a low, fixed interest, non-need based loan available to natural or adoptive parents of dependent students. Eligible parents may borrow the cost of education (total of tuition, books, room and board, personal expenses, transportation, etc.) minus any other aid awarded (refer to student’s award letter). The interest rate is capped at 10.50 percent. Parents must have an acceptable credit history to be eligible for the PLUS loan. Repayment usually begins 60 days after the loan is fully disbursed.

**TUITION MANAGEMENT SERVICES**
Hawai‘i Pacific University offers an interest-free monthly payment option through Tuition Management Services (TMS). For more information or to set up a payment plan, contact TMS by phone (1-888-713-7234) or on-line at www.afford.com/hpu.

**LEAVE OF ABSENCE**
A student maintains “continuous enrollment” by being enrolled in courses at the University throughout each fall and spring term following admission. Students who plan to interrupt their continuous enrollment should apply for a leave of absence.

Students contemplating a leave of absence who have previously been awarded a loan under the Direct Loan Program (Stafford/PLUS Loan) are required to contact the Financial Aid Office and their lender prior to commencing a leave of absence to ascertain their repayment status. Students wishing to request a leave of absence should see an academic advisor who will assist them in requesting the leave. While the University may allow a longer Leave of Absence, for Title IV purposes, a Leave of Absence cannot be longer than 180 days. After 180 days, a student will be reported as withdrawn for Title IV purposes.

**HAWAII PACIFIC UNIVERSITY SCHOLARSHIP PROGRAMS**
Hawai‘i Pacific University scholarships are awarded on the basis of merit. Applicant information may be obtained by contacting the Office of Scholarships at 1164 Bishop Street, Honolulu, HI 96813, or visit the HPU Web site at www.hpu.edu/Scholarships. The HPU website also allows students to conduct their own private scholarship search. Contact the University’s Athletic Office, 1060 Bishop Street, Penthouse, Honolulu, HI 96813, for information concerning potential opportunities to participate on an HPU athletic team and eligibility requirements to earn athletic scholarships.

**TAX BENEFITS FOR EDUCATION**

**American Opportunity Tax Credit (Current as of publication date)**
The American Opportunity Tax Credit is a tax credit available for the first four years of college or postsecondary education. If eligible, up to $2,500 can be subtracted from the total tax on the filer’s tax return. It is offered to parents or students who pay college tuition for attendance at least half time. In order for a parent to claim the credit, the student must be his or her dependent, must be under age 24, and must be enrolled at least half-time in a degree program.

**Lifetime Learning Tax Credit**
Taxpayers enrolled in post-secondary education may be eligible to receive a 20 percent tax credit on the first $10,000 of tuition and required fees paid each year. The maximum deduction is $2,000.

**Tuition and Fees Deduction**
Students may be able to deduct qualified education expenses paid for higher education. The maximum deduction is $4,000. The deduction is available even if the taxpayer does not itemize deductions on Schedule A.
Tax Benefits for Interest Paid on Student Loans
The interest paid on a qualified education loan may be deductible from taxpayer income. The maximum allowance is $2,500 per year. Both students and parents are eligible. This will not be a credit to reduce tax, but a “deduction” from gross income. The deduction is available even if the taxpayer does not itemize deductions on Schedule A.

For more information on Tax Guidelines contact:
• Your tax advisor
• The IRS hotline: (800) 829-1040 or website: www.irs.gov
• HPU website: www.hpu.edu

TUITION
Like most independent universities, Hawai‘i Pacific receives minimal support from public funds. Tuition and fees must cover the majority of what it costs the University to provide its services, with the balance of expenses being met by income from gifts and grants. Because prompt payment of student bills is crucial for University operations, tuition and fees are due two weeks prior to the start date of the session.

The tuition and fee schedules can be found at the HPU website: www.hpu.edu/Business_Office/
ADMISSION OFFICE

The Office of Admission assists undergraduate students interested in applying to the University. The admission staff is available to answer questions about HPU, explain requirements for entrance to the University, and evaluate transfer credits from other accredited institutions of higher learning. Tours of HPU’s campuses are available and may be coordinated through this office. For more specific information about admissions requirements, see the Admission section.

For those interested in a graduate degree and the admission requirements, please refer to the Graduate Studies section of this catalog or visit the website: www.hpu.edu/grad.

BUSINESS OFFICE

The Business Office is responsible for providing HPU students with an efficient method of conducting business with the University. Payment options include transactions via an online portal (HPU Pipeline) or in person at the Business Office. Our capable, friendly staff is available to assist students with the following inquiries/services:

- Tuition and Fee Assessments
- Billing/e-Bills
- Tuition and Fee Payments
- Balances Due
- Payment Options
- Payment Due Dates
- Financial Aid Refunds
- Processing 1098-Ts
- Federal Perkins Loan Program
- Federal Nursing Loan Program
- Non-Financial Aid Refund Requests
- Removing Account Balance Holds/ Super Holds

More information is located on the HPU Business Office website: www.hpu.edu/Business_Office/.

Students may contact the Business Office by calling (808) 356-5272 or by emailing businessoffice@hpu.edu.

Our office hours are 7:30 am until 5:00 pm (HST) Monday through Friday, excluding observed University holidays. We are located in the Upper Bishop Building (UB), 1164 Bishop Street, Suite 1200, on the Downtown Campus.

FINANCIAL AID OFFICE

The University participates in various federally-funded, need-based, financial aid programs, including grants, low-interest loans, and work opportunities. The University also administers merit-based scholarship programs for new and continuing students. For further information, see the Financial Aid section.

MILITARY/VETERANS CENTER

U.S. military veterans, active duty, members of the Selected Reserve, National Guard, and some family members may be eligible to receive education benefit through the Department of Veterans Affairs (VA). The HPU Military/Veteran Service Center is available to assist students with VA benefit information, paperwork, and enrollment certification.
MILITARY CAMPUS PROGRAMS SERVICES

College of Extended and Interdisciplinary Education (CXE), home of Military Campus Programs, CXE maintains a full-time student services staff, and offers courses and programs on all major O'ahu military installations and operates the Military/Veteran Center on the downtown campus. Staff are also available by telephone and email to support the student services needs of those taking courses through CXE’s distance learning programs and are located away from the island of O'ahu. Further information is available in the College of Extended and Interdisciplinary Education section of the catalog and on the HPU website at www.hpu.edu/cxe

VETERAN’S BENEFITS:

Students planning to enroll under any VA education (GI Bill) program must first apply for benefits at www.gibill.va.gov. Disabled veterans seeking enrollment under the VA’s Vocational Rehabilitation and Employment (VR&E) program should contact their local VA Regional Office for more information.

Once eligibility is confirmed by the VA, students will receive a Certificate of Eligibility (COE) and the student is now ready to register for courses. Students may register for courses at any Hawai’i Pacific University registration center. Students must notify their advisor at the time of registration that they intend to use their VA education benefits. Students must also contact the Military/Veterans Service Center for guidance on the processing of their course certifications. Staying in contact with the Military/Veterans Service Center will facilitate the course certification process for the student, the school, and the VA. Late and adjusted certifications will result in a delay of all benefit payments so it is incumbent upon the student to ensure accurate processing of program certifications.

Students using Montgomery GI Bill benefits (Chapter 33, 30, 1606, or 1607) must also verify their enrollment each month to receive payment for that month at: www.gibill.va.gov.

All recipients of veterans benefits must meet satisfactory progress standards in order to continue receiving benefits. These requirements vary with course load, length of the academic term, and the degree program of study. Federal law prohibits the certification of courses that do not meet specific degree program requirements. Degree-seeking students must declare an appropriate program of study and are eligible to receive VA education benefits. Non-degree-seeking students (Special Status) are generally ineligible for VA education benefits. However, degree-seeking students from other appropriately accredited and approved institutions may take courses with Hawai’i Pacific University for transfer to their home institution provided the HPU Military/Veterans Service Center has documentation verifying the course will meet the student’s degree requirements.

Students are required to immediately notify the HPU VA Coordinator of any changes to registration, tuition, or fees, for certification adjustments. Likewise, if a student fails to complete a certified course, either by drop or non-attendance, the student is required to immediately notify the HPU VA Coordinator. Students are responsible for any debts owed to the VA or the University resulting from schedule changes, drops or withdrawals, non-attendance, failure to maintain academic progress, or less-than-anticipated eligibility or ineligibility of veteran benefits regardless of original method of payment.

Questions regarding eligibility, payments, or benefits should be directed to the VA at www.gibill.va.gov, or 1-888-GI-Bill-1. To contact the HPU VA Certifying Official, please contact va@hpu.edu or (808) 356-5222.
COMMUTER SERVICES

Commuter Services provides programs to assist students who live off-campus. The staff helps students to find housing and address housing concerns; connects students to university and community resources; and connects those living off-campus with the University.

OFF-CAMPUS HOUSING

The island of O‘ahu offers many different living arrangements—from the fast-paced city lifestyle of Honolulu (close to the downtown campus) to the quiet beach town of Kailua (near the Hawai‘i Loa campus). Commuter Services provides students with the information and resources needed to locate their own off-campus accommodations.

Although the University does not endorse or sponsor any particular apartments or landlords, Commuter Services maintains current listings of available apartments, houses and private rooms for students to lease. Current postings are available on HPU Pipeline eAds. Inquiries may be made to Commuter Services via telephone by calling, (808)-544-0277, by fax at (808)-544-0268, or by email at: icommute@hpu.edu.

ROTC

Interested and qualified HPU students may participate in the Military Science and Air Science (Army and Air Force ROTC) programs located nearby at the University of Hawai‘i at Manoa campus. These programs are traditionally four-year programs consisting of a Basic Course and an Advanced Course. However, a two-year program course of study for students at four-year colleges who did not take ROTC during their first two years is also offered. Students register for these courses at Hawai‘i Pacific University and attend the training and lecture sessions at the University of Hawai‘i at Manoa campus. For more information, students should contact the HPU Military/Veteran Center or the Air Force or Army program representatives at (808) 956-7734 (Air Force ROTC) or (808) 956-7744 (Army ROTC).

ACADEMIC ADVISING

Academic Advisors help students set and achieve their academic and personal goals. These goals are realized through our cohort advising model, which enables students to develop a collaborative working relationship with a professional advisor. Through mentorship, students are able to define and implement sound educational plans that are consistent with their personal values, goals, and career plans.

The staff is available to assist students with the following:

- Make a smooth transition from high school, other institutions, or professional experiences
- Registration needs
- Assistance regarding academic progress—Declare or change a major, minor, and/or concentration
- Create an academic plan and track progress toward graduation
- Understand degree and university requirements
- Counsel students who are struggling academically and make appropriate referrals.

For questions about advisor locations and availability, please contact the Academic Advising Office located on the downtown campus [phone: (808) 544-1198; email: advising@hpu.edu; office: 1164 Bishop Street, Suite 123 (UB Building)]. Most students are assigned advisors based on their intended major. Students who have not selected a major will work with an advisor who will guide them through selecting an appropriate degree program. While drop-in services are available on a first-come, first-served basis on selected
days, students are encouraged to call or go online for an appointment.

**CAREER SERVICES CENTER**

The Career Services Center (CSC) provides a wide array of career related services to meet the needs of all students and alumni. The professional career counseling team helps students with major choices, career exploration, and professional development so that upon graduation, they can easily transition from student to working professional. In order to gain full advantage of the services, students are encouraged to visit the Career Services Center early and not wait until they are ready to graduate. According to most employers, the one area most applicants lack is experience. HPU’s internships and Cooperative Education programs offer valuable work experience opportunities and provide access into the field or industry in which students are majoring. Services are provided free of charge to HPU’s student body and alumni from the Downtown, Hawai‘i Loa, Oceanic Institute, and Military Campuses. Arrangements can also be made to provide services for those in HPU’s distance learning programs.

**Services Provided:**

- Career counseling
- Interest and personality assessments
- Cooperative education and internship programs
- Job search assistance
- Résumé writing assistance
- Job listings
- Mock interview

**Employment for International Students**

International students are allowed and encouraged to participate in work experience for academic credit. During their first year at Hawai‘i Pacific University, international students must strive to develop proficient English verbal and written skills, and are encouraged to learn about American social and business customs. International students have several specific eligibility requirements to qualify for participation in work off-campus. The career counselors work together with designated school officials authorized by immigration to ensure that international students find appropriate co-ops and internships and meet all legal requirements for work as defined by the U.S. Bureau of Citizenship and Immigration Services.

**Location and Hours:**

The Career Services Center is located at 1164 Bishop Street (UB Building), Suite 122B. Students and alumni are highly encouraged to schedule an appointment for one-on-one personalized services.

**COUNSELING AND BEHAVIORAL HEALTH SERVICES**

Counseling services are made available to provide support and help HPU students work through difficult or challenging life situations and/or changes through various counseling opportunities, including:

- Individual counseling
- Couples counseling
- Group counseling
- Family counseling
- Referral services
- Crisis support services
- Outreach Services

Licensed psychologists provide services at the Downtown and Hawai‘i Loa campuses. To
schedule an appointment, please call (808) 687-7076. Counseling services are free and confidential to all registered HPU students.

**OFFICE OF INTERNATIONAL STUDENTS AND SCHOLARS**

The Office of International Students and Scholars has full-time advisors to assist international students with all their immigration concerns. Any questions about visas, passports, F-1 regulations, J-1 regulations, I-20s, employment, or any other immigration issue can be directed to the advisors. International students who have questions concerning their F-1 and J-1 status should consult with an International Student Advisor in an appointment.

The office provides a variety of handouts, orientation sessions and workshops of importance to international students. The International Student Handbook, which can be found at the HPU website, provides a wealth of information on adjusting to American life, travel and immigration, employment, income tax, health care, community resources, and more. Contact iss@hpu.edu or (808) 356-5299 for more information.

International students are accepted for individual terms of study that includes fall, spring and summer. Additional tuition is charged for those students who elect to attend the University’s summer term. A statement of financial support (SFS) showing sufficient financial resources in USD, along with a financial institution verification of liquid assets on bank letterhead must be submitted.

Location and Hours:
The International Students & Scholars is located at 1164 Bishop Street (UB building) on the 2nd floor in Suite 200. Students are highly encouraged to call (808) 356 5299 to schedule an appointment. Hours of operation are Monday through Friday, 8:00 a.m. to 5:00 p.m. (HST), excluding observed university holidays and weekends. For more information, please visit our website at www.hpu.edu/Inter-national_Student or email us at iss@hpu.edu.

**REGISTRAR’S OFFICE**

The Registrar’s Office provides HPU students with a comprehensive information and service center for registration and academic records.

Our friendly staff is available to assist students, faculty and staff with the following services:

- General information, registration policies and procedures
- Registration inquiries; deposit clearance and registration time tickets
- Student account inquiries
- Processing requests for record changes (student name, addresses, telephone and emergency contact)
- Verification letters for enrollment, degree awards and student loan deferments
- Processing requests for official transcripts or course descriptions
- Processing and posting degree conferrals and issuing HPU diplomas
- Student record inquiries, maintenance of all student academic records
- Processing semester grades, grade changes, probation and suspensions
- Planning and coordinating with departments on all matters relating to student registration and academic records
- Administering the security and confidentiality of student records in accordance with FERPA
- Processing new and replacement ID cards.

The Registrar’s Office is located on the downtown campus, 1164 Bishop Street (UB Building), Suite 216. Hours of operation are Monday through Friday, 8:00 a.m. to 5:00 p.m. (HST), excluding observed University holidays. For more information, please contact us at registrar@hpu.edu or (808) 544-0239.
UNICARD (ID CARD)

The UniCard photo ID card is recognized as official identification for students, faculty and staff; and is required for several activities such as voting in student elections, utilizing the intercampus shuttle service, borrowing materials from the University libraries, entering the University Computer Center, and receiving tutorial services on both campuses. It entitles the bearer to free or reduced-rate entrance to student activities such as athletic events and student life functions. Also, many merchants offer discounts to holders of UniCards.

The UniCard is encoded with information that allows students a number of print jobs at the Computer Center and the Education Technology Center. Students exceeding the number of copies allowed may pay to recharge the card at locations on both campuses.

UniCard Services are provided in the Registrar’s Office and at the Education Technology Center on the Hawai‘i Loa campus. There is no charge for the initial UniCard, but there is a charge of $15.00 for a replacement card.

New Students
Each new student must present his/her government-issued photo identification such as passport, driver’s license, or state ID card. HPU staff will verify that the student has registered for classes. New faculty and staff members will need to visit the Human Resources Office to fill out new hire forms and get their pictures taken. The UniCard is generally available for pick-up the same day that the photo is taken.

Military Campus Programs students may submit their pictures online and pick up their UniCards from their respective military base location.

Continuing Students
Students who were issued UniCards in a previous term need only to have their cards validated for the next term; the process takes just a few minutes. A student must present his/her UniCard and HPU staff will verify registration. Military Campus Programs students may have their ID cards validated at their respective military base location.

CAMPUS BOOKSTORES

Barnes & Noble stores at Hawai‘i Pacific University stock required and recommended textbooks and related materials for courses, many of which are available in a digital format or for rent. The bookstores also stock a wide variety of school spirit gifts and apparel, school and tech supplies, and cold drinks. The downtown bookstore also offers a robust general reading selection along with snacks, dorm products, and trending lines such as Burt’s Bees, SakRoots, and more.

The main store is located at the Aloha Tower Marketplace, fronting Nimitz Highway. The University also maintains a bookstore outlet in the administrative building on the University’s Hawai‘i Loa campus. Textbooks for the military campuses are available at the downtown campus store and online.

Textbooks and most products are available on our website at www.hpu.bncollege.com.

STUDENT LIFE

The Office of Student Life develops and implements comprehensive co-curricular and extra-curricular programs, activities and services that support and enhance the college experience at Hawai‘i Pacific University. In partnership with HPU departments, Student Life strives to connect students with their peers, faculty, and staff; promote school spirit
and pride; foster social and learning communities; offer leadership and mentorship opportunities; and acclimate students to the university and Hawai‘i. In addition, the Student Life staff advises student groups; engages students in thoughtful discussion on local and world matters; and supports students’ personal and professional development.

**Student Organizations, Programs and Initiatives**

Student Life advises the Student Government Association (SGA), Campus Activities Board (CAB), Registered Student Organizations (RSOs), Honor Societies and Student Activity Fee Allocation Committee. In addition, the staff manages Sharky’s Cove. Activities and annual events include leadership development (e.g., HPU L.E.A.D.S., Take the Lead), Welcome Week, Club Carnival, Hawai‘i Spotlight, Halloween FunFest, Da Freakshow (talent show), and much more. For more information on current and future initiatives, visit our website at [www.hpu.edu/studentlife](http://www.hpu.edu/studentlife), contact us at (808) 544-0277 or email us at [studentlife@hpu.edu](mailto:studentlife@hpu.edu).

**Registered Student Organizations (RSOs)** There are a variety of clubs and organizations that give students an opportunity to contribute to campus life at Hawai‘i Pacific University. These Registered Student Organizations (RSOs), supported by the Office of Student Life, provide a wide range of social, academic, professional, recreational and community service activities to encourage student involvement. The HPU RSOs are divided into three categories: academic and professional, cultural and spiritual, and special interest. Students are encouraged to join an organization or start a new club that meets their needs and interests. For more information, go to [www.hpu.edu/clubs](http://www.hpu.edu/clubs).

**Student Government Association (SGA)** SGA is the student government of HPU, and the members serve as advocates for change. The organization works with their constituents by holding town-hall meetings to hear student concerns and determine how they wish to effect change on campus. SGA is comprised of the student senate, executive officers and judicial council. For more information, go to [www.hpu.edu/sga](http://www.hpu.edu/sga).

**Campus Activities Board (CAB)**

CAB is a student-run organization that strives to enhance the HPU experience through quality entertainment, creative programming and community involvement. For more information, go to [www.hpu.edu/cab](http://www.hpu.edu/cab).

**MUSIC SCHOLARSHIP PROGRAMS**

**Band**

Hawai‘i Pacific University’s Sea Warrior Band is comprised of a Pep Band, Jazz Ensemble, and Wind Ensemble. Members of the Sea Warrior Band play a variety of music, including show, rock, swing, and jazz, at HPU’s volleyball and basketball games. In addition to supporting our athletic teams, they are often featured at University pep rallies, graduations, orientations, and other special events on campus. Scholarships are available for incoming, transfer, and returning band members. Academic credit is offered as MUS 1700. Each candidate must demonstrate a high level of proficiency on at least one of the featured instruments (flute, oboe, clarinet, bassoon, alto, tenor, and baritone saxophone, trumpet, trombone, bass trombone, tuba, piano, guitar, bass guitar, and percussion).

**Chamber Orchestra**

The HPU Chamber Orchestra is comprised of highly skilled violinists, violists, cellists, and double bassists. The Chamber Orchestra performs for a variety of University and campus events, as well as with the International Choral and Vocal Ensemble. Music performed is mainly from the renaissance, baroque, and romantic genres. Scholarships are available for incoming, transfer, and returning orchestra members. Academic credit is offered as MUS 2820.
International Chorale and Vocal Ensemble
Diversity plays a key role in the HPU experience and the International Chorale and International Vocal Ensemble. The Choral Activities, made up of talented students from Hawai‘i, the mainland U. S., and other countries, truly embodies that diversity. The International Chorale is composed of talented choral enthusiasts from the HPU community of students, faculty and staff, as well as singers from the community at large, who perform choral repertoire from multi-ethnic sources. The International Vocal Ensemble (IVE) is composed of select singers who are recruited and auditioned for their vocal talents and experience. The IVE makes up the vocal core of HPU’s International Chorale. Performance venues include campus events, a fall and spring concert, as well as performance tours locally and globally.

Scholarships are available for incoming, transfer, and returning IVE members. Academic credit is offered as MUS 1710 for International Chorale and MUS 2700 for IVE.

FIRST-YEAR PROGRAMS

First-Year Programs (FYP)
FYP collaborates with a number of departments to offer programs, activities and services including New Student Orientation (fall and spring), leadership positions (Orientation Leader), Peer Academic Coach, Live Hawai‘i, alternative spring break, and much more. For more information on current and future initiatives, visit our website at www.hpu.edu/FYP, contact us at (808) 544-0277, or email us at readysetgo@hpu.edu.

RESIDENCE LIFE
Residence Life provides students the opportunity to learn, develop and grow. On-campus housing is provided at the Hawai‘i Loa campus, and the Waterfront Lofts at the Aloha Tower Marketplace. Each building is staffed by a student resident advisor (RA) or Community Assistant (CA) who lives in the building. An area coordinator, a full-time professional staff member lives in the community and helps to ensure that students have a safe and secure environment in which to live and learn. Each on-campus room is equipped with basic furniture, including an extra-long twin bed, desk, and closet space and/or dresser for each resident. The majority of rooms are shared units with a semi-private bathroom. Each building offers a community area for resident activities, group study, and programs conducted by University faculty and staff. All on-campus housing is nonsmoking.

Meal plans are available for students at both the Waterfront Lofts and the Hawai‘i Loa Residence Halls. Students pay for a meal plan as part of the room-and-board housing fee. The Hawai‘i Loa Dining Commons (DC) (managed by Sodexo) is located in the center of the Hawai‘i Loa residence hall complex. The DC provides meal service for students, faculty, and staff.

The Hawai‘i Loa Student Center and Fitness Center provide students with a centralized area for social activities, leisure time, exercise and group study. At the Student Center, students may use computers with internet access, a large-screen television, DVD player, foosball table, ping pong table and a pool table. Residents may also check out board games and other recreational items. The Fitness Center is configured with fitness equipment, including a treadmill, cross trainer, recumbent bikes, benches, power rack and an assortment of free weights.

New Student Orientation Program
The best way for students to start their HPU journey is with the New Student Orientation program. This is an informative and fun-filled program for incoming first-year and transfer students. HPU provides opportunities to meet others, ease the transition to HPU, prepares students for the academic year, and helps them become familiar with the University community.
New undergraduate students are assessed a one-time program fee for orientation. The fee will be charged to the students’ accounts in July or December and payment is due along with tuition. Additional information and registration materials are sent to new students in the mail and available online at www.hpu.edu/orientation.

Honor Societies

Hawai‘i Pacific University has 19 honor societies. Students may apply for membership to one or more honor societies during the fall or spring term.

All applicants must possess good reputation and character, and those who have been reported for academic misconduct are ineligible for membership. Each honor society conducts various activities for its members throughout the year. Formal induction ceremonies for new members are generally conducted during the fall or spring term.

Students are strongly encouraged to carefully read the requirements for each honor society and apply only to those for which they clearly meet the stated criteria. The honor society application is available online at www.hpu.edu/Honors during the application period. For more information, contact the Office of Student Life at (808) 544-0277 or email us at honors@hpu.edu.

ALUMNI

HPU provides alumni several ways to stay connected to the university, including benefits such as Alumni ENewsletter, HPU Connect, discounts with university partners and much more! The
University Relations Department seeks to encourage the creation of lifelong relationships and alumni involvement in its global community. To learn more ways to connect with HPU and fellow alumni, please visit [www.hpu.edu/stayconnected](http://www.hpu.edu/stayconnected).

For additional information or assistance, alumni may contact:

Hawai‘i Pacific University  
University Relations  
1 Aloha Tower Drive  
Honolulu, HI 96813 U.S.A.  
Telephone: (808) 687-7067  
Toll Free Telephone 1-866-CALL-HPU (extension 9) [U.S. and Canada only]  
Fax: (808) 544-8079

ATHLETICS

The Athletics Department oversees the intercollegiate athletics program, campus recreation and spirit programs such as Cheer, Dance and Mascot.

Intercollegiate Athletics

The Intercollegiate Athletics program at Hawai‘i Pacific University functions as an integral part of the academic and social environment of the University and community. Its coaches, student-athletes, and professional staff strive to maintain the highest standards of academic achievement, sportsmanship, athletic competitiveness, integrity, and citizenship. The Sharks compete in the National Collegiate Athletic Association (NCAA) Division II and the Pacific West Conference, fielding 14 competitive teams in softball, baseball, women’s acrobatics and tumbling, women’s volleyball, in addition to men’s and women’s programs in basketball, soccer, tennis, cross country, and golf. For more information on the Intercollegiate Athletics Program, visit our website at www.hpusharks.com, contact us at (808) 356-5214, or email sharks@hpu.edu.

Campus Recreation

Campus Recreation offers students, faculty and staff at Hawai‘i Pacific University exciting opportunities to stay physically active. Offering 24-hour access to the Hawai‘i Loa Fitness Center, intramural sports leagues/tournaments, sport club opportunities, outdoor recreational activities and fitness classes, Campus Recreation promotes a fun and healthy balance to an academic life. Campus Recreation also partners with companies throughout Hawai‘i to offer discounts within the recreational community exclusive to HPU students. More information can be obtained by calling at (808) 544-9370 or emailing campusrec@hpu.edu. Stay active and stay healthy!

Cheer Team

Hawai‘i Pacific University’s Cheer Program strives to garner school spirit while representing the University and the State of Hawai‘i. The Cheer Team performs at HPU’s volleyball and basketball games as well as the University pep rallies, Club Carnivals, orientations and other special events on campus and in the community. Students interested in joining the Cheer Team are encouraged to demonstrate a high level of proficiency in tumbling, stunting, jumping; however, these skills are not required. Partial tuition waivers are available for incoming undergraduate students and returning Cheer Team members.

For more information, contact us at (808) 356-5214, or email bhoff@hpu.edu.

Dance Team

The Dance Team performs at HPU’s volleyball and basketball games, as well as the University pep rallies, Club Carnivals, orientations, Intercultural Day and many other special events on campus and within the community. Interested individuals must have extensive training in hip-hop, jazz and pom, as well as elite technical skills in jumps, turns and leaps. Strong ballet training is recommended. Partial tuition waivers are available for incoming undergraduate students and returning Dance Team members. For more information, contact us at (808) 356-5214.
**Mascot**
In the fall of 2003, Hawai‘i Pacific University introduced Sharky, who has increased school spirit by interacting with fans at HPU’s volleyball and basketball games. Sharky also appears at many other campus and community events as well. Partial tuition waivers are available to incoming and returning undergraduate students. For more information, contact us at (808) 356-5214.

**LIABILITY**
Hawai‘i Pacific University takes every reasonable precaution to prevent students from sustaining injuries while on the premises. The University, however, assumes no responsibility for injuries that students sustain on University property, or at University-sponsored activities and events.

**STUDENT CONDUCT**
Students are responsible for knowing the academic and administrative regulations of the University as stated in this catalog. Students, by the act of registration, agree to observe the policies and guidelines of the University and the Code of Student Conduct.

The provisions of this catalog are not to be regarded as a contract between any student and the University. The University reserves the right to change any of the policies, rules, regulations and standards of conduct at any time as may be necessary in the interest of the University. The University also reserves the right to modify or discontinue any of the services, programs or activities described in this catalog.

The most up-to-date student handbook can be found online at [www.hpu.edu/studenthandbook](http://www.hpu.edu/studenthandbook).

**Code of Student Conduct**
Students of Hawai‘i Pacific University will conduct themselves at all times with propriety, and will meet the stated expectations and standard of conduct of the University as stated under the University’s *Code of Student Conduct*. The *Code* formulates student conduct and accountability, and is found in the *Student Handbook*.

Students who violate the code will render themselves subject to the University’s Student Conduct System described in the *Student Handbook*.

The *Code of Student Conduct*, as well as a summary of University policies relating to students, may be found in the *Student Handbook*, published annually by the Office of the Dean of Students. Copies of the *Student Handbook* are available in the Office of Student Life, at all Military Campus Programs locations, and online at [www.hpu.edu/studenthandbook](http://www.hpu.edu/studenthandbook).
STATEMENT OF ACADEMIC FREEDOM

Hawai‘i Pacific University supports and protects the academic freedom of both the faculty and the students. The examination of partisan views, no matter how controversial, within the purview of a course of instruction, is the very life blood of freedom of thought and inquiry in an educational institution within a free society.

Like all other rights and privileges in a free society, academic freedom is constrained by other freedoms and rights of individuals within the society. Academic freedom necessitates the recognition of significant contrary viewpoints and requires a degree of respect for the rights of others to hold such contrary viewpoints. Academic freedom requires differentiation between personal views and opinions and proven facts of broadly held conclusions within a discipline. It is neither possible nor desirable to attempt to enumerate the limits of academic freedom. In general, academic freedom is abused when important individual rights of others are denied under the guise of academic freedom.

All members of the University are expected to exercise their rights to academic freedom responsibly.

BACCALAUREATE REQUIREMENTS

The following requirements must be met in order to obtain a baccalaureate degree from Hawai‘i Pacific University:

1. Completion of at least 120 credit hours of which a minimum of 36 are upper-division credits (level 3000 and above);

2. Completion of the general education requirements as well as the specific requirements prescribed for each degree program and major area of study;

3. Attainment of a cumulative GPA of at least 2.0 in all courses taken at HPU;

4. Attainment of a cumulative GPA of at least 2.0 for all courses required for and counted toward a major, including lower- and upper-division major requirements, upper-division major electives and, for BSBA degrees, the lower- and upper-division business requirements; In the case of the Bachelor of Science in Business Administration degree program, a 2.0 cumulative GPA must be attained for all courses required for and counted towards the business core. In the case of the Bachelor of Science in Computer Science degree, a cumulative GPA of at least 2.0 is required for all CSCI courses applicable for the degree. For the Bachelor of Science degree in Nursing, a cumulative GPA of at least 2.75 is required in order to enroll in 2000-level nursing courses. A minimum HPU cumulative GPA of 2.75 must be maintained for progression in the major;

5. Payment of all indebtedness to Hawai‘i Pacific University;

6. Submission of the Petition to Graduate. Students must submit these forms to the appropriate advising center at the beginning of the term in which they anticipate graduating in order to allow sufficient time for review and evaluation of their records.

Students meeting these requirements are eligible to participate in the graduation ceremony immediately following their final term.

RESIDENCY REQUIREMENTS

Students seeking baccalaureate degrees must complete at least 12 credit of major course work
and the last 30 credit immediately preceding graduation in residence at Hawai‘i Pacific University [exception: Servicemembers Opportunity Colleges (SOC) students must complete at least 30 credit hours with HPU including 12 credit hours of major course work. They are not required to complete the last 30 credit hours in residence].

Students seeking associate degrees must complete at least 15 credit hours of course work with at least six of those hours in the degree major concentration.

All online courses at HPU are considered in residence.

**ACADEMIC CREDITS**

The unit of academic credit awarded by the University is called a “credit hour.” One credit hour is defined as a minimum of three classwork hours comprised of one hour of direct faculty instruction in class and a minimum of two hours of out of class work by the student per week. One credit hour represents 14 to 15 hours of class attendance, or its equivalent, during a term, and encompasses the successful completion of all course assignments and a demonstration of mastery of course content. Most courses at the University yield three credit hours of academic credit. A letter grade of D denotes minimal completion of that course; however, most major programs of study require a demonstration of proficiency with a grade of C or better. General education writing courses must be passed with a C- or better to enroll in courses for which they are prerequisites.

**UNDERGRADUATE TRANSFER CREDIT POLICY**

The Office of Admission reserves the right to accept or reject transfer credits earned at any other institution of higher education. In general, Hawai‘i Pacific University accepts credits earned at institutions fully accredited by the U.S. regional accrediting associations or an institution recognized by The Office of Admission, provided such credits are substantially equivalent to courses at Hawai‘i Pacific University and have been completed with a grade of C- or better. An evaluation of transfer credits will be reviewed only after a student has been admitted to HPU.

Transfer credits are accepted as one of three categories of credits: Elective, General Education or Program Field of Study credits.

- Elective – These are courses that are not part of the program/major or general education requirements, but may still count toward the baccalaureate degree. Some majors limit the amount of elective credit.

- General Education – These courses are similar at most colleges, with a liberal arts foundation, and often include courses in English, history, math, science and other subjects.

- Program Field of Study – These courses are primarily requirements for the chosen major/degree program. Pre-requisites to courses in the major field of study usually can be transferred.

**Transfer Credit Restrictions**

Transfer credit is accepted for regular undergraduate degree-seeking students. Only course credits are accepted in and transfer to Hawai‘i Pacific University. Grades and grade points from other institutions do not transfer.
Timeline

Courses considered for transfer will be evaluated by a transcript evaluator and will be accepted based on equivalency for program requirements. Certain Colleges, Departments, or Programs (e.g., Nursing) may have specific expiration dates for transfer credits which will be applied during the transcript evaluation. Students have the first term of admission to reconcile transfer credit, and exceptions will be handled in accordance to the Student Handbook policies and procedures.

Limitation of Credit (maximum total transfer credits allowed toward a baccalaureate degree = 90)

- Maximum of 90 credits from a regionally accredited four year college or university
- Maximum of 60 credits from a community college or from American Council on Education (ACE) evaluation
- Maximum of 45 credits toward an associate’s degree
- Maximum of 36 credits may be earned in passing courses by examination
- Maximum of 30 credits awarded for dual credit, or combined AP and IB
- Maximum of 15 credits of extension or continuing education
- Maximum of 4 credits in physical education/activity
- Only academic courses that carry a grade of C- or better will be accepted for transfer credit
- Repeated courses will only transfer credit once. The most recent attempt will be used for credit

Courses Receiving No Credit

Hawai‘i Pacific University does not accept the following types of courses for transfer credit:

- Courses from unaccredited institutions: Coursework taken at any institution not fully accredited by a regional U.S. accrediting association or not recognized by The Office of Admission is not transferable.
- Courses below college level: At Hawai‘i Pacific University, courses include those numbered below 1000.
- Developmental or remedial courses are not transferable.
- Life experience, internship or practicum credit are not transferrable*
  *Unless denoted as part of an articulation agreement.

Military Service or Schooling

Coursework taken through military schools may be considered for credit on the basis of recommendations of the American Council on Education (ACE). The student’s DD-214 or DD-295 form should be submitted along with either the Army/American Council on Education Registry Transcript System (AARTS), Sailor-Marine American Council on Education Registry Transcript (SMART), Joint Services Transcript (JST) or Community College of the Air Force (CCF).

Courses with Non-traditional Grades

Courses completed with non-traditional grades such as CR (credit), P (pass), S (satisfactory) may be transferrable only if the grade represents a C- or higher. Courses with non-traditional grades are generally only accepted as elective credit and do not fulfill University, college, school, or departmental requirements.
Concurrent Enrollment

All transfer credit taken at another institution while concurrently enrolled as a Hawai‘i Pacific University student are subject to approval by the University before transfer credit will be accepted.

GENERAL EDUCATION TRANSFER CREDIT

Completion of the full CSU GE Breadth certification (CSU Cert) or University of California Intersegmental General Education Transfer Curriculum (UC IGETC) certification, or an Associate of Arts degree (with embedded CSU/IGETC requirements) from a community college, or equivalent GE transfer degree or certification from an out-of-state community college prior to matriculation satisfies the following GE areas:

• The American Experience
• Creative Arts
• Critical Thinking & Expression
• Global Crossroads & Diversity
• The Natural World
• The Sustainable World
• Technology & Innovation
• Traditions & Movements that Shape the World
• Quantitative Analysis & Symbolic Reasoning
• Written Communication & Information Literacy I & II

All other transfer credit is evaluated on a course-by-course basis, and may require the submission of course syllabi or catalog descriptions.

INTERNATIONAL TRANSFER CREDIT

Hawai‘i Pacific University accepts academic credit earned at international institutions that are fully accredited by their country’s Ministry of Education, but only if the courses meet general transfer credit policies. Evaluation of credit is done at the time of admission based on official English translated transcripts.

TRANSFER AND CUMULATIVE GPA CALCULATION

• All transferable credit attempted is calculated into the transfer and cumulative GPAs. This includes courses not meeting the minimum “C” grade for transfer.
• When a course is repeated in transfer from one or more transfer institutions, the credit and grade for the course with the higher grade is counted in the transfer and cumulative GPAs.
• When a course is repeated between Hawai‘i Pacific University and a transfer institution, only credit for one course will apply, and both grades are calculated into the cumulative GPA.

CREDIT BY EXAMINATION

Hawai‘i Pacific University recognizes and accepts the use of national standardized and recognized testing instruments to measure knowledge acquired outside the classroom. Credit may be granted only for exams that meet Hawai‘i Pacific University standards. Regarding AP, IB, CLEP, and DSST examinations and acceptable minimum scores for approved exams, score requirements, and credit granted, see the HPU website under “Transfer Credits”.

40
College-Level Examination Program (CLEP) and DANTES Subject Standardized Test (DSST)

The College Level Examination Program enables students to earn college credit by examination in areas approved by the disciplines. Classified students may take CLEP tests to demonstrate college level competency no matter when, where, or how this knowledge has been acquired: through formal study, private reading, employment experiences, non-credit courses, military/industrial/business training, or advanced work in regular high school courses. This program gives individuals the opportunity to validate and receive credit for college-level knowledge they already possess.

No student is eligible to take CLEP General Examinations for credit after reaching sophomore standing; i.e., the student must have completed not more than 24 credit hours of college work.

Credit is awarded for approved CLEP or DSST examinations and may apply toward General Education requirements. Students seeking to fulfill major requirements must have preapproval from the department chair. Only elective credit will be awarded for CLEP general exams.

Hawai‘i Pacific University awards credit to students whose score meets the established minimum for approved CLEP and DANTES Subject Examinations. Only elective credit will be awarded for CLEP general exams.

The University accepts no more than 36 credit hours earned through any type of credit by examination process.

Advanced Placement (AP)
Credit is awarded for approved AP exams that meet the minimum score requirements. Students must submit an official AP score report to Hawai‘i Pacific University for credit consideration.

International Baccalaureate (IB)
Credit is awarded for approved IB exams that meet the minimum score and diploma requirements. Students must submit an official IB score report or diploma transcript to Hawai‘i Pacific University for credit consideration.

Challenge Exams
These are comprehensive exams that are created and administered within the University and test a student’s level of mastery for a given University course. Only students with grade point averages of 3.0 or above who have completed at least 15 credits at the University are eligible to petition. A student may consult an academic advisor to submit a petition for permission to take a Challenge Exam. If the reviewing dean approves the petition, the student pays an examination fee, and the dean selects an appropriate instructor to design and administer the examination. If the student successfully passes the challenge exam, credits are awarded without a standard grade.

MAJOR COURSE OF STUDY

The major course requirements vary depending upon the degree program and the curriculum required. Students are advised to consult with an academic advisor as soon as possible after admission to begin the advising process for selection of a major field of study. All students must complete a minimum of 12 credit hours for credit in their major courses in residence with HPU. Students interested in double majors or more than one degree program should consult their academic advisor or military campus coordinator for information and academic planning. For students who wish to pursue a double major, more than one
half of the credits taken must be unique to the second major field of study (e.g., if one major requires 36 credits, then at least 19 credits must be unique to the second major field of study).

The major is listed on the diploma as well as on the transcript.

MINOR COURSE OF STUDY

In addition to undertaking a major, students may elect to do an optional minor program of study. The minor encompasses completion of selected courses that are fewer in number and less comprehensive than a major. At least twelve (12) credits unique to each minor must be taken in addition to those required for fulfillment of the major program of studies. All students must complete a minimum of six (6) credits of minor course work in residence with HPU in order to be awarded a minor. The minor is not listed on the diploma but is listed on the transcript, provided that the student has completed all necessary course work and the degree has been conferred. Minors must be identified prior to degree conferral. Students may not add minor courses of study to degree programs that have already been completed and conferred on the original transcript.

SECOND BACHELOR’S DEGREE

An individual already holding a baccalaureate degree may pursue a second bachelor’s degree in consultation with an academic advisor. To earn a second bachelor’s degree, the student must satisfy the general education requirements of the University or the equivalent and meet the specific requirements for the second degree. Credit hours earned for the first bachelor’s degree may be counted for general education or other specific requirements. The student must complete a minimum of 30 credit hours of course work required in the new degree program subsequent to earning the first bachelor’s degree. Those 30 credit hours must be taken in residence at Hawai‘i Pacific University.

CHANGES IN ACADEMIC PROGRAM REQUIREMENTS

Requirements for specific degrees and majors within degrees may change as curricula are revised and new programs are implemented. New students (including transfer students) are expected to meet the requirements of the program that are in existence at the time of the initial registration. A continuing student may select the new version of a given program. However, once selected, they may not select the former version of the program. A student who has been granted a leave of absence (for no more than one calendar year) may continue, upon return, in the program in which he or she was last enrolled. A student on leave who has not attended Hawai‘i Pacific for more than one calendar year must adhere to the requirements in effect upon return (Exception: SOC students).

CLASSIFICATION SYSTEM

Courses numbered from 1000 to 1999 are generally freshman-level courses that, except for two-course sequences, often have no college level prerequisites. Courses numbered from 2000 to 2999 are generally sophomore courses, many of which have college-level prerequisites. Freshman and sophomore courses are, together, designated “lower-division.”

Courses numbered 3000-4999 are “upper-division” requiring substantial preparation and most often one or more prerequisite classes, including a passing grade of C- or higher in a Written Communication and Information Literacy II. Courses numbered at the 3000-level are considered to be junior-level courses. Courses numbered at the 4000-level are generally senior-level courses, often requiring the student to fulfill several upper-division prerequisites before being able to enroll for the course.

Courses numbered 5000-7999 are graduate-level courses. Enrollment in these courses is
limited to graduate students. Undergraduate students who are concurrently enrolled in the University’s undergraduate/graduate program should consult an academic advisor to register for graduate courses. Concurrent credit classes are charged graduate tuition rates. See Concurrent Credit Program section of this catalog for more details.

**AVAILABILITY OF COURSES**

Every effort will be made by the University to offer courses required in various degree programs and listed in the catalog. However, student enrollment and faculty availability may affect course offerings. Furthermore, some courses listed in this catalog are offered only once a year or only upon sufficient demand as determined by the respective deans.

The University cannot guarantee that all courses needed by any one student in order to graduate will be offered during the summer or winter terms.

**GENERAL PETITIONS**

The General Petition form is used when extenuating circumstances require that an exception be made to current policies. Students should consult with an academic advisor, who will assist them in completing the form. Depending upon the nature of the request, review and approval of the form will be performed by the academic advisor and/or the appropriate dean.

**AUDITING COURSES**

Students may petition to audit courses with consent of an academic advisor prior to or at the start of the term or term. Students who audit do not receive any credits or grades for the audited courses. Audited courses are subject to registration procedures and tuition payment.

**PASS/FAIL COURSES**

Certain courses such as COOP work experiences are graded only on a Pass/Fail basis. Students desiring to take another course as pass/fail must petition an academic advisor prior to or at the start of the term or term. Only 15 term credit hours taken on a Pass/Fail basis may be applied to the unrestricted elective portion of a student’s baccalaureate program.

**CREDIT/NO CREDIT COURSES**

Certain courses may also be taken, by petition, on a credit/no credit basis. Courses that may be taken for credit/no credit do not include those that are considered to be required or are restricted elective courses in a student’s degree program. Under the credit/no credit option, a student receives a grade of CR (credit) or NC (no credit). A grade of CR is granted if the student earns a grade of C- or better in the course. Because no grade points are awarded for CR/NC grades, courses taken on a credit/no credit basis are not included in calculating a student’s GPA.

Students desiring to take a course as CR/NC must petition an academic advisor prior to or at the start of the term or term.

Only 15 credit hours taken on a CR/NC basis may be applied to the unrestricted elective portion of a student’s baccalaureate degree.

**DIRECTED STUDY COURSES**

Directed Study courses are tutorial courses that are offered only under exceptional circumstances. They are approved only on a case-by-case basis for students who are unable to
complete course requirements in the regularly scheduled classroom setting or via an online course offering. Directed Study courses are equivalent to the lecture sessions and are assigned to specific instructors. Students should submit a directed study registration form requesting to enroll in a directed study course and which must be approved by the dean of the college offering the course.

USE OF COURSES TO MEET UNIVERSITY GRADUATION REQUIREMENTS

Courses may be counted only once toward fulfilling the 120-credit requirement to earn a baccalaureate degree at HPU. Under certain circumstances (described below), a course can be used to satisfy more than one University requirement (e.g., major, minor, general education), but mathematically the credits can only count once toward the total number of credits needed.

Situations where a course can be used to satisfy University requirements are:
1. A course may satisfy both a general education common core requirement and a lower-division language or lower-division major requirement.
2. A course may satisfy an upper-division general education requirement and an upper-division major requirement or elective.
3. An upper-division course may fulfill a requirement for more than one major or minor.
4. In most cases, courses completed in the general education common core and lower- and upper-division requirements for a given degree program are applicable to a second major, minor, or degree.
5. After a baccalaureate degree is conferred, a minimum of 30 additional credits must be completed to fulfill the requirements for an additional major or degree. Even if a student graduates with more than the 120 credits required for a baccalaureate degree, a minimum of 30 additional credits, including major, minor or other degree requirements, must be completed.
6. Certain courses (e.g., COOP, PE 1000-1250) may be taken more than once for academic credit. Repeatable courses will receive credit each time up to the limit specified in the course description. Such courses are graded on a Pass/Fail basis.

ACADEMIC YEAR

The academic year consists of fall, winter, spring, and summer terms. Fall term begins in late August or early September, and consists of 15 weeks of classes, including a week for final examinations. Spring term begins in mid-January and consists of 15 weeks of classes (with a one-week spring recess), including a week for final examinations. There are two eight-week sessions within each fall and spring term.

The Winter term runs for approximately four weeks between the fall and spring terms. The summer term begins in mid-May and runs for 12 weeks. During this summer term, there are three sessions of four weeks, two sessions of six weeks, and one session of eight weeks, as well as classes that run the full 12 weeks.

CLASS SCHEDULES

During the regular 15-week fall and spring terms, most classes meet two or three times each week for periods of 85 and 55 minutes, respectively. Evening and Saturday classes run for two hours and 55 minutes once a week; instructors of such sessions usually schedule at least one break. During the Winter term or Summer term, individual class sessions are generally scheduled in Monday-Wednesday-Friday or Tuesday-Thursday-Saturday sequences, or online.

Courses scheduled on base locations follow a hybrid format. The class has approximately
five credit hours per week; three credit hours are conducted in the classroom and two credit hours are online. Four-week term courses require ten contact hours per week; six credit hours in the classroom and four credit hours online. Some exceptions may apply; contact the base advisor with any questions.

A schedule of courses is published for each term and is available through Pipeline or by clicking on the “Course Search” link at the top of the HPU home page (www.hpu.edu).

CLASS STANDING

A student’s class standing is determined by the number of credits that were taken and completed:

- FRESHMAN 1-30 credit hours completed
- SOPHOMORE 31-60 credit hours completed
- JUNIOR 61-89 credit hours completed
- SENIOR 90 or more credit hours completed

COURSE LOADS

For undergraduate students, the minimum full-time load is 12 credit hours; the normal full-time load is 15; and the maximum course load for a student with a GPA of 3.00 or higher and with the consent of an academic advisor is 16 credit hours. (For information on graduate course loads, refer to the section on graduate studies.) The maximum course load for students registering for Off-Campus/Military Campus Programs courses are as follows: 8-week session-9 credit hours, 4-week session-6 credit hours.

A student on probation, having a GPA below 2.00, may register for a maximum of 12 credit hours in a fall or spring term.

All undergraduate students, seeking to enroll for 17 or more credit hours, must meet with an academic advisor to request permission.

CHANGE IN REGISTRATION (ADD/DROP)

Courses may be changed only in accordance on the academic calendar for each term or session. All paper Add/Drop-Withdrawal forms submitted after the published deadlines are subject to a processing fee. Students receiving financial aid should consult with a financial aid counselor if the change will increase or decrease the amount of credits for which they are registered. International students on F-1 VISA status must be registered full-time to remain in status according to Department of Homeland Security guidelines. Students with registration holds will be required to clear them prior to any course changes.

Students who are having extreme difficulty in these courses should make every effort to work with their instructors, writing lab tutors, and/or tutors in the Center for Academic Success to gain additional support for improving their academic performance. A student who must withdraw or who receives a grade lower than a C- in one of these courses should register for the course again in the next term to avoid falling behind. Since WRI 1150 is only offered in the fall term, a student who does not pass that course should enroll in WRI 1100 in the following winter or spring term. Students should also be cautious about withdrawing from MATH courses that are required for progression in their degree programs.

Students who wish to change their schedules may do so using one of the following options:

Web changes
Students process course changes using HPU Pipeline in accordance with published deadlines.
Students with registration holds are required to clear them prior to any course changes on the web.

**In-person changes**
Students should obtain a paper Add/Drop-Withdrawal form from the Registrar’s Office, Academic Advising, or military base location. A downloadable version is also available on the Registrar's Office website. Students should fill out the pertinent information, sign the form, and take the form to an academic advisor for signature. Non-degree (unclassified) students do not need an advisor approval. Students on financial aid must also take the form to the Financial Aid Office for signature. The academic advisor will direct the student to the appropriate office for final processing.

Deadlines to add and drop courses vary by term/session length. Refer to the academic calendar for important registration-related deadlines.

If an “Unacceptable Practice” investigation is in progress and/or if a student receives an “Unacceptable Practice” citation in a nursing (NUR) course, the student may not withdraw from the course. Students will need to have a clearance (signature on the withdrawal form) from the dean of nursing or his/her designee in order to withdraw from nursing (NUR) courses. The effective date of the withdrawal is the day the registrar receives the signed form. A student who stops attending a class without an official withdrawal will be charged all fees as though attendance had been continued, and a grade of F will be recorded.

**WITHDRAWAL POLICY**
Any degree seeking student discontinuing their studies at Hawai‘i Pacific University are required to officially withdraw or apply for a leave of absence.

**TYPES OF WITHDRAWAL:**

**ADMINISTRATIVE**
Students are administratively withdrawn if:
1. have not registered for classes within 1 year from last term attended;
2. not returned to HPU when the approved period of the leave of absence has expired and have not applied for a continuation leave or regular withdrawal; or
3. have not returned to HPU after the specified time from academic or disciplinary suspension, and the period of suspension has not been extended.

**MEDICAL**
Upon the recommendation by a certified health care provider, a medical withdrawal may be granted by HPU. A medical/health clearance is required before the student can be considered for re-admission. A medical withdrawal cannot be an approved withdrawal unless documentation and proper paperwork is submitted – after drop add date all turn to W’s, if NOT approved all grades turn to F’s.

**VOLUNTARY**
It is a student’s responsibility to file a notice of withdrawal with the Registrar’s Office. Failure to do so may result in fees and unsatisfactory grades on a student’s transcript, and will be taken into consideration should the student apply for re-admission.

**REQUIREMENTS FOR THE WITHDRAWAL OR LEAVE OF ABSENCE PROGRAM:**

1. Complete the appropriate withdrawal or leave of absence form, bearing appropriate signatures.
2. Drop all classes.
3. Confirm with financial aid and the business office regarding payment policies.

4. International students must meet with International Student Services in order to process the proper immigration paperwork.

5. Submit supplemental paperwork if needed.

**THE ABOVE STEPS MUST BE COMPLETED BEFORE ACTION CAN BE TAKEN ON YOUR WITHDRAWAL OR LEAVE OF ABSENCE APPLICATION. COMPLETION OF ALL PROPER PAPERWORK IS THE RESPONSIBILITY OF THE STUDENT.**

**LEAVE OF ABSENCE**

A student maintains “continuous enrollment” by being enrolled in courses at the University throughout each fall and spring term following admission. Occasionally, students may temporarily interrupt their academic studies due to health, personal, or emergency situations.

Approved leaves of absence permit students to resume their studies under the same degree requirements that were in effect at the time they began their leave. A leave of absence is limited to a maximum of one academic year.

Students wishing to request a leave of absence should consult with an academic advisor, who will assist them in completing a petition requesting the leave.

Students contemplating a leave of absence who have previously been awarded a loan under the Federal Family Education Loan Program (Stafford/PLUS/Loans) are required to contact the University’s Financial Aid Office and their lender prior to commencing a leave of absence to ascertain their repayment status.

**DEFERRAL OF ENROLLMENT POLICY**

Students who have been offered admission to a degree seeking program at Hawai‘i Pacific University and have NOT attended any classes may request a deferral of enrollment for up to one year from admission term. Deferment pertains only to admission to the university, not admission to a particular major or program.

Exclusions to deferral policy: Nursing, Marine Biology, and Social Work. Deferred students must submit an enrollment deposit for the original term of entry.

Students are expected to re-confirm their intention to enroll at Hawai‘i Pacific University by one year from original admission term.

Deferral requests are not automatically granted and will be evaluated by the Office of Admission on a case-by-case basis. Last day to defer is the Friday before the start of classes for the term of admission. If admission is deferred, there is no guarantee of scholarships or aid.

During the deferral period, the student will not apply or enroll at another college as a degree-seeking candidate, and not hold a deferral at another institution. Students who are found to have applied to other colleges or universities during the deferral period will have their admission revoked.

**Requirements for the Deferred Enrollment Program:**

1. Students who wish to defer their enrollment must submit the required, non-
refundable enrollment deposit and complete the Deferral Form.

2. Students who are granted approval to defer their enrollment should understand that their approval is contingent upon successful completion of any course work in progress at the time approval is granted.

3. A final official school transcript must be forwarded to Hawai‘i Pacific University’s Office of Admission.

**THE ABOVE STEPS MUST BE COMPLETED BEFORE ACTION CAN BE TAKEN ON YOUR DEFERRAL REQUEST. COMPLETION OF ALL DEFERRAL PROCEDURES IS THE RESPONSIBILITY OF THE APPLICANT.**

**READMISSION POLICY**

A candidate for readmission to Hawai‘i Pacific University is an individual who was admitted and attended the University as a degree-seeking student. A readmission applicant is defined as one who has not enrolled in classes for one year or longer.

Readmitted students fall under the catalog year of readmission, and are responsible for the graduation requirements and academic policies which exist at the time of re-entrance.

All special circumstances for readmission must be approved by petition.

The university will require an applicant for readmission to file a statement containing such supplementary information as is needed for proper consideration. Please contact admission for questions.

Graduate students may require an interview, resume, and course work or internship paperwork for certain majors.

Any previous scholarships or financial aid would be void. Reapplications would fall under the current terms scholarship and financial aid requirements.

Students under academic suspension are ineligible for readmission for one calendar year. They should present evidence of successful achievement at another college or university as part of their application for readmission.

Applications for readmission are reviewed individually. Decisions are based upon such factors as previous level of achievement, reasons for withdrawal, the candidate’s potential for successfully completing a degree program, and institutional capacity.

**PROCESS OF READMISSION**

1. Complete and file the application for readmission to the Admission Office. Pay reapplication fee.

2. Submit an official transcript if student has attended another college or university since leaving Hawai‘i Pacific University.

3. Submit a letter from a certified health care provider stating the status of the student's health if withdrawn for medical reasons.

4. A personal interview may be required as circumstances warrant.

5. Clear any previous university holds.
THE ABOVE STEPS MUST BE COMPLETED BEFORE ACTION CAN BE TAKEN ON AN APPLICATION. COMPLETION OF ALL ADMISSIONS PROCEDURES IS THE RESPONSIBILITY OF THE APPLICANT.

REFUND POLICY

During the regular fall and spring terms, the University adheres to the following schedule for tuition refunds when a student withdraws from classes:

1. Withdrawal through the first week of session = 100 percent refund
2. Withdrawal through the second week of class = 50 percent refund
3. Withdrawal through the fourth week of class = 25 percent refund
4. Withdrawal after the fourth week of class = 0 percent refund

Registration deposit of $200 is nonrefundable in the event that the student is unable to attend.

Refund policies for shorter sessions on and off campus are adjusted appropriately. Refund policies are noted on the policy sheet provided during registration and are subject to change.

Federal refund policy will apply to students receiving financial aid. Refer to the HPU website at www.hpu.edu for specific information.

PETITION TO GRADUATE

Students completing their program course requirements by the end of a given term must complete a Petition to Graduate (PTG) form available online or in the Registrar’s Office, Academic Advising, and military base locations. The completed form should be submitted to the student’s academic advisor for approval by the deadline published on the academic calendar.

RECORD OF STUDENT INFORMATION

Changes to a student’s contact information (addresses, phone numbers, email, emergency contact, etc.) may be updated online using HPU Pipeline, or submitted in writing to the Registrar’s Office. Students may also submit changes by email from their my.hpu.edu account. Requests to update a student’s name, social security number, or date of birth must be made in writing to the Registrar’s Office and include supporting documentation (e.g., copy of marriage license, divorce decree, etc.).

CONFIDENTIALITY OF ACADEMIC RECORDS (FERPA)

Notification of Student Rights

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords students certain rights with respect to their education records. These rights are:

1. The right to inspect and review student education records within 45 days of the day the University receives a request for access.

Students should submit to the University registrar, dean, or appropriate official, a written, dated, and signed request that identifies the record(s) they wish to inspect. The request
must include the requestor’s full name, date of birth, and student identification number. The University official, in consultation with the registrar, will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request amendment of the student education records that a student believes is inaccurate, misleading, or otherwise in violation of his or her right to privacy.

Students who wish to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it should be changed.

If the University decides not to amend the record as requested by the student, the University will notify the student in writing of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing. The right to provide written consent before the University discloses personally identifiable information contained in student education records, except to the extent that FERPA authorizes disclosure without consent.

The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is defined as a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

The University designates the following as “directory information” and may, upon inquiry, disclose this information at the University’s discretion without prior consent of the student.

a. Name of student
b. Local and other addresses
c. Local and other telephone numbers
d. Email addresses
e. Date of birth
f. Dates of attendance
g. Enrollment status (full-time, part-time, etc.)
h. Major field of study
i. Education level (i.e., undergraduate, graduate)
j. Class standing (i.e., freshman, sophomore, etc.)
k. Previous educational institution(s) attended
l. Degrees received and dates of conferral
m. Honors and awards received
n. Participation in officially recognized activities and sports
o. Weight and height of members of athletic teams

HPU is under no obligation to release directory information to anyone who inquires. FERPA only states that an institution may release directory information. When in doubt, HPU will not release directory information and may require that a written release from the student be provided before directory information is released.
Students have the right to restrict the release of their directory information. To exercise this right, a student must submit a signed request in writing to the HPU Registrar’s Office in person or by mail, 1164 Bishop Street, Suite 216, Honolulu, HI 96813. A request form is available at the Registrar’s Office or at www.hpu.edu/ferpa. Requests must be submitted no later than the last day to add/register for classes, as published by the University, for the term or term that the student is enrolled. Once the request is filed it becomes a permanent part of the student’s record and shall remain in effect until the student instructs Hawai‘i Pacific University, in writing, to have the request removed.

The University will not disclose official transcripts and/or information not identified as “directory information” to non-school officials without prior written consent from the student unless it is an exception under FERPA.

3. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Hawai‘i Pacific University to comply with the requirements of FERPA.

The name and address of the Office that administers FERPA is:

Family Policy Compliance Office  
Department of Education  
400 Maryland Avenue, SW  
Washington DC 20202-4605

Questions regarding the rights and release of information that this Act provides to Hawai‘i Pacific University students should be directed to the University registrar:

Registrar’s Office  
1164 Bishop Street, Suite 216  
Honolulu, Hawai‘i 96813  
Tel. (808) 544-0239  
Email: registrar@hpu.edu

ACADEMIC RECORDS

Complete academic records are maintained in the Registrar’s Office. Students may request the registrar to send an official transcript of their work to a third party at www.hpu.edu/transcripts. The student must pay the transcript fee and settle any outstanding obligations with the University before a transcript may be released. Students who have undertaken academic work at other institutions of higher learning must direct those institutions to have official transcripts forwarded to the Admissions Office at Hawai‘i Pacific University to determine any transfer credit awards. These and other documents may not be issued to third parties nor be reproduced without the permission of the registrar.

GRADING AND GRADE POINT AVERAGE (GPA)

Instructors determine students’ scholastic standing in their courses based on assignments, tests, examinations, class attendance, and participation, as well as other criteria established in course syllabi. Letter grades are awarded by instructors according to a 4.0 scale outlined as follows:

<table>
<thead>
<tr>
<th>LETTER GRADE</th>
<th>DESCRIPTION</th>
<th>QUALITY POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>EXCELLENT</td>
<td>4.0</td>
</tr>
</tbody>
</table>

51
A-  3.7
B+  3.3
B   GOOD  3.0
B-  2.7
C+  2.3
C   AVERAGE  2.0
C-  1.7
D+  1.3
D   POOR  1.0
F   FAILURE  0.0

W   WITHDRAW
   Does not affect GPA but will permanently appear on the transcript

P   PASSING
   Does not affect GPA

CR/NC   CREDIT or NO CREDIT
   Does not affect GPA

I   INCOMPLETE
   Does not affect GPA (see policy below)

AU   AUDIT
   Does not affect GPA; will not earn credit nor grade for course

Note: Grades for graduate courses are generally A, A-, B+, B, B-, C+, C, or F. For more on this policy and its exceptions, see the GRADUATE STUDIES section of this catalog.

The GPA is determined by dividing the total number of quality points earned by the total number of GPA credit hours. The GPA is calculated to two decimal points without rounding.

**COURSE INCOMPLETE POLICY**

The assignment of incomplete grades is reserved for cases of illness, unforeseen predicaments, military assignments, or other emergencies that prevent a student from completing the course by the due date, normally after the last day to drop without a W grade. In such cases, the instructor should ask for documentation and has the option of issuing an “Incomplete” grade at the end of the term. If granted, the “Incomplete” grade will allow a student a maximum period of six months to complete the appropriate course work. If the student does not complete the assignments and the instructor does not submit a grade to the Registrar’s Office by the end of the six-month period, a grade of “F” will be assigned. A student cannot graduate with an outstanding “Incomplete” grade.

**COURSE REPEAT POLICY**

Undergraduate students who receive a grade in a course that is lower than C may repeat that course. Only the last grade attained in a repeated course will be used in the calculation of the student’s grade point average (GPA). An undergraduate student cannot repeat any course for credit in which a grade of C or better is earned unless the course is defined in the current catalog as repeatable for credit. If a course is designated in the catalog as repeatable, then all grades earned in the allowed course attempts will be calculated into the GPA.

If an undergraduate student wants to repeat a course in which a grade of C or better was earned, neither the credit nor the second grade will replace the first course attempt.
Requests to repeat a course in which a grade of C or better is earned, and the course is not designated as repeatable in the catalog, shall require the consent of the department chair and the dean of the college in which the course is offered.

Graduate students who receive a grade lower than B may repeat that course only once more. Only the last grade earned will be calculated into the GPA. A graduate student cannot repeat any course for credit in which a grade of B or better is earned unless the course is defined in the current catalog as repeatable for credit or if the repeat is approved by the department chair and the dean of the college in which the course is offered. If a course is designated in the catalog as repeatable, then all grades earned in the allowed course attempts will be calculated into the GPA.

The following rules apply to any student who repeats a course for credit:

1. Any course being repeated must be taken in a graded status A–F unless the course is only offered on a pass/fail basis.

2. When a course is repeated, all applicable tuition and required fees apply.

3. Credit toward a degree with a passing grade of D or higher may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credits from that course.

4. If the subject code or course number has changed since the student completed the initial course attempt, the department or program offering the course will verify that the repeated course is substantially the same in order to have the policy apply.

5. If the initial course is a cross-listed course, a student may apply the policy in any course in which the initial course is cross-listed and is currently equivalent. If the initial attempt of a course has a modifier such as university honors, the repeated course is not required to have the same course modifier.

Once a bachelor’s or a master’s degree has been granted by HPU, repeating courses for any reason (as a special status or post-baccalaureate student) will not affect the GPA or content of the degree already earned.

Students are strongly encouraged to visit with an academic advisor to determine whether repeating a course is in their best interest. Repeating a course may have an impact on financial aid, insurance, entrance to professional schools, participation in athletics or other extra-curricular activities, immigration status, and other matters.

**HONORS AT GRADUATION**

Honors are based upon the Honors Point Average (HPA). The honors grade point average is based upon the student’s entire academic history. This includes grades for all coursework taken at all institutions of higher learning, including repeated courses.

The Commencement Program is printed prior to the calculation of final grades. As a result, grades for the final semester and/or term will not be included in the honors calculation for the program. Students qualifying for honors at the time of the ceremony have the appropriate honors indicated in the program and are presented with an honors sash at the ceremony.

Honors, as defined below, are based upon all completed courses and grades. Final graduation status, including the awarding of degrees and honors, is determined and certified by the university registrar as posted to the official academic transcript, six to eight weeks after the end of the term.
Honors are awarded based upon the following criteria:

Associate Degree:
Students completing an associate degree may graduate with the designation “With Honors” by completing at least 24 credit hours of coursework at the university and having a minimum grade point average (GPA) of 3.4 for HPU courses and a minimum honors point average (HPA) of 3.4.

Baccalaureate Degree:
Undergraduate students in a baccalaureate degree program may graduate with “Latin honors” if they have completed at least 45 credit hours of coursework at the university. They must have earned a minimum grade point average (GPA) of 3.4 for HPU courses and have achieved the requisite honors point average (HPA) requirements. The corresponding honors designation for the baccalaureate degrees are as follows:

- 3.4–3.69 Cum Laude
- 3.7–3.89 Magna Cum Laude
- 3.9–4.00 Summa Cum Laude

Graduate Degree:
Students in a graduate degree program at the University may graduate with the designation “With Distinction” by attaining a minimum grade point average (GPA) of 3.7 as follows:

- Completion of at least 24 credit hours of coursework at the University toward the MSIS, MSN, or MA, or 27 credit hours toward the MBA, or all semester hours for MATESL, or 39 credit hours for a concurrent degree program.
- A minimum honors point average (HPA) of at least 3.7 for all graduate coursework completed at any college or university.

DEAN’S LIST

At the end of the fall and spring term, full-time undergraduate students (12 or more earned hours of credit) who have earned a GPA of 3.5 or better for the term just completed, are recognized by being placed on the Dean’s List by the Provost/Vice President of Academic Affairs. This honor becomes a permanent part of the student’s academic record and is printed on the transcript.

The college programs requiring practicums or clinical courses in their major, who determine success by a designation of pass/fail credit for those courses, may use the following amended calculation to determine student Dean’s list designation:

- Students must achieve 12 or more earned credit hours for the term.
- A minimum of 6 of the 12 credits must receive a grade designation; however, all of the student’s graded credits for the semester will be used to determine the semester GPA.
- Students must pass any course designated as pass/fail.
- Pass/fail determinations are not defined as graded credits. The number of pass/fail course credits will not be added in the calculation that determines the term GPA.

ACADEMIC PROBATION, SUSPENSION, AND DISMISSAL

Undergraduate students must maintain the minimum GPAs listed below to remain in good academic standing. The number of credit hours attempted and the corresponding GPA are as follows:

<table>
<thead>
<tr>
<th>Credit Hours Attempted</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
After attempting more than 12 credits, a student who does not meet the minimum requirements will be placed on academic probation. Students enrolled part-time will be evaluated after 15 credit hours have been attempted.

Students enrolled in a major with a higher GPA requirement than the standard listed above, will be evaluated on the major’s higher standard.

At the end of each fall and spring term, students will be placed on probation when their cumulative GPA falls below the standard listed above for the cumulative credits attempted.

While on probation, a student must schedule periodic meetings with an academic advisor who will work with the student and monitor the student’s progress. A student on probation is recommended to enroll in 12 credit hours or less during a spring or fall term.

Students who do not raise their GPA to the accepted level outlined above by the end of the next spring term will be subject to academic suspension. Thus, a student placed on probation at the end of one spring term could continue on probation for the following fall term and into the next spring. Students who do not raise their GPA to the required level, based on credits attempted, by the next spring term will be subject to academic suspension.

Suspension appeals are a formalized process initiated by the student and submitted to the Associate Vice President of Academic Affairs. Students approved to return will remain on continued probation for the term in which they return. A student whose suspension appeal has been approved may not appeal a subsequent suspension.

Students who have successfully appealed their suspension will be placed on continued probation status. Students who fail to raise their GPA to the published standard by the end of the next spring term after their suspension has been lifted, will be subject to dismissal, which is final.

**ACADEMIC INTEGRITY POLICY**

1. Academic Integrity Policy (Student Handbook, pg. 47):

It is Hawai‘i Pacific University’s policy that any act of academic dishonesty will incur a penalty up to and including expulsion from the university. A student who cheats on an academic exercise, lends unauthorized assistance to others or who hands in a completed assignment that is not his or her work will be sanctioned. The term academic exercise includes all forms of work submitted either electronically or on paper for points, grade or credit. For details on the Academic Integrity Policy, go to the Student Handbook at [www.hpu.edu/studenthandbook](http://www.hpu.edu/studenthandbook)

2. Academic Grade Appeal Procedures for Students (Student Handbook, pg. 49):

Students have a right to appeal a final course grade when the student believes that the assigned grade does not reflect what the student has earned according to the criteria for grading as outlined by the instructor of the course. It is the responsibility of the instructor of each course to define his/her grading policy and criteria at the beginning of the term and as explicitly as possible. If there is any deviation from this original statement of grading criteria due to extenuating circumstances, all affected students must be informed. It is assumed that the final course grade assigned is correct; thus the student appealing that grade must justify the need for a change of the grade assigned. Students who desire to appeal a final course grade must follow the process described as noted in the Student Handbook at [www.hpu.edu/studenthandbook](http://www.hpu.edu/studenthandbook).

3. Academic Grievance Procedures for Students (Student Handbook, pg. 50):
Students with individual grievances concerning unfair treatment in the course of their studies must follow the procedures as noted in the Student Handbook at www.hpu.edu/studenthandbook.
ADDITIONAL SUPPORT SERVICES
UNIVERSITY LIBRARIES AND LEARNING COMMONS

Hawai‘i Pacific University maintains two libraries—Meader Library on the downtown campus and Atherton Library on the Hawai‘i Loa campus as well as the HPU Aloha Tower Learning Commons. The HPU Libraries are committed to providing a range of instructional services and learning support opportunities to empower students to be effective users of information resources.

Mission
The Hawai‘i Pacific University Libraries and Learning Commons support student learning and faculty research with innovative services, resources, and facilities. They further serve as gathering places for study, collaboration, and instruction, with the goal of exemplifying the mission and shared values of the institution.

The Collections
The HPU Libraries’ collections contain databases, electronic books, print books, periodicals (magazines, journals, and newspapers) and audiovisual materials. The books are classified according to the Library of Congress Classification System and are housed in both campus libraries. Electronic books are available through the HPU Libraries’ online catalog. Emphasis is given to acquiring titles that are academically oriented and relevant to the courses offered by the University. Full text periodical online databases are available via the HPU Libraries’ Tab on HPU Pipeline.

Reference and Instruction Services
Reference and instruction services are offered in each library to provide professional assistance with student and faculty research. For off-campus access to research help, the Libraries’ Tab in Pipeline has a 24/7 chat staffed by reference librarians. The chat service can also be accessed through the course menus in Blackboard. Both library locations offer library instruction sessions to individuals, new student group orientations, as well as in-class, faculty-requested instruction. Librarians offer instructional sessions on an individual basis and in coordination with various scheduled classes.

Access Services
General library services are offered at each branch, including item check-outs and check-ins, book delivery services, reading assignments from instructors, interlibrary loan services, and cashier services for fines and fees. By request, books can be transported between HPU Libraries and the Oceanic Institute.

Library Hours
During the major academic terms, the HPU Libraries are generally open seven days a week including evening hours. Hours vary by location. Extended evening hours are provided prior to the final examination periods during the major academic terms. Library hours are generally shortened during the summer and winter terms. The HPU Libraries are closed on University-observed holidays.

MEADER LIBRARY
Meader Library is located on three floors in the 1060 Bishop Street Building in downtown Honolulu. The Library is named in honor of Dr. James Laurence Meader, the first president of Hawai‘i Pacific University (then Hawai‘i Pacific College). Study rooms, collaborative spaces, comfortable seating, and quiet study areas are provided throughout the library. Computer workstations, printers, photocopiers, media equipment, and wireless Internet are also available. This Library’s collections are primarily devoted to Business, Social Sciences Humanities and Computer Sciences. There are also collections of books to support students learning English and other languages.

Closed Shelves Book Room
This specially designated room contains the various volumes of books that because of their uniqueness and presentation of information require special consideration and handling. Access
to the volumes in this room is by appointment only under supervised and con-trolled conditions.

ATHERTON LIBRARY
Atherton Library is located on the third floor of the Cooke Academic Center on the Hawai‘i Loa campus. It is named to commemorate Frank and Eleanor Atherton, and was funded as a gift of the Atherton Family Foundation. This Library’s collections primarily supports the Diplomacy and Military Studies, Environmental Science, Marine Science, Nursing, Public Health Studies and Social Work degree programs. There are individual study carrels, individual study rooms and general seating areas in the library to accommodate user needs.

Hawaiian-Pacific Collection
The HPU Libraries major collection of books on Hawai‘i and the Pacific Area are located in Atherton library. These materials document the social, historical, educational, scientific, and economic events of this area and its people. The collection is further divided into circulating and reference materials.

HPU ALOHA TOWER LEARNING COMMONS
The HPU Aloha Tower Learning Commons, located on the ground floor of Aloha Tower Marketplace, is the centerpiece of the revitalized Aloha Tower Marketplace. It is a state-of-the art learning and technology center that provides students and faculty with a modern space to collaborate, exchange ideas, socialize and learn as a group. Additionally, the space enriches Honolulu’s intellectual and cultural scene by providing a home for seminars on arts and culture, as well as think-tank sessions for a broad range of ages and demographics.

Students have access to both Windows and Apple computers in the HPU Learning Commons. Windows Laptops are available for check out by students. Wireless access to the internet is available through the facility. The four collaborative meeting rooms have 60” monitors that allow students to share their laptop or mobile device display. The meeting rooms are also equipped for web conferencing. There are various types of work spaces for students to use for studying or group collaborations.

Computing Services
The Information Technology Services Division’s Computing Services department provides the reporting and response systems for various types of computer system issues throughout the University via the ITS Service Desk. The ITS Service Desk supports HPU students, faculty and staff with several software and hardware related requests, including Pipeline accounts, Virtual Cloud support and associated academic applications, email, Blackboard (distance learning), and wireless connectivity.

Technical support is provided to all faculty and staff using University-provided computers and software. The ITS Service Desk may be contacted by email service desk@hpu.edu, or by telephone (808) 566-2411. Requests for assistance received during working hours are acknowledged within 24 hours or the following business day for after-hours requests.

COMPUTING SERVICES
The Information Technology Services Division’s Computing Services department provides the reporting and response systems for various types of computer system issues throughout the University via the ITS Service Desk. The ITS Service Desk supports HPU students, faculty and staff with several software and hardware related requests, including Pipeline accounts, Virtual Cloud support and associated academic applications, email, Blackboard (distance learning), and wireless connectivity.

Technical support is provided to all faculty and staff using University-provided computers and software. The ITS Service Desk may be contacted by email service desk@hpu.edu, or by
telephone (808) 566-2411. Requests for assistance received during working hours are acknowledged within 24 hours or the following business day for after-hours requests.

Education Technology Center (Hawai‘i Loa Campus)

The Education Technology Center (ETC) in the Academic Center on the windward Hawai‘i Loa Campus provides similar services as the main Computer Center downtown with virtual cloud desktop access, printing, copying and scanning services. The ETC also has a hands-on testing computer classroom available to faculty and also open to staff by reservation for training sessions.

The official HPU identification card, the UniCard, is processed each semester by the Education Technology Center for the Hawai‘i Loa Campus students.

HPU Pipeline

HPU Campus Pipeline is HPU’s centralized in-house information and communication center. Applicants to HPU are granted access to Pipeline when they are accepted for admission. Accounts for others are set up within 24 hours of their first registration.

Announcements about activities, deadlines, and services are posted daily and are accessible from anywhere a student can log on to the Internet. Through Pipeline, students may: use a free-of-charge email service; personalize their calendars; review course schedules, financial aid status, and grades; use eAds - a free classified advertisement service for HPU students; update mailing address; view course homepages; review course offerings for upcoming sessions; access library resources; link to many other resources and services, and access to Blackboard courses.

Traditional face-to-face, online and hybrid courses are accessed via Pipeline’s Blackboard class links.

Internet Access

All students and faculty of Hawai‘i Pacific University have access to the internet, online resources and to their academic software and documents through various cloud workstations located in the University libraries, the Computer Centers and the Education Technology Center (ETC), Student Center, Sharky’s Cove, Veteran’s center, and Sea Warrior Center. Additionally, the libraries and computer labs are equipped with iMacs. Each student is provided with free email service available through HPU Pipeline once they register at Hawai‘i Pacific University. Applicants who have been admitted are granted early access. While not institutionally required, it is highly recommended that all students consider owning their own personal computer and peripherals in order to accomplish their academic work.

Wireless Connectivity

The HPU wireless network is available in all buildings and classrooms on the downtown campus and in the Academic Center and residence halls on the Hawai‘i Loa campus, as well as most facilities, including Aloha Tower marketplace and the Oceanic Institute, and all military campus education center locations.

Wireless technology allows students and faculty to access their email, do research on the World Wide Web, and use other Internet resources to complete academic work. The wireless system also enables students and faculty to remotely access most of the programs available on the virtual cloud interface using the VMWare client.

The downtown Computer Center and ETC provide on-site assistance to students, faculty and staff with configuring their computers for wireless use. The Service Desk is available by phone to assist with wireless setup of mobile devices and an FAQ online is also available to guide with wireless connectivity setup.

TUTORING SERVICES

The Center for Academic Success is located on the 6th floor of the Lower Bishop building. It is
open daily to provide free tutoring services for all registered students. A similar service, emphasizing assistance to nursing and science students, is provided in the Education Technology Center (ETC) on the Hawai‘i Loa campus.

Tutoring is available for over 100 courses and covers subject areas such as accounting, computer science, economics, management, mathematics, modern languages, science, and all aspects of English, with heavy emphasis on writing. All tutoring complements and supports classroom instruction. It is designed to meet each student’s individual needs, and is generally given in one-to-one sessions. Tutoring is tailored to aid student in the mastery of basic as well as the further development and refinement of analytical and other skills for academic success. Use of the center’s computer lab for specified computer-assisted tutoring is also available.

OFF-CAMPUS/MILITARY CAMPUS PROGRAMS

MISSION
Off-Campus/Military Campus Programs seeks to provide an effective and challenging education for all military service members, their families, Veterans, and U.S. government civilian personnel. We recognize the need for flexibility without sacrificing academic integrity in educational programs. We use various traditional and distance learning course delivery methods to educate our students in an ever-changing global environment.

PROGRAM AVAILABILITY
Hawai‘i Pacific University offers programs online and on several military installations on O‘ahu:
- Joint Base Pearl Harbor/Hickam,
- Marine Corps Base Hawai‘i–Camp Smith
- Marine Corps Base Hawai‘i–Kaneohe Bay
- Schofield Barracks
- Tripler Army Medical Center
- Coast Guard Station–Sand Island.

Off-Campus/Military Campus Programs offers accelerated sessions throughout the academic year.

Civilian students without access to military installations are responsible for applying and receiving base passes before the start of each term. Information about the base pass process is available at hpu.edu/military

APPLICATION AND ADMISSION
Military affiliated and civilians with high school diploma or GED equivalent are eligible for admission to Off-Campus/ Military Campus Program. Department of Defense (DOD) and Veteran’s education benefits or tuition assistance may be applicable for some applicants. The degree programs are non-sequential to facilitate entry at any point.

Off Campus/Military Campus Program office staff assist with the application and admission process. An application for admission is available online at www.hpu.edu/military. (Note: Undergraduate active duty Army students using tuition assistance must apply through the GoArmyEd Portal at www.goarmyed.com).

Applicants may apply as degree-seeking or “special status.” Degree-seeking students are those who intend to pursue an academic program of study resulting in the conferral of a degree. Special status students are eligible to take up to 15 credits without declaring a degree program.

Degree-seeking students with no prior college transfer credits must submit official high school transcripts or GED and pay a non-refundable application fee. Prospective student with at least 24
credit hours of transferrable credits (prior university/college, CLEP/DSST, may not be required to submit high school or GED transcripts and must provide official college transcripts confirming the 24 transferable credit hours.

Special status students must complete a special status application and submit a non-refundable application fee. If a special status student decides to pursue a degree, the student will need to pay a non-refundable application fee for the degree seeking application. (Applicants to HPU’s graduate programs should refer to the graduate admissions section.)

REGISTRATION FOR COURSES
A schedule of courses is available online at www.hpu.edu/military. Students may register in person for classes at any Off-Campus/Military Campus Programs office on O‘ahu, the Military/Veteran Center or through their campus Pipeline account. Active duty Army students, Army Reservists and Army National Guard members using Army tuition assistance benefits must register for their courses through the Army’s GoArmyEd web portal. Off-island students may register online through HPU’s online portal, Pipeline (Army students should register through GoArmyEd portal). Off-island students may also request a downloadable version of the registration form by contacting MCP via email at: mcponline@hpu.edu. For additional information contact OCP/MCP at: (808) 544-1179.

VETERAN’S BENEFITS
See Military/Veteran Service Center section in the Student Services section of this catalog for detailed information.

ONLINE COURSES
Off-Campus/Military Campus Programs offers eligible students the opportunity to pursue their educational programs with HPU regardless of location. The OCP/MCP online program provides military-affiliated students the opportunity to complete courses with HPU toward its associate or select bachelor degrees. Online courses apply toward meeting residency requirements.

MILITARY CAMPUS PROGRAM DEGREE PROGRAMS

Servicemembers Opportunity Colleges (SOC)
Hawai‘i Pacific University is a member of the Servicemembers Opportunity Colleges (SOC) Consortium and network, which meets the educational needs of servicemembers and their families. SOC institutions recognize and evaluate specialized learning acquired through military service insofar as such learning applies to a program of study. Select degree programs can be completed with the University online. Upon completion of the University’s residency requirements, a relocated student may also continue to study at another accredited institution. Credits earned at the other institution may serve as transfer credits to fulfill Hawai‘i Pacific University degree requirements.

SOC Eligibility Requirements
Active and retired military, members of the Reserves and National Guard, Veterans, Department of Defense employees, and their immediate family members are eligible for participation. SOC guarantees are restricted to specific degree programs. For all other degree programs, consult with an advisor, dean, or program chairperson.

SOC contracts are binding for the degree program of study upon issuance. The contract guarantees that program requirements will not change. Students may, however, opt into a more current version of the program of study at their request.

Students may change their degree programs or majors and receive another SOC contract provided they have not completed a program of study in effect with HPU at the same academic
level (associate or baccalaureate).

Students must complete all University academic and residency requirements to be eligible for graduation under the SOC program. The University currently has established no time limits for completion of SOC degree programs.

**HPU/SOC Residency Requirements**
SOC students must complete 30 credit hours with HPU, including 12 credit hours of major course work in baccalaureate programs (six in Associate degree programs). There are no “final semester” residency requirements for SOC-eligible students. A student unable to complete residency requirements prior to departure from Hawai‘i may complete appropriate HPU online courses to meet these requirements, if available.

**SOC Degree Programs**
The following is a list of Hawai‘i Pacific University’s SOC-approved degree programs or degree programs for which SOC contracts are issued:

**ASSOCIATE DEGREE PROGRAMS**
*Associate of Arts*
- General Studies

*Associate of Science*
- Computer Science
- Criminal Justice
- General Business
- Mathematics
- Military Studies
- Supervisory Leadership

**BACCALAUREATE DEGREE PROGRAMS**
*Bachelor of Arts*
- History
- Human Resource Development
- International Studies
- Psychology

*Bachelor of Science*
- Business Administration
- Computer Science
- Criminal Justice
- Diplomacy and Military Studies

All associate degree programs and select baccalaureate degree programs are available entirely online. Refer to the Off-Campus/Military Campus Programs website at www.hpu.edu/military for the most current list of degree programs available entirely online.

**NAVY COLLEGE PROGRAM DISTANCE LEARNING PROGRAM PARTNERSHIP (NCPDLP) /EARMYU**
HPU participates as a partner in both the Navy College Program Distance Learning Partnership and EarnyU. Refer to the Off-Campus/Military Campus Programs website www.hpu.edu/military for the most current information on these programs.

**MILITARY NATIONAL TEST CENTERS**
Off-Campus/Military Campus Programs operates five National Test Centers (NTC) at military
bases on O‘ahu. The NTCs provide military-affiliated students access to CLEP, DSST, and Pearson VUE examinations. The MCP NTCs are located at: Joint Base Pearl Harbor/Hickam (both locations), Tripler Medical Center, Schofield Army Barracks, and MCBH–Kaneohe Bay. Testing schedules vary by base. For additional information email: mcptesting@hpu.edu.
Undergraduate Programs

Hawai‘i Pacific University offers the following undergraduate degree programs and majors. Some of these programs include multiple concentration options. For more detailed information, please refer to the program requirement elsewhere in this catalog.

¹ Associate degrees are only available to military community students through the College of Extended and Interdisciplinary Education and the College of Business.

² Degree also delivered through College of Extended and Interdisciplinary Education online and on base through the Military Campus Programs.

³ Individualized Major: Students may also choose to earn a BA degree with a specialized major outside of the established majors. Such students must consult with an academic advisor and have their respective program approved by the appropriate dean.
Minors

Hawai‘i Pacific University offers minor programs of study in many fields. Students may choose to pursue a minor in addition to their major field of study.

A minor program of study encompasses completion of selected courses that are fewer in number and less comprehensive than a major. At least four courses are required for a minor. Students must complete a minimum of six (6) semester credits of minor course work in residence with HPU in order to be awarded the minor. Although the minor is not listed on the student’s diploma, it does appear on the HPU transcript provided that the student has completed all necessary course work at the time the student’s degree is conferred. Minors must be identified prior to degree conferral. Students may not add minor courses of study to degree programs that have already been completed and conferred on the HPU transcript. Please refer to the “Minors” section of this catalog for specific requirements for each minor.

The General Education Program at Hawai‘i Pacific University is designed to help students lead exultant and courageous lives as intelligent members of a complex society. By introducing students to different ways of knowing, the General Education Program challenges students to become creative and innovative, both within their chosen career fields and in their wider lives. In so doing, the General Education Program prepares students for the challenges and opportunities of the 21st century.

The purpose of the General Education Program is to provide students with a liberal arts foundation, set in the rich cultural context of Hawai‘i. Diverse courses outside the major will inspire lifelong learning by introducing students to ideas, perspectives, and experiences relevant to their lives. The General Education Program cultivates the skills, knowledge, and values expected of all educated persons through the achievement of specific student learning outcomes.

The unique features of the general education are the Hawaiian context and Hawai‘i’s place as the crossroads of the pacific. This curriculum will be delivered to an internationally diverse, engaged student body and will emphasize multidisciplinary approaches, applied learning, and experiential learning, rooted in a tropical island community.

The general education curriculum is aligned with the following Western Association of Schools and Colleges (WASC) core competencies: critical thinking, information literacy, oral communication, quantitative reasoning, and written communication.

GENERAL EDUCATION PROGRAM OBJECTIVES:

The general education features three program objectives that are aligned with thirteen student learning outcomes:

Skills (Mākau Naʻauao):

Students will develop skills in writing, quantitative reasoning, critical thinking, group process, and communication so they can find, evaluate, and implement information effectively to solve problems.

- **Critical Thinking** – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- **Communication** – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through written, oral, or visual communication, in English or modern languages.

- **Information & Technology Literacy** – Students will recognize the need for information and use technology to locate, interpret, determine the credibility of, and use the information effectively, ethically, and legally.

- **Quantitative Reasoning** – Students will interpret, calculate, analyze, represent, and clearly communicate quantitative information through mathematical tools (e.g. equations, graphs, or diagrams).

- **Creative Problem-Solving** – Students will define and research problems, identify problem-solving strategies, generate and select appropriate solutions, and evaluate their outcomes.
• **Aesthetic Appreciation and Expression** – Students will engage in creative practices to interpret creative works and express ideas through the arts.

• **Teamwork** – Students will identify best practices for effective teamwork and group dynamics, demonstrate strong interpersonal skills, and contribute in groups and resolve conflicts.

**Knowledge and Perspectives (‘Ike):**

Students will explore diverse social and cultural viewpoints and gain knowledge about the historical, geographical, natural, technological and contemporary forces that impact and shape the world.

• **Natural Sciences** – Students will investigate the natural world, demonstrate problem-solving skills, and utilize the scientific method to develop hypotheses and propose experimental methods to describe, explain, and predict natural phenomena.

• **Historical and Conceptual Perspectives** – Students will investigate the major concepts, ideologies, and movements that have molded the development of human societies to interpret the temporal framework of contemporary society.

• **Sustainability** – Through a multidisciplinary perspective and applied, experiential learning opportunities, students will examine the interconnections and interdependency of ecological, social-cultural, and economic systems, and explain how the dynamics of these systems impact nature, human communities, and cultures.

• **Societies & Cultures** – Students will explore cross-cultural perspectives, investigate trends and analyze issues of various communities. They will identify behaviors, thoughts, and perspectives that both distinguish regions, countries, languages and cultures from one another and connect them.

**Values (Mea Waiwai):**

• **Civic Engagement** – Students will identify best practices in civic engagement, and engage in efforts to constructively influence the public good.

• **Ethical Reasoning and Values** – Students will identify, articulate, and evaluate the ethical perspectives of others and themselves.

**THE STRUCTURE OF THE GENERAL EDUCATION PROGRAM**

**First Year Core Curriculum Areas**

Within the first year at HPU or directly following any required foundational writing course(s), students will complete one course in each of the following curriculum areas:

• **Hawai‘i and the Pacific**

This curriculum area provides multidisciplinary courses & is required for all HPU students (including transfer students with an Associate in Arts or Associate in Science Degree). Courses in this curriculum area are designed to deepen student awareness of the unique place in which they have chosen to live and study. Multidisciplinary courses analyze historical developments, science, politics, values, art, geography, music, religion, and cultural practices within Hawai‘i and across the Pacific.
Quantitative Analysis and Symbolic Reasoning

Courses in this curriculum area prepare students for an increasingly data-driven society in which the ability to use and critically evaluate information, especially numerical information, is central to the role and requirements of an informed citizen. Students will acquire the skills necessary to identify and understand a given problem, organize relevant information and assumptions, form a conjecture, decide upon and apply an appropriate strategy, draw conclusions, and communicate the result to others. Through these processes, students will enhance their ability to make rational decisions based on data, and apply mathematical, statistical, or symbolic reasoning to complex problems and decision-making.

Writing and Information Literacy I

The first course in this sequence facilitates students' entry into the intellectual life of Hawai‘i Pacific University by helping them to become more capable and independent academic readers and writers. With their small section size and emphases on research, information literacy, the writing and revision process, critical analysis, and collaboration, courses in this curriculum area help students develop academic habits and skills important to their success in future courses.

Writing and Information Literacy II

The second course in this sequence facilitates students' entry into the intellectual life of Hawai‘i Pacific University by further helping them to become more capable and independent academic readers and writers. With their small section size and emphases on research, information literacy, the writing and revision process, critical analysis, and collaboration, courses in this curriculum area help students develop academic habits and skills important to their success in future courses.

General Education Core Curriculum Areas

Following or in tandem with the First Year Common Core, students will be required to take one course in each of the remaining eight curriculum areas:

The American Experience

Courses in this curriculum area explore multiple histories, social movements, cultural heritages, and belief systems that shape the United States – its norms, laws, public policies and discourses – in the context of the country’s rich and varied cultural diversity. Students will develop oral communication skills, consider ethical and social decisions from multiple perspectives, explore individual and group beliefs, and critically examine factors supporting and sustaining inequitable treatment of groups of people in the U.S.

Creative Arts

The creative arts celebrate the human capacity to imagine, create, and transform ideas into expressive forms, such as paintings, poems, music, theater, digital design, and photography. Courses in this curriculum area introduce students to ways of experiencing and understanding a variety of artistic concepts, structures, and forms. Students will engage in imaginative and intuitive practices to develop their ability to understand creative works and express ideas through the arts.

Critical Thinking and Expression

Critical thinking intersects with oral, written, and visual communication skills as
fundamental proficiencies required for academic, professional, and personal success. Courses in this curriculum area prepare students to think critically about questions of fact, value, or concept. Students will learn the techniques, strategies, and methods of critical thinking; practice oral and visual communication skills; and demonstrate the ability to express ideas and arguments clearly and coherently. *It is highly recommended that students fulfill this Curriculum area requirement early in their degree plan.*

- **Global Crossroads and Diversity**

Courses in this curriculum area explore cross-cultural perspectives and selected concepts that underscore contemporary issues of global concern. Students will develop awareness of cultural practices and traditions in the context of a changing, globalizing world while reflecting on their own values and customs. Students will learn exchange ideas and connect with diverse communities and cultures.

- **The Natural World**

Courses in this curriculum area focus on the nature of discovery, scientific reasoning, and invention to develop critical awareness of the methods and limits of scientific inquiry. Students will cultivate observational and analytical skills, particularly in reference to the natural world.

- **The Sustainable World**

Courses in this curriculum area will help students understand the changing world they live in and become active contributors as society seeks to achieve sustainability. Students will examine, through multidisciplinary perspectives, the inherent connection between natural, social, and economic systems and engage in applied and experiential learning opportunities. Students will engage in community activities that encourage them to think of a future they wish to create, rather than react to present problems by reductive problem solving.

- **Technology and Innovation**

Courses in this curriculum area explore technology systems and processes in order to develop an understanding of the impact of technology on individuals, the environment, and the global community. Students will apply modern technology for acquiring, analyzing and sharing information; and through this they will learn both physical and social aspects of technology, explore innovative practices and be challenged to draw upon their imagination and knowledge to propose novel solutions to problems.

- **Traditions and Movements that Shape the World**

Courses will help students explore the historical development of human societies and important movements and themes which have shaped and continue to influence the world. Students will assess information, ask questions, debate ideas and explain the significance of political, social, scientific, and cultural trends in a historical context.
FIRST YEAR CORE CURRICULUM AREAS

Hawai‘i and the Pacific (3 credits – 1 course)

This curriculum area provides multidisciplinary courses and is required for all HPU students (including transfer students with an Associate in Arts or Associate in Science Degree). Courses in this curriculum area are designed to deepen student awareness of the unique place in which they have chosen to live and study. Multidisciplinary courses analyze historical developments, science, politics, values, art, geography, music, religion, and cultural practices within Hawai‘i and across the Pacific.

Students successfully completing these courses will obtain the following skills, knowledge, perspectives and values:

Skills (Mākau Na‘auao):

- *Aesthetic Appreciation and Expression* – Students will engage in creative practices to interpret creative works and express ideas through the arts.

Knowledge and Perspectives (‘Ike):

- *Historical and Conceptual Perspectives* – Students will investigate the major concepts, ideologies, and movements that have molded the development of human societies to interpret the temporal framework of contemporary society.

- *Sustainability* – Through a multidisciplinary perspective and applied, experiential learning opportunities, students will examine the interconnections and interdependency of ecological, social-cultural, and economic systems, and explain how the dynamics of these systems impact nature, human communities and cultures.

Values (Mea Waiwai):

- *Civic Engagement* – Students will identify best practices in civic engagement, and engage in efforts to constructively influence the public good.

Students must select one course from the following options:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AL</td>
<td>Languages in the Pacific</td>

</tr>
</tbody>
</table>

Courses in this Curriculum Area must be taken in a student’s first year at HPU and is required for all HPU students (including transfer students with an Associate in Arts or Associate in Science Degree).
Quantitative Analysis and Symbolic Reasoning (3 credits – 1 course)*

Courses in this curriculum area prepare students for an increasingly data-driven society in which the ability to use and critically evaluate information, especially numerical information, is central to the role and requirements of an informed citizen. Students will acquire the skills necessary to identify and understand a given problem, organize relevant information and assumptions, form a conjecture, decide upon and apply an appropriate strategy, draw conclusions, and communicate the result to others. Through these processes, students will enhance their ability to make rational decisions based on data, and apply mathematical, statistical, or symbolic reasoning to complex problems and decision-making.

Students successfully completing these courses will obtain the following skills:

Skills (Mākau Naʻauao)

- **Critical Thinking** – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- **Quantitative Reasoning** – Students will interpret, calculate, analyze, represent, and clearly communicate quantitative information through mathematical tools (e.g. equations, graphs, or diagrams).

- **Creative Problem-Solving** – Students will define and research problems, identify problem-solving strategies, generate and select appropriate solutions, and evaluate their outcomes.

Students must select one course from the following options:

- CSCI 1534 Data Analysis and Visualization – the Good, the Bad, the Ugly
- MATH 1120 Mathematics in the Modern World
- MATH 1123 Statistics
- MATH 1130 Pre-calculus I
- MATH 1150 Pre-calculus I and II
- MATH 2214 Calculus I
- PHIL 2090 Principles of Logic
- PSY 1100 Probabilistic Thinking: Randomness, Chaos and Chance

Courses in this Curriculum Area must be taken in a student’s first year at HPU or directly following any required developmental mathematics course(s).

*Place out option: Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Quantitative Analysis and Symbolic Reasoning.

Written Communication and Information Literacy I (3 credits – 1 course)*

The first course in this sequence facilitates students’ entry into the intellectual life of Hawai‘i Pacific University by helping them to become more capable and independent academic readers and writers. With their small section size and emphases on research, information literacy, the writing and revision process, critical analysis, and collaboration, courses in this curriculum area help students develop academic habits and skills important to their success in future courses.

Students successfully completing these courses will obtain the following skills:
Skills (Mākau Naʻauao):

- **Critical Thinking** – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- **Communication** (written) – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through written language.

- **Information and Technology Literacy** – Students will recognize the need for information and use technology to locate, interpret, determine the credibility of, and use the information effectively, ethically, and legally.

Courses in this curriculum area must be taken in the student’s first year at HPU or directly following any required foundational writing course(s).

Students must select one course from the following options:

**Written Communication and Information Literacy I**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>WRI 1100</td>
<td>Writing and Analyzing Arguments</td>
</tr>
<tr>
<td>WRI 1150</td>
<td>Literature and Argument</td>
</tr>
</tbody>
</table>

*Place out option: Students who score 630 or above on the SAT critical reading or 28 or above on the ACT English may place out of Written Communication and Information Literacy I. Students will not receive course credit for a course in this category, though will have satisfied the Written Communication and Information Literacy I course requirement.*

**Written Communication and Information Literacy II (3 credits – 1 course)**

The second course in this sequence further facilitates students’ entry into the intellectual life of Hawai’i Pacific University by helping them to become more capable and independent academic readers and writers. With their small section size and emphases on research, information literacy, the writing and revision process, critical analysis, and collaboration, courses in this curriculum area help students develop academic habits and skills important to their success in future courses.

Students successfully completing these courses will obtain the following skills:

Skills (Mākau Naʻauao):

- **Critical Thinking** – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- **Communication** (oral) – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through oral presentations.

- **Communication** (visual) – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through written language.

- **Information and Technology Literacy** – Students will recognize the need for information and use technology to locate, interpret, determine the credibility of, and
use the information effectively, ethically, and legally.

Courses in this curriculum area must be taken in a student’s first year at HPU or directly following any required developmental writing course.

Students must select one course from each of the following areas:

**Written Communication and Information Literacy II**

**GENERAL EDUCATION CORE CURRICULUM AREAS**

**The American Experience (3 credits – 1 course)**

Courses in this curriculum area explore multiple histories, social movements, cultural heritages, and belief systems that shape the United States – its norms, laws, public policies and discourses – in the context of the country’s rich and varied cultural diversity. Students will develop oral communication skills, consider ethical and social decisions from multiple perspectives, explore individual and group beliefs, and critically examine factors supporting and sustaining inequitable treatment of groups of people in the U.S.

Students successfully completing these courses will obtain the following skills, knowledge, perspectives, and values:

**Skills (Mākau Naʻauao):**

- *Communication (oral)* – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through oral presentations.

**Knowledge and Perspectives (ʻIke):**

- *Historical and Conceptual Perspectives* – Students will investigate the major concepts, ideologies, and movements that have molded the development of human societies to interpret the temporal framework of contemporary society.

- *Societies and Cultures* – Students will explore cross-cultural perspectives, investigate trends and analyze issues of various communities. They will identify behaviors, thoughts, and perspectives that both distinguish regions, countries, languages and cultures from one another and connect them.

**Values (Mea Waiwai):**

- *Ethical Reasoning and Values* – Students will identify, articulate, and evaluate the ethical perspectives of others and themselves.

Students must select one course from the following options:

**Creative Arts (3 credits – 1 course)**
The creative arts celebrate the human capacity to imagine, create, and transform ideas into expressive forms, such as paintings, poems, music, theater, digital design, and photography. Courses in this curriculum area introduce students to ways of experiencing and understanding a variety of artistic concepts, structures, and forms. Students will engage in imaginative and intuitive practices to develop their ability to understand creative works and express ideas through the arts.

Students successfully completing these courses will obtain the following skills, knowledge and perspectives:

Skills (Mākau Naʻauao):

- Aesthetic Appreciation and Expression – Students will engage in creative practices to interpret creative works and express ideas through the arts.

- Communication (written, oral, or visual) – Students will organize their thoughts, feelings, concepts, and information, to effectively, clearly and persuasively convey their perspectives through written, oral, or visual communication, in English or modern languages.

Knowledge and Perspectives (ʻIke):

- Societies and Cultures – Students will explore cross-cultural perspectives, investigate trends and analyze issues of various communities. They will identify behaviors, thoughts, and perspectives that both distinguish regions, countries, languages and cultures from one another and connect them.

Students must select one course from the following options:

Critical Thinking and Expression (3 credits – 1 course)

Critical thinking intersects with oral, written, and visual communication skills as fundamental proficiencies required for academic, professional, and personal success. Courses in this curriculum area prepare students to think critically about questions of fact, value, or concept. Students will learn the techniques, strategies, and methods of critical thinking, practice oral and visual communication skills, and demonstrate the ability to express ideas and arguments clearly and coherently.

Students successfully completing these courses will obtain the following skills:

Skills (Mākau Naʻauao):

- Critical Thinking – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- Communication – Students will organize their thoughts, feelings, concepts, and
information, to effectively, clearly and persuasively convey their perspectives through written, oral, or visual information, in English or modern languages.

- **Creative Problem-Solving** – Students will define and research problems, identify problem-solving strategies, generate and select appropriate solutions, and evaluate their outcomes.

Students must select one course from the following options:

*It is highly recommended that students fulfill this Curriculum area requirement early in their degree plan.

**Global Crossroads and Diversity (3 credits – 1 course)**

Courses in this curriculum area explore cross-cultural perspectives and selected concepts that underscore contemporary issues of global concern. Students will develop awareness of cultural practices and traditions in the context of a changing, globalizing world while reflecting on their own values and customs. Students will learn exchange ideas and connect with diverse communities and cultures.

Students successfully completing these courses will obtain the following skills, knowledge, and perspectives:

**Skills (Mākau Naʻauao):**

- **Teamwork** – Students will identify best practices for effective teamwork and group dynamics, demonstrate strong interpersonal skills, and contribute in groups and resolve conflicts.

**Knowledge and Perspectives (ʻIke):**

- **Historical and Conceptual Perspectives** – Students will investigate the major concepts, ideologies, and movements that have molded the development of human societies to interpret the temporal framework of contemporary society.

- **Societies and Cultures** – Students will explore cross-cultural perspectives, investigate trends and analyze issues of various communities. They will identify behaviors, thoughts, and perspectives that both distinguish regions, countries, languages and cultures from one another and connect them.

**The Natural World (3 credits – 1 course)**
Courses in this curriculum area focus on the nature of discovery, scientific reasoning, and invention to develop critical awareness of the methods and limits of scientific inquiry. Students will cultivate observational and analytical skills, particularly in reference to the natural world.

Students successfully completing these courses will obtain the following skills, knowledge and perspectives:

**Skills (Mākau Naʻauao):**

- *Quantitative Reasoning* – Students will interpret, calculate, analyze, represent, and clearly communicate quantitative information through mathematical tools (e.g. equations, graphs, or diagrams)

- *Creative Problem-Solving* – Students will define and research problems, identify problem-solving strategies, generate and select appropriate solutions, and evaluate their outcomes.

**Knowledge and Perspectives (ʻIke):**

- *Natural Sciences* – Students will investigate the natural world, demonstrate problem-solving skills, and utilize the scientific method to develop hypotheses and propose experimental methods to describe, explain, and predict natural phenomena.

Students must select one course from the following options:

- **BIOL 1000** Introductory Biology
- **CHEM 1000** Introductory Chemistry
- **CHEM 2050** General Chemistry
- **GEOG 1000** Introduction to Physical Geography
- **GEOL 1000** The Dynamic Earth
- **MARS 1000** Introductory to Oceanography
- **MARS 2110** Ocean Environments of the Pacific Islands
- **PHYS 1020** Astronomy

**The Sustainable World (3 credits – 1 course)**

Courses in this curricular area help students understand the changing world they live in and become active contributors as society seeks to achieve sustainability. Students will examine, through multidisciplinary perspectives, the inherent connection between natural, social, and economic systems and engage in applied and experiential learning opportunities. Students will engage in community activities that encourage them to think of a future they wish to create, rather than react to present problems by reductive problem solving.

Students successfully completing these courses will obtain the following skills, knowledge, perspectives and values:

**Skills (Mākau Naʻauao):**

- *Teamwork* – Students will identify best practices for effective teamwork and group dynamics, demonstrate strong interpersonal skills, and contribute in groups and resolve conflicts.

**Knowledge and Perspectives (ʻIke):**

- *Natural Sciences* – Students will investigate the natural world, develop problem-solving skills, and utilize the scientific method to develop hypotheses and propose
experimental methods to describe, explain, and predict natural phenomena.

- **Sustainability** – Through a multidisciplinary perspective and applied, experiential learning opportunities, students will examine the interconnections and interdependency of ecological, social-cultural, and economic systems, and explain how the dynamics of these systems impact nature, human communities and cultures.

**Values (Mea Waiwai):**

- Civic Engagement – Students will identify best practices in civic engagement, and engage in efforts to constructively influence the public good.

Students must select one course from the following options:

- **ARTS 1003** Sustainable Art and Design
- **BIOL 1500** Conservation Biology
- **ENVS 3000** Sustainability and the Environment
- **HIST 3650** History of Oil in the Modern World
- **MARS 2100** Marine Resource Management: Social, Ecological, and Cultural Dimensions
- **NSCI 2000** Lessons for Building Sustainable Communities
- **NSCI 3000** Building Sustainable Communities
- **SWRK 2010** Social Sustainability, Social Work, and Entrepreneurship

**Technology and Innovation (3 credits – 1 course)**

Courses in this curriculum area explore technology systems and processes in order to develop an understanding of the impact of technology on individuals, the environment, and the global community. Students will apply modern technology for acquiring, analyzing, and sharing information; and through this endeavor, they will learn both physical and social aspects of technology, explore innovative practices and be challenged to draw upon their imagination and knowledge to propose novel solutions to problems.

Students successfully completing these courses will obtain the following skills:

**Skills (Mākau Na’auao):**

- **Critical Thinking** – Students will synthesize information from text and/or other media, explain issues, analyze concepts and evidence, assess assumptions, define their own perspectives and positions, and evaluate the implications and consequences of their conclusions.

- **Information and Technology Literacy** – Students will recognize the need for information and use technology to locate, interpret, determine the credibility of, and use the information effectively, ethically, and legally.

- **Creative Problem-Solving** – Students will define and research problems, identify problem solving strategies, generate and select appropriate solutions, and evaluate their outcomes.

Students must select a course from the following options:

- **CSCI 1041** Digital Literacy in a Global Society
- **CSCI 1061** Mobile Technologies for the 21st Century
- **CSCI 1611** A Gentle Introduction to Computer Programming
- **CSCI 1555** Health Information Systems
- **HIST 2630** The History of Science and Technology
- **MATH 1234** Introduction to Cryptology
Traditions and Movements that Shape the World (3 credits – 1 course)

Courses in this curriculum area will help students explore the historical development of human societies and important movements and themes which have shaped and continue to influence the world. Students will assess information, ask questions, debate ideas and explain the significance of political, social, scientific, and cultural trends in a historical context.

Students successfully completing these courses will obtain the following knowledge perspectives, and values:

Knowledge and Perspectives (ʻIke):

• *Historical and Conceptual Perspectives* – Students will investigate the major concepts, ideologies, and movements that have molded the development of human societies to interpret the temporal framework of contemporary society.

• *Societies and Cultures* – Students will explore cross-cultural perspectives, investigate trends and analyze issues of various communities. They will identify behaviors, thoughts, and perspectives that both distinguish regions, countries, languages and cultures from one another and connect them.

Values (*Mea Waiwai*):

• Ethical Reasoning and Values – Students will identify, articulate, and evaluate the ethical perspectives of others and themselves.

Hawai‘i Pacific University offers the Associate of Science degree in General Business to students enrolled through Military Campus Programs upon completion of 60 credit hours of required and elective subjects. Students may continue to take the courses required for a Bachelor of Science in Business Administration with a concentration in General Business, Accounting, Business Economics, Finance, Hospitality and Tourism Management, International Business, Management, or Marketing.

**PROGRAM OBJECTIVES**

*Students who earn the Associate of Arts in General Studies will:*

1. Conduct analysis of data and use business reasoning to resolve business issues to achieve organizational goals.
2. Demonstrate the ability to apply technology.
3. Describe in writing the primary management functions of a business and organizational structure options.
4. Solve business problems and make decisions based on data, analysis, and best practices.
5. Present orally analysis, findings, and recommend action to be taken in business situations.

**FOUNDATIONAL COURSES (0 TO 11 CREDITS)**

**GENERAL-EDUCATION COURSES (36 CREDITS)**

**OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (12 CREDITS)**

**UNRESTRICTED ELECTIVES (15 CREDITS)**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach 60 credit hours.
The mission of the College of Business Administrations is to prepare profession-ready global leaders. The Bachelor of Science in Business Administration allows the student a choice from among nine concentrations – Accounting, Business Economics, Finance, General Business, Hospitality and Tourism Management, International Business, Management, Management Information Systems, and Marketing. Courses often use project based learning activities as a means to connect the knowledge and skills that are developed in the classroom with the application in real world settings. The emphasis in courses is on cross functional awareness by considering organizations as systems whereby each functional area has a role to play in successful and well managed operations.

PROGRAM OBJECTIVES

Students who select this degree will have the capability to:

1. Demonstrate an understanding of organizational vocabulary, structures, and cultures.
2. Demonstrate an understanding of the processes that support systems, stakeholders, and decision-making in professional and global contexts.
3. Use critical thinking skills to collect and analyze data, draw logical conclusions, and present information in a comprehensive manner.
4. Effectively communicate qualitative and quantitative information in speaking, writing, and presenting.
5. Perform research using the appropriate authoritative literature and other secondary sources.
6. Contribute to project-based activities as both a leader and team member.
7. Identify attitudes that reflect sound principles, values, ethics, and professional responsibility.

III. CONCENTRATION REQUIREMENTS (21 Credits)

Accounting Concentration

This concentration is for those students who like the challenges of demystifying puzzles as well as problem solving. Students are prepared to seek accounting positions in public accounting, private industry, government service, and not-for-profit organizations. Internships are available and may be considered as an elective for this concentration. Alumni are employed by international firms, regional and local firms, by public and private corporations, and by various government and non-government agencies.

Plus one Upper-division Accounting elective

Business Economics Concentration

Business Economics is a structured concentration and provides excellent preparation for students who prefer exposure to the various functional areas of business such as finance, accounting, marketing, management, and management information systems, as a solid grounding in economic fundamentals. Business Economics graduates are employed by financial institutions, brokerage firms, insurance companies, government, and other financial related organizations.

Plus two upper-division electives from Economics or Finance

Finance Concentration

Students selecting this concentration develop analytical and financial management skills, improve decision-making abilities, and enhance their communication skills. Students are provided with a sound foundation in economic theory that underlies the functions of domestic and international financial markets. In addition, the curriculum encourages an intensive focus on both the application and theory of operations of the capital markets. Finance graduates are employed by banks, credit unions, brokerage houses, financial institutions, insurance companies, government agencies, and other related organizations.
ECON 3100 Introduction to Econometrics
ECON 3300 Money and Banking
ECON 3400 International Trade and Finance
FIN 3200 Personal Finance
FIN 3300 Investments
FIN 3400 Financing in the Money and Capital Markets

Plus one elective from any economics, finance, or real estate upper-division electives

General Business Concentration

This concentration allows students the flexibility to select courses from several business disciplines with the constraint of completing a pre-determined set of courses. Any seven Business upper-division electives are required for this concentration.

Hospitality and Travel Management Concentration

Few places of the world are better suited to study Hospitality and Tourism Management than in Hawai‘i, one of the world’s greatest tourist destinations. Students will have the opportunity to experience a living laboratory of tourism management; with over 8 million tourists visiting per year, tourism is the heart of Hawai‘i’s economy. Through internships and partnership projects with major hotels and travel providers, plus one of the most diverse cultural student and faculty populations, affiliations with major global associations and professional travel clubs, HTM students are often already connected to their first career position when they graduate.

The Hospitality and Tourism Management concentration will expose students to all aspects of hospitality and tourism from a management focus. The courses combine theory and practice with opportunities for project based learning, group projects, and field experiences to prepare students to be professional-ready global leaders in the field of hospitality & tourism. 600 hours of work experience in the hospitality-related field is required.

HTM 3110 Hotel and Resort Management
HTM 3210 Food and Beverage Management
HTM 3220 Special Events Management
HTM 3580 Cultural Values and Hotel Management
HTM 3610 Travel Industry Marketing
HTM 4410 Destination Development and Marketing

HTM WORK EXPERIENCE (600 hours of hospitality related work experience: 3 Credits)

International Business Concentration

This concentration provides a strong foundation in the current issues and problems that international managers face. It is based on an analytical approach that is comparative in nature, and the orientation is toward practical applications. Global problems related to population, resources, energy, food, the environment, and other pertinent topics are also presented and discussed. A variety of international cultures are studied with particular attention given to values and consumer patterns in those cultures. Students will have the opportunity to analyze business activities across cultures, social and environmental consequences of location decisions, and the alternative use of resources. This concentration is based on an understanding of basic economic and business decision making.

Complete the following courses:
ECON 3400 International Trade and Finance
MKTG 3420 International Marketing
Plus one appropriate upper-division business elective

Plus one of the following courses:

- GEOG 3730 Economic Geography
- PSCI 3500 Comparative Politics
- PSCI 3510 Political Development
- PSCI 3520 Politics and Government in Asia
- PSCI 3525 Islam and Politics
- PSCI 3560 The Politics of Culture and Race

Plus one of the following courses:

- INTR 3100 International Political Economy
- INTR 3275 Global Governance
- INTR 3300 International Law
- INTR 3400 International Relations of Asia

Plus one of the following courses:

- INTR 39XX Any Contemporary Nations series course

Plus one of the following courses:

- HIST 3231 Europe: the 20th Century
- HIST 3501 Islam and the Middle East
- HIST 3551 Pacific Island History
- HIST 3650 History of Oil in the Modern World

Management Concentration

This concentration provides for the study of contemporary management principles applicable to all occupations and organizations. A strong business administration core is augmented by a wide variety of management electives directed toward the student’s particular interests. Current issues and problems related to organizational environments and structures are introduced, with a strong emphasis on internal business management. The place, function, and effect of small business in the U.S. economy are examined. In order to meet the challenge of today and tomorrow, an exploration of the process of change in organizations, and models of innovation are studied. A systems approach to planning and decision-making, including the management processes, information support, and the evaluation of public relations are also examined.

- MGMT 3400 Human Resource Management

Plus two courses from the following:

- MGMT 3420 Compensation Management
- MGMT 3444 Training and Development in Organizations
- MGMT 3650 Employment and Labor Law for Business
MGMT 3700  Human Resource Planning and Staffing
MGMT 3750  International Human Resource Management

*Plus any three upper-division management courses*  *Plus one course from the following:*

ACCT 3200  Managerial Accounting
MKTG 3630  Global Distribution and Supply Chain Marketing
MKTG 4400  Marketing Management

**Management Information Systems Concentration**

This concentration is designed to produce leaders in management information systems, this concentration combines a business administration core with hands-on computer systems experience. The curriculum is based on the ACM standards. Students have opportunities to enroll in internships that may lead to career positions. There is also the opportunity to in career-related student organizations and honor societies. This concentration also provides the foundation for students who wish to continue their education in the Master of Science in Information Systems (MSIS) degree program.

MIS 3020  Information Systems Project Management
MIS 3050  Application Development
MIS 3060  Systems Analysis and Design
MIS 3065  Data and Information Management
MIS 3070  IT Infrastructure
MIS 4000  Enterprise Architecture

*Plus one appropriate upper-division business elective*

**Marketing Concentration**

This concentration is for those who want a broad exposure to the fundamentals of marketing. The concentration prepares practitioners and managers through exposure to the many facets of marketing: development, advertising, distribution, sales or products and services. Students will gain an understanding of research, planning, analysis, communication, business relations, and decision-making techniques, and applications are presented. Problems, issues, and alternative solutions involving product strategy, pricing, distribution, promotion, and marketing research will be discussed, both from a national and international perspective. In general, marketing principles will be applied to multinational and international business practices. Retailing and management of the marketing function will also be studied.

MKTG 3100  Consumer Behavior
MKTG 3110  Market Research
MKTG 3420  International Marketing
MKTG 3630  Global Distribution and Supply Chain Marketing
MKTG 4400  Marketing Management

*Plus any two appropriate marketing electives.*

**IV. UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
COLLEGE OF EXTENDED AND INTERDISCIPLINARY EDUCATION
Hawai‘i Pacific University offers the Associate of Arts degree in General Studies to students enrolled through Off-Campus/Military Campus Programs upon completion of 60 credit hours of required and elective subjects. The AA in General Studies can be tailored to lead directly into most Bachelor programs. In the degree, students will complete coursework for all Curriculum Areas in the General Education Program and the remaining credits are taken as unrestricted electives.

**PROGRAM OBJECTIVES**

*Students who earn the Associate of Arts in General Studies will:*

1. *Develop skills in writing, quantitative reasoning, critical thinking, group process, and communication so they can find, evaluate, and implement information effectively to solve problems.*

2. *Explore diverse social and cultural viewpoints and gain knowledge about the historical, geographical, natural, technological and contemporary forces that impact and shape the world.*

3. *Discern and assess the values that underlie various crucial positions, articulate their own values with coherence and integrity, and participate in community projects that bridge academia and the public good.*

**FOUNDATIONAL COURSES (0 TO 11 SEMESTER CREDITS)**

**GENERAL EDUCATION COURSES (36 CREDITS)**

**UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
ASSOCIATE OF SCIENCE DEGREE IN COMPUTER SCIENCE
Total credits required: 60 credits

Hawai‘i Pacific University offers the Associate of Science degree in Computer Science to students enrolled through Military Campus Programs upon completion of 60 credit hours of required and elective subjects. The AS in Computer Science leads directly into the Bachelor of Science in Computer Science degree program. In addition to offering classroom-based instruction, HPU makes the AS in Computer Science degree program available entirely online through Off-Campus/Military Campus Programs.

PROGRAM OBJECTIVES
Students who earn the Associate of Science in Computer Science will:
1. Use spreadsheets for tabular data analyses and corresponding graphics.
2. Apply fundamental concepts of functions, relations, sets, and counting strategies in problem solving.
3. Demonstrate logic and proof techniques in solving problems in discrete mathematics.
4. Apply problem-solving techniques for developing algorithms and computer programs.
5. Demonstrate appropriate use of fundamental programming constructs and data types.
6. Apply complex data structures, abstraction, and object-oriented methodologies when developing software solutions for problems.
7. Create graphical user interfaces to interact with software users.

FOUNDATIONAL COURSES (0-11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)

Students will complete one course in each of the following first-year general education core curriculum areas:
1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:
5. The American Experience
6. Creative Arts
7. Critical Thinking & Expression
8. Global Crossroads & Diversity
9. The Natural World
10. The Sustainable World
11. Technology & Innovation
12. Traditions & Movements that Shape the World

For those students intending to continue onto a bachelor’s degree, it is recommended they utilize their unrestricted electives to complete the remaining 6 courses of the general education requirement.
OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES
(6-9 CREDITS)

Quantitative Analysis & Symbolic Reasoning (choose one option)
MATH 1130 Pre-Calculus I and MATH 1140 Pre-Calculus II or
MATH 1150 Pre-Calculus I & II

Complete one of the following
CSCI 1041 Digital Literacy in a Global Society (Technology & Innovation)
CSCI 1061 Mobile Technologies for the 21st Century (Technology & Innovation)
CSCI 1534 Data Analysis and Visualization: the Good, the Bad, the Ugly
(Quantitative Analysis & Symbolic Reasoning)

MAJOR REQUIREMENTS (25-27 CREDITS)

Complete one of the following
CSCI 1911 Foundations of Programming
CSCI 1611 Gentle Introduction to Computer Programming

Complete all of the following
CSCI 2301 Discrete Mathematics for Computer Science
CSCI 2911 Computer Science I
CSCI 2912 Computer Science II
CSCI 2913 Data Structures
CSCI 2916 Computer Science I Lab

Complete one of the following
MATH 1123 Statistics
BIOL 2050+2051 General Biology I + Lab
CHEM 1020+1021 Introduction to Chemistry and the Environment +Lab
CHEM 2050+2051 General Chemistry I + Lab
ENVS 2000+2001 Principles of Environmental Science + Lab
MARS 2062+2063 Marine Biology + Lab
PHYS 2030+2031 College Physics I + Lab
PHYS 2050+2051 General Physics I + Lab

Complete two additional CSCI courses, 2000-level or higher

UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
ASSOCIATE OF SCIENCE DEGREE IN CRIMINAL JUSTICE
Total credits required: 60 credits

Hawai‘i Pacific University offers the Associate of Science degree in Criminal Justice to students enrolled through Off-Campus/Military Campus Programs upon completion of 60 credit hours of required and elective subjects. The AS in Criminal Justice leads directly into the Bachelor of Science in Criminal Justice. In addition to offering classroom-based instruction, HPU makes the AS in Criminal Justice degree program available entirely online through Off-Campus/Military Campus Programs.

PROGRAM OBJECTIVES
Students who earn the Associate of Science in Criminal Justice will:

1. Define the operation and purposes of the major components of the criminal justice system, police, courts and corrections.
2. Develop oral and written skills that effectively articulate analysis of criminal justice research and apply solutions to a wide range of contemporary criminal justice issues.

FOUNDATIONAL COURSES (0-11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)

Students will complete one course in each of the following first-year general education core curriculum areas:

1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:

5. The American Experience
6. Creative Arts
7. Critical Thinking & Expression
8. Global Crossroads & Diversity
9. The Natural World
10. The Sustainable World
11. Technology & Innovation
12. Traditions & Movements that Shape the World

For those students intending to continue onto a bachelor’s degree, it is recommended they utilize their unrestricted electives to complete the remaining 6 courses of the general education requirement.

## UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
Hawai‘i Pacific University offers the Associate of Science degree in Health Professions to students enrolled through Off-Campus/Military Campus Programs upon completion of 60 credit hours of required and elective subjects. The AS in Health Professions helps prepare students for health-related careers or further study in healthcare such as the BS in Nursing. In addition to offering classroom-based instruction, HPU makes the AS in Health Professions degree program available entirely online through Off-Campus/Military Campus Programs.

PROGRAM OBJECTIVES
Students who earn the Associate of Science in Health Professions will:
1. Demonstrate the knowledge needed for entrance into, and success in, health profession schools in the fields of Nursing, Pre-Medicine, and Allied Health.
2. Synthesize a foundation of knowledge for a career in healthcare occupations.

FOUNDATIONAL COURSES (0 TO 11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)

Students will complete one course in each of the following first-year general education core curriculum areas:
1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:

UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
ASSOCIATE OF SCIENCE DEGREE IN HOMELAND SECURITY
Total credits required: 60 credits

The major is designed to prepare students for careers in homeland security and such law-related employers as federal, state, local government and private sector law enforcement and security organizations. The degree readies students for continued academic studies while leading directly into the Bachelor of Science in Diplomacy and Military Studies, Bachelor of Science in Criminal Justice or the Bachelor of Arts in International Studies.

PROGRAM OBJECTIVES
Students who earn the Associate of Science in Homeland Security will:
1. Apply the perspectives of Political Science, Criminal Justice and History to demonstrate mastery of Homeland Security.
2. Demonstrate understanding of key processes in Homeland Security issues and dilemmas.

FOUNDATIONAL COURSES (0 TO 11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)
Students will complete one course in each of the following first-year general education core curriculum areas:
1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I

UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
ASSOCIATE OF SCIENCE DEGREE IN MATHEMATICS
Total credits required: 60 credits

Hawai‘i Pacific University offers the Associate of Science degree in Mathematics to students enrolled through Off-Campus/Military Campus Programs upon completion of 60 credit hours of required and elective subjects. The AS in Mathematics provides a foundation for further studies directed towards a major or a minor in math or in a math-based discipline. In addition to offering classroom-based instruction, HPU makes the AS in Mathematics degree program available entirely online through Military Campus Programs.

PROGRAM OBJECTIVES
Students who earn the Associate of Science in Mathematics will:
1. Interpret and form inferences from mathematical constructs such as tables, formulas, and graphs.
2. Represent mathematical information symbolically, visually, numerically and verbally.
3. Apply mathematical techniques toward solving quantitative problems in mathematics, statistics, and in other math-based disciplines.

FOUNDATIONAL COURSES (0-11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)

Students will complete one course in each of the following first-year general education core curriculum areas:
1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:
5. The American Experience
6. Creative Arts
7. Critical Thinking & Expression
8. Global Crossroads & Diversity
9. The Natural World
10. The Sustainable World
11. Technology & Innovation
12. Traditions & Movements that Shape the World

For those students intending to continue onto a bachelor’s degree, it is recommended they utilize their unrestricted electives to complete the remaining 6 courses of the general education requirement.

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3-6 CREDITS)

Quantitative Analysis & Symbolic Reasoning (one of the following)
MATH 1130 Pre-Calculus I
MATH 1140 Pre-Calculus II
MATH 1150 Pre-Calculus I & II
MATH 1123 Statistics
Technology & Innovation (one of the following)
  CSCI  1611  Gentle Introduction to Computer Programming
  MATH  1234  Introduction to Cryptology

MAJOR REQUIREMENTS (25-28 CREDITS)

Choose either
  MATH  1130 and MATH  1140  Pre-Calculus I and Pre-Calculus II or
  MATH  1150  Pre-Calculus I & II

Complete all of the following
  CSCI  2911  Computer Science I
  CSCI  2916  Computer Science I Lab
  MATH  1123  Statistics
  MATH  2214  Calculus I
  MATH  2215  Calculus II

Complete two of the following:
  MATH  2216  Calculus III
  MATH  3350  Linear Algebra
  MATH  3307  Differential Equations

Complete one of the following:
  CSCI  1611  Gentle Introduction to Programming
  CSCI  1911  Foundations of Programming
  CSCI  2301  Discrete Math for Computer Science
  MATH  2326  Decision Making
  MATH  1234  Introduction to Cryptology

UNRESTRICTED ELECTIVES (14-17 CREDITS)

The number of unrestricted elective credits needed vary depending on the number of credits
that overlap between the general education requirements and the major requirements, but
students will need to earn enough college-level credits to reach a total of 60 credit hours.
Hawai‘i Pacific University offers the Associate of Science degree in Military Studies to students enrolled through Military Campus Programs upon completion of 60 credit hours of required and elective subjects. Students may continue to take the courses required for a Bachelor of Science in Diplomacy and Military Studies. In addition to offering classroom-based instruction, HPU makes the AS in Military Studies available entirely online through Military Campus Programs.

**PROGRAM OBJECTIVES**

Students who earn the Associate of Science in Military Studies will:

1. **Apply the perspectives of history, political science, and international relations to understand military studies.**

2. **Place questions and issues concerning the role of the military within their chronological and geographical context to serve as a foundation for more in-depth inquiries.**

3. **Make use of critically reflective tools for interpreting pertinent historical, cultural, philosophical, and political issues.**

**FOUNDATIONAL COURSES (0 TO 11 CREDITS)**

**GENERAL EDUCATION COURSES (18 CREDITS)**

Students will complete one course in each of the following first-year general education core curriculum areas:

1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:

5. The American Experience
6. Creative Arts
7. Critical Thinking & Expression
8. Global Crossroads & Diversity
9. The Natural World
10. The Sustainable World
11. Technology & Innovation
12. Traditions & Movements that Shape the World

For those students intending to continue onto a bachelor’s degree, it is recommended they utilize their unrestricted electives to complete the remaining 6 courses of the general education requirement.
OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (12 CREDITS)

HIST 1001 Traditions and Encounters: World Cultures to 1500 (Traditions & Movements that Shape the World)
HIST 1002 Global Crossroads: 1500-Present (Global Crossroads & Diversity)
HIST 1401 American Stories: Themes in American History to 1877 (The American Experience)
HIST 1558 Living History of Hawai‘i (Hawai‘i & the Pacific)

LOWER-DIVISION MAJOR REQUIREMENTS (15 CREDITS)

INTR 1000 The International System
PSCI 1400 American Politics
PSCI 2000 Introduction to Politics
   Plus two additional courses approved by the program director

UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college level credits to reach a total of 60 credit hours.
ASSOCIATE OF SCIENCE DEGREE IN SUPERVISORY LEADERSHIP

Total credits required: 60 credits

This Associate of Science offers the student an introduction to the study of leadership. It will incorporate an examination of the theories of leadership, its styles, traits and myths including the major processes underlying human behavior. Students will explore the nature and responsibilities of the supervisor-as-leader and will cover tools for decision making and career skills involving both personal planning and interpersonal relations such as time management, goal setting, assertiveness and networking. Application of military training and experience to this program will be based on the credit recommendations provided by the American Council on Education (ACE).

PROGRAM OBJECTIVES

Students who earn the Associate of Science in Supervisory Leadership will:
1. Explain the use of motivational theories and principles in leading employees.
2. Describe the functions and responsibilities of supervisors as leaders.
3. Demonstrate the functions of a team as a constructive member and as its leader.

FOUNDATIONAL COURSES (0 TO 11 CREDITS)

GENERAL EDUCATION COURSES (18 CREDITS)

Students will complete one course in each of the following first-year general education core curriculum areas:
1. Hawai‘i & the Pacific
2. Quantitative Analysis & Symbolic Reasoning
3. Writing & Information Literacy I
4. Writing & Information Literacy II

In addition, students will take one course from at least two of the remaining general education curricular areas:
5. The American Experience
6. Creative Arts
7. Critical Thinking & Expression
8. Global Crossroads & Diversity
9. The Natural World
10. The Sustainable World
11. Technology & Innovation
12. Traditions & Movements that Shape the World

For those students intending to continue onto a bachelor’s degree, it is recommended they utilize their unrestricted electives to complete the remaining 6 courses of the general education requirement.

MAJOR REQUIREMENTS (15 CREDITS)

- HRD 1000  Introduction to Human Resource Development
- HRD 2000  Integrated Talent Management
- PADM 1000  Introduction to Leadership
- PADM 2000  Supervisory Leadership

Plus one additional course approved by the program director

UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 60 credit hours.
The Public Administration degree at Hawai‘i Pacific University is a comprehensive study of the organization of governments, their policies, programs and the behaviors of public servants. The degree includes preparation to serve as managers in local, state, and federal government, focusing on the formal study of executive management and institutional structure. Graduates with the Bachelor in Public Administration will be able to better compete for careers in government and in the non-profit sector.

**PROGRAM OBJECTIVES**

The Bachelor in Public Administration will:

1) Ensure that students are able to identify problems or objectives associated with public administration issues, collect and analyze evidence in support of those problems or objectives, assess assumptions, and define relevant individual perspectives.

2) Facilitate student communication both in writing and orally and in individual and team presentations such that their thought and feeling are synthesized relevantly, effectively, and clearly, and persuasively communicate their perspectives through written language and oral communication.

3) Confirm that students can interpret, calculate, analyze, and interpret quantitative information using mathematical, statistical and/or reasoning to solve complex problems.

4) Utilize motivational theories and principles for leading employees to include performance evaluations, counseling and career development, grievance, and disciplinary procedures.

**I. LOWER DIVISION COURSES**

**FOUNDATIONAL COURSES** (0 - 11 Credits)

**III. UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF ARTS
MAJOR: HUMAN RESOURCE DEVELOPMENT
Total Credits required: 120 Credits

Human Resource Development (HRD) is the strategic and integrated use of training and development, organizational development, and other talent management activities to improve individual and organizational performance. The HRD program has been developed based on resources and guidelines from the Association for Talent Development, the Academy of Human Resource Development, and the Society for Human Resource Management. The program focuses on the development of student knowledge and capabilities in the following nine competency areas:

1) Strategic Talent Management
2) Instructional Design
3) Training Delivery
4) E-learning and Learning Technologies
5) Measurement, Evaluation, & Analytics
6) Organizational Development
7) Organizational Leadership
8) Organizational Staffing
9) Project Management

PROGRAM OBJECTIVES
Upon completion of the program students who major in human resource development will be able to:

1) Describe, design, recommend, and evaluate training and development activities aimed at increasing the performance of individuals or groups in organizational setting.
2) Describe, design, recommend, and evaluate organizational development activities based on behavioral science that are aimed at increasing the effectiveness of organizations.
3) Describe, design, recommend, and evaluate talent management strategies or systems to attract, utilize, and retain people with the skills and aptitude required to meet organizational goals.
4) Develop a holistic perspective of HRD activities by creating an HRD project aligned with the strategic business objectives of an organization.

I. LOWER DIVISION COURSES

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)

PSY 1000 Introduction to Psychology (Critical Thinking and Expression)
LOWER-DIVISION MAJOR REQUIREMENTS (9 Credits)

HRD 1000 Introduction to Human Resource Development
HRD 2000 Strategic Talent Management
PADM 1000 Supervisory Leadership

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (30 Credits)

CJ 3000 Ethics and Justice
HRD 3100 Principles of Instructional Design
HRD 3100 Training Methods and Delivery in Business
HRD 3120 E-Learning and Learning Technologies
HRD 3130 Measurement, Evaluation & ROI of Training
HRD 3300 Human Resource Project Management
HRD 3400 Organizational Staffing
PADM 3000 Analytical Techniques and Methods
PSY 3120 Group Dynamics in Organizations
HRD 4000 HRD Career Development Capstone

UPPER-DIVISION MAJOR ELECTIVE REQUIREMENTS (6 Credits)

Complete two courses from the following:

ANTH 3350 Diversity in the Workplace
COM 3350 Team Building
COM 3420 Business Communications
PADM 3400 Public Personnel Administration
PADM 3800 Non-Profit Management
HRD 3300 Human Resource Project Management
PSY 3120 Applications of Psychology to Management
PSY 3122 Industrial and Organizational Psychology

Plus one upper-division elective chosen from ANTH, COM, MGMT, PSY, or SOC.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF ARTS
MAJOR: INDIVIDUALIZED
Total Credits required: 120 Credits

PROGRAM DESCRIPTION
A flexible program that permits students to design a course of study that combines academic rigor and intellectual content from several disciplines, or in one or two fields in which the University does not otherwise offer a major.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION REQUIREMENTS (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)

LOWER-DIVISION MAJOR REQUIREMENTS (6-18 Credits)
To be determined by the academic advisor and the appropriate dean. These should be courses numbered at the 1000- and 2000-level which are relevant to the particular focus of the individualized major and/or are prerequisites for the chosen upper division courses. If any of the listed courses are also eligible for the common core, students may count such courses in both places.

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (36-51 Credits)
To be determined by the academic advisor and the appropriate Dean. Courses should be numbered at the 3000- or 4000-level

III. UNRESTRICTED ELECTIVES
The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, and the number of credits required by the individualized program, but students will need to earn enough college-level credits to reach a total of 120 credits.
The HPU School of Education provides a bachelor’s degree program in elementary education that prepares candidates for licensing in Hawai‘i and 49 other states in grades K-6.

Guided by a profound belief in active, collaborative, experiential, reflective, and transformative learning as well as a deep commitment to diversity and educational technology, this degree program is based on an innovative, inquiry-oriented, standards driven, field-based curriculum that integrates content and pedagogy and employs an electronic portfolio assessment system to evaluate the teacher candidate’s progress toward achieving professional standards. In addition, HPU provides teacher candidates with cutting edge, course web page technology tools and access to online periodical databases in education.

University faculty, mentor teachers, and principals join in a unique partnership to deliver an innovative curriculum that has been designed to develop professional educators who are reflective practitioners dedicated to the scholarship of teaching and learning and school renewal.

PROGRAM OBJECTIVES

Students who complete the Bachelor of Education in Elementary Education will:

1. Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and design and implement developmentally appropriate and challenging learning experiences.
2. Use an understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments, which enable each learner to meet high standards.
3. Work with others to create environments that support individual and collaborative learning and encourage positive social interaction, active engagement in learning, and self-motivation.
4. Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and create learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.
5. Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
7. Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. Understand and use a variety of instructional strategies to encourage learners to develop a deep understanding of content areas and their connections and to build skills to apply knowledge in meaningful ways.
9. Engage in ongoing professional learning and use evidence to continually evaluate his or her practice, particularly the effects of their choices and actions on others (learners, families, other professionals, and the community), and adapt practice to meet the needs of each learner.
10. Seek appropriate leadership roles and opportunities to take responsibility for student learning and collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

III. UNRESTRICTED ELECTIVES
The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF SCIENCE
MAJOR: CRIMINAL JUSTICE
Total Credits required: 120 Credits

This major is designed to prepare students for jobs and careers in law and other-related fields such as federal, state, and local levels. The program covers theoretically based criminology and practical-based criminal justice programs. Areas of study cover the theoretical aspect of criminal behavior, as well as practical application of skills to the criminal justice field. The faculty members teaching criminal justice courses represent a broad spectrum of academic disciplines, including law, law enforcement, psychology, sociology, and administration of criminal justice. The curriculum is designed to expose the students to all areas of the criminal justice filed and develop skills applicable to future employment.

PROGRAM OBJECTIVES:

Students who major in Criminal Justice will:
1. Critically analyze the criminal justice system and its aims and objectives.
2. Apply their knowledge to evaluate and analyze the causes, consequences and responses to crime and its interrelatedness to a broad range of criminal justice applications.
3. Define the operation and purposes of the major components of the criminal justice system: police, courts, and corrections.
4. Demonstrate effective problem-solving skills through creating practical solutions to contemporary issues identified through the study of the processes of national and global criminal justice systems.
5. Develop oral and written skills that effectively articulate analysis of criminal justice research and apply solutions to a wide range of contemporary criminal justice issues.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0 - 11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (6 Credits)

PSCI 1400 American Political System (The American Experience)
PSY 1000 Introduction to Psychology (Critical Thinking and Expression)

LOWER-DIVISION MAJOR REQUIREMENTS (18 Credits)

CJ 1000 Violence in American Society
CJ 1500 Cybersecurity
CJ 2050 Basic Criminology
CJ 2060 Justice Systems

And any two of the following:

HMLD 2000 Disaster Preparedness and Response
SOC 1000 Introduction to Sociology
SOC 2000 Social Problems and Policy

II UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (21 Credits)

CJ 3000 Ethics and Justice
CJ 3070 Justice Management
CJ 3300 Criminal Procedures
CJ  3320  Corrections: Processes and Programs
CJ  3500  Criminal Law
CJ  3550  Crime Scene Investigation: Theories and Practices
SOC  3100  Methods of Inquiry

UPPER-DIVISION ELECTIVE REQUIREMENTS

Four Additional Upper-Division courses chosen from: (12 Credits)

CJ  3310  Law Enforcement: Contemporary Issues
CJ  3510  Crime Victims and Justice
CJ  3520  Drug Abuse and Justice
CJ  3530  Juvenile Deviancy and Justice
CJ  3600  Special Topics
LAW  3410  Constitutional Law

CAPSTONE (3 Credits)

CJ  4900  Seminar in Criminal Justice

III. UNRESTRICTED ELECTIVES:
The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
COLLEGE OF HEALTH AND SOCIETY
BACHELOR OF SCIENCE IN NURSING
Total Credits required: 120 Credits

The Bachelor of Science in Nursing degree is conferred upon students who satisfactorily complete the general education requirements and the prescribed curriculum. To earn this degree, a student must complete a minimum of 120 Credits hours and meet all the requirements of the nursing major with at least a 2.75 cumulative nursing grade point average and an overall HPU cumulative grade point average of 2.75 or higher.

The Nursing Program is approved by the Hawai‘i Board of Nursing and is accredited by the Commission on Collegiate Nursing Education (CCNE).

PROGRAM OBJECTIVES
Students who major in nursing will:
1. Synthesize knowledge from the humanities, arts and sciences to provide competent nursing services within a multicultural society.
2. Effectively utilize the nursing process to prioritize the dynamic integration of body, mind and spirit.
3. Consistently demonstrate effective, assertive and professional verbal, non-verbal and written communication with all members of the health care team.
4. Apply therapeutic communication skills to assess and facilitate patients’, families’, groups’, and communities’ understanding of their own experience.
5. Integrate the caring ethic as the foundation of nursing practice.
6. Provide culturally competent nursing care to promote health outcomes of diverse populations.
7. Apply the research process to deliver evidence-based care.
8. Utilize information systems to support nursing and deliver patient centered care.
9. Collaborate in community service in response to the diverse needs of people served.
10. Integrate critical thinking, diagnostic, moral and ethical reasoning to assist the patient in achieving mutually determined health outcomes.
11. Integrate principles of leadership, management, and health care policies into nursing practice.
12. Pursue knowledge and expertise commensurate with the evolving scope of professional nursing practice.

MATH 1123 Statistics

GENERAL PREREQUISITES

- Students must have a minimum 2.75 cumulative GPA prior to entering 2000 level nursing courses.
- Students must maintain a minimum HPU and NUR GPA of 2.75 in order to progress to the next level clinical course.
- Two course failures will lead to dismissal from the nursing program. Students may repeat only once, to obtain a grade of C or better.
- If an “Unacceptable Practice” investigation is in progress and/or if a student receives an “Unacceptable Practice” citation in a nursing (NUR) course, the student may not withdraw from the course. Students will need to have a clearance (signature on the withdrawal form) from the dean of Nursing or designee in order to withdraw from nursing (NUR) courses.

CLINICAL HEALTH REQUIREMENTS

See CNHS website for current clinical health requirements www.hpu.edu/CNHS/BSN/Clinical_Health_Requirements.html

LEVEL ONE NURSING REQUIREMENTS (12 Credits)

NUR 357 Interventions Lab
NUR 3900 Leadership and Management in Nursing
NUR 3964 Comprehensive Health Care
NUR 3965 Comprehensive Health Care Laboratory
NUR 4700 Nursing Research Proposal Development

*One upper-division elective from Nursing or a related field*

**LEVEL FIVE NURSING REQUIREMENTS (12 Credits)**
NUR 4950 Comprehensive Health Care
NUR 4951 Comprehensive Health Care Laboratory
NUR 4960 Developing a Healthy Community
NUR 4961 Developing a Healthy Community Laboratory

**II. UNRESTRICTED ELECTIVES (9 Credits)**

The number of unrestricted elective Credits needed will vary depending on the number of Credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level Credits to reach a total of 120 credits.
NURSING PATHWAYS

RN TO BSN PATHWAY

Students who have been admitted to Hawai‘i Pacific University, who are currently licensed as an RN in the state of Hawai‘i may be enrolled in the RN to BSN Pathway.

Upon completion of the general ed. courses below, RNs may enroll in nursing courses:

WRI 1100 Analyzing and Writing Arguments
WRI 1200 Research, Argument and Writing

REQUIREMENTS
NUR 3360 Concepts and Issues for Professional Nurses
NUR 3900 Leadership and Management in Nursing
NUR 4700 Nursing Research Proposal Development (MATH 1123 prerequisite or corequisite)
NUR 4950 Comprehensive Health Care
NUR 4951 Comprehensive Health Care Laboratory
NUR 4960 Developing a Healthy Community
NUR 4961 Developing a Healthy Community Laboratory
NUR xxxx Nursing Elective

LPN TO BSN PATHWAY

Students who are Licensed Practical Nurses may be eligible for the pathway in order to qualify the student must have:
• Completed all General Education (GenEd) requirements
• A cumulative GPA of 2.75 or higher. Note: Only courses meeting BSN requirements apply to GPA calculation and GPA must remain 2.75 or higher for progression and graduation in the nursing program.
• Have a current Hawai‘i State LPN license (AD Military are exempt).
• Have one (1) year of recent acute care experience.
• ATI TEAS Test score of 60% or higher.
• A personal statement and resume.

HPU Credits for completion of an accredited LPN/LVN Program

NUR 2950/2951 Nursing Concepts and Processes (LPN Credits) 3/2
NUR 2963 Communication for Health Care Professionals (LPN Credits) 2
NUR 3952/3953 Gerontologic Nursing (LPN Credits) 1/2
NUR 3962/3963 Adult Health I (LPN Credits) 3/3
NUR 3964/3965 Adult Health II (LPN Credits) 3/4
**Equivalency Testing**

*Prior to beginning the 1st Semester, Equivalency Testing must be completed (see below)*!

NUR 2970/2971* Health Assessment (HPU Test-out) 3

*Prior to beginning the 2nd Semester, Equivalency Testing must be completed (see below)*

MILITARY HOSPITAL CORPSMAN (HM) TO BSN PATHWAY IN NURSING

HPU Credits for completion of an accredited Military Hospital Corpsman (HM) Program after review of transcripts by a military transcript evaluator.

Students who are Military Hospital Corpsman (HM), may be eligible for the pathway. In order to qualify the student will:

- Completion of all General Education (GenEd) requirements and all science and math Prerequisite courses (refer to BSN program for required math and science courses)
- Have a cumulative GPA of 2.75 or higher, (Only courses meeting BSN Requirements apply to GPA calculation), and must maintain 2.75 or higher GPA to remain in pathway.
- Have a current Hawai‘i State LPN license (military personnel are exempt).
- Have one (1) year of recent acute care experience.
- ATI TEAS Test 60% or higher.
- Personal statement and resume.

BACHELOR OF SCIENCE IN PUBLIC HEALTH
Total Credits required: 120 Credits

The Public Health program provides graduates with the knowledge and essential skills necessary to become active members of the public health workforce. The curriculum provides a strong base for anyone wishing to pursue a career in public health or move forward onto graduate school. Core courses require students to explore the history of the public health, ethics, human physiology, human disease, community health, drugs and society, healthcare systems, culture and health, epidemiology, health policy, health education program planning and evaluation, health promotion and wellness management, research methods, international health, and environmental health. Three semesters of public health practicum courses have hands-on learning opportunities in real-world settings, wherein they apply what they have learned from the classrooms and on-campus laboratories, under the mentorship of experienced public health professionals from established off-campus health organizations. The overall goal of the program is to prepare students for public health careers and to reinforce a desire for lifelong learning and humanitarian service to our local and global communities.

PROGRAM OBJECTIVES
Students who major in Public Health will:
1. Integrate knowledge from general education courses and biological, physical, social and health sciences to synthesize skills in computing, speaking, writing and analysis, research, and critical thinking in daily tasks and activities related to public health practices.
2. Apply acquired knowledge and communication skills to work effectively individually and in teams toward accomplishing goals in public health.
3. Apply knowledge of public health issues and cultural competency and the impact of cultural values and ethnicity on understanding health and illness, wellness management and the utilization of public health services to improve population health.
4. Analyze current Federal and State health legislation, regulations, and standards, and their effect on public health professional practice.
5. Evaluate population-based data and patterns of morbidity and mortality using epidemiological methods.
6. Analyze health-related theories that drive health-behavior change interventions and programs
7. Utilize scientific research methods to evaluate efficacy of health promotion, wellness management and disease prevention programs.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0 - 11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION (9 Credits)
WRI 1100 Analyzing & Writing Assignment
WRI 1200 Research, Argument, and Writing
MATH 1123 Statistics

LOWER-DIVISION MAJOR REQUIREMENTS (27 Credits)

BIOL 2030 Anatomy and Physiology
BIOL 2032 Anatomy and Physiology II
BIOL 2040 Microbes and Human Health
PH 1000 Introduction to Personal and Community Health
PH 1200 History of Public Health
PH 1300 Public Health and Ethics
PH 2010 Drugs and Society
PH 2020 Human Disease
II. UPPER-DIVISION REQUIREMENTS (39 Credits)

PH  3000  Community Health: Theory and Practice
PH  3001  Research, Evaluation, and Planning for Health Science
PH  3015  Culture and Health
PH  3020  Epidemiology
PH  3030  Health Promotion and Wellness Management
PH  3040  Health Education Planning, Theory, and Practice
PH  3050  International Health
PH  3080  Practicum I
PH  4000  Environmental Health
PH  4010  Health Policy Analysis
PH  4030  Practicum II
PH  4910  Practicum III
PH  4920  Public Health Capstone Seminar

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The mission of Hawai‘i Pacific University’s Bachelor Degree in Social Work is to prepare appropriate undergraduate students, especially working adults, for entry into the competent, effective generalist practice of social work at the beginning level. Hawai‘i Pacific University’s social work students should unashamedly want to “make the world a better place” through caring, professional practice. They should appreciate that social work’s heritage, commitment, values, and methods offer one means of doing this.

**PROGRAM GOALS**

1. *To develop students’ competence in the use of the generalist problem-solving model with client systems of all sizes.*
2. *To prepare graduates who practice competently with diverse populations.*
3. *To prepare graduates who understand the social contexts of social work practice at micro, mezzo, and macro levels, including the changing nature of those contexts.*
4. *To promote the values and ethics of professional social work in the program and in students’ practice*
5. *To develop in students an appropriate foundation for and valuing of lifelong learning, in practice or in graduate education.*

**III. UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
COLLEGE OF LIBERAL ARTS
The anthropology major stresses the refinement of intellectual skills and the nourishing of citizen scholars. The program is a valuable means for emphasizing the cross-disciplinary trends in the social and physical sciences. When students graduate with a degree in anthropology, they are trained in critical analytical thinking and writing and are capable of responsible membership in a global society. Students may select a Pacific-Hawaiian Studies emphasis. Graduates are well prepared for graduate study in social sciences and/or employment opportunities in the health care industry, social service agencies, international and local corporations, educational institutions, non-governmental organizations, and not-for-profit groups.

MISSION STATEMENT:
Our mission is to inspire and enable students to become citizens of a global community who effectively and responsibly engage with cultural and social difference. We aspire to give students the competency and emotional intelligence to be able to engender positive change both within themselves and in the world around them.

PROGRAM OBJECTIVES
1. Student will demonstrate that they have engaged with differences that they normally do not experience in everyday life and rather than simply tolerating (or being threatened by) them, use these differences as an engine for their own personal growth as citizens in a global world.
2. Demonstrate through the use of contextual analysis and comparison an understanding of political and cultural frames that shape everyday perceptions and behaviors.
3. Demonstrate the ability to conceive of and make concrete proposals for social change that promotes a more just and compassionate vision of reality.
4. Demonstrate the motivation to actively and effectively engage with the world around them in socially productive ways.
5. Demonstrate the skills needed to undertake graduate work in anthropology or other related disciplines.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0 - 11 Credits)

**III. UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The B.A. in Asian and Pacific Studies is an interdisciplinary major grounded in the humanities with study-abroad opportunities. Students cultivate practical applications of a sophisticated understanding of Asian and Pacific countries, languages, literatures, philosophies and artistic and religious traditions of peoples from Asia and the Pacific. The focus to the Pacific concentration is on the Pacific Islands and includes New Zealand and Australia; the focus of the program’s concentration on Asia includes South, Southeast, and East Asia.

PROGRAM OBJECTIVES
Students who major in Asian and Pacific Studies will:
1. Devise a multidisciplinary understanding of Asian and Pacific cultures, their values, histories, and worldviews, and articulate these through research papers of projects.
2. Evaluate and construct practical applications of humanities based mastery of specific Asian or Pacific cultures.
3. Engage in an intermediate level of fluency in one Asian or Pacific language and be able to successfully navigate its culture.
4. Demonstrate advanced writing competencies and specialized working knowledge of specific Asian or Pacific regions.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (9 Credits)
Choose one of the following:

AL  1050  Languages in the Pacific
ARTH 1001  Arts of Oceania
ENG 1101  Representations of Pacific Life
HIST 1558  Living History of Hawai‘i
PHIL 1001  Philosophies of Hawai‘i and the Pacific

Complete both courses below (6 Credits):

MARS 2110  Ocean Environment of the Pacific Islands
CLST 1000  Great Books, East and West

LOWER-DIVISION LANGUAGE REQUIREMENTS (8 Credits)
TWO semesters of the same Asian or Pacific language: CHIN, HAWN, JPE, etc.

Students are welcome to enroll in language courses abroad or at other institutions and transfer the Credits towards this degree program.

Students may be able to test out of the language requirement.

II. UPPER-DIVISION REQUIREMENTS

Upper Division Major Requirements (33 Credits)

1. General Asian Studies (6 Credits)

Select one course each of the two categories below:
A. Humanities
PHIL 3300 History of Asian Philosophies
REL 3310 Asian Traditions

B. Politics and Economy
ECON 3900 Economic Issues of Asia
INTR 3400 International Relations of Asia
PSCI 3520 Politics and Government in Asia

2. CHOOSE ONE Humanities-Based Research Methods (3 Credits)
HIST 3900 Research and Writing Across Time and Culture
HUM 3900 Research and Writing in the Humanities

3. AREA STUDIES (18 Credits)
Select any four courses from one of the following three categories and one course from each of the other two categories. In each of the three areas of emphasis, select no more than two courses from the same alpha. At least half of the 18 Credits must be earned in alphas within the humanities (e.g., ARTH, CLST, ENG, HIST, MUS, PHIL, REL, THEA, etc.).

A. East Asian Studies
ARTH 3301 Art of China
ARTH 3321 Art of Japan
ENG 3223 Special Topics in Asian Literature
HIST 3302 History of Modern China
HIST 3322 History of Modern Japan
HIST 3326 Cultural History of Japan
HIST 3465 US-Japanese Relations
INTR 39XX Contemporary Nations: (e.g., China, Japan, Korea, Taiwan)

B. South and Southeast Asian Studies:
ARTH 3351 Art of India and SE Asia
HIST 3352 History of Modern SE Asia
HIST 3362 History of India
INTR 39XX Contemporary Nations: (e.g., India, Southeast Asia, Vietnam)
PSCI 4605 Islam and Politics

C. Pacific Studies:
ANTH 3500 Appreciating Pacific Worlds
ANTH 3556 Hawaiian Archaeology
ANTH 3980 Hawaiian Sovereignty
ARTH 3551 Art of the Pacific
ARTH 3552 Art of Polynesia
ARTH 3556 Art of Hawai‘i
ENG 3226 Hawai‘i Writers
ENG 3227 Hawai‘i and the Pacific in Film
GEOG 3200 Geography of Hawai‘i and The Pacific
HIST 3551 Pacific Island History
HIST 3558 Living History of Hawai‘i
HIST 3668 Military History of Hawai‘i
PSCI 3416 Elections in Hawai‘i

Additional courses at the 3000-level or higher may be approved by the Department Chair (under advisement or in consultation with the Program Chair for Asian Studies) and Dean of Liberal Arts. Courses must have substantial Asian-Pacific Studies content or relevance to a particular field of interest to which the student applies perspectives gained from other required courses in the Asian-Pacific Studies curriculum.
4. Practicum and Capstone (6 Credits):

ASIA 3950  Asian and Pacific Studies Practicum
ASIA 4900  Asian and Pacific Studies Seminar

III. STUDY ABROAD AND INTERNSHIPS (suggested minimum of 6 Credits, up to 30)

_Students are strongly encouraged to participate in an HPU student exchange/study abroad program in the region of your emphasis to fulfill requirements for the major_, including summer, semester and/or year-long study abroad opportunities available (6-30 Credits). Programs are currently available and students have attended programs in Australia, Cambodia, China, Indonesia, Japan, Korea, New Zealand, Taiwan, Thailand, Vietnam and more programs are being developed or may be proposed by students.

In many cases, these courses may fulfill some upper division field as well as language requirements. These study abroad opportunities should enable students to gain increased depth in areas of specialization unique that may not be available at HPU.

In addition to possibly engaging in an internship as part of a student’s ASIA 3950 Asian Studies Practicum, students may pursue internship opportunities in Hawai‘i or abroad in one’s area of concentration

IV. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF ARTS
MAJOR: COMMUNICATION STUDIES
Total Credits required: 120 Credits

The Communication Studies major at Hawai‘i Pacific University is a comprehensive program of study that develops the skills and confidence necessary to present ideas in various formats in a variety of situations. An emphasis on effective communication techniques, media technology, and culture is built on a foundation of communication theory and research.

PROGRAM OBJECTIVES
Students who major in Communication Studies will:
1. Demonstrate oral communication competency.
2. Understand and apply rhetorical theory to communication purposes.
3. Evaluate and critique examples of communication.
4. Adjust communication content and delivery to a diversity of contexts.

I. LOWER-DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE
(3 Credits)

COM 1000 Introduction to Communication Skills

I. LOWER-DIVISION MAJOR REQUIREMENTS (12 Credits)

COM 2000 Public Speaking
MC 2200 First Amendment and Intellectual Property Law

Two courses from:
COM 2300 Communication and Culture
COM 2500 Sex, Gender, and Communication
COM 2640 Argumentation and Debate

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (33 Credits)

Take all of the following:
COM 3000 Mass Media
COM 3250 Communication Research
COM 3300 Intercultural Communication
COM 3320 Persuasion
COM 3780 Media Convergence
COM 3950 Communication Practicum

Advanced Applications: One course chosen from:
COM 3440 Advanced Public Speaking
COM 3641 Advanced Forensics

Theory: One course chosen from:
COM 3680 Rhetorical Theory
COM 3900 Communication Theory
**Restricted Elective Requirements:** *Take one of the following:*

- **COM 3200** Interpersonal Communication
- **COM 3260** Film as Communication
- **COM 3270** Film Genre
- **COM 3340** Nonverbal Communication
- **COM 3350** Team Building
- **COM 3400** Communicating Professionally
- **COM 3420** Business Communication

**Required Capstone**

- **COM 4900** Communication Seminar

**UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
English majors study poetry, novels, films, plays, short stories, sit-coms, and songs—all the oral, written, and visual texts through which humans express meaning. English majors develop their creativity, their oral and written communication skills, and their powers of persuasion and critical thinking, preparing themselves for careers in fields such as business, law, education, professional and technical writing, journalism, advertising, and publishing. The English department is often approached by prospective students and their families who ask, “What can you do with an English degree?” A better question might be, “What can’t you do with an English degree?” In terms of future careers, students are only limited by their own imaginations. Writing, research and critical thinking skills are essential to high-level work in almost every business or institution. This is good news for HPU English majors and writing minors.

PROGRAM OBJECTIVES

Students who major in English will:
1. Develop transferable analytical skills such as the ability to summarize, interpret, and evaluate complex texts.
2. Develop transferable communication skills such as writing clearly and persuasively, revising and editing their own and others’ writing, and making effective oral presentations.
3. Employ appropriate research methods to locate and evaluate information and will effectively present their own arguments with support from primary and secondary texts.
4. Recognize and analyze various textual forms and strategies in academic and creative genres.
5. Practice various textual strategies in academic and creative genres.
6. Examine the ways in which texts shape and/or are shaped by history, culture, and context.
7. Experience and analyze diverse texts from various cultures.
8. Articulate or identify important theoretical concepts and approaches and apply them in interpreting or analyzing texts.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 SEMESTER CREDITS)

GENERAL EDUCATION COURSES (36 SEMESTER CREDITS)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)

ENG 2500 World Literature

I. LOWER-DIVISION REQUIREMENTS (3 Credits)

ENG 2100 Ways of Reading: Film, Literature, Culture

LOWER-DIVISION LANGUAGE REQUIREMENTS (8 CREDITS)
Two semesters of the same language: CHIN, FR, HAWN, JPE, KOR, LAT or SPAN.

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (40 Credits)

Upper-Division Foundation Courses (6 Credits)
Choose two courses from the following:
ENG 3100 British Literature to 1800
ENG 3102 British Literature After 1800
ENG 3122 American Literature After 1800
ENG 3130 Topics in World Literature

**English Electives (12 Credits)**

*Choose four courses from the following:*

- ENG 3101 Shakespeare on Screen
- ENG 3135 Japanese Literature
- ENG 3140 Biography
- ENG 3145 Nonfiction Film: Documentary, Docudrama, and Historical Film
- ENG 3150 Television Studies
- ENG 3202 Literature of Slavery
- ENG 3206 British Comic Literature
- ENG 3223 Special Topics in Asian Literature
- ENG 3224 Ethnic Literature
- ENG 3226 Special Topics in Hawai‘i-Pacific Literature

*Choose a combination of courses to total six Credits from the following:*

- WRI 3310 Poetry Workshop
- WRI 3311 Childhood and Poetry Workshop
- WRI 3313 The Sacred and Erotic in Lyric Poetry
- WRI 3320 Scriptwriting
- WRI 3330 Fiction Writing
- WRI 3340 Creative Nonfiction Writing Workshop
- WRI 3391 Wanderlust: Student Literary Magazine
- WRI 3510 Composition Studies
- WRI 3951 Staff Reader, Hawai‘i Pacific Review
- WRI 3953 Managing Editor, Hawai‘i Pacific Review
- WRI 3990 Non-paid Internship
- WRI 3991 Paid Internship
- WRI 4990 Professional Writing Portfolio Seminar

**Research Writing Requirement (3 Credits)**

- HUM 3900 Research and Writing in the Humanities

**English or Writing Electives (3 Credits)**

*Choose two courses from the following:* Any ENG or WRI course at the 3000- or 4000-level

**Senior Seminar and Portfolio Capstone Requirement (7 Credits)**

- ENG 4910 English Major Portfolio Capstone

*Plus any two of the following:*

- ENG 4100 Shakespeare Seminar
- ENG 4120 Seminar in Modernism
- ENG 4300 Seminar in Textual Criticism
- ENG 4320 Seminar on Post-Colonial Literature
III. UNRESTRICTED ELECTIVES
The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The history major at Hawai‘i Pacific University provides students with a solid foundation in the field of historical studies and its methodologies. It offers broad exposure to the past, chronologically and geographically, through a selection of courses offering in-depth study of regional, global and thematic history. The capstone course is a seminar resulting in a substantial piece of research and synthesis. The history major develops skills and a base of knowledge to prepare the student for graduate study. It also enables one to pursue careers drawing upon competency in research, writing, analysis, comparative perspectives, multicultural sensitivities, foreign language ability, and related skills relevant to positions in a variety of changing environments.

PROGRAM OBJECTIVES
Students who major in history will:

1. Comprehend and apply various research and analytical methodologies to the study of history while developing an appreciation for diverse historical viewpoints.
2. Place historical questions and issues of enduring importance within their chronological and geographical contexts.
3. Gain a historical understanding of diverse cultures and regions of the world across time.
4. Critically reflect on the development of the world’s major civilizations and cultures from indigenous and comparative perspectives while exploring the richness and diversity of heritages relevant to the informed global citizen living in a pluralistic present.
5. Recognize the nature of global processes, as they operate in an historical framework, through the study of global systems such as capitalism, gender, warfare, religion, etc.
6. Demonstrate critical analytic and reasoning skills useful in a broad spectrum of academic and non-academic endeavors.
7. Effectively and clearly communicate historical ideas both orally and in writing.
8. Understand the construction of value systems across time and within world cultures and thus promote the development of their own personal, ethical, and moral frameworks.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)

Take one of the following (3 Credits)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1001</td>
<td>Traditions and Encounters: World Cultures to 1500</td>
</tr>
<tr>

<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1002</td>
<td>Global Crossroads: 1500-Present</td>
</tr>
<tr>
<td>HIST 1402</td>
<td>Introduction to American History Since 1865</td>
</tr>
</tbody>
</table>

Take two “Introduction to Civilization” courses from the following (6 credits):
(Note: If HIST 1401 and/or HIST 1402 were already taken as lower division requirements, they cannot count as Introduction to Civilization Courses)
HIST 1401 American Stories: Themes in American History to 1877
HIST 1402 Introductions to American History since 1865
HIST 1558 Living History of Hawai‘i
HIST 1717 Reacting to the Past

LOWER-DIVISION MAJOR REQUIREMENTS (11 Credits)

HIST 2900 The Historian’s Craft

Lower-Division Language Requirements (8 Credits)
Two semesters of the same language:
CHIN, FR, HAWN, JPE, KOR, LAT, or SPAN. (One semester of HAWN satisfies Hawai‘i and the Pacific)

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (36 Credits)

HIST 4900 Seminar in History

33 additional upper-division Credits in History

Take two courses from the following:

Asia-Pacific World (6 Credits)

HIST 3322 History of Modern Japan
HIST 3352 History of Modern South East Asia
HIST 3362 History of India
HIST 3556 History of Hawai‘i
HIST 3668 Military History of Hawai‘i
HIST 3777 Hawai‘i and the World

Take two courses from the following:

The Atlantic World (6 Credits)

HIST 3222 Europe and the Age of Revolution
HIST 3225 The Enlightenment and the French Revolution
HIST 3231 Europe: The 20th Century
HIST 3242 History of Spain
HIST 3411 U.S.: Jackson to Civil War
HIST 3414 “Untied States:” Race and Ethnicity in American History
HIST 3441 U.S. History Since World War II
HIST 3470 Women in America
HIST 3461 American Intellectual History
HIST 3576 The Atlantic World in the Age of Empire
HIST 3666 U.S. Military History
HIST 3676 U.S. Diplomatic History

Take two courses from the following:

World (6 Credits)

HIST 3070 Sex in History
HIST 3501  Islam and World History
HIST 3571  The African Diaspora
HIST 3650  History of Oil in the Modern World
HIST 3655  Bubbles, Panics, and Depressions: A World History of Economic Crisis
HIST 3661  History of Warfare to 1500
HIST 3662  War and Society Since 1500
HIST 3670  Racism, Violence, and Genocide
HIST 3776  Modern Imperialism
HIST 3780  Modern World Revolutions
HIST 3788  Food in World History
HIST 3792  Encounters and Exchanges in Modern World History
HIST 3795  Playtime: Play and Leisure in World History
HIST 4661  History of Military Thought

**Plus 15 additional credits in any upper-division HIST course.**

*Optional Study abroad opportunities are available to earn up to 15 credits to fulfill the requirements of the major.*

### UNRESTRICTED ELECTIVES

The number of unrestricted elective Credits needed will vary depending on the number of Credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level Credits to reach a total of 120 credits.
The “Humanities” describes a wide range of academic disciplines that share a common interest in the fundamental question: What does it mean to be human?

A student who majors in Humanities will explore how humans have approached this question through time and across the world primarily through the study of human expression, thought, and inquiry across the disciplines of art, philosophy, religion, literature, and history. This exploration will enable students to cultivate three important intellectual virtues: critical thinking, narrative imagination, and a sense of global citizenship.

The major has both depth and breadth. Students will acquire depth by focusing on one of the primary fields within the major. Color, Art History, Classical Studies, Philosophy, or Religious Studies. Students will acquire breadth by taking a selection of upper-division Humanities courses outside their area of concentration.

Students who graduate from the program will find that their major has given them a solid, liberal arts foundation, giving them a wide array of career options and the flexibility to adapt to a rapidly changing world. They will be well prepared to work in a wide variety of fields or to pursue professional degrees in professions such as law, education, and business; or to pursue specialized graduate study in their chosen academic discipline in the Humanities. More importantly, they will be well positioned to become lifelong learners and to appreciate the many expressions of human thought and creative expression throughout the world.

PROGRAM ObjectIVES

Specialized Knowledge: Develop familiarity with prominent features of the literature, art, philosophies, and religions of the world.

Broad, Integrative Knowledge and Intellectual Skills: Articulate core values, world views, ideals and forms of artistic expression associated with the human experience, and place them within their cultural and historical contexts.

Applied Learning and Intellectual Skills: Demonstrate higher-level writing competencies through the composition of interpretive essays and research papers.

Civic Learning: Cultivate moral reasoning, along with an awareness of the ethical sensibilities of diverse peoples as presented in their literary, artistic, philosophical and/or religious works.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (9 Credits)

ARTS (3 Credits)
Choose one of the following:

ARTH 1001 Art Oceania
ARTH 2301  World Art History  
ARTS 1000  Introduction to Visual Arts  
ARTS 1003  Sustainable Art and Design  
ARTS 2150  Introduction to Design  
MUS 1000  Introduction to Classical Music  
MUS 2101  Music in World Culture  
THEA 2320  Acting I: Basic Acting for Stage and Screen  

HISTORY (3 Credits)  
Choose one of the following:  

HIST 1001  Traditions and Encounters: World Cultures to 1500  
HIST 1002  Global Crossroads: 1500 to Present  
HIST 1401  American Stories: Themes in American History to 1877  
HIST 1402  Introduction to American History Since 1865  
HIST 1558  Living History of Hawai‘i  
HIST 1717  Reacting to the Past  
HIST 2360  The History of Science and Technology  

LITERATURE (3 Credits)  
Choose one of the following:  

ENG 1101  Representations of Pacific Life  
ENG 2000  The Art of Literature  
ENG 2500  World Literature  

LOWER-DIVISION MAJOR REQUIREMENTS (6 Credits)  

GENERAL HUMANITIES (3 Credits)  
Choose one of the following:  

CLST 1000  Great Books, East and West  
HUM 1000  Introduction to the Humanities  
HUM 1270  Introduction to Women’s Studies  

PHILOSOPHY AND RELIGIOUS STUDIES (3 Credits)  
Choose one of the following:  

PHIL 1000  Introduction to World Philosophies  
PHIL 1001  Philosophies of Hawai‘i and the Pacific  
PHIL 2090  Principles of Logic  
PHIL 2500  Introduction to Ethics  
REL 1000  Introduction to World Religions  
REL 2151  The Hebrew Bible as Literature  

LOWER-DIVISION LANGUAGE REQUIREMENTS (8 Credits)  
Two semesters of the same language: CHIN, FR, HAWN, JPE, KOR, or SPAN.

II.  UPPER-DIVISION MAJOR REQUIREMENTS (33 Credits)  

HUM 3900  Research and Writing in the Humanities  

CAPSTONE SEMINAR  
Take one of the following (3 Credits):  

CLST 4900  Seminar in East-West Classical Studies  
HUM 4900  Interdisciplinary Seminar and Integrative Project  
PHIL 4501  Reordering Social Values  
REL 4900  Seminar in Religious Studies
Take five courses from one of the following concentrations (15 Credits):

**Art History**
- ARTH 3206 Renaissance to Modern Art
- ARTH 3301 Art of China
- ARTH 3321 Art of Japan
- ARTH 3351 Art of India and South East Asia
- ARTH 3551 Art of the Pacific
- ARTH 3552 Art of Polynesia
- ARTH 3556 Art of Hawai‘i
- ARTH 3611 Art of the Human Body
- ARTS 3051 Photography

or related ARTH courses

**East-West Classical Studies**
- ARTH 2200 Foundations of Western Art
- ARTH 3301 Art of China
- ARTH 3321 Art of Japan
- ARTH 3351 Art of India and South East Asia
- CLST 3030 Ancient Drama
- CLST 3100 Female Figures in Classical Myth
- ENG 3222 Asia Dramatic Literature
- MUS 3100 Theatre Music of the World

or related CLST courses

**Philosophy**
- PHIL 3200 History of Western Philosophy
- PHIL 3260 Exploring Film
- PHIL 3300 History of Asian Philosophies
- PHIL 3501 Philosophy of Arts and Aesthetics
- PHIL 3651 Environmental Ethics
- PHIL 3721 Philosophy in Contemporary Literature
- PHIL 3731 Philosophy of Social Sciences
- PHIL 3741 Philosophy of Law
- PHIL 4500 Global Justice

or related PHIL courses

**Religious Studies**
- REL 3000 Religion, Sacrifice and Violence
- REL 3001 Religion and Social Change
- REL 3007 On Death and Dying
- REL 3152 Understanding Early Christian Literature
- REL 3200 Abrahamic Traditions
- REL 3310 Asian Traditions
- REL 3500 Indigenous Traditions
- REL 3600 War in World Religions
- REL 3700 Female Figures in the Bible
- REL 4002 World Religions, Sustainability, and Globalization

or related REL courses

Four additional upper-division courses in ARTH, CLST, ENG, HIST, HUM, PHIL or REL (12 Credits)

**III. UNRESTRICTED ELECTIVES**

The number of unrestricted elective Credits needed will vary depending on the number of Credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level Credits to reach a total of 120 credits.
The Integrated Multimedia degree prepares students to work and produce in the online, mass media, information and entertainment industries. The major focuses on developing multiple media literacy competencies, analytic abilities and narrative skills. In this program, students develop mixed media portfolios and capstone projects. The applied audio-visual, graphical and online skills that students learn are informed by a foundation in writing, critical analysis and creative development.

PROGRAM OBJECTIVES
The major in Integrated Multimedia will enable students to demonstrate:
1. Acquire the technical and creative multimedia skills to produce and deploy effective graphical and audio-visual artifacts and online content.
2. Demonstrate the ability to communicate effectively to targeted and mass audiences through media creation and interaction.
3. Gain skills in creating and distributing multimedia content via online and emerging technologies.
4. Acquire and demonstrate knowledge of the technological development and history of modern electronic media systems.
5. Develop an understanding of the local and global influence of electronic media and the ethical and legal responsibilities of media practitioners.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 SEMESTER CREDITS)

GENERAL EDUCATION COURSES (36 SEMESTER CREDITS)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)
MULT 1100 Foundations of Multimedia

LOWER-DIVISION MAJOR REQUIREMENTS (15 Credits)

CSCI 2761 HTML and Web Design
MC 2200 First Amendment and Intellectual Property Law
MULT 2060 Modern Media Systems
MULT 2460 Graphic Design Studio
MULT 2465 Motion Picture Production

LOWER-DIVISION LANGUAGE REQUIREMENTS (8 CREDITS)
Two semesters of the same language: CHIN, FR, HAWN, JPE, KOR, or SPAN.

II. UPPER-DIVISION MAJOR REQUIREMENTS (33 Credits)

COM 3950 Internship Practicum
MULT 3360 Writing for New Media
MULT 3400 Design Systems and Portfolio
MULT 3475 Web Interface and Design
MULT 3510 Nonlinear Audio-Visual Editing
MULT 3675 Advanced Web Design
MULT 3750 Motion Graphics and Compositing

Writing:
Choose one of the following:
MC 3120 Writing for the Media
WRI 3320 Scriptwriting
Application:
*Choose one of the following:*
- ARTS 3051 Photography
- MC 3310 Photography
- MULT 3500 Cinematography Workshop
- MULT 3560 Documentary Production
- MULT 3600 Creative Narrative Production
- MULT 3700 Radio and Audio Production
- MULT 3780 Global Documentary
- MULT 4000 Advanced Cinematic Production
- MULT 4010 Postproduction Seminar

Capstone:
*Choose one of the following:*
- MULT 4702 Mobile Media Design
- MULT 4900 Multimedia Seminar

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective Credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level Credits to reach a total of 120 Credits.
The B.A degree in International Studies prepares students to take their place as citizens of the world. Through a multi-disciplinary program of study, students develop practical skills and knowledge to analyzing a range of contemporary global issues. Students gain a foundation in global studies and international relations, and a deeper knowledge of global issues that draws from courses in anthropology, economics, environmental studies, economics, geography, history, international relations, and political science.

The program of study allows students to develop regional expertise in specific countries or world regions (e.g., China, India, Japan, Africa, Europe, or Latin America), gain competency in a second language, and are strongly encouraged to participate in study abroad opportunities. In addition to regional expertise, students select from one of two Concentration for a thematic focus:

(1) “Development and Sustainability”: which examines the economic, environmental, political, and socio-cultural underpinnings of development and underdevelopment, and explores strategies for building sustainable and resilient communities worldwide.

(2) “International Relations and Security”: which highlights that changing nature of global politics, international relations, and national security affairs.

The interdisciplinary nature of the B.A. in International Studies degree has proven to be success-ful undergraduate program for students ready to address a range of global challenges, and, and is also strong preparation for graduate programs and law schools. It positions students to become employed in a range of public and private sector organizations, including the U.S. Foreign Service/diplomatic corps, USAID, intelligence and foreign policy analysis, or international banking; international organizations like the European Union, World Health Organization, or United Nations; and non-governmental organizations, such as CARE, Doctors without Borders, or Oxfam. Many careers today demand experts with knowledge and skills stretch beyond their own physicals and cultural borders to deal with issues in a global context, and the BA in International Studies is ideal preparation for those career paths.

PROGRAM LEARNING OBJECTIVES:

Students who major in International Studies will:

1. Develop competency in various theoretical approaches in the field of global studies and international relations.
2. Be able to conduct rigorous comparative analysis of global issues in a regional context and within social science disciplines.
3. Work within conceptual frameworks to analyze the global arena of politics, economics, and social/cultural issues.
4. Gain proficiency in critical skills in international relations to include an emphasis on research and communication skills, knowledge of various world cultures, and global systems.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (6-9 Credits)

Choose one of the following (up to 3 Credits):

- GEOG 1500 World Regional Geography
- GEOG 2000 Visualizing Human Geography
Take all of the following (6 Credits):

<table>
<thead>
<tr>
<th>Code</th>
<th>Course</th>
</tr>

- INTR 3275 Global Governance
- INTR 3300 International Law
- INTR 3400 International Relations of Asia
- INTR 39XX Any Contemporary Nations course (e.g., China, EU, Japan, Korea)
- PSCI 3525 Islam and Politics
- PSCI 3540 Politics of Terrorism
- SOC 3660 Sociology of Terrorism

*or any 3000-level HIST, INTR, or PSCI course*

### III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF ARTS
MAJOR: MULTIMEDIA CINEMATIC PRODUCTION
Total Credits required: 120 Credits

The Multimedia Cinematic Production degree prepares students to work and produce in the audio-visual, mass media, information and entertainment industries. The major focuses on developing multiple media literacy competencies, analytic abilities and narrative skills. In this program, students can choose a capstone project focusing on a creative Cinematic Narrative Production or a Documentary Production. The applied audio-visual, graphical and online skills that students learn are informed by a foundation in communication and critical analysis, and an emphasis on writing and narrative design.

PROGRAM OBJECTIVES
Students who major in Multimedia Cinematic Production will:
1. Acquire the technical and creative multimedia skills to produce effective graphical, performative and audio-visual artifacts.
2. Demonstrate the ability to communicate effectively to targeted and mass audiences through media creation.
3. Gain skills in creating and distributing multimedia messages via online and emerging technologies.
4. Acquire and demonstrate knowledge of the technological development and history of modern electronic media systems.
5. Develop an understanding of the local and global influence of electronic media and the ethical and legal responsibilities of media practitioners.

**III. UNRESTRICTED ELECTIVES**

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The political science major is designed to make students familiar with the major schools of thought and methodologies in the field of political science. Students become knowledgeable about American, comparative, and international politics and study the dynamics of power and decision making in various political systems. They learn to grasp the forces that determine the direction of emerging countries and their governments, and to analyze the political-economic relationship within geopolitical areas. Students can make comparisons among different political structures within the world, and understand competing historical and contemporary political thought that underpins political systems. The goal in political science is to achieve a self-reflective analysis of the institutions that socialize individuals into their political constructs.

PROGRAM OBJECTIVES:
Students who major in Political Science will:
1. Be knowledgeable about American, comparative, and international politics.
2. Understand the dynamics of power and decision making in various political systems.
3. Be able to analyze the political-economic relationship within geopolitical areas.
4. Be able to make comparisons among different political structures within the world, to include the congressional and parliamentary systems.
5. Understand competing historical and contemporary political thought that underpins political systems.
6. Be able to perform a self-reflective analysis of the institutions that socialize individuals into their political constructs.

MAJOR ELECTIVES

Five upper-division (3000-or 4000-level) electives from PSCI, INTR, CJ, or SOC, with at least three of them (9 Credits) from PSCI or INTR.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
Psychology is the scientific study of behavior and mental processes. The psychology program at Hawai‘i Pacific University provides students with an understanding of the theoretical approaches and research methods applicable to both laboratory and real-world settings. The program emphasizes the role of the liberal arts and critical thinking in higher education, the student’s personal development and an appreciation of individual differences and cultural diversity.

To achieve the mission of the psychology program, students study a range of topics that exposes them to a variety of methodologies and laboratory experiences that will enable them to evaluate, interpret and solve problems in the workplace, at home and in their community. Course topics may include human and animal learning, cognition and behavior, child and adult development, normal and abnormal behavior, addictions, neuroscience, and the applications of psychology to business, education and health. The curriculum emphasizes active learning, fieldwork and research within an international environment that prepares students for graduate study in psychology and/or a broad range of entry-level positions in psychology and the community.

PROGRAM OBJECTIVES
Students who major in psychology will:
1. Demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Understand and apply basic research methods in psychology, including research design, data analysis, and interpretation.
3. Respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes.
4. Understand and apply psychological principles to personal, social, and organizational issues.
5. Value empirical evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a science.

PSY 4925 Psychology Research Seminar
PSY 4950 Counseling Practicum

Plus take four additional upper-division courses in PSY, excluding PSY 3235
(Minimum 12 Credits)

III. UNRESTRICTED ELECTIVES
The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The TESOL program at HPU is structured on three types of courses: theoretical, pedagogical, and practical. Theoretical linguistic courses, taught from an applied perspective, help the TESOL student better understand languages in general, and English in particular. Pedagogical courses examine teaching strategies appropriate for diverse contexts. Practicum courses place the future teacher language classes to observe master teachers, serve with them as assistants, and finally assume class responsibility as solo practice teachers. While the TESOL program focuses on the teaching of English, sound language teaching principles are universal. Thus, program graduates frequently find that their fluency in other languages, combined with their TESOL training, make them excellent candidates for teaching positions in those other languages.

PROGRAM OBJECTIVES

Students who complete the Bachelor of Arts in Teaching English to Speakers of Other Languages (TESOL) will be prepared to demonstrate ASK:

A. Attitudes of a professional: They are collegial toward their peers, enthusiastic toward the profession and thoughtfully reflective about their teaching practices. They display personal, professional and cultural sensitivity toward their students.

S. Skills of an effective language teacher: They possess excellent spoken and written English skills. They can critically evaluate ESL or EFL texts, prepare and teach effective lessons, apply sound principles in assessment and feedback, and respond appropriate to student needs in a given class.

K. Knowledge of the English language, language learning processes, and pedagogical principles: They can base their teaching on knowledge of the English sound system, grammar, and variations in context; the stages and complexities of second language learning; and communicative language.

UPPER-DIVISION ELECTIVE REQUIREMENTS (12 Credits)

Four courses
Two upper-division electives from Applied Linguistics (AL)
Plus two courses chosen from the following in disciplines related to TESOL such as anthropology or area studies, cross cultural relations, education, English, world languages, psychology, and writing.

Recommended courses include:

Any upper-division AL or ENG course

| ANTH  | 3700 | Culture and Language                            |
| ED    | 3000 | Introduction to Teaching                        |
| ED    | 3300 | Foundations of American Education               |
| PHIL  | 4721 | Philosophy of Education                         |
| PSY   | 3400 | Lifespan Development                            |
| PSY   | 3235 | Cross-Cultural Psychology                       |
| SOC   | 3380 | Cross-Cultural Relations,                       |
| WRI   | 3510 | Introduction to Composition Studies            |

or a TESOL-related course cleared through the TESOL program chair.

Practice Teaching

Ideally, the student completes three credits of AL 3950 Language Classroom Experience before taking AL 4960 Practice Teaching in the final term. When circumstances warrant and the TESOL Practicum Coordinator approves, however, the final Credits of AL 3950 may be taken concurrently with AL 4960.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of Credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF SCIENCE
MAJOR: Diplomacy and Military Studies
Total Credits required: 120 Credits

The Diplomacy and Military Studies major at Hawai‘i Pacific University is designed to provide students with a solid foundation in the fields of historical and political studies and their various approaches and methodologies in order to understand better the role of the military as an institution within society. The program of study is constructed to give students historical, ethical, and practical perspectives on military affairs. Students enrolled in the program take a variety of courses that provide a broad context both in terms of chronology and geography. The B.S. in Diplomacy and Military Studies develops the skills, base of knowledge, and moral awareness that will serve as preparation for a career as a leader, whether in today’s military or in the private sector. Those same skills and knowledge base, however, are also useful in pursuing a graduate degree in history, political science, international relations, or law.

PROGRAM OBJECTIVES
Students who major in Diplomacy and Military Studies will be able to:
1. Discuss and apply the various methodologies and approaches to the study of history, political science, and international relations in a military context.
2. Place questions and issues concerning the role of the military within their chronological and geographical context to serve as a foundation for more in-depth inquiries.
3. Make use of critically reflective tools for interpreting pertinent historical, cultural, philosophical, and political issues.
4. Articulate the moral and ethical concerns raised through the study of the relationship of the military to society and technology.
5. Appreciate the importance of the military as an instrument for the preservation of peace rather than the waging of war.
6. Serve as responsible, moral leaders.
7. Be prepared to undertake graduate study in history, political science, international relations, and related fields.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0 TO 11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (12 Credits)

TAKE ONE OF THE FOLLOWING:
HIST 1001 Traditions and Encounters: World Cultures to 1500 (Traditions & Movement)
HIST 1401 American Stories: Themes in American History to 1877 (American Experience)

TAKE ONE OF THE FOLLOWING:
HIST 1002 Global Crossroads: 1500-Present (Global Crossroads & Diversity)
HIST 1402 Introduction to American History since 1865 (American Experience)

TAKE THE FOLLOWING:
INTR 1000 The International System (Global Crossroads & Diversity)
PSCI 2000 Introduction to Politics (Traditions & Movements)

Note: Because multiple lower division requirements qualify for the same General Education Curricular Areas, a maximum of 12 Credits can double count toward both Lower Division and General Education requirements.
LOWER-DIVISION MODERN LANGUAGE REQUIREMENTS (4 Credits)

One semester of language (CHIN, FR, HAWN, JPE, KOR, or SPAN).

LOWER-DIVISION MAJOR REQUIREMENT (3 Credits)

HIST 2900 The Historian’s Craft

II UPPER-DIVISION REQUIREMENTS (54-55 Credits)

CAPSTONE REQUIREMENT (3 Credits)

HIST 4900 Seminar in History

Upper-Division Major Requirements (24 Credits)

<table>

PSCI 3540 Politics of Terrorism
PSCI 3650 Intelligence Studies
PSCI 3890 Homeland Security
SOC 3660 Sociology of Terrorism

For students in the ROTC program (28 Credits)

MSL 3010 Leading Small Organizations I or AS 3510 Air Force Leadership Studies
MSL 3020 Leading Small Organizations II or AS 3520 Air Force Leadership Studies
MSL 4010 Leadership Challenges & Goals I or AS 4010 National Security Affairs
MSL 4020 Leadership Challenges & Goals II or AS 4020 National Security Affairs

Note: All ROTC MSL and AS classes are 4 credits

Plus 4 courses (12 credits) from the list of electives for students not in ROTC above. Two courses must be HIST courses.

III UNRESTRICTED ELECTIVES
The number of unrestricted elective Credits needed will vary depending on the number of Credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level Credits to reach a total of 120 Credits.
The Bachelor of Science degree in Mass Communication combines the traditional areas of Advertising, Journalism, and Public Relations to reflect today’s converging industries and job opportunities. Required classes in our B.S. degree focus on integration of traditional Advertising, Journalism, and Public Relations while providing students the flexibility to tailor their degree to fit their career interest.

PROGRAM OBJECTIVES
Students who major in Mass Communication will be able to:
1. Build integrated strategic communication programs in business, professional, and social environments, including: research and, planning, rationale, and implementation techniques.
2. Produce a professional, entry-level mass communication portfolio.
3. Apply First Amendment, copyright, contract laws in Mass Communication situations.

III. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3 Credits)

COM 2000 Public Speaking

LOWER-DIVISION MAJOR REQUIREMENTS (15 Credits)

MC 1000 Introduction Mass Communication
MC 1100 Mass Communication Writing
MC 2100 Mass Communication Research
MC 2200 First Amendment & Intellectual Property Law
MULT 1050 Point, Shoot, Edit

LOWER-DIVISION LANGUAGE REQUIREMENTS (0 Credits)
Not required, but recommended for students wishing to work in international mass communication.

IV. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (6 credits)

COM 3950 Communication Practicum
MC 4900 Capstone Experience

MC RESTRICTED ELECTIVE REQUIREMENTS

Student pick six courses from the following (18 credits):

MC 3100 Feature Writing
MC 3100 Editing
MC  3120  Writing for Digital Media  
MC  3130  Reporting  
MC  3140  Sports Writing  
MC  3300  Social Media  
MC  3310  Photography  
MC  3700  Creativity  
MC  3710  Promoting Non-Profits/NGOs  
MC  3720  Audience Behavior  
MC  3730  New Media Strategies and Sales  
MC  3740  Crisis Communication  
MC  3750  Special Events Planning  
MC  3760  Integrating Mass Communication  
MC  3910  Selective Topics in Mass Communication  
COM  3320  Persuasion or  
COM  3900  Communication Theory  
MULT  2460  Graphic Design Studio or  
MULT  2465  Motion Picture Production  

V. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
COLLEGE OF NATURAL AND COMPUTATIONAL SCIENCES
BACHELOR OF SCIENCE
MAJOR: BIOCHEMISTRY
Total Credits required: 120 Credits

Biochemistry is the study of living organisms at the molecular level. The field explores the structures, functions, transformations, and interactions of biological molecules (proteins, lipids, carbohydrates and nucleic acids), which give rise to the complexity of living systems. Recent advances in this fast growing field, such as the synthesis and amplification of DNA, the understanding of cell communication, and uncovering the molecular basis of life threatening diseases, have driven innovation and shaped the world’s health and prosperity.

Our biochemistry curriculum is based on guidelines from the American Society for Biochemistry and Molecular Biology (ASBMB). The major is rigorous, efficient, and contemporary, focusing on the fundamentals as well as the cutting edge areas, approaches, and practices within modern biochemistry. Students take foundational lecture and laboratory courses in chemistry, biology, physics, and mathematics followed by a breadth of advanced courses in biology and organic, physical, and analytical chemistry, as well as a series of in-depth courses in biochemistry. Our faculty are enthusiastically engage in research, the majority of which is focused around biomedical applications. Not only does our faculty’s high level of engagement in research provide rich and meaningful research opportunities for our biochemistry majors, but it also infuses our program with the energy and excitement of the cutting edge developments within the field.

One contributing factor to this sharp growth in the field of biochemistry has been the advancement of sophisticated instrumentation which enables more powerful observation and study of complex biomolecules. A distinguishing feature of our program is the wide array of advanced research instruments that are integrated into our required laboratory courses. This provides students hands-on experience with state of the art instrumentation in the field, thereby enhancing the skills sets and competitiveness of our graduates.

Because biochemistry forms a foundation for many other scientific disciplines, our biochemistry major prepares students to apply for jobs directly in biochemistry or related fields and to enroll in graduate (masters or doctorate) or a professional (health professions, allied health, or law) programs. Examples of relevant fields include biotechnology, biomedical engineering, biostatistics, medical/pharmaceutical/agricultural, food research, health professions (medical, pharmacy, dentistry, veterinary), allied health professions (physical therapy, physician’s assistant, dietician, medical technologist), law (patent law, forensics), chemistry/biochemistry education, environment science, scientific writing, and sales and marketing.

We offer two different concentrations for the biochemistry major. The Conventional Biochemistry Concentration will prepare students for jobs in the workforce directly following graduation or for further study in graduate programs, in any of the areas listed above. The Pre-Health Professions Concentration provides students with a comprehensive and rigorous training in biochemistry while also preparing them to be competitive applicants for health related professional schools.

PROGRAM OBJECTIVES
  1) Content Areas:
     1. Demonstrate an understanding of the physical/chemical principles that provide significant insight into the functioning of living systems as measured through standardized subject exams developed by the American Chemical Society.
     2. Know key concepts and principles regarding biochemical structures, principal biochemical pathways of living organisms and the molecular basis of biochemical processes.
II) Laboratory Techniques:
3. Understand the theory and learn to operate a wide variety of advanced biochemical instrumentation.
4. Perform laboratory techniques involving chromatographic separations, analyses and purifications.
5. Perform laboratory techniques involving key biochemical reactions, procedures and functions.

III) Acquired Skills:
6. Learn to access and critically analyze literature in the field of biochemistry.
7. Identify and discuss the major issues, including ethical ones, at the forefront of the discipline of biochemistry.
8. Use oral, written and visual presentations to present their work to both a science literate and a general audience.
9. Use computers as information and research tools, including data acquisition and statistical analysis.

IV) Pre-Health Professions Concentration (additional objective):
10. Enhance students’ competitiveness for entry into health related professional school as evaluated by acceptance rates.

BACHELOR OF SCIENCE
MAJOR: BIOLOGY
Total Credits required: 120 Credits

Biology, the study of life, is currently in its most exciting era. Unique insights of new scientific pioneers fueled by modern research techniques are sparking an explosion of biological information. From these fragments emerge a picture of life revealing fascinating connections between molecules, cells, organisms, ecological systems, and evolution. Biologists explore these fundamental components and their connections to build a unified understanding of life.

The College of Natural and Computational Sciences offers two pathways, or concentrations, for a major program of study leading to a Bachelor of Science degree in Biology. The first concentration is the General Biology program of study, which provides a broad, yet integrated curriculum across the breadth of fields within the biological sciences. The General Biology curriculum is scientifically rigorous yet flexible, offering student’s choices and opportunities for pursuing their own areas of interest. The General Biology program provides the background and preparation for a variety of biological careers or further studies, including the areas of wildlife biology, conservation, ecology, molecular biology, zoology, botany and physiology. The second concentration is the Human and Health Sciences program of study. This curriculum option focuses on molecular and human biology, with options to study advanced aspects of human health and social sciences, from microbiology to psychology, anthropology and health management. The Human and Health sciences option prepares students for entry into medical school, dental school, veterinary school, pharmacy and health care training programs, and graduate studies in health related fields. In addition, it provides the scientific background for careers in biotechnology, cell and molecular biology, and biomedicine. In both curriculum options, the Biology degree program at HPU integrates modern laboratory methods and field experiences with traditional classroom instruction, providing excellent preparation for employment or graduate studies for future biologists, science educators, health professionals, researchers, and many others.

GENERAL BIOLOGY CONCENTRATION

PROGRAM OBJECTIVES
Students who major in Biology will:

1. Apply the fundamental knowledge, principles, processes and systems in the natural sciences to solve biological problems.
2. Integrate advanced concepts across the breadth of biology subject areas, including cellular, molecular, and organismal biology, ecology, evolution, and the diversity of life.
3. Conduct observational and experimental studies in biology, with appropriate experimental design and application of mathematical, statistical and computational techniques.
4. Find, read, and evaluate published biological research from a variety of sources.
5. Communicate scientific ideas effectively in written and oral formats with effective presentation techniques.
6. Exhibit professionalism and commitment to uphold scientific ethics.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (6 Credits)
CHEM 2050  General Chemistry I
MATH 2214  Calculus I

II. LOWER-DIVISION MAJOR REQUIREMENTS (29-31 Credits)
BIOL 2050 General Biology I
BIOL 2051 General Biology I Laboratory
BIOL 2052 General Biology II
BIOL 2053 General Biology II Laboratory
CHEM 2051 General Chemistry I Laboratory
CHEM 2052 General Chemistry II
CHEM 2053 General Chemistry II Laboratory
MATH 1123 Statistics
MATH 2215 Calculus II; or MATH 3305 Linear Algebra; or BIOL 4090 Biometry

Take either the College Physics series:
PHYS 2030 College Physics I
PHYS 2031 College Physics I Laboratory
PHYS 2032 College Physics II
PHYS 2033 College Physics II Laboratory

Or the General Physics series:
PHYS 2050 General Physics I
PHYS 2051 General Physics I Laboratory
PHYS 2052 General Physics II
PHYS 2053 General Physics II Laboratory

III. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (34 - 39 Credits)

Choose one upper-division course (3 Credits) from one of the following alphas; ANTH, BIOL, CHEM, NUR, PSY

IV. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The "3+3" Program Pathways for Biology-Human Health Sciences Students

These pathways offer students the opportunity to enter into the doctoral program of their choice (Pharmacy, Physical Therapy or Chiropractic) after their third (junior) year at HPU after having completed all necessary doctoral pre-requisites, maintaining a certain GPA and meeting admission requirements. After the first year of the doctoral program, students may transfer back courses to HPU to receive a Bachelor of Science (B.S.) in Biology - Human Health Sciences. In order to qualify for this degree, students must follow the prescribed Program Pathway and obtain all stated classes.

HPU students will receive preferred admission status at our partner universities, and may even be guaranteed admission to the program (see each school program below).

Students should share their intent to be part of these articulating programs with both their academic advisor and the Pre-Health Professions Specialist early on to ensure they receive the best guidance and support.

For more detailed information, please visit the website:

Physical Therapy

The Pre-Physical Therapy Program at HPU begins with a solid grounding in core science classes as students work towards a degree in Biology - Human Health Sciences. As students enter their junior year at HPU, they have two pathway choices into Physical Therapy.

3+3 Program at Carroll University

This 3+3 program is a great option for students who wish to proceed directly into the Doctor of Physical Therapy Program after three years at HPU. Carroll University will offer HPU students preferred admission into their program, providing that students have completed all the program pre-requisites with at least 30 semester credits taken at HPU. Applications must have a cumulative and science GPA of at least 3.0 (out of 4.0), submit all application materials to Carroll University by the first priority deadline (approximately Mid-January of Junior year) and obtain a Committee Letter from the Hawaii Pacific University Pre-Health Professions Committee.

In order to obtain a B.S in Biology - Human Health Sciences after the completion of the first year of the Doctor of Physical Therapy Program at Carroll University, the student must transfer back the credits obtained and petition to graduate. It is the responsibility of the student to ensure that he/she completes all the necessary courses required at HPU in order to qualify for this degree plan.

Direct Entry at Creighton University

The Physical Therapy School at Creighton University will guarantee acceptance to up to five HPU students each year who graduate with a B.S. in Biology - Human Health Sciences, have maintained a GPA of 3.5 (out of 4.0) or greater, and scored at least 300 on the GRE (combined quantitative and verbal.) Students will need to apply to Creighton University through PTCAS, have completed a minimum of 60 hours of observation with a physical therapist and have at least three excellent letters of recommendation.

Pharmacy

HPU offers three different 3+3 opportunities for students interested in Pharmacy. All pathways offer students the option of proceeding directly into a Doctor of Pharmacy Program after three years at HPU. A B.S. in Biology - Human Health Sciences will be awarded after the successful completion of Year One in the Doctor of Pharmacy program. It is the responsibility of the student to ensure that he/she completes all the necessary courses required at HPU in order to qualify for this degree plan.
3+3 at University of Hawaiʻi, Hilo

The Daniel K Inouye College of Pharmacy at UH Hilo will welcome HPU students who have maintained a GPA of at least 3.2 (out of 4), achieved a 60 on the PCAT and have a successful interview with the College of Pharmacy admissions team. A minimum of a "C" grade is required for all program pre-requisite courses, and students must follow the "Three Year Plan for Articulation Agreements" in order to be eligible to receive their BS from Hawaii Pacific University after transferring to the Doctor of Pharmacy Program.

3+3 at Creighton University

Students entering the Doctor of Pharmacy Program at Creighton University must follow the “Three Year Plan for Articulation Agreements” and accumulate at least 90 semester hours of credit by the spring before enrollment at Creighton University. Participants need to maintain a cumulative GPA of 3.5 (out of 4.0) and achieve a PCAT score of at least 60. Students will apply to the program via PharmCAS no later than November 1st of the academic year prior to enrollment (junior year).

3+3 at University of the Pacific

The Thomas J. Long School of Pharmacy and Health Sciences at University of the Pacific will welcome HPU students who have completed at least 90 semester hour credits (at least 75 of which were completed at HPU), have a minimum GPA of 3.5, and completed all the necessary prerequisites, including a full year of General Biology, General Chemistry and Organic Chemistry. Students will apply via PharmCAS.

Chiropractic

HPU and the University of Southern California Health Sciences, College of Chiropractic have partnered to offer students interested in a career as a Chiropractic Doctor a 3+3 direct entry program. Southern California University of Health Sciences College of Chiropractic will offer HPU students preferred admission into their program and guarantee the acceptance of up to five HPU students each year. Applicants must have completed all the program pre-requisites (at least 30 semester credits must be taken at HPU), and have a cumulative and science GPA of at least 3.0 (out of 4.0). Students are required to submit all application materials directly to Southern California University of Health Sciences. Note that the application fee will be waived for HPU students.

In order to obtain a B.S in Biology - Human Health Sciences after the completion of the first year of the Doctor of Chiropractic Program at Southern California University of Health Sciences, the student must transfer back the credits obtained and petition to graduate. It is the responsibility of the student to ensure that he / she completes all the necessary courses required at HPU in order to qualify for this degree plan.
BACHELOR OF SCIENCE
MAJOR: CHEMISTRY
Total number of Credits required: 120 Credits

Chemistry is the study of matter and the changes it undergoes. As such, the discipline is central to the natural sciences, serving as a foundation for all other disciplines, as diverse as biology, molecular biology, pharmacy, medicine, physics, environmental and marine sciences, engineering, geology and earth science. Thus, a strong background in chemistry prepares students not only for service directly in the chemical arena (e.g. education, industrial analytical chemistry, chemical engineering, pharmaceuticals synthesis, quality control, etc.) but also in many related disciplines (e.g. medicine, pharmacy, biotechnology, environmental services, alternative fuels, material sciences, etc.). The HPU B.S. in Chemistry program offers a broad-based and rigorous chemistry education that provides students with the intellectual, experimental, and communication skills to participate effectively as scientific professionals. The program is modeled on the American Chemical Society (ACS) guidelines for undergraduate chemistry education and prepares students for employment as professional chemists, for entrance into graduate or health professional schools, and for employment in other areas where a background in chemistry is advantageous. A distinguishing feature of the program is the hands-on experience students engage in through our laboratory courses, which are rich, relevant and reflective of laboratory environments in academic, industrial, and government laboratories. There are two concentrations to choose from, both of which lead to a Bachelor of Science in Chemistry. The Conventional Concentration prepares student for employment as professional scientists or for entrance in graduate school in chemistry and related fields. The Pre-Health Professions Concentrations trains students with the most current and essential chemistry curriculum while preparing them for entrance into professional schools in the health professions.

PROGRAM OBJECTIVES
The Chemistry program objectives are based on the published American Chemical Society (ACS) guidelines for chemistry programs.

I) Content Areas: Students who complete the Chemistry major will demonstrate knowledge of:

1. Introductory chemistry: periodic table, chemical reactions, stoichiometry, gas laws, chemical thermodynamics, atomic structure, molecular structure, intermolecular forces, acids and bases, kinetics, chemical equilibrium, crystal structures, and electrochemistry.
2. Core foundational areas of chemistry: analytical, biochemistry, inorganic, organic and physical.
3. Specialized coursework: in the form of advanced elective courses and/or research experiences within or integrating between some of the above areas, to nurture maturity in the field.

II) Laboratory Experience: Chemistry is primarily an experimental science. The Chemistry major thus requires over 400 hours in the laboratory. While many of these lab courses are specific in topic, for students they represent an invaluable introduction and exposure to general laboratory environments and practices. Students will:

4. Understand the theory and learn to operate a wide variety of advanced biochemical instrumentation.
5. Use computers as information and research tools, including data acquisition, statistical analysis and molecular modeling.
6. Demonstrate safety in the laboratory and practice environmentally sound disposal methods.
7. Learn to prepare effective presentations of laboratory data and be able to clearly communicate scientific information in the form of laboratory reports and oral presentations.

III) Research Experience: All students in the major will complete a senior research project as part of their capstone experience. Many students may choose to involve themselves in ongoing faculty research projects before that:

8. Demonstrate a practical understanding of a variety of contemporary scientific methods in the process of carrying out research project experiments.
9. Learn to access and critically analyze literature and to derive chemical information through the use of molecular search engines such as SciFinder™.

10. Design experimental protocols, analyze data and demonstrate critical problem solving skills to troubleshoot.

11. Communicate findings in both oral and written presentations.

IV) Pre-Health Professions Concentration:

12. Enhance students’ competitiveness for entry into health related professional school as evaluated by acceptance rates.

Conventional Concentration

UPPER-DIVISION ELECTIVE REQUIREMENTS (10-11 Credits)

A. Choose two courses from:

BIOL 3170 Cell and Molecular Biology
BIOL 3050  Genetics
BIOL 3034  Human Physiology
BIOL 3036  Human Anatomy

B. Complete the following:

One additional upper-division (3000 level or higher) CHEM course, 3 credits.
One additional laboratory course from within the Department of Natural Sciences, 1-2 credits (this may be fulfilled by CHEM 4950 Practicum).

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The Computer Science major meets the high standards of model programs proposed by the professional organizations ACM (Association for Computing Machinery— www.acm.org) and IEEE (the world’s largest professional association for the advancement of technology— www.ieee.org). The courses in the degree can be broadly divided into three areas: computer languages and problem-solving; software design and computer organization. The wide range of courses offered includes foundational core courses as well as exciting and important contemporary topics. A senior project allows students to apply all the skills and knowledge acquired throughout the program to a challenging and relevant software problem. The curriculum is designed to provide students with excellent preparation for high-demand jobs in the growing field of computer science, or for further graduate studies.

PROGRAM OBJECTIVES

Students who major in Computer Science will:

1. Apply appropriate problem-solving strategies, programming constructs, and data types for designing and developing algorithms and computer programs.
2. Demonstrate knowledge of mathematical foundations of computer science, such as discrete mathematics, and apply logic and proof techniques in solving problems.
3. Analyze and demonstrate knowledge of fundamental algorithms such as sorting and graph algorithms, algorithmic strategies, fundamental data structures, and complexity classes; determine complexity measures for algorithms.
4. Apply data modeling and database design techniques to develop relational database systems.
5. Demonstrate knowledge of fundamental principles of data communications, networking, and distributed systems; apply this knowledge to systems that use the Internet or other networks.
6. Demonstrate knowledge of digital representations of information, digital logic principles and components, and digital architectures and organization.
7. Describe and apply principles of computer operating systems, including memory management and resource scheduling.
8. Employ professional software development models, testing principles, documentation techniques, team work, and project management skills for building software applications that include quality control, scalability, reliability, maintainability, and usability.
9. Be prepared to undertake graduate study or professional work in any of a broad range of computer-related positions and possibly involving collaboration with other disciplines.

I. LOWER DIVISION COURSES

FOUNDATIONAL COURSES (0-11 Credits)

GENERAL EDUCATION COURSES (36 Credits)

PREREQUISITE COURSES (0-9 Credits):

An introductory programming class:

CSCI 1911 Foundations of Programming or
CSCI 1611 A Gentle Introduction to Programming

Pre-Calculus:

MATH 1130 Pre-Calculus I and
MATH 1140 Pre-Calculus II; or
MATH 1150 Pre-Calculus I & II Accelerated
OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSES (3-6 Credits)

CHEM 2050 General Chemistry I
MATH 2214 Calculus I

LOWER-DIVISION MAJOR REQUIREMENTS (22 Credits)

CSCI 2301 Discrete Math for Computer Science
CSCI 2911 Computer Science I
CSCI 2912 Computer Science II
CSCI 2913 Data Structures
CSCI 2916 Computer Science I Lab
MATH 1123 Statistics
MATH 2215 Calculus II

EXPERIMENTAL LAB SCIENCE REQUIREMENTS (8-10 Credits)

Students are required to take two semester of science courses with experimental lab components. In fulfilling this requirement, students gain both understanding of the scientific method and experience with laboratory work. Two semester of a lecture+lab pair of science courses is required. It is not required to take a full sequence within the same discipline; for example, this requirement could be met with BIOL 2050+2051 and CHEM 2050+2051. Pick any two pairs from this list:

BIOL 2050+2051 General Biology I + Lab
BIOL 2052+2053 General Biology II + Lab
BIOL 3020+3021 Plant Biology + Lab
BIOL 3034+3035 Human Physiology + Lab
BIOL 3040+3041 General Microbiology + Lab
BIOL 3170+3171 Cell and Molecular Biology + Lab
CHEM 1020+1021 Introduction to Chemistry and the Environment + Lab
CHEM 2050+2051 General Chemistry I + Lab
CHEM 2052+2053 General Chemistry II + Lab
CHEM 3030+3031 Organic Chemistry I + Lab
CHEM 3032+3033 Organic Chemistry II + Lab
ENVS 2000+2001 Principles of Environmental Science + Lab
ENVS 3002+3003 Applications of Environmental Science + Lab
MARS 2062+2063 Marine Biology + Lab
MARS 3000+3001 General Oceanography I + Lab
MARS 3002+3003 General Oceanography II + Lab
PHYS 2030+2031 College Physics I + Lab
PHYS 2032+2033 College Physics II + Lab
PHYS 2050+2051 General Physics I + Lab
PHYS 2052+2053 General Physics II + Lab

Some of these lecture+lab pairs depend on prior pairs, for example taking General Chemistry II relies on taking General Chemistry I first. Students should carefully consult the pre-requisites, especially for 3000-level courses.

Students planning to go onto graduate school may need a particular sequence of sciences prescribed by their intended graduate program. They should discuss their selections with their advisors with this in mind.

Plus three additional upper-division CSCI courses.

Plus one additional upper-division MATH course.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The Environmental Science major prepares students for advanced studies or careers in the private and public sectors as environmental scientists. Students selecting this major take a rigorous series of lower-division courses in chemistry, physics, biology, earth system science, and mathematics as a foundation for advanced courses in environmental science. In addition, students take upper-division courses in biology and chemistry providing breadth of perspective for examining environmental issues. Upper-division coursework in communication and environmental ethics provides additional understanding, skills, and perspective for approaching environmental issues. Environmental Science majors also have opportunities to choose from a range of field-based practicum, internship, and career experiences with environmental science companies or institutions.

**PROGRAM OBJECTIVES**

*Students who major in environmental science will:*

1. Demonstrate an understanding of the factual base, processes, and relationships that constitute a working foundation in the environmental sciences.
2. Demonstrate an understanding of the social, economic, political, and legal framework in which environmental issues are enmeshed.
3. Critically analyze and formulate possible solutions to complex environmental issues that include consideration of social, economic, and political as well as scientific issues.
4. Access, comprehend, and communicate information to and from the many audiences required by a practitioner in field of environmental science.
5. Develop a working knowledge of techniques used to gather and analyze information in environmental studies, including project design, sampling, measurement, geographic image interpretation, hazardous materials concerns, statistical and graphical analysis, and other computational skills.
6. Demonstrate an understanding of divergent ethical views of environmental issues, distinguish them from scientific or legal viewpoints, formulate their own environmental ethic, and articulate it to the others.
7. Be well-prepared for graduate studies in a related discipline or for entry-level positions in the discipline.

II. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The Marine Biology major is composed of a rigorous sequence of courses leading to the Bachelor of Science degree. Students prepare for advanced work by taking a year (two semesters) each of general biology, general chemistry, and college physics, all with laboratory components. Mathematics preparation extends through integral calculus and statistics. A practical course in oceanographic field techniques, plus two semesters of general oceanography, with laboratory and fieldwork, complete the lower-division requirements. Advanced courses ranging from molecular biology to ecology offer students breadth and depth across the spectrum of modern biology and its marine applications. Laboratory and fieldwork take advantage of Hawai‘i’s tropical and oceanic setting and its wealth of marine life. The University’s 42-foot research vessel, Kaholo, supports small classes in advanced studies from fringing coral reefs in Kāne‘ohe Bay to the deep sea only a few hours away. Completion of the Marine Biology major prepares students to enter private or public sector and domestic or international careers in fields such as living marine resource management, marine environmental analysis and protection, and interpretation or reaching in biology and marine science. Students who aim for future leadership in marine biology also achieve the academic preparation to pursue a Master’s or Doctoral degree in their field.

PROGRAM OBJECTIVES

Students majoring in marine biology will:

1. Demonstrate broad basic knowledge of the fundamental principles in the biological and physical sciences.
2. Apply and integrate scientific principles to complex biological problems in the marine environment.
3. Plan and implement observational and experimental studies of marine organisms and ecosystems and analyze the data obtained from these studies using appropriate mathematical and statistical techniques.
4. Communicate scientific ideas effectively in written and oral formats using appropriate computer applications for data analysis and presentation.
5. Find published information from a variety of printed and electronic sources.
6. Use a biological perspective to analyze complex problems in the marine environment.

Complete either the College Physics Series
PHYS 2030 College Physics I
PHYS 2031 College Physics I Laboratory
PHYS 2032 College Physics II
PHYS 2033 College Physics II Laboratory
or the General Physics Series:
PHYS 2050 General Physics I
PHYS 2051 General Physics I Laboratory
PHYS 2052 General Physics II
PHYS 2053 General Physics II Laboratory
(*The General Physics series, PHYS 2050-53, is recommended for students planning to attend graduate school)

II. UPPER-DIVISION REQUIREMENTS

UPPER-DIVISION MAJOR REQUIREMENTS (37-40 Credits)

BIOL 3030 Comparative Animal Physiology
BIOL 3054 Evolutionary Genetics
BIOL 3060 Marine Invertebrate Zoology; or BIOL 3070 Marine Vertebrate Zoology
BIOL 3080 Ecology
BIOL 3081 Ecology Laboratory
BIOL 3170 Cell and Molecular Biology; or BIOL 4040 Environmental Microbiology
CHEM 3010 Fundamental Organic Chemistry; or CHEM 3030/CHEM 3032 (Organic Chemistry I, II) [The year-long chemistry series is recommended for students planning to attend graduate school].
MARS 3000 General Oceanography I
MARS 3001 General Oceanography I Laboratory
MARS 3002 General Oceanography II
MARS 3003 General Oceanography II Laboratory
MARS 4050 Marine Ecology
MARS 4051 Marine Ecology Laboratory
MARS 4910 Seminar: Marine Biology (capstone course)

Plus a minimum of two laboratory courses chosen from the following:
BIOL 3031 Comparative Animal Physiology Laboratory
BIOL 3061 Marine Invertebrate Zoology Laboratory
BIOL 3071 Marine Vertebrate Zoology Laboratory
BIOL 3171 Cell and Molecular Biology Laboratory
BIOL 4041 Environmental Microbiology Laboratory

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
The HPU Bachelor of Science in Mathematics major is a comprehensive degree program that provides students with four options depending on their interests and future plans.

**PROGRAM OBJECTIVES**

*Students who major in mathematics:*

1. Recognize and understand a core of fundamental mathematical operational skills.
2. Apply mathematical problem-solving skills to a variety of real-world problems.
3. Experience the application of mathematics in various multi-cultural contexts.
4. Employ appropriate research methods in exploring mathematical skills and their use in problem solving.
5. Develop comprehensive oral and written communication skills in the pursuit of a broad-based mathematics foundation.
6. Use mathematics-based skills in both individualized and team-oriented applications.

**I. LOWER DIVISION COURSES**

**FOUNDATIONAL COURSES (0-11 Credits)**

**GENERAL EDUCATION COURSES (36 Credits)**

**PREREQUISITE COURSES (0-9 Credits):**

The number of credits required depends on the students’ preparation. Some students may be able to go directly into the lower division requirements of CSCI 2911 and MATH 2214.

**Pre-Calculus:**

- **CSCI 1911** Foundations of Programming
- **MATH 1130** Pre-Calculus I
- **MATH 1140** Pre-Calculus II; or
- **MATH 1150** Pre-Calculus I & II Accelerated

**OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE (3 Credits)**

- **MATH 2214** Calculus I

**LOWER-DIVISION MAJOR REQUIREMENTS (10 Credits)**

- **CSCI 2911** Computer Science I
- **CSCI 2912** Computer Science II
- **CSCI 2916** Computer Science I Lab
- **MATH 2215** Calculus II

**II. UPPER-DIVISION REQUIREMENTS**

**UPPER-DIVISION MAJOR REQUIREMENTS (3 Credits)**

- **MATH 3305** Linear Algebra
CONCENTRATION REQUIREMENTS

Math Education Concentration: (44-46 Credits)

The Mathematics Education concentration provides students with a solid foundation in undergraduate mathematics with specialized courses to prepare them to pursue entry into a secondary education post-graduate program for licensure and/or a Master’s degree in education with a mathematics specialty. This concentration also helps to prepare students for passing the Praxis II Math Content exam for the state licensure, for pursuing a position in the Hawai‘i DOE as an emergency hire, and or pursuing private school mathematics teaching positions.

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE (3 Credits)

COM 2000 Public Speaking

LOWER DIVISION REQUIREMENTS (12 Credits)

MATH 1123 Statistics
MATH 2007 Math across the Ages
MATH 2220 Proof Writing
PSY 1000 Introduction to Psychology

EXPERIMENTAL LAB SCIENCE REQUIREMENTS (8-10 Credits)

Students are required to take two semester of science courses with experimental lab components. In fulfilling this requirement, students gain both understanding of the scientific method and experience with laboratory work. Two semester of a lecture+lab pair of science courses is required. It is not required to take a full sequence within the same discipline; for example, this requirement could be met with BIOL 2050+2051 and CHEM 2050+2051.

Pick any two pairs from this list:

BIOL 2050+2051 General Biology I + Lab
BIOL 2052+2053 General Biology II + Lab
BIOL 3020+3021 Plant Biology + Lab
BIOL 3034+3035 Human Physiology + Lab
BIOL 3040+3041 General Microbiology + Lab
BIOL 3170+3171 Cell and Molecular Biology + Lab
CHEM 1020+1021 Introduction to Chemistry and the Environment + Lab
CHEM 2050+2051 General Chemistry I + Lab
CHEM 2052+2053 General Chemistry II + Lab
CHEM 3030+3031 Organic Chemistry I + Lab
CHEM 3032+3033 Organic Chemistry II + Lab
ENVS 2000+2001 Principles of Environmental Science + Lab
ENVS 3002+3003 Applications of Environmental Science + Lab
MARS 2062+2063 Marine Biology + Lab
MARS 3000+3001 General Oceanography I + Lab
MARS 3002+3003 General Oceanography II + Lab
PHYS 2030+2031 College Physics I + Lab
PHYS 2032+2033 College Physics II + Lab
PHYS 2050+2051 General Physics I + Lab
PHYS 2052+2053 General Physics II + Lab
Some of these lecture+lab pairs depend on prior pairs, for example taking General Chemistry II relies on taking General Chemistry I first. Students should carefully consult the pre-requisites, especially for 3000-level courses.

Students planning to go onto graduate school may need a particular sequence of sciences prescribed by their intended graduate program. They should discuss their selections with their advisors with this in mind.

**UPPER-DIVISION REQUIREMENTS (24 Credits)**

- MATH 3220 College Geometry
- MATH 3316 Problem Solving for Mathematics Teaching
- MATH 3330 Abstract Algebra
- MATH 3450 Real Analysis
- MATH 4920 Math Education Practicum

**ELECTIVES**

Plus any three additional electives. The electives can be upper division (3000 or 4000 level) MATH classes or MATH 2216 (if not taken as part of the concentration requirement), or electives may include up to two PSY or ED classes as approved by a faculty or academic adviser.

**Pure Math Concentration: (46 Credits)**

The Pure Mathematics concentration provides students more choices of mathematics classes than the other concentrations, thereby allowing students to more fully pursue interests that could lead to a graduate school specialty. The student pursuing the Pure Mathematics concentration will also be prepared to enter a graduate teacher education program in education.

**LOWER DIVISION REQUIREMENTS (9 Credits)**

- MATH 2007 Math Across the Ages
- MATH 2216 Calculus III
- MATH 2220 Proof Writing

**EXPERIMENTAL LAB SCIENCE REQUIREMENTS (8-10 Credits)**

Students are required to take two semester of science courses with experimental lab components. In fulfilling this requirement, students gain both understanding of the scientific method and experience with laboratory work. Two semester of a lecture+lab pair of science courses is required. It is not required to take a full sequence within the same discipline; for example, this requirement could be met with BIOL 2050+2051 and CHEM 2050+2051.

Pick any two pairs from this list:

- BIOL 2050+2051 General Biology I + Lab
- BIOL 2052+2053 General Biology II + Lab
- BIOL 3020+3021 Plant Biology + Lab
- BIOL 3034+3035 Human Physiology + Lab
- BIOL 3040+3041 General Microbiology + Lab
- BIOL 3170+3171 Cell and Molecular Biology + Lab
- CHEM 1020+1021 Introduction to Chemistry and the Environment + Lab
- CHEM 2050+2051 General Chemistry I + Lab
- CHEM 2052+2053 General Chemistry II + Lab
- CHEM 3030+3031 Organic Chemistry I + Lab
- CHEM 3032+3033 Organic Chemistry II + Lab
- ENVS 2000+2001 Principles of Environmental Science + Lab
ENVS 3002+3003 Applications of Environmental Science + Lab
MARS 2062+2063 Marine Biology + Lab
MARS 3000+3001 General Oceanography I + Lab
MARS 3002+3003 General Oceanography II + Lab
PHYS 2030+2031 College Physics I + Lab
PHYS 2032+2033 College Physics II + Lab
PHYS 2050+2051 General Physics I + Lab
PHYS 2052+2053 General Physics II + Lab

Some of these lecture+lab pairs depend on prior pairs, for example taking General Chemistry II relies on taking General Chemistry I first. Students should carefully consult the pre-requisites, especially for 3000-level courses.

Students planning to go onto graduate school may need a particular sequence of sciences prescribed by their intended graduate program. They should discuss their selections with their advisors with this in mind.

UPPER DIVISION REQUIREMENTS (21 Credits)

Any seven electives. The electives can be upper-division (3000 or 4000 level) MATH classes. The following classes are recommended:

MATH 3110 Foundations of Logic with Applications
MATH 3320 Set Theory
MATH 3330 Abstract Algebra
MATH 3450 Real Analysis

Applied Math Concentration: (48 Credits)

The Applied Mathematics concentration is an interdisciplinary major that has applications to the physical sciences, statistics, medical research, biological research, environmental studies, economics, actuarial science, teaching operations research, management science, the behavioral and social sciences, education research, and computer science. The successful graduate will be prepared for employment in industry, government, commerce, or further graduate study.

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE (4 Credits)

CHEM 2050 General Chemistry I
CHEM 2051 General Chemistry I Laboratory

LOWER DIVISION REQUIREMENTS (18 Credits)

CHEM 2052 General Chemistry II
CHEM 2053 General Chemistry II Laboratory

PHYS 2051 General Physics I Laboratory
PHYS 2052 General Physics II
PHYS 2053 General Physics II Laboratory

UPPER DIVISION REQUIREMENTS (24 Credits)

MATH 3307 Differential Equations
MATH 3470 Applied Statistics
MATH 3500 Numerical Methods
MATH 4470 Methods of Applied Mathematics I
ELECTIVES
Plus any three additional electives. The electives can be upper division (3000 or 4000 level) MATH classes or MATH 2220, or electives may include up to two Natural Science or CSCI classes as approved by a faculty or academic adviser.

3-2 Engineering (Dual Degree) Math Concentration: (27 Credits)

The 3-2 Engineering concentration is the first portion of a five-year program leading to dual degrees in Applied Mathematics and Engineering. The 3-2 Engineering major will receive a well-rounded background in liberal arts and will have a solid foundation in both mathematics and science. The successful major will be fully prepared to continue engineering studies at either Washington University in St. Louis or the University of Southern California in Los Angeles.

Washington University offers engineering degrees in Chemical Engineering, Civil Engineering, Computer Science, Electrical Engineering, Engineering and Public Policy, Mechanical Engineering, and Systems Science and Mathematics.

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE (4 Credits)
CHEM 2050 General Chemistry I
CHEM 2051 General Chemistry I Laboratory

LOWER DIVISION REQUIREMENTS (28 Credits)
ECON 2010 Principles of Microeconomics or ECON 2015 Principles of Macroeconomics
CHEM 2052 General Chemistry II
CHEM 2053 General Chemistry II Laboratory
MATH 2007 Math Across the Ages
MATH 2216 Calculus III
PHYS 2050 General Physics I
PHYS 2051 General Physics I Laboratory
PHYS 2052 General Physics II
PHYS 2053 General Physics II Laboratory
PHYS 2054 General Physics III
PHYS 2055 General Physics III Laboratory

UPPER DIVISION REQUIREMENTS (12 Credits)
MATH 3307 Differential Equations
MATH 3470 Applied Statistics (Industrial and Systems Engineering)
MATH 3500 Numerical Methods
MATH 4470 Methods of Applied Mathematics I

ELECTIVES

There may be a significant core of course work depending on the engineering major being pursued. Students should clarify their engineering degree choice by the beginning of the second year at the latest and seek guidance from the 3-2 Engineering Program Coordinator. As an example: for Chemical Engineering, CHEM 3040 Quantitative Analysis and CHEM
3030 Organic Chemistry in addition to CHEM 3020 is highly recommended. Planning elective choices is essential to ensure students are as prepared as possible for their chosen field. Please consult with the Program Coordinator for more information.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
BACHELOR OF SCIENCE
MAJOR: OCEANOGRAPHY: 5 Concentrations
(General, Chemical, Mathematics, Fisheries, and Biological)
Total Credits required: 120 Credits

The Oceanography major is composed of a rigorous sequence of courses leading to the Bachelor of Science degree. Laboratory and field work take advantage of Hawai‘i’s oceanic setting, and its wide variety of readily accessible marine environments, ranging from small, shallow estuaries to the deep ocean, only a few hours away. The University’s 42-foot research vessel, Kaholo, is used extensively for advanced fieldwork. Oceanography is the interdisciplinary study of the global oceans, and includes the sub-disciplines of physical, chemical, geological and biological oceanography. In addition students can choose among several concentrations for more focused upper-division coursework in Chemistry, Mathematics, Biology, or Fisheries Science. Completion of the Oceanography major prepares students to enter careers in the marine and aquatic sciences in the private or public sectors, including research laboratories and government agencies. Potential career areas include: education and teaching, environmental analysis, marine policy, fisheries science and management, marine industries, and many others. Students wishing to pursue their studies at the graduate level also achieve the academic preparation to pursue a Master’s or Doctoral degree in oceanography.

PROGRAM OBJECTIVES:
Students majoring in oceanography will:
1. Demonstrate broad basic knowledge of the fundamental principles in the biological and the physical sciences.
2. Integrate scientific principles from chemistry, physics, geology, and biology to explain processes in the marine environment.
3. Plan and implement observational and experimental studies of marine systems and analyze the data obtained from these studies using appropriate mathematical and statistical techniques.
4. Communicate scientific ideas effectively in written and oral formats using appropriate computer applications for data analysis and presentation.
5. Find and evaluate published information from a variety of printed and electronic sources.
6. Use an interdisciplinary perspective to analyze complex problems and develop relevant questions pertaining to marine systems.

MATH 1123  Statistics
MATH 2214  Calculus I

Complete either the College Physics Series:

PHYS 2030  College Physics I
PHYS 2031  College Physics I Laboratory
PHYS 2052  General Physics II
PHYS 2053  General Physics II Laboratory

or the General Physics*:

PHYS 2050  General Physics I
PHYS 2051  General Physics I Laboratory
PHYS 2012  General Physics II
PHYS 2053  General Physics II Laboratory

(*The General Physics series PHY 2050-53, is recommended for students planning to attend graduate school)

II. UPPER-DIVISION REQUIREMENTS

UPPER DIVISION MAJOR REQUIREMENTS (13 CREDITS)

MARS  3000  General Oceanography I
MARS  3001  General Oceanography I Laboratory
MARS  3002  General Oceanography II
MARS  3003  General Oceanography II Laboratory
MARS  4220  Research Experiences in Oceanography
MARS  4920  Seminar: Oceanography; or MARS 4500 Marine Sciences Honors Seminar

UPPER-DIVISION MAJOR ELECTIVES

Complete one of the following concentration area (Chemistry, Biology, Mathematics, or Fisheries Science), or select from the general electives list (General Option). Courses cannot “double-count” for major requirements, with the exception of those that count as General Education credits.

CHEMISTRY CONCENTRATION (23 Credits)

CHEM  3030  Organic Chemistry I
CHEM  3031  Organic Chemistry I Laboratory
CHEM  3032  Organic Chemistry II
CHEM  3033  Organic Chemistry II Laboratory
MARS  4070  Chemical Oceanography

Select two courses from the following:
MARS  4060  Geological Oceanography
MARS  4080  Physical Oceanography
MARS  4090  Biological Oceanography

Plus at least 6 Credits from the following:

CHEM  3020  Chemical Thermodynamics and Kinetics
CHEM  3040  Quantitative Analysis
CHEM  3041  Quantitative Analysis Laboratory
CHEM  3050  Environmental Chemistry
CHEM  4030  Biochemistry I
CHEM  4031  Biochemistry I Laboratory

188
CHEM  4054  Aquatic Chemistry
CHEM  4950  Chemistry Practicum
GEOL  3040  Geochemistry

**BIOLOGY CONCENTRATION (23-26 Credits)**

BIOL  3080  Ecology
BIOL  3081  Ecology Laboratory
CHEM  3010  Fundamental Organic Chemistry; or CHEM 3020/3032 Organic Chemistry I, II (The year-long series is recommended for students planning to attend graduate school).
MARS  4050  Marine Ecology, or MARS 4090 Biological Oceanography

Select two courses from the following:

MARS  4060  Geological Oceanography
MARS  4070  Chemical Oceanography
MARS  4080  Physical Oceanography

Choose at least seven credits from the following courses, with at least three credits from each of the following two subject groups:

**Group 1: Cellular and Molecular Biology**

BIOL  3040  General Microbiology
BIOL  3041  General Microbiology Laboratory
BIOL  3050  Genetics
BIOL  3054  Evolutionary Genetics
BIOL  3170  Cell and Molecular Biology
BIOL  3171  Cell and Molecular Biology Laboratory

**Group 2: Organismal Biology & Ecology**

BIOL  3010  Hawaiian Natural History
BIOL  3025  Algal Biology and Diversity Laboratory
BIOL  3030  Comparative Animal Physiology
BIOL  3031  Comparative Animal Physiology Laboratory
BIOL  3060  Marine Invertebrate Zoology
BIOL  3061  Marine Invertebrate Zoology Laboratory
BIOL  3070  Marine Vertebrate Zoology
BIOL  3071  Marine Vertebrate Zoology Laboratory
BIOL  4024  Algal Biology and Diversity
MARS  4030  Marine Mammal Biology
MARS  4031  Marine Mammal Biology Laboratory
MARS  4040  Seabird Ecology and Conservation
MARS  4050  Marine Ecology
MARS  4051  Marine Ecology Laboratory
MARS  4090  Biological Oceanography
MARS  4100  Marine Resource Management: Culture & Sustainability
MARS  4210  Marine Fisheries & Management
MARS  4400  Marine Conservation Biology
MATHEMATICS CONCENTRATION (24 Credits)

MARS  4080   Physical Oceanography
MATH  3305   Linear Algebra
MATH  3307   Differential Equations

Select two courses from the following:

MARS  4060   Geological Oceanography
MARS  4070   Chemical Oceanography
MARS  4090   Biological Oceanography

Plus nine credits from the following courses:

MATH  2216   Calculus III
MATH  3110   Foundations of Mathematical Logic and Application
MATH  3234   Cryptology
MATH  3301   Discrete Mathematics
MATH  3302   Elementary Number Theory
MATH  3316   Problem Solving
MATH  3450   Real Analysis
MATH  3460   Probability
MATH  3470   Engineering Statistics
MATH  3500   Numerical Methods
MATH  4301   Combinatorics and Graph Theory
MATH  4450   Complex Analysis
MATH  4470   Methods of Applied Mathematics I
MATH  4471   Methods of Applied Mathematics II

FISHERIES SCIENCE CONCENTRATION (28 Credits)

OVERLAPPING GENERAL EDUCATION AND LOWER-DIVISION COURSE (3 Credits)

ECON  2010   Principles of Microeconomics

UPPER-DIVISION CONCENTRATION REQUIREMENTS (25 Credits)

BIOL  3080   Ecology
BIOL  3081   Ecology Laboratory
ECON  3430   Environmental Economics
ENVS  3600   Natural Resources Management
MARS  4050   Marine Ecology
MARS  4210   Marine Fisheries and Management

Select one course from the following:

MARS  4060   Geological Oceanography
MARS  4070   Chemical Oceanography
MARS  4080   Physical Oceanography

Plus at least five credits from the following courses, with at least three credits from a fisheries-related course:

Fisheries-related courses:
BIOL 3070  Marine Vertebrate Zoology
MARS 4100  Marine Resource Management: Culture and Sustainability
MARS 4400  Marine Conservation Biology

Other Courses:

BIOL 3060  Marine Invertebrate Zoology
MARS 4030  Marine Mammal Biology
MARS 4040  Seabird Ecology and Conservation
MARS 4050  Marine Ecology
MARS 4051  Marine Ecology Laboratory
MARS 4090  Biological Oceanography

**GENERAL OPTION (23 Credits)**

Select three courses from the following:

MARS 4060  Geological Oceanography
MARS 4070  Chemical Oceanography
MARS 4080  Physical Oceanography
MARS 4090  Biological Oceanography

Plus at least 14 credits from courses in the natural and computational sciences:

BIOL 3010  Hawaiian Natural History
BIOL 3025  Algal Biology and Diversity Laboratory
BIOL 3030  Comparative Animal Physiology
BIOL 3031  Comparative Animal Physiology Laboratory
BIOL 3040  General Microbiology
BIOL 3041  General Microbiology Laboratory
BIOL 3050  Genetics
BIOL 3054  Evolutionary Genetics
BIOL 3060  Marine Invertebrate Zoology
BIOL 3061  Marine Invertebrate Zoology Laboratory
BIOL 3070  Marine Vertebrate Zoology
BIOL 3071  Marine Vertebrate Zoology Laboratory
BIOL 3080  Ecology Laboratory
BIOL 3081  Ecology Laboratory
BIOL 4040  Environmental Microbiology
BIOL 4024  Algal Biology and Diversity
BIOL 4040  Environmental Microbiology
BIOL 4041  Environmental Microbiology Laboratory
BIOL 4090  Biometry
CHEM 3010  Fundamental Organic Chemistry
CHEM 3020  Chemical Thermodynamics and Kinetics
CHEM 3030  Organic Chemistry I
CHEM 3031  Organic Chemistry I Laboratory
CHEM 3032  Organic Chemistry II
CHEM 3033  Organic Chemistry II Laboratory
CHEM 3040  Quantitative Analysis
CHEM 3041  Quantitative Analysis Laboratory
CHEM 3050  Environmental Chemistry
CHEM 4030  Biochemistry I
CHEM 4031  Biochemistry I Laboratory
CHEM 4032  Biochemistry II
CHEM 4033  Biochemistry II Laboratory
CHEM 4054  Aquatic Chemistry
CSCI 3242  Modeling and Simulation
CSCI 3301  Database Technologies
ENVS 3010 Environmental Impact Analysis
ENVS 3030 Earth Systems and Global Change
ENVS 3600 Natural Resources Management
GEOL 4700 Geographic Information Systems
Any upper-division (3000-4000 level) GEOL course.
Any upper-division (3000-4000 level) MARS course.
Any upper-division (3000-4000 level) MATH course.

III. UNRESTRICTED ELECTIVES

The number of unrestricted elective credits needed will vary depending on the number of credits that overlap between the general education requirements and the major requirements, but students will need to earn enough college-level credits to reach a total of 120 credits.
OTHER UNDERGRADUATE PROGRAMS

University Scholars Honors Program

Study Abroad and Student Exchange Programs

Concurrent Programs
UNIVERSITY SCHOLARS HONORS PROGRAM

Each year, a small number of exceptionally well-prepared and highly-motivated students enter Hawai’i Pacific University as members of the University Scholars Program. This enrichment program offers students an opportunity to take many of their general education core courses in especially stimulating and challenging honors class sections, and to supplement their upper-division work with selected courses and options. University Scholars Program courses are taught by professors who are skilled, motivated, and interested in teaching honors students. Class sizes are small to facilitate discussion and provide a particularly meaningful educational experience.

Applicants for admission to the University who have demonstrated superior academic performance and potential may become members of the University Scholars Program by invitation or by petition. Applicants are screened by the University Scholars Committee. Currently enrolled students may petition the Committee for admission to the Program or may enroll in the Program’s courses with permission. Membership is open to eligible students in all degree programs and majors.

Students maintain their membership by regular enrollment in the Program’s classes and continued high academic performance. A Certificate of Merit is granted to students who complete the required number of honors sections at both the lower-division and upper-division levels and graduate at least cum laude. (Refer to the “Latin Honors at Graduation” section in this catalog).

Special sections of certain lower-division courses required in the General Education Program are designated honors sections for University Scholars. At the upper-division level, University Scholars enroll in honors designated sections of courses in both their junior and senior years.

In addition to their classroom course work, University Scholars are involved in activities such as social events, contact with faculty members and other professionals in their fields of interest, guest speakers, and serving as student mentors for the new cohort of honors program students as they begin their studies at HPU. University Scholars students, faculty work together to design and implement these activities.

University Scholars Curriculum
To earn the certificate, program participants must complete at least six courses from among the honors sections offered in the lower division and three in the upper division, and maintain at least a 3.4 GPA for all courses counted towards the degree. Students with AP credits for high school work may petition to count an AP course towards the lower-division requirement.

Lower-Division Honors Sections
The following honors courses are typically offered regularly, although additional courses may be added on a semester-by-semester basis. Students should work with their advisor to determine the honors classes offered each semester and to confirm which classes fit their own schedule requirements. Honors sections are generally listed as section H or 1H in the schedule of courses.

Upper-Division Honors Sections
Each semester a selection of honors-designated upper-division courses is made upon the recommendations of the program chairs from the various disciplines and programs.

This list of courses is available each semester prior to registration from the Honors Specialist and through the Director of University Honors Programs.
STUDY ABROAD—STUDENT EXCHANGE PROGRAMS

Hawai’i Pacific University offers degree-seeking students opportunities to complement their HPU experience by participating in study abroad programs at various sister-school universities. Participants pay regular HPU tuition and have credits earned at the host institution applied to HPU degree program requirements. Participants are selected competitively on the basis of academic record, appropriateness of study abroad plan to the HPU major and potential to succeed academically and personally in a foreign environment. Student Exchange courses (SE) are listed in the University Curriculum section, and more details can be found on the HPU website under Academics > Study Abroad Programs. Hawai’i Pacific University has exchange programs in Japan, Korea, China, Taiwan, Thailand, Australia, Brazil, Mexico, Germany, France, Spain, Slovenia, Austria, Sweden, and Norway. For more information, please contact the Office of International Exchange and Study Abroad Programs.

CONCURRENT PROGRAM

Select graduate programs participate in HPU’s Concurrent Program, which allows students to complete limited graduate coursework within a participating graduate program before earning an undergraduate degree (www.hpu.edu/grad/academics/concurrent_programs/index.html). The Concurrent Program is only available to current HPU students with a minimum GPA of 3.0 who have completed 90 credits hours towards the degree (including the current term and any transfer credits).

Students who do not meet these requirements may be admitted via a petition signed by the program chair, the department chair or director, and the college dean.

Eligible HPU undergraduates may enroll in designated graduate courses and earn both graduate and undergraduate credit simultaneously for the same course. A maximum of 12 credit hours may be earned concurrently. If a student successfully completes this concurrent coursework with a 3.0 or higher GPA and has their HPU undergraduate degree conferred, the student can continue in the participating HPU graduate program without having to take any further steps. If a student decides not to pursue a graduate program at HPU immediately after graduation, the student has the privilege of entering the participating graduate program within one year from the date of graduation.

Concurrent Degree Programs

For a list of classes for each of the following Concurrent Programs, please contact the department or go to the Concurrent Programs website, http://www.hpu.edu/grad/academics/concurrent_programs/index.html.

Business Administration (MBA)
Communication (MA)
Diplomacy and Military Studies (MA)
Elementary Education (MEd)
Human Resource Management (MA)
Information Systems (MS)
Global Leadership and Sustainable Development (MA)
Marine Science (MS)
Organizational Change (MA)
Secondary Education (MEd)
Teaching English to Speakers of Other Languages (MA)

**Concurrent Degree Certificate:**
National Security and Strategic Studies

**Eligibility Criteria**
1. Current HPU student
2. GPA 3.0 or above
3. Completed 90 credit hours (including current term and any transfer credits)
4. In designated programs with Petition for Concurrent Registration (PCR)
5. Students who do not meet these requirements may be admitted via a petition signed by:
   a. the program chair, the department chair or director, and
   b. the college dean

**Admission**
1. Verify eligibility by meeting with an undergraduate advisor
   a. The advisor will fill out and sign the Petition for Concurrent Registration (PCR) with designated undergraduate & graduate concurrent courses
   b. Any courses not on the Concurrent Program list must have an approved General Petition attached to the PCR by the advisor
2. Confirm eligibility by meeting with a graduate advisor
   a. The graduate advisor will review and approve the PCR
3. Concurrent Admission requires an approved PCR with a completed graduate program application form
   a. Application fee of $50 is required
   b. Transcript from HPU is not required
   c. Essay may be required; check with the department
   d. Letter of reference is not required

**Registration for Concurrent Classes**
1. Concurrent course registration is not available online. It must be done in person at the Registrar’s Office.
2. Concurrent course tuition will follow the approved guidelines set for concurrent course. Please check with the Business Office for details
3. Maximum 12 credit hours can be used for concurrent courses (including any courses that will be counted as graduate credits)
4. Each term the student must meet first with an undergraduate advisor to select the designated course(s) and get a PCR filled out and signed. This form must then be viewed and approved by a graduate advisor prior to registration

**Completion of the Undergraduate Degree**
1. If a student successfully completes the Concurrent Program coursework with a 3.0 or higher and has the undergraduate degree conferred, the student can continue in the HPU graduate program without having to take any further steps. Graduate admissions will change the student status from undergraduate to graduate upon the conferral of the degree.
2. If a student decides not to pursue a graduate program at HPU immediately after graduation the student has the privilege of entering the graduate program within one year from the date of graduation.
MINORS

Besides enrolling in a major, students are encouraged to consider one of the many minors of study that are available at Hawai‘i Pacific University. A minor program of study encompasses completion of selected courses that are fewer in number and less comprehensive than a major. At least four courses in the minor field must be taken in addition to coursework in the major. All students must complete a minimum of six (6) credit of minor course work in residence with HPU in order to be awarded a minor. Although the minor is not listed on the diploma, it is listed on the transcript, provided that the student has completed all necessary course work and the degree has been conferred. Minors must be identified prior to degree conferral. Students may not add minor courses of study to degree programs that have already been completed and conferred on the original transcript.

ACCOUNTING

Five upper-division courses beyond ACCT 2010:
ACCT 3000 Intermediate Accounting I
ACCT 3010 Intermediate Accounting II
ACCT 3020 Intermediate Accounting III
ACCT 3200 Managerial Accounting
ACCT 4100 Auditing

AMERICAN STUDIES

Any six of the following courses-four of which must be upper-division from at least three different alphas:
AMST 1776 Essential America
AMST 3476 Written on the American Skin
ANTH 3550 Hawai‘i in the Pacific: Selected Issues
ANTH 3556 Hawaiian Archaeology
ANTH 3980 Hawaiian Sovereignty, Process and the Sacred Community
ENG 2202 Popular Fiction
ENG 3122 American Literature After 1800
ENG 3202 Literature of Slavery
ENG 3203 Pidgin Literature
ENG 3224 Ethnic Literature
ENG 3226 Hawai‘i Writers
ENG 3227 Hawai‘i and the Pacific in Film
ENG 3252 20th-Century American Women Writers of Color
ENG 3812 American Folk Ballads
HIST 2401 American History to 1877
HIST 2402 American History Since 1865
HIST 3411 US: Jackson to Civil War
HIST 3414 “Untied States;” Race and Ethnicity in American History
HIST 3421 Golden Age/Progressive Era
HIST 3441 US History Since WWII
HIST 3461 American Intellectual History
HIST 3465 US-Japanese Relations 1853-Present
HIST 3470 Women in America
HIST 3666 US Military History
HIST 3676 US Diplomatic History
INTR 3940 Contemporary Nations: USA
PSCI 1400 American Political System
PSCI 3401 Issues in American Politics
PSCI 3411 The United States Presidency
PSCI 3412 American Foreign Policy
PSCI 3413 Constitutional Law
PSCI 3415 State and Local Government
PSCI 3416 Elections in Hawai‘i
PSCI 3430 America: Images from Abroad

Or other courses approved by the American Studies Program Chair.

ART HISTORY

At least one course from each category for a total of four upper-division courses beyond ARTH 2100 (Tribal Arts), ARTH 2000 (Art of Asia), or ARTH 2200 (Western Art):

Tribal
ARTH 3551 Art of the Pacific
ARTH 3552 Art of Polynesia
ARTH 3556 Art of Hawai‘i

Asia
ARTH 3301 Art of China
ARTH 3321 Art of Japan
ARTH 3351 Art of India and Southeast Asia

Western
ARTH 3206 Renaissance to Modern Art
ARTH 3611 Art and the Human Body
ARTS 3051 Photography

BIOLOGY

Nine courses of at least 21 credit, including at least three upper-division lecture and two upper-division laboratory courses. At least four of these courses (lecture or lab) must be outside the requirements for the student’s major.

LOWER-DIVISION REQUIREMENTS (10 credits):
A grade of ‘C’ or better in this General Biology series is a prerequisite for all upper-division courses.
BIOL 2050 General Biology I
BIOL 2051 General Biology I Lab
BIOL 2052 General Biology II
BIOL 2053 General Biology II Lab

UPPER-DIVISION REQUIREMENTS (11 CREDITS):
One lecture course from each of the following three subject groups, and two laboratory courses from any two groups, must be completed. Although some courses are listed in more than one group, each course can count towards completion of only one subject group for the minor.
Group 1: Cellular and Molecular Biology

BIOL 3040 General Microbiology
BIOL 3041 General Microbiology Lab
BIOL 3050 Genetics
BIOL 4030 Cell and Molecular Biology
BIOL 4031 Cell and Molecular Biology Lab
BIOL 4040 Environmental Microbiology
BIOL 4041 Environmental Microbiology Lab
CHEM 4030 Biochemistry I
CHEM 4031 Biochemistry I Lab

Group 2: Organismal Biology

BIOL 3020 Plant Biology
BIOL 3021 Plant Biology Lab
BIOL 3030 Comparative Animal Physiology
BIOL 3031 Comparative Animal Physiology Lab
BIOL 3034 Human Physiology
BIOL 3060 Marine Invertebrate Zoology
BIOL 3061 Marine Invertebrate Zoology Lab
BIOL 3070 Marine Vertebrate Zoology
BIOL 3071 Marine Vertebrate Zoology Lab
BIOL 3xxx Human Anatomy

Group 3: Ecology and Evolution

BIOL 3010 Hawaiian Natural History
BIOL 3020 Plant Biology
BIOL 3021 Plant Biology Lab
BIOL 3054 Evolutionary Genetics
BIOL 3080 Ecology
BIOL 3081 Ecology Lab
BIOL 4040 Environmental Microbiology
BIOL 4041 Environmental Microbiology Lab
MARS 4050 Marine Ecology (Oceanography majors only)
MARS 4051 Marine Ecology Lab (Oceanography majors only)

BUSINESS ECONOMICS

Four upper-division courses beyond ECON 2010 and 2015
ECON 3010 Intermediate Microeconomics; or ECON 3020 Managerial Economics
ECON 3015 Intermediate Macroeconomics; or ECON 3300 Money and Banking
ECON 3100 Introduction to Econometrics
ECON 3400 International Trade and Finance

CHEMISTRY

16 upper-division credits beyond the General Chemistry sequence:

General Chemistry Sequence (10 credits)
CHEM 2050 General Chemistry I
CHEM 2051 General Chemistry I
Laboratory CHEM 2052 General Chemistry II
CHEM 2053 General Chemistry II Laboratory

**Organic Chemistry Sequence (8 credits)**

CHEM 3030 Organic Chemistry I
CHEM 3031 Organic Chemistry I Laboratory
CHEM 3032 Organic Chemistry II
CHEM 3033 Organic Chemistry II Laboratory

*Plus one of the following groups (5 credits):*
CHEM 3040 Quantitative Analysis
CHEM 3041 Quantitative Analysis Laboratory
OR
MARS 4070 Chemical Oceanography
MARS 4071 Chemical Oceanography Laboratory
OR
CHEM 4030 Biochemistry I
CHEM 4031 Biochemistry I Laboratory

*Plus one additional course from the following (3 credits):*
CHEM 3020 Physical Chemistry I
CHEM 3050 Environmental Chemistry
CHEM 4054 Aquatic Chemistry
CHEM 4950 Practicum
GEOL 3040 Geochemistry
MARS 3070 Chemical Oceanography

**CLASSICAL STUDIES.**

*Four upper-division courses; or, alternatively, three upper division courses and ARTH 2200:*

ARTH 2200 Foundations of Western Art
CLST 3030 Ancient Drama
CLST 3100 Female Figures in Classical Myth, Literature, and Religion
CLST 3405 The Age of Augustus
CLST 4900 Seminar in East-West Classical Studies
HIST 3101 Greek History to Alexander
HIST 3102 The Age of Alexander the Great
HIST 3111 Roman Republic & Empire
HIST 3170 Gender & Sexuality in the Classical World
HIST 4911 Seminar in Ancient History
HUM 3601 Mythology
PHIL 3200 History of Western Philosophy

*Or other upper-division humanities courses related to the ancient Western world.*

**COMMUNICATION STUDIES**

*Six courses:*

*Two lower-division courses:
COM 1200 Foundations of Communication Studies
COM 2300 Communication and Culture or COM 2500 Sex, Gender and Communication

Four upper-division courses:
COM 3000 Mass Media
COM 3200 Interpersonal Communication or COM 3300 Intercultural Communication
COM 3320 Persuasion
COM 3900 Communication Theory

COMPUTER INFORMATION SYSTEMS (CIS)

Four upper-division courses beyond CSCI 1011 and 3201:
CSCI 3211 Systems Analysis
CSCI 3301 Database Technologies
CSCI 4921 Software Project Management

Plus one upper-division CSCI elective.

COMPUTER SCIENCE

Four CSCI core courses (listed below) plus four CSCI upper-division courses:
CSCI 1911 (or exemption by placement exam)
CSCI 2911 Computer Science I
CSCI 2916 Computer Science I Lab (1 credit)
CSCI 2912 Computer Science II

Four upper-division CSCI courses totaling at least 12 credit

CRIMINAL JUSTICE

Complete one lower-division and four upper-division Criminal Justice courses (15 Credits).
CJ 1000 Violence in American Society
CJ 3000 Ethics and Justice
CJ 3070 Justice Management
CJ 3300 Criminal Procedures
CJ 3500 Criminal Law

DIPLOMACY AND MILITARY STUDIES

Any five of the following Upper-Division courses with at least one from both HIST and PSCI:
GEOG 3750 Military Geography
HIST 3465 U.S.-Japanese Relations 1853-Present
HIST 3501 Islam and the Middle East
HIST 3661 History of Warfare to 1500
HIST 3662 War and Society since 1500
HIST 3666 U.S. Military History
HIST 3668 Military History of Hawaii
HIST 3676  U.S. Diplomatic History  
HIST 3870  Modern World Revolutions  
HIST 4661  History of Military Thought  
HIST 4900  Seminar in History  
HIST 4961  Seminar: Military History  
INTR 3000  International Relations  
INTR 3200  National and International Security  
INTR 3250  Peace-Building and Conflict Management  
INTR 3275  Global Governance  
INTR 3350  International Human Rights  
INTR 3400  International Relations of Asia  
INTR 3905  Any Contemporary Nations course  
PSCI 3412  American Foreign Policy  
PSCI 3430  American: Images from Abroad  
PSCI 3925  Islam and Politics  
PSCI 3540  Politics of Terrorism  
PSCI 3650  Intelligence Studies  
PSY 3360  Military Psychology  
SOC 3660  Sociology of Terrorism  

_Or other courses approved by the DMS Program Chair._  

**EAST-WEST CLASSICAL STUDIES**  

**Five Courses**  

**Required:**  

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLST 1000</td>
<td>Great Books East and West</td>
</tr>
</tbody>
</table>

**Choose 4 additional courses: any 2 from Western Traditions and any 2 from Eastern traditions.**  

**WESTERN TRADITIONS**

</table>
Note: Students are encouraged, but not required, to study a classical language, preferably, Japanese, or Chinese.

**ENGLISH**

*Six upper-division courses beyond WRI 1150 or any 2000-level ENG:*

- HUM 3900 Research and Writing in the Humanities
- Plus any three 3000-level ENG courses
- Plus any two upper-division ENG, or WRI courses

**ENVIRONMENTAL STUDIES**

*Six upper-division courses beyond ENVS 2000:*

*Complete one or both of the following:*

- ENVS 3010 Environmental Impact Analysis
- ENVS 3030 Earth Systems and Global Change
- Plus
- ENVS 4100 Society and Environment: Contemporary Issues Seminar

*Plus three or four of the following:*

- ANTH 3115 Culture, Religion, and the Environment
- COM 3500 Technical Communication
- ECON 3430 Environmental Economics
- GEOG 3720 Population Dynamics
- ENVS 3020 Environmental Policy Process
- PHIL 3651 Environmental Ethics

**FILM STUDIES**

*Six upper-division courses:*

- COM 3260 Exploring Film or PHIL 3260 Exploring Film
- ENG 3330 Film Theory and Criticism

*Plus any four of the following electives:*

- ENG 3101 Shakespeare on Screen
- ENG 3145 Nonfiction Film: Documentary, Docudrama, and Historical Film
- ENG 3227 Hawai‘i and the Pacific in Film
- ENG 3350 Literature Adapted to Screen
- PSCI 3620 Politics in Film
- WRI 3320 Scriptwriting

**FINANCE**

*Four upper-division courses beyond FIN 3000:*
ECON 3300  Money and Banking
ECON 3400  International Trade and Finance
FIN 3300  Investments
FIN 3400  Financing in the Money and Capital Markets

**GENDER AND WOMEN’S STUDIES**

_Six courses:_

HUM 1270  Introduction to Women’s Studies

_Plus five courses from the following list below. No more than 3 courses may have the same alpha (alphabetic prefix such as ENG, HIST or SOC):_

ANTH 3360  Men and Women in Modern Society

Society ANTH 3365  Women in Asia

ARTH 3611  Art and the Human Body

CLST 3100  Female Figures in Classical Myth, Literature, and Religion

ENG 3250  Texts and Gender

ENG 3251  Sex, Power and Narrative

ENG 3252  20th-Century American Women Writers of Color

HIST 3070  Sex, Gender, and History

HIST 3170  Gender and Sexuality in the Classical World

HIST 3270  Gender in Medieval and Early Modern Europe

JADM 3540  Women, Minorities, and Justice

PSCI 3550  Women and Politics

SOC 3320  Marriage and the Family

SOC 3329  Sociology of Gender and Sexuality

SOC 3760  Women, Minorities and Justice

_Or other special topic courses pertinent to the study of gender. Please consult the Faculty Advisor to determine applicability to the minor._

**GEOGRAPHY**

_Five upper-division courses beyond GEOG 1500, or GEOG 2000 or GEOG 2500._

_Four upper-division GEOG courses and one course from the INTR Contemporary Nations series._

**GERONTOLOGY**

The Minor in Gerontology is meant to provide a broad base of health knowledge that will be useful in a wide variety of occupations such as social work, journalism, correctional system, business and education.

_Five courses_

_Students must take all of the following:_

PH 1000  Introduction to Personal and Community Health

PH 3060  Global Aging

PH 3070  Gerontology Theory and Practice

PH 4020  Social Gerontology

REL 3007  On Death and Dying

**GLOBAL COMMUNICATION**
Six courses:
Two lower-division courses:
COM 1200 Foundations of Communication Studies
COM 2300 Communication and Culture

Four upper-division courses:
COM 3000 Mass Media
COM 3300 Intercultural Communication
COM 3750 Global Communication Cases
COM 3760 Communication Futures

HEALTH PROMOTION

Students must take the following:
PH 1000 Introduction to Personal and Community Health
PH 3020 Epidemiology
PH 3030 Health Promotion and Wellness Management
PH 3040 Health Education Planning, Theory, and Practice
PH 4600 Grantwriting in the Health Professions

HISTORY
Any five upper-division HIST courses beyond any single 2000-level HIST course.

HOSPITALITY AND TOURISM MANAGEMENT

Four upper-division courses beyond the upper-division business requirements and beyond HTM 1010 and one HTM work experience:
HTM 3110 Hotel and Resort Management
HTM 3210 Food and Beverage Management
HTM 3610 Travel Industry Marketing
HTM 4310 Passenger Transportation Management

HUMAN RESOURCE DEVELOPMENT

Six lower-division and twelve upper-division credits.
HRD 1000 Introduction to Human Resource Development
HRD 2000 Strategic Talent Management
HRD 3100 Principles of Instructional Design
HRD 3110 Training Methods and Delivery in Business
HRD 3120 E-Learning and Learning Technologies
HRD 3130 Measurement, Evaluation and ROI Training
HRD 3300 Human Resource Project Management
HRD 3400 Organizational Staffing

HUMANITIES

Five courses:
One lower-division course in ARTH, CLST, HUM, PHIL, or REL
Plus four other upper-division ARTH, CLST, ENG, HIST, HUM, PHIL, or REL courses. No more than two of these courses may come from the same alpha.
INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY

Six upper-division courses beyond PSY 1000:
MKTG 3100 Consumer Behavior
PSY 3121 Applications of Psychology to Management
PSY 3122 Industrial/Organizational Psychology

Plus any three upper-division Psychology courses. (Courses listed below are recommended when available).
PSY 3120 Group Dynamics in Organizations
PSY 3300 Social Psychology
PSY 3500 Tests and Measurements in Psychology

INTERNATIONAL BUSINESS

Four upper-division courses beyond the upper-division business requirements:
ECON 3400 International Trade and Finance
ECON 3900 Economic Issues of Asia
MGMT 3300 International Business Management
MKTG 3420 International Marketing

INTERNATIONAL STUDIES

A total of five courses (15 credits) is required, four of them at the upper-division level:

One lower-division course from:
GEOG 1500 World Regional Geography
GEOG 2000 Visualizing Human Geography
INTR 1000 The International System
PSCI 2000 Introduction to Politics

Four upper-division courses from:
HIST 3xxx Any 3000-level HIST course
INTR 3000 International Relations
PSCI 3500 Comparative Politics

Plus one additional upper-division (3000-4000 level course in ANTH, ENVS, GEOG, HIST, INTR, PSCI or SOC).

JAPANESE

Option 1:
Five courses beyond JPE 2200 taken at HPU.

Required Courses (12 credits):
JPE 3100 Advanced Japanese I
JPE 3200 Advanced Japanese II
JPE 4100 Advanced Japanese III

Elective courses (6-7 credits):
Choose two:
ANTH 3300 Japanese Society and Culture
ARTH 3321 Art of Japan
**Option 2:**

*One-year study abroad in Japan (30 credits)*

Students participate in the student exchange study abroad programs at one of HPU’s Exchange Partner Schools in Japan: Aoyama University, Hakodate University, Momoyama Gakuin University, Nagoya University of Foreign Studies, Obirin University, and Surugadai University.

</tr>
</tbody>
</table>

*Advertising/Public Relations: Strategic Communication majors only may substitute MKTG 3200 Product Development for MKTG 3100*

**MATHEMATICS**

*Five upper-division courses beyond MATH 2215:*

A minor in mathematics is awarded for the successful completion of five upper-level
MATH classes (3000-4000 level) beyond MATH 2215. One 2000-level math class (above MATH 2215) may count to the math minor, but MATH 2326 is not eligible to count towards the minor.

**MULTIMEDIA**

*Six courses:*

*Two lower-division courses:*

MULT 2000  Introduction to Cinema Studies or MULT 2060 Modern Media Systems
MULT 2460  Graphic Design or MULT 2465 Video Production I

*Two upper-division courses:*

MULT 3360  Writing for New Media
MULT 3475  Web Interface and Design

*Two of the following:*

MULT 3510  Nonlinear Editing
MULT 3560  Documentary Production
MULT 3600  Creative Media Production
MULT 3675  Advanced Web Design
MULT 3750  Motion Graphics and Compositing
MULT 3780  Global Documentary
MULT 4702  Mobile Design
MULT 4900  Multimedia Seminar

**MUSIC**

*Total of 17 credits in three areas are required. At least 12 credits must be upper-division.*

MUS 2400  Music Theory I (3 credits) Ensemble and Applied Music (8 credits):
*For pianists and guitar/ukulele players 4-6 credit of applied music:*
MUS 3210  Applied Music (solo) and 2-4 credit of ensemble/chamber courses:
MUS 1710  International Chorale (voice placement audition required) MUS 3210 Applied Music (trio, quartet, quintet ...)
MUS 3700  Sea Warrior Band (Hawaiian Ensemble, Jazz Ensemble, audition required)
MUS 3710  International Vocal Ensemble (audition required)
*MUS 3720  Chamber Orchestra (Symphony, audition required)*

*Choose two upper division courses in music from the following (6 credits):*

MUS 3010  Jazz History
MUS 3030  History of American Musical Theater
MUS 3100  Theater Music of the World
MUS 4000  Topics in Music (repeatable)
PHIL 3501  Philosophy of Art and Aesthetics
PSY 3160  Psychology of Music
OCEANOGRAPHY

The minor requires a total of 26-27 credits in MARS courses:
MARS 1020 Oceanographic Field Techniques
MARS 2060 Geology, Chemical & Physical Oceanography
MARS 2061 Geology, Chemical & Physical Oceanography Lab
MARS 2062 Marine Biology
MARS 2063 Marine Biology Lab

Five courses from the following list at least one of which must be a lab:
MARS 3084 Descriptive Regional Oceanography
MARS 4060 Geological Oceanography
MARS 4061 Geological Oceanography Lab
MARS 4070 Chemical Oceanography
MARS 4071 Chemical Oceanography Lab
MARS 4080 Dynamic Physical Oceanography
MARS 4081 Dynamic Physical Oceanography Lab

PHILOSOPHY

Five of the following with at least one course from each group:
History of Philosophy
PHIL 3200 History of Western
Philosophy
PHIL 3300 History of Asian Philosophy
Ethics and Aesthetics
PHIL 3260 Exploring Film
PHIL 3501 Philosophy of Art and Aesthetics
PHIL 3651 Environmental Ethics
Social and Political Philosophy
PHIL 3731 Philosophy of Social Sciences
PHIL 4501 Reordering Social Values
HUM 3000 The Contemporary Choices

PHYSICAL SCIENCES

CHEM 3020 Chemical Thermodynamics and Kinetics
GEOL 3040 Geochemistry
PHYS 2054 Modern Physics

Plus two courses from the following, but no more than one from any alpha:
CHEM 3040 Quantitative Analysis
CHEM 4054 Aquatic Chemistry
GEOL 3010 Volcanoes: Effects on Humanity and the Environment
GEOL 3020 Hydrogeology
GEOL 3030 The History of Life and the Earth
MARS 3060 Geological Oceanography
MARS 3080 Dynamical Physical Oceanography

POLITICAL SCIENCE
Six upper-division Political Science or International Studies courses beyond PSCI 1400 or PSCI 2000 or PSCI 2500.

PRE-MEDICAL STUDIES

Twenty courses of at least 45 credits (including lecture, laboratory, and internship courses). At least four of these courses (lecture, laboratory, or internship) must be outside the requirements for the student’s major.

Lower-Division requirements (28 credits)

<table>

OR any other upper division REL course

SOCIAL SCIENCES

Six upper-division Social Science courses:

PSY 3300 Social Psychology
SOC 3100 Methods of Inquiry
SOC 3200 Social Statistics

Plus three upper-division courses from ANTH, PSCI, PSY, or SOC.

SPANISH

Option 1:

Five upper-division courses beyond SPAN 2200:

Four required courses (16 credits)

Both of these:

SPAN 3100 Advanced Spanish Speaking and Listening
SPAN 3200 Advanced Spanish Writing and Grammar

Choose two Culture and Literature courses:

SPAN 3310 Culture and Literature of Spain
SPAN 3320 Culture and Literature of Mexico and Central America
SPAN 3330 Culture and Literature of South America
SPAN 3340 Culture and Literature of Caribbean
SPAN 3350 Culture and Literature of Spanish-speakers in the U.S.

One Elective (3 or 4 credits)

Choose from:

SPAN 33xx Any third Culture and Literature course from the list above
ANTH 3815 Mexican Culture and Identity (offered at La Universidad Latina de América, in Morelia, México)
HIST 3242 History of Spain.

Option 2:

Semester study abroad in Mexico or Spain

SPAN 3100 Advanced Spanish Speaking and Listening or SPAN 3200 Advanced Spanish Writing and Grammar

Plus 15 credits in content courses taught in Spanish at one of three study abroad sites. Students may participate in a semester exchange in either Fall or Spring with La Universidad Latina de América in Morelia, México or in Spring with La Universidad de Cádiz or La Universidad de Sevilla in Spain. Students must have completed SPAN 3100 or SPAN 3200 with a grade of C or better by the time of the trip.

SPEECH COMMUNICATION

Six courses:

Two lower-division courses:

COM 2000 Public Speaking
COM 2460 Argumentation and Debate

Four upper-division courses:
Six courses:

One required course:

ARTS 2010  Beginning Drawing

Choose one of the following courses:

ARTS 2020  Intermediate Drawing
ARTS 2150  Introduction to Design
MULT 2460  Graphic Design

Choose four of the following courses:

ARTS 3010  Introduction to Sculpture
ARTS 3020  Introduction to Painting
ARTS 3051  Introduction to Photography
ARTH 3206  Renaissance to Modern Art
ARTH 3611  Art and the Human Body
ARTH 3551  Art of the Pacific
ARTS 4901  Advanced Studio Projects

Six upper-division Applied Linguistics courses beyond AL 2000:

AL 3110  Phonetics and English Phonology
AL 3120  English Syntax
AL 3950  Language Classroom Experience (usually taken 1 credit at a time)
AL 4710  Materials, Methods, Testing I: Spoken English
AL 4720  Materials, Methods, Testing II: Written English
AL 4960  Practice Teaching I

The minor has a total of five courses

Both of the following:

THEA 2320  Acting I: Basic Acting for Stage and Screen
THEA 3420  Acting II: Fundamentals of Scene Study

Plus three additional upper-division courses from the list below, two of which must be from
the THEA Alpha:

COM 3260  Exploring Film
ENG 3321  Western Dramatic Literature
ENG 3222  Asian Dramatic Literature
ENG 4100  Shakespeare Seminar
MUS 3100  Theater Music of the World
PHIL 3501  Philosophy of Art and Aesthetics
THEA 3500  Applied Technical Theater
THEA 3520 Intermediate Scene Study
THEA 3600 Advanced Technical Theater
THEA 3620 Directing
THEA 4520 Acting IV: Advanced Acting
THEA 4900 Seminar in Theater
THEA 4950 Theater Performance
WRI 3320 Scriptwriting

**WRITING**

*18 upper-division credits*

*15 credits chosen from this list. (Courses in this list are 3 credits unless otherwise specified).*

- COM 3400 Communicating Professionally
- COM 3420 Business Communication
- COM 3500 Technical Communication
- HIST 3900 Research and Writing across Time and Culture
- HUM 3900 Research and Writing in the Humanities
- JOUR 3300 Reporting
- JOUR 3400 Editing
- MULT 3360 Writing for New Media
- SWRK 3300 Writing and Research in Social Work
- WRI 3310 Poetry Workshop
- WRI 3311 Childhood and Poetry
- WRI 3313 The Sacred and Erotic in Lyric Poetry
- WRI 3320 Scriptwriting
- WRI 3330 Fiction Writing
- WRI 3340 Creative Nonfiction Writing Workshop
- WRI 3390 Literary Magazine*
- WRI 3391 Wanderlust: HPU Student Literary Magazine
- WRI 3510 Composition Studies (3-4 credits)
- WRI 3950 Professions in Writing Practicum
- WRI 3951 Staff Reader, Hawai‘i Pacific Review (1 credit)
- WRI 3953 Managing Editor, Hawai‘i Pacific Review
- WRI 3990 Nonpaid Internship (1-2 credits)
- WRI 3991 Paid Internship (1-3 credits)

Students are encouraged to take at least three credits in internship or practicum courses such as WRI 3391, 3510, 3950, 3951, 3953, 3990 or 3991

*Plus required capstone (3 credits):*

- WRI 4990 Professional Writing Portfolio Seminar

*While WRI 3390 will no longer be offered after spring 2013, students who have taken the course can still apply it to the minor.*
UNDERGRADUATE CERTIFICATE PROGRAMS
UNDERGRADUATE CERTIFICATES

ANTHROPOLOGY CERTIFICATES

Anthropology is the study of human diversity. It explores the changing, multicultural world in which we live in order to understand the rich varieties of the human adventure. Its goal: to help people, despite their differences, live and work together in mutually meaningful and rewarding ways.

KEY ADVANTAGES OF AN ANTHROPOLOGY CERTIFICATE

- Enhance your current degree major without necessarily taking additional courses.
- Enrich your understanding of today’s complex, multicultural, changing world.
- Learn to navigate across different specializations to deal effectively with real world problems.
- Broaden your education with concrete work experiences that allow you to apply classroom skills in real-life situations and add credibility to your job résumé.
- Reinforce reading and writing skills needed to succeed in today’s competitive environment.

CERTIFICATE IN ASIAN STUDIES

For two centuries, Asia and Hawai‘i have been intimately connected. Asia’s remarkable economic growth, followed now by a decline, has reverberated throughout Hawai‘i’s economy. The challenge is to understand these processes – how they have shaped and reshaped Asian societies. The Asian Studies Certificate focuses on the political economy of the region. Through an exploration of four overlapping fields – anthropology, international relations, history, and political science – the certificate examines the plights and possibilities of development in Asia as well as the hopes and harms entwined with recent social changes. Particularly relevant to majors in advertising, anthropology, communication (speech, theater, visual communication), economics, history, humanities, human resource development, human services, international relations, international studies, journalism, justice administration, literature, political science, psychology, public relations, social science, business economics, entrepreneurial studies, finance, human resource management, international business, management, marketing, and social work.

ANTH 3950 Internship/Practicum

Choose one of the following courses:

ANTH 3300 Japanese Culture and Society
ANTH 3302 Chinese Culture and Society

Choose three courses from the following list:

ANTH 3300 Japanese Culture and Society*
ANTH 3302 Chinese Culture and Society*
ANTH 3365 Gender in Asia
ECON 3900 Economic Issues of Asia
HIST 3302 History of Modern China
HIST 3322 History of Modern Japan
HIST 3352 History of Modern South East Asia
INTR 3400  International Relations of Asia
INTR 39xx  Contemporary Nations Series (any courses with this alpha on an Asian country or region)
PSCI 3520  Politics and Government in Asia
PSCI 3580  Comparative Political Economy

* Can be used only if not used elsewhere in this certificate

CERTIFICATE ON THE BODY, SEX, AND FOOD
With the advent of mass marketing, music videos and cable television, today’s youth culture is saturated with images and ideas that locate power, prestige and desire firmly within consumer culture and the iconic male and female bodies that symbolize and fetishize it. This certificate seeks to give students the intellectual skills to interrogate the human body as a site of many different levels of cultural activity. In contrast to the idea of bodies and their appetites as passive vehicles for advertising, this certificate will encourage students to investigate and reflect critically on the ways in which the body and its appetites are used to construct, challenge and reflect social and cultural ideals. By looking at both cultural and biological perspectives on the body, bodily practice and the ways in which bodies are objectified, utilized and experienced, students will gain an appreciation for the way in which the human body acts as a focus for important cultural, social and political activity. The scope of this certificate is broad, ranging from issues surrounding the maintenance of the body such as the meanings and uses of food, to the sociology of the performing arts, to uses of massed bodies in collective action from demonstrations to massacres and memorials. Relevant to majors in anthropology, the humanities, international studies, political science, social work, communication, psychology, and sociology.

ANTH 3950  Internship/Practicum

Choose four courses from the following list:
ANTH 3200  Medical Anthropology
ANTH 3360  Men and Women in Modern Society
ANTH 3365  Gender in Asia
ANTH 3400  Anthropology of Food
ANTH 3403  Topics of Ethnomusicology: Rhythm and Culture
ANTH 3580  Impact of Tourism on Local Culture
ARTH 3611  Art and the Human Body
ENG 3252  20th Century Women Writers of Color
INTR 3350  International Human Rights
PSCI 3401  Issues in American Politics
PSCI 3560  Politics of Culture and Race

CERTIFICATE IN CULTURAL AND SOCIAL ANALYSIS
Anthropology has traditionally understood its mission primarily in academic terms. This certificate aims to introduce students to more recent developments in anthropology which are specifically focused on contemporary social and political issues, but which are informed by social theory and the holistic and cross-cultural approaches of modern anthropological practice. Students in this certificate will learn how to utilize contextual information on culture, history, economics, and politics to better understand the issues of meaning and belief that underlie modern political and social action. Cross-cultural analysis will be used to highlight important similarities and differences between the ways in which different societies engage with a similar
set of issues. This certificate would have a natural constituency among anthropology majors, but would also be attractive to students in fields such as humanities, international studies, nursing, political science, psychology, and sociology wishing to pursue advanced undergraduate training in social analysis. It would also be attractive students aiming at graduate work in law, the social sciences or social work.

ANTH 3950 Internship/Practicum

Choose four courses from the following list:

ANTH 3000 Is Global Citizenship Possible?
ANTH 3110 Symbolism, Myth and Ritual
ANTH 3200 Medical Anthropology
ANTH 3230 Making a Difference
ANTH 3250 Anthropology of “First” Contact and Colonialism
ANTH 3360 Men and Women in Modern Society
ANTH 3980 Hawaiian Sovereignty, Process, and the Sacred Community
ENG 4320 Seminar in Postcolonial Literature
INTR 3250 Peace-Building and Conflict Management
INTR 4110 Diaspora Cultures
PSCI 3560 Politics of Culture and Race
SOC 3750 Social Movements and Collective Behavior or SOC 3760 Women, Minorities and Justice

CERTIFICATE IN CULTURE AND LANGUAGE LEARNING
Hawai’i has gained a reputation as a living study in cross-cultural communication and interaction. Though dozens of different languages may be spoken in homes and workplaces around Hawai’i, English is the lingua franca. Language in Hawai’i is often the topic of discussion and concern in the media, in political arenas, and certainly in schools at all levels. The Certificate in Culture and Language Learning not only examines the relationship between language and culture but also strives to augment the knowledge and teaching skills of the student seeking to know more about English as one of the languages most spoken around the world. Particularly relevant to majors in anthropology, social work, communication (speech, theater, visual communication), human services, journalism, literature, psychology, public relations, social science, and teaching English to speakers of other languages.

ANTH 3700 Culture and Language
AL 2000 Introduction to Linguistics
AL 3320 Sociolinguistics

Choose one of the following advanced Applied Linguistics classes:

AL 3110 Phonetics and English Phonology
AL 3120 English Syntax
AL 3130 Semantics
AL 3310 History of the English Language
AL 3340 Translation in Second Language Acquisition
AL 3500 Second Language Learning and Teaching
Choose one of the following pedagogical Applied Linguistics classes:

AL 3350  Group Dynamics for Language Teachers
AL 3740  Technology in Language Teaching
AL 3750  Creating Language Teaching Materials
AL 4710  Materials/Methods/Testing: Spoken English
AL 4720  Materials/Methods/Testing: Written English

**HAWAI‘I / PACIFIC STUDIES CERTIFICATE**

The Pacific is truly one of the world’s great wonders. Covering roughly one-third of the earth’s surface, its islands – small in size and population – present a staggering array of cultural and ecological diversity. Close to one-fourth of the world’s languages, for example, can be found among this tiny fraction of the globe’s population. The Hawai‘i/Pacific Studies Certificate places Hawai‘i’s cultural traditions within the broader context of the Pacific that continues to nourish them. Through the exploration of overlapping fields, the certificate examines critical Pacific issues that have framed (and continue to frame) Hawai‘i’s own development. Particularly relevant to majors in advertising, anthropology, economics, human resource development, justice administration, political science, communication (speech, theater, visual communication), journalism, public relations, history, humanities, human services, international studies, literature, psychology, social science, military studies, social work, business economics, entrepreneurial studies, finance, human resource management, international business, management, and marketing.

ANTH 3950  Internship/Practicum

Choose four courses from the following list:

ANTH 3000  Is Global Citizenship Possible?
ANTH 3230  Making a Difference
ANTH 3500  Appreciating Pacific Worlds
ANTH 3550  Hawai‘i in the Pacific: Selected Issues
ANTH 3556  Hawaiian Archaeology
ANTH 3980  Hawaiian Sovereignty, Process and the Sacred Community
ARTH 3556  Art of Hawai‘i, or ARTH 3551 Art of the Pacific, or ARTH 3552 Art of Polynesia
HIST 3556  History of Hawai‘i, or HIST 3551 Pacific Island History, or ANTH 3980 Hawaiian Sovereignty, Process and the Sacred Community

**INDIVIDUALIZED CERTIFICATE IN ANTHROPOLOGY**

Students are encouraged to explore new syntheses across the disciplines just as anthropology itself does. Students construct their own certificates in association with the program’s anthropologists, the Dean of International Studies, and the University’s advising staff. A key requirement is that students take charge of their education and decide how they want to bring different perspectives, different disciplines, together in productive, insightful ways that enhance their educational experience.

This certificate serves two constituencies:
1) Students outside the Anthropology major who have a sustained interest in anthropological issues and perspectives.
2) Students who are Anthropology majors who are studying areas of Anthropology that are either not covered by an existing certificate, or for which there is substantial overlap with courses offered in other departments and schools

ANTH 3950 Internship/Practicum
Four courses at the 3000 level or higher, with the permission of the Dean of Humanities and Social Sciences and anthropology faculty. Courses must have substantial anthropological content or be relevant to a field of interest to which the student will apply an anthropological perspective.

CERTIFICATE IN MANAGING OUR MORTALITY

Research indicates that death in the United States is often a lonely, painful, uncaring experience dominated by technology. This certificate provides learners from various sectors of the community with a basic foundation that focuses upon the primary issues facing people at the end of life. Framed within theories of caring, the personal, professional, institutional, and legal barriers to quality end of life care will be researched and analyzed. The certificate in Managing Our Mortality envisions certificate students as agents of change willing to move into the broader community to create caring and ethical end of life environments. Particularly relevant to majors in anthropology, human services, psychology, social science, pre-medical studies, nursing, and social work.

ANTH 3200 Medical Anthropology
ANTH 3922 Managing Our Mortality (cross-listed as NUR 3922)
ANTH 3950 Internship/Practicum
Plus any two upper division ANTH or NUR courses

CERTIFICATE IN PUBLIC ANTHROPOLOGY

Public anthropology emphasizes the student/scholar’s responsibility to actively address central issues of our time. It affirms a commitment, through ethnography, to reframing the terms of public debate—transforming received, accepted understandings of social issues with new insights, new framings. The certificate affirms student/scholars as active citizens that, in striving for social justice, empower others and transforms political structures. The certificate brings together courses from a range of disciplines that (1) systematically analyze important social issues and (2) offer ways to effectively reframe and rethink them in order to address and, to the degree possible, bring sense, sensibility, and change to the way we cope with them today. The certificate examines a range of issues including the environment, tourism, and peace studies which are all of major importance within the specific location of Hawai‘i. The specific “local” focus of the certificate makes it an ideal course of study for students wishing to gain experience and greater knowledge of the issues and challenges facing this part of the world specifically. This focus is an attempt to get students to engage critically with their own surroundings wherever these may ultimately be. The constituency for this certificate includes Anthropology majors, students majoring in political science, international studies, humanities (with a specific interest in Pacific and Hawaiian studies) and sociology.

ANTH 3950 Internship/Practicum

Choose four courses from the following list:
ANTH 3000 Is Global Citizenship Possible?
ANTH 3115 Culture, Religion, and the Environment
ANTH 3230 Making a Difference
ANTH 3250 Anthropology of “First” Contact and Colonialism
ANTH 3500 Appreciating Pacific Worlds
ANTH 3550 Hawai‘i in the Pacific: Selected Issues
ANTH 3580 Impact of Tourism on Local Culture
ANTH 3980 Hawai‘iian Sovereignty, Process, and the Sacred Community
INTR 3250 Peace-Building and Conflict Management
PSCI 3560 Politics of Culture and Race

COMPUTER INFORMATION SYSTEMS CERTIFICATE

The demands of the modern business world are constantly changing. The Computer Information Systems (CIS) Certificate Program is meant to provide the modern tools necessary to execute business procedures with standard programs as well as to customize applications to meet business needs.

Earning a certificate means that the student has obtained competency in database theory, data communications, and a modern programming language.

CIS Certificate Requirements
Students are expected to be familiar with introductory programming concepts and common computer application to business. To earn the certificate, the student must complete a minimum of four courses, earning a grade of “A” or “B” in each course at Hawai‘i Pacific University. This program is not available to BSBA-Computer Information Systems, BSCS, and MSIS majors at Hawai‘i Pacific University.

Students must take two courses preferably in one specific language. Current languages include: Access Basic, Visual Basic, C, C++, Java, Oracle 7, RPG 400 and SQL.

CSCI 37xx Modern Programming Language I
CSCI 37xx Modern Programming Language II

Students must take both of the following courses:

CSCI 3301 Database Technologies
CSCI 3401 Data Communication

FORENSIC HEALTH SCIENCE CERTIFICATE

Forensic Science is on the threshold of biotechnical advancement. Individuals working in the human service area can facilitate a valuable service in the transition of trauma victims from health care institutions to the court of law. The forensically educated professional could be a critical component in facilitating the proper recognition and collection of evidence in complex forensic cases. With the application of deoxyribonucleic acid (DNA) profiling, virtually any scrap of evidence can provide genetic evidence to assist in the apprehension (or elimination) of a perpetrator. These new technologies are helping to revolutionize the ability to bring to justice criminals who commit violent crimes.
REQUIRED COURSES
NUR 3972 Introduction to Forensic Science
NUR 3973 Criminalistics and the Investigation of Injury and Death
NUR 3974* Clinical Internship in Forensic Health Science
PSY 3310 Forensic Psychology

NUR 3974 students need to meet the health requirements of the School of Nursing. See Nursing Student Clinical Health Requirements on our web site for specifics.

GERONTOLOGY CERTIFICATE

The Certificate in Gerontology provides an opportunity for students in various programs to learn about a complementary field of study. Students enrolled in programs such as social work, journalism, social sciences, and business may find a concentration in gerontology to be an advantage in the workplace. The Certificate includes a practicum course, giving the student field experience in gerontology.

Students must take all of the following:
PH 1000 Introduction to Personal and Community Health
PH 3060 Global Aging
PH 3070 Gerontology Theory and Practice
PH 4010 Social Gerontology in Health Science
PH 4910 Practicum III
REL 3007 On Death and Dying

HOSPITALITY AND TRAVEL MANAGEMENT CERTIFICATE

Hawai‘i is well known as one of the most popular travel and tourism destinations in the world. HPU offers a dynamic travel and hospitality program with the goal of enhancing the skills of the travel industry professional. Courses in this certificate program focus on the: application of theoretical concepts to real world situations, development of critical thinking skills, analysis and synthesis of information leading to logical conclusions, and understanding holistic systems.

CERTIFICATE REQUIREMENTS

It is recommended that applicants to the Travel and Hospitality certificate have an educational and/or experiential background in travel industry or a related area.

Students must take a total of five courses in order to receive a Travel and Hospitality certificate.

Students must take two of the following courses:
HTM 3110 Hotel and Resort Management
HTM 3210 Food and Beverage Management
HTM 4310 Passenger Transportation Management
HTM 4410 Destination Development and Marketing

And two of the following courses:
HTM 3610 Travel Industry Marketing
And one of the following courses or an upper division TIM elective:

**HTM 4620** Travel Industry Financial Analysis and Control
**HTM 4635** Advanced Business Law: Hotel and Travel

**HTM 3510** Travel Agency Management
**HTM 3645** Human Resource Management in Travel Industry Management
**HTM 4110** Hotel Rooms Management
**HTM 4210** Advanced Food and Beverage
**HTM 4655** Information System Issues in Travel Industry Management
**HTM 4692** Management of Customer Service Organizations

**HUMAN RESOURCE MANAGEMENT CERTIFICATE**

The Undergraduate Certificate in Human Resource Management (CHRM) program provides a solid base of HR knowledge. It will help broaden one’s knowledge on the most current trends and practices in HR with its local and global focus. It will help elevate one’s standing in the HR and business communities, boost career opportunities, and will earn an individual increased credibility and respect within the profession and the organization where you are employed. Earning the CHRM is a professional tool of advantage at all stages of one’s career. Participants learn how to succeed in today’s business environment through effective leadership and management of an organization’s most valuable human resources.

**REQUIRED COURSES**

**MGMT 3444** Training and Development in Organizations
**MGMT 3650** Employment and Labor Law for Business
**MGMT 3700** Human Resource Planning and Staffing
**MGMT 4000** Strategic Human Resource Management

*Plus one elective chosen from the following:*

**MGMT 3400** Human Resource Management
**MGMT 3420** Compensation Management
**MGMT 3440** Organizational Change and Development
**MGMT 3441** Managing Organizational Performance
**MGMT 3750** International Human Resource Management
**MGMT 4950** Human Resource Development Practicum

**TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES (TESOL) CERTIFICATE PROGRAM**

**Student Qualifications**

The Teaching English to Speakers of Other Languages (TESOL) Certificate Program at Hawai’i Pacific University is designed for students who are earning or have completed a bachelor’s degree. Prospective students may be undergraduates who seek preparation in the field of language teaching before they graduate, college graduates who wish to enter the field of TESOL but do not wish to get a second bachelor’s degree or immediately go on to the graduate level, or in-service classroom teachers who want a refresher course to upgrade their skills or background knowledge in this field. The certificate program may also be used as preparation for graduate work in TESOL, language education, or linguistics.
TESOL Certificate Requirements

The TESOL Certificate is awarded upon completion of at least 24 credit hours of specified courses. For those who have finished an undergraduate degree, the work can be accomplished in no less than two full semesters or can be spread over a longer period. For undergraduate students, the work is normally spread over more than two semesters. Students earning the BA in TESOL may not later take the TESOL Certificate since the certificate is built on a subset of the same courses; however, transferring from one plan to another is possible during the course of study.

REQUIRED COURSES (16-18 credit)

ELECTIVE COURSES IN OTHER FIELDS

Students may enter the program with some of the required or elective courses having been taken at another institution. If the HPU transcript evaluator accepts these courses, they need not be repeated at HPU, but the student must take other AL courses to make up the minimum 24-credit requirement. If the student has taken all courses from the list of the required and elective courses in applied linguistics, the student may choose from the following to fulfill the 24-credit minimum. Students are also encouraged to select from the following list to enhance their knowledge of English, English literature, psychology of learning, and pedagogy. Students are strongly encouraged to take more than the minimum 24 credits during their study for the TESOL Certificate.

The Transcultural Nursing Certificate in Transcultural Nursing is intended for the nursing student and/or RN or LPN who is interested in enriching their understanding and application of Transcultural Nursing in order to become better equipped to provide culturally competent nursing care. The Transcultural Nursing Certificate program includes foundational theory and concepts of Transcultural Nursing as well as application to the diverse cultures of Hawaii, and to one specific culture experienced through study and cultural immersion. Supplemental courses will examine cultural diversity.

Transcultural Nursing Certificate Requirements

The student will complete 13 credits as designated below to complete the certificate.

Complete each one of these Nursing Courses:

- NUR 3930  Complementary Healing Methods
- NUR 3943  Transcultural Nursing
- NUR 3944  Transcultural Nursing
- NUR 3945  Theoretical Foundations of Transcultural Nursing
And complete one of the following 3 credit courses:

ANTH 3200  Medical Anthropology
ARTH 3611  Art and the Human Body
COM 3300  Intercultural Communication
PSY 3235  Cross-Cultural Psychology
REL 1000  Introduction to the World Religions

POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICAL/PRE-HEALTH STUDIES

Student Qualifications
Applicants must have graduated from an accredited institution of higher learning with a baccalaureate or higher degree and a final GPA of 2.5 or above, or they must earn a GPA of 2.5 or above in their most recent 60 semester units (90 quarter units) of course work. Because of the limited number of students that can be accommodated by the certificate program, applicants with higher GPAs will have an advantage in being admitted. However, GPA will be only one of many factors in evaluating applicants.

This certificate program is designed for career-changing post-baccalaureate students who are looking for assistance in taking science (and other associated topics) courses to initiate the preparation for pre-medical/pre-health professions graduate school qualifying examinations (MCAT, DAT, OAT, GRE, etc.) Students with a high level of science preparation may be able to complete the program in one year with 24 credits. Students who have earned an undergraduate degree in science-related fields at HPU or other universities may have already taken many of these courses. If students have HPU or approved transfer credit for these courses they may be applied to meet the certificate requirements; however, students must take at least 24 credits at HPU that are specific to the certificate. Students can choose additional courses from the electives list as necessary to reach 24 credit.

Post-Baccalaureate Certificate Requirements:
This certificate program requires 56 program credits. The projected time for completing the program is two years and a certificate will be awarded to those students who achieve a total GPA of 3.2 or over and have successfully completed 56 program credits (of which at least 24 are taken at HPU after earning the bachelor’s degree). There is a progression GPA requirement of 2.8 for the program (from Year 1 to Year 2)

REQUIRED COURSES (45 credit)

BIOL 2050/51 General Biology I Series
BIOL 2052/53 General Biology II Series
CHEM 2050/51 General Chemistry I Series
CHEM 2052/53 General Chemistry II Series
CHEM 3030/31 Organic Chemistry I Series
CHEM 3032/33 Organic Chemistry II Series
MATH 2214  Calculus I
MATH 2215  Calculus II
PHYS 2030  College Physics I or PHYS 2050 General Physics I
PHYS 2031  College Physics I Laboratory or PHYS 2051 General Physics I Laboratory
PHYS 2032  College Physics II or PHYS 2052 General Physics II
PHYS 2033  College Physics II Laboratory or PHYS 2053 General Physics II Labora-
ELECTIVE COURSES
Choose from among these courses to reach a total of 56 credits for the certificate:

- ANTH 3200 Medical Anthropology
- BIOL 2170 Ethnobotany: People and Plants
- BIOL 3020 Plant Biology
- BIOL 3034/35 Human Physiology Series
- BIOL 3036 Human Anatomy
- BIOL 3040 General Microbiology
- BIOL 3050 Genetics
- BIOL 3090 Biometry
- BIOL 4020 Cancer Biology
- BIOL 4030/31 Cell and Molecular Biology Series
- CHEM 3020 Physical Chemistry
- CHEM 3040/41 Quantitative Analysis Series
- CHEM 4030/31 Biochemistry I Series
- CHEM 4032/33 Biochemistry II Series
- COM 2640 Argumentation and Debate
- PMED 3950 Pre-Health Professions Practicum
- SOC 3100 Methods of Inquiry

(Advanced MATH courses may be substituted)

Minimum GPA Requirements
A student must have at least a 3.20 GPA in the 56 minimum credits in order to receive the Post-Baccalaureate Certificate in Pre-Medical/Pre-Health Studies. If students have HPU or approved transfer credit for these courses they may be applied to meet the certificate requirements; however, students must take at least 24 credits at HPU that are specific to the certificate and must have at least a 3.20 GPA. There is a progression GPA requirement of 2.8 for the program (from Year 1 to Year 2). Furthermore, the student must pass required courses with a grade of B or better. Required course in which the student has received a C, D, or F must be repeated.
INTRODUCTION TO GRADUATE EDUCATION

The goal of graduate education at a Masters level is to elevate and motivate thinking to a more advanced level, preparing the student to become a productive, innovative and creative problem solver, and decision-maker in the field or discipline of his or her choosing.

The degree allows the student to master a particular scope of knowledge, relate and integrate that knowledge to other disciplines, use it to understand and apply concepts, theory and principles in new and challenging situations, and to analyze and solve complex problems. Research methodology, technical and communication skills are part of the curriculum with the purpose of preparing the graduate to become a decision-making professional, complete with the attitudes and abilities to grow as an advanced professional in his or her field.

Curriculum may include coursework centered around research, case studies, applied projects, collaborative work with organizations outside of the university, and internships. A capstone experience completes the master’s program and may include one of the following: a major research-driven thesis or its equivalent; a comprehensive professional-level project or case study; an internship or work of original art; or a comprehensive exam.

ADMISSIONS

Requirements
Admission into HPU graduate programs is based upon the student’s prior academic record, professional experience, and potential for success in graduate studies. Students who have earned a baccalaureate degree (or the equivalent to a U.S. College or university degree for international students) with a G.P.A of 2.7 or higher are encouraged to apply for admission. Admissions decisions are made based on written recommendations, a history of professional experience, and, if required, personal interviews, resumes and GMAT, PRAXIS, GRE, TOEFL and IELTS scores. Refer to the Application Procedures for any program specific requirements.

Application Procedures
Applicants should submit the following materials to:

Hawai’i Pacific University
Admission Office
One Aloha Tower Drive
Honolulu, HI 96813

Students applying for admission to the graduate program should:

1. Complete the Graduate Application online via online application at http://www.hpu.edu. Please be sure to complete all sections of the application.
2. Application fee of $50.00 paid via credit card at time of application sub-mission
3. Submit official transcripts showing successful completion of all undergraduate degrees and other postsecondary work. Be sure to send official transcripts from all universities and colleges attended.
4. Submit two letters of recommendation. The letters should be written by employers, former professors, or other persons who can attest to your ability to succeed as a graduate student and as a professional in your intended field.
5. Submit appropriate test scores depending on specific program requirements
6. Be sure to contact HPU Admissions for additional questions.

Graduate Special Status Applicants: Graduate special status students may take up to 12 credits at HPU. After completing 12 credits, a student must apply as a degree-seeking
Admissions Deferral Procedures
Students who have been offered admission to a degree seeking program at Hawai‘i Pacific University and have NOT attended any classes may request a deferral of enrollment for up to one year from admission term. Deferment pertains only to admission to the university, not admission to a particular major or program.

Additional Requirements for International Students
International students seeking admission into a graduate program, who are not native speakers of English and have not completed their degrees at U.S. English-speaking colleges or universities, are required to demonstrate English language skills. Submission of a recognized English placement test score is highly recommended. The minimum scores that HPU recognizes are:

<table>
<thead>
<tr>
<th>Recognized Tests</th>
<th>Minimum Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper-Based TOEFL</td>
<td>550, Essay 5</td>
</tr>
<tr>
<td>Computer-Based TOEFL</td>
<td>213, Essay 5</td>
</tr>
<tr>
<td>Internet-based TOEFL</td>
<td>80, Writing 25 (IBT)</td>
</tr>
<tr>
<td>International English Language Testing System (IELTS)</td>
<td>6.0 and 6.5 on the Writing Module</td>
</tr>
<tr>
<td>Pearson Test English Academic (PTE Academic)</td>
<td>58 overall</td>
</tr>
</tbody>
</table>

ELS Completion of level 112 and passing grade on the final exam

English proficiency waivers are available for students from English speaking countries and students with a U.S. baccalaureate-level confirmed degree.

International students must also:

1. Have official copies of transcripts sent directly from your postsecondary school or testing authority, including an English translation.
2. Submit a completed and signed Hawai‘i Pacific University Statement of Financial Sponsorship Form (supplemental form) accompanied by an original certified bank statement, indicating that sufficient funds are available to support the first year of graduate school.

Graduate Visiting Students
Please visit www.hpu.edu/visiting to learn more about the admission process and additional ways to meet English proficiency.

ACADEMIC POLICY AND PROCEDURES

Course Loads
During Fall and Spring terms, a student is required to take 9 credits to be considered full-time. Students may not exceed 12 credit hours of graduate-level work without special written permission from the dean of their respective academic division. Students taking only
prerequisite courses must take a minimum of 12 credit hours to maintain their full-time status. The maximum number of courses permitted for students taking only prerequisite courses is 18 credit hours.

**Internships**
Internships and practicums are available for qualified graduate students in a number of leading firms and organizations in the private and not-for-profit sectors.

Internships are professional, managerial, or highly technical in nature. They are intended to provide the University’s most outstanding and competitive students with work experiences leading directly, upon graduation, to career positions either with the firms or organizations where they have interned or similar employers.

Graduate students must maintain a 3.0 GPA to be eligible to participate in these programs. International students must be enrolled full-time, while U.S. citizens may be enrolled part-time to earn co-op or internship credits. Students may apply a total of three credit hours toward a concentration. See co-op and internship sections.

Students interested in this program should contact the Career Services Center and their graduate faculty advisor.

**Time Requirement**
Students should complete the requirements for their graduate programs within seven years of their first enrollment into an HPU graduate program. They must complete the professional paper/capstone course within one year of initial registration.

**Leave of Absence**
Please refer to the Academic Policies and Procedures in the undergraduate section of this catalog.

**ACADEMIC CREDITS AND GRADES**
Students who have completed military or institutional training of a formal nature (such as the Naval War College, etc.) may be considered for transfer credit on the basis of recommendations of the American Council on Education (ACE).

Requirements for transfer of credit are as follows:

1. The student must have completed a baccalaureate degree at the time he or she took the course(s) in question and have been accorded graduate status. Courses to be transferred must clearly be graduate-level courses;

2. The course(s) being considered must have been completed no more than five (5) years before initial enrollment in the HPU graduate program and no more than seven (7) years before completion of relevant HPU degree;

3. The student must have earned a B or better in each of the courses considered for transfer;

4. Transferred courses to be applied against core courses must be the same in terms of curriculum and developed competencies. No transfer credit will be awarded to replace the Hawai‘i Pacific University capstone courses;

5. The student must provide official transcripts from all institutions from which they are requesting official transfer credit, including English translations of international transcripts; and
6. To have transfer credits evaluated in order to determine if they can be applied towards the program course requirements, students must begin by contacting their graduate academic advisor and requesting that the credits be evaluated. With the assistance of the academic advisor, the student will need to complete a General Petition form, which requires the inclusion of a course description for each course that will be evaluated for transfer credit. The course description should be within the same catalog period as when the course was taken. When a course description is vague or does not convey clearly the course content, a course syllabus will be required. The General Petition is submitted to the appropriate college for the final decision if the course meets the requirements to make it eligible to be evaluated. The final number of credits awarded might vary depending upon whether it was taken during a term or an 8-week or shorter session.

Grades
To earn the graduate degree, students must complete all courses with at least a cumulative 3.0 GPA. (Upper-division undergraduate accounting and law classes required as part of the Accounting concentration are considered graduate courses for GPA purposes.) All courses taken (except those taken under the Repeat Policy) will count toward the student’s graduate level GPA for determining academic progress, probation, and graduation. This includes prerequisite courses. In addition, graduate students must complete all degree requirements with a minimum cumulative 3.0 GPA. Students enrolled in a concurrent graduate degree program must meet this requirement for each degree separately.

Students receiving a grade of F or NC in a core or capstone course must usually repeat the course to earn an acceptable grade. Students receiving an F for a concentration or elective course may repeat the course. For repeated courses, the last grade will be the one used to calculate the cumulative GPA, although the original grade will remain on the transcript. Otherwise, all courses taken at HPU are used for cumulative GPA calculations.

</tbody>
</table>

**Honors at Graduation**
Students in a graduate program at the University may graduate with the designation “With Distinction” by attaining a minimum grade point average (GPA) of 3.7 as follows:

1. Completion of at least 24 credit hours of coursework at the University toward the MSIS, or MA, or 27 credits toward the MBA, or all credit hours for MATESOL, or 39 credit hours for a concurrent degree program.
2. A minimum honors point average (HPA) of least 3.7 for all HPU coursework taken while in graduate status.
3. An HPA of at least 3.7 for all graduate coursework completed at any college or university.

**Academic Probation, Suspension, and Dismissal**
Students with graduate student status must maintain a 3.0 GPA to remain in good academic standing. After attempting nine term credit hours students will be placed on academic probation if they fail to achieve a 3.0 GPA.
Students on academic probation must schedule periodic meetings with an academic advisor who will work with them and monitor their progress. Probationary students are restricted to taking 9 credit hours (three graduate courses), or 12 credit hours (combination of graduate and under-graduate courses) during a spring or fall term. Students on probation for the second consecutive term—or after completion of 9 or 12 credit hours (as appropriate) subsequent to being placed on probation for the first time—and who have not demonstrated satisfactory progress in raising their GPA may be suspended.

Appealing a suspension is a formalized process initiated by the student. Appeals for suspension are submitted to the Associate Vice President for Academic Affairs. The suspension appeal process is a one-time process, and students approved to return will remain on continued probation for the term in which they return. All suspension appeal approvals are subject to the approval of the Provost/Vice President for Academic Affairs or his/her designee. Students who have successfully appealed their suspension will be placed on continued probation status for one term only. Should a student fail to raise their GPA after their suspension has been lifted, they will be subject to dismissal, which is final.

**CAPSTONE REQUIREMENT**

To graduate, students must meet both university requirements and those established within each graduate program. The University requires a minimum 3.0 GPA to graduate and the successful completion of a capstone experience. Each graduate program has its own specific degree requirements, including a capstone experience, which students must meet.

A capstone or culminating experience provides students with an opportunity to integrate prior learning, and is undertaken at the conclusion of the program of study. It can take several different forms, including a thesis, professional paper, special project, portfolio, or comprehensive exams. For a complete explanation of degree requirements, capstone experience and any related policies and procedures, please go to the specific graduate program web page and/or talk to a Graduate Academic Advisor or the Department Chair of the graduate program of interest.

Students interested in pursuing a concurrent degree while already in a degree program must submit a request in writing prior to entering the capstone series of courses. Moreover, the students must complete the required core courses of the concurrent graduate degree program before beginning the capstone series.

Students desiring to take a subsequent degree after completing an HPU graduate program, may transfer 12 credit hours of core courses into the new program. Specific program course requirements appear on the subsequent pages of this section.

MSW students who have not completed the professional paper within one year must re-enroll in SWRK 7350. MA/DMS students must complete HIST 7602 within seven years from first graduate enrollment. Students who do not complete HIST 7602 in the term of enrollment will receive an incomplete grade for the course if they can demonstrate close proximity to finishing; otherwise, they will receive an NC grade and must maintain continuous enrollment in HIST 7003 for up to 3 terms.

Students receive the grades A, B, C, or F for IS 6700 or OC 7000 course. The grades awarded for IS 7200, NUR 7000, COM 7250, or OC 7000 are A, B, C, and NC (no credit). The NC grade is assigned to those students who have not successfully completed the professional paper at the end of the term. Students receiving the NC grade must register for IS 7200, OC 7000, NUR 7000, or COM 7250 in the next term; and maintain continuous enrollment for up to one year until they have successfully completed the paper. As long
as the student has been continuously enrolled in the professional paper course, he or she will be awarded three credit hours of credit with the appropriate grade upon completion of the paper. The student who has taken an unapproved hiatus between IS 6700 and IS 7200 or OC 7000 must start the sequence again, beginning with IS 6700/OC 7000. Students are responsible for the tuition for continuous enrollment in the professional paper courses and for any retakes of those courses.

The MBA and concurrent degree programs require the completion of two capstone courses in the last year of program study. The capstone courses ensure that they can draw from their analytical, communication, and technological skills and are capable of applying these in a global setting.

Students are to enroll in the capstone course that is specific for the MBA. The MGMT 7001/7002 sequences must be taken in two consecutive terms, that is, fall and spring, or spring and summer, or summer and fall. The MGMT 7001 course will require students to develop a strategic plan. The implementation of this plan becomes the basis for the MGMT 7002 course.

Students must maintain continuous registration and enrollment in the MGMT 7002 course until the implementation plan is completed. However, students should complete the plan within seven years from first graduate enrollment at HPU, and within one year from the first enrollment in MGMT 7001. MBA students who have not completed the plan within the one-year, but are still within the seven-year must re-enroll in MGMT 7001 and begin the capstone sequence anew. Students receive the grades A, A-, B+, B, B-, C+, C, or F for the MGMT 7001 course. The grades awarded for the MGMT 7002 course are A, A-, B+, B, B-, C+, C, and NC (no credit). The NC grade is assigned to those students who have not successfully completed the professional paper at the end of the term. Students receiving the NC grade must register for MGMT 7002 in the next term, and maintain continuous enrollment for up to one year until they have successfully completed the plan. As long as the student has been continuously enrolled in the capstone course, he or she will be awarded three credit hours of credit with the appropriate grade upon completion of the paper. The student who has taken an unapproved hiatus between MGMT 7001 and MGMT 7002 must start the sequence again, beginning with MGMT 7001. Students are responsible for the tuition for continuous enrollment in the capstone courses and for any retakes of those courses. A summary of the capstone courses for the different graduate degree programs is located on the next two pages.

PROFESSIONAL PAPER RETAKE POLICY

Normally, students should complete the professional paper course sequence for the MBA, MSIS, MA/COM, MA/HR, MA/GLSD, and MA/OC within one year of first enrollment in IS 7100, COM 7150, MGMT 7001, GLSD 7100 or OC 7000. Satisfactory progress beyond that year is determined by the dean of that particular college, in consultation with the program faculty. At the discretion of the dean of the college in which the program is located, a student may be suspended if satisfactory progress is not made after that one year.

CONCURRENT GRADUATE DEGREES (formerly known as Joint Programs)

Hawai‘i Pacific University offers the opportunity for students to prepare themselves for multidiscipline careers by enrolling in concurrent graduate degree programs. Students may apply for a concurrent graduate degree program either at the initial admission stage or while pursuing one of the degrees. Students who enter a concurrent degree while already in a concurrent graduate degree program must do so in writing and prior to entering the capstone series of courses. Moreover, the student must complete the required core courses of the concurrent graduate degree program before beginning the capstone series. For MBA/MSIS students, the professional paper must include an integrated study of both business and information systems. For other
concurrent graduate degree program students, the professional paper must similarly be pertinent to both disciplines. Students are not required to take MGMT 7001/7002 or OC 7000 to complete the MBA or MA (Human Resource Management, Global Leadership and Sustainable Development, or Organizational Change) portion of the concurrent degree program with MSIS. These students are to complete the MSIS capstone course series. Students desiring to take a subsequent degree after completing an HPU graduate program, may transfer 12 credit hours of core courses into the new program. Specific program course requirements appear on the subsequent pages of this section.

The following is a list of Concurrent Graduate Degree Programs:

- Business Administration and Human Resource Management
- Business Administration and Global Leadership and Sustainable Development
- Business Administration and Organizational Change
- Business Administration and Nursing
- Business Administration and Information Systems
- Business Administration and Communication
- Information Systems and Human Resource Management
- Information Systems and Global Leadership and Sustainable Development
- Information Systems and Organizational Change
- Information Systems and Diplomacy and Military Studies
- Organizational Change and Communication

GRADUATE PROGRAMS
OF STUDY
GRADUATE PROGRAMS

Hawai‘i Pacific University offers the following graduate degree programs. Some of these programs include concentration options. For more detailed information, please refer to the program requirements elsewhere in this catalog.

**College of Business**

- Master of Arts in Human Resource Management
- Master of Arts in Organizational Change
- Master of Business Administration
- Master of Science in Information Systems

**College of Extended and Interdisciplinary Education**

- Master of Education in Elementary Education
- Master of Education in Secondary Education

**College of Health and Society**

- Master of Science in Nursing
- Master of Social Work

**College of Liberal Arts**

- Master of Arts in Clinical Mental Health Counseling
- Master of Arts in Communication
- Master of Arts in Diplomacy and Military Studies
- Master of Arts in Global Leadership and Sustainability Development
- Master of Arts in Teaching English to Speakers of Other Languages (TESOL)

**College of Natural and Computational Sciences**

- Master of Science in Marine Science
CONCURRENT GRADUATE PROGRAMS
(formerly known as Joint Programs)

Concurrent graduate degrees are awarded for completion of requirements derived from specific combinations of graduate programs (www.hpu.edu/grad/academics/joint_programs.html). Students may enter a concurrent graduate degree either at the initial admission stage or while pursuing one of the degrees. Students who enter the concurrent graduate degree while already enrolled in one of the participating degree programs must do so prior to entering the capstone series of courses. Moreover, students must complete the required courses of the concurrent graduate degree before beginning the capstone series. The professional paper must be pertinent to both disciplines. Some concurrent graduate degrees have additional requirements.

Hawai‘i Pacific University offers the following concurrent graduate degree programs.

- Business Administration and Communication
- Business Administration and Global Leadership and Sustainable Development
- Business Administration and Human Resource Management
- Business Administration and Organizational Change
- Business Administration and Information Systems
- Business Administration and Nursing
- Information Systems and Diplomacy and Military Studies
- Information Systems and Global Leadership and Sustainable Development
- Information Systems and Human Resource Management
- Information Systems and Organizational Change
- Organizational Change and Communication
MASTER OF ARTS IN HUMAN RESOURCE MANAGEMENT

PROGRAM OBJECTIVES
Students who complete the Master of Arts in Human Resource Management will:

1. Understand and apply appropriate theories and methods for HRM.
2. Develop broad perspectives necessary for analyzing HRM in organizations.
3. Integrate strategy, structure, technology, and people into HRM applications.
4. Relate the HRM process to various national and business settings.
5. Use contemporary HRM techniques in a variety of cross-cultural and societal settings.
6. Understand various HRM models for creating organizational improvements.

It is the mission of the MAHRM program to prepare students to enter human resource management as a career field, to position themselves to exploit promotion opportunities in the discipline, or to segue into the HR field as managers after successful careers in other management disciplines. In general, we are committed to preparing our students to become HR generalists, specialists, managers, and executives, as their career phase, maturity level, and personal motivation dictates.

PREREQUISITES
Students from a variety of backgrounds are attracted to this graduate program. Therefore, to ensure each student is adequately prepared for the academic rigors of a graduate-level program, the following courses must be satisfactorily completed as a foundation for graduate studies:

- CSCI 3201 Information Management Using Spreadsheets and Databases
- SOC 3100 Methods of Inquiry*
- SOC 3200 Social Statistics*

*or the equivalent of 6 credits of undergraduate courses in research methods and statistics.

CORE COURSES (33 credits)
- HR 6320 Global Human Resource Management
- HR 6400 Human Resource Management
- HR 6420 Compensation Management
- HR 6460 Human Resource Development
- HR 6470 Collective Bargaining and Labor Relations
- IS 6005 Information System Management
- IS 6020 Modern Methods in Project Management
- IS 6040 Business Analytics
- LAW 6000 Law for Managers
- OC 6440 Organizational Change and Development
- OC 6445 Organizational Behavior

CAPSTONE COURSE (3 credits)
- HR 7021 Certification Seminar in Human Resources
MASTER OF ARTS IN ORGANIZATIONAL CHANGE

PROGRAM OBJECTIVES

Students who complete the Master of Arts in Organizational Change will:

1. Attain a solid foundation in the theory and practice of organizational design and behavior.
2. Achieve competency in recognizing and reconciling cultural differences effecting change and development.
3. Understand and apply change and development theories and practices from a systemic, holistic perspective.
4. Be able to critically evaluate the effectiveness of various change and development models and methods in both global and local contexts.
5. Understand and demonstrate the dynamics of change: in particular, innovation diffusion, change leadership, knowledge management, problem solving, and technology transfer.
6. Be able to work with various stakeholders to design and implement effective and sustainable change and development initiatives.
7. Be able to assess and measure important aspects of change and development, such as the organizational culture, innovation diffusion, performance improvements, and the success/failure of change initiatives.
8. Be able to conduct both primary and secondary research to investigate change and development issues and related problems.
9. Understand and recognize the global-wide change and development profession, including the roles of consultants, change agents, educators, political leaders, non-profit administrators, and corporate executives.

The Master of Arts in Organizational Change is designed for students who want to gain expertise in managing change—a continual requirement for long-term survival in today’s competitive world. Organizational change involves a multi-disciplinary perspective and uses concepts and methods from such fields as management, sociology, and anthropology, organizational development, technology, psychology, and comparative economics.

The program requires a minimum of 36 credit hours of graduate work. The 36 credit hours are divided into 33 credit hours of core courses and a 3-credit hour capstone course.

PREREQUISITES

Students from a variety of backgrounds are attracted to this graduate program. Therefore, to ensure each student is adequately prepared for the academic rigors of a graduate-level program, the following courses must be satisfactorily completed as a foundation for graduate studies:

PROGRAM OBJECTIVES
Students who complete the Master of Business Administration will:
1. Develop a strategic level understanding of key business functions.
3. Create innovative business solutions by demonstrating critical thinking skills, assessing industry trends, and adapting to the global environment.
4. Communicate effectively by designing and delivering written works and oral presentations to include business reports, academic papers, and research products.
5. Assess the legal, professional, and ethical implications of business decisions including intercultural practices and social responsibility.
6. Apply effective leadership principles and practices in a global context through engagements in competent teamwork.

PREREQUISITES
Students without prior academic course work in the field or without significant professional experience must satisfactorily complete the prerequisites. Financial, Accounting or Principles of Accounting I (HPU), Principles of Finance or Business Finance (HPU), Statistics (HPU), and Survey of Economics or Principles of Microeconomics (HPU), are the prerequisites required for admission to all MBA programs. Prerequisites may be waived for individuals who have completed these courses within the last seven years and have earned a grade of C or higher, or for individuals with significant professional experience in the field. Verification for students with prior academic coursework or professional experience will be evaluated.

Prerequisite courses taken from other providers and established universities may be considered, prior to the student enrolling in our MBA core courses. For all prerequisites, students must submit a certificate of successful completion (or official transcript if taken at an accredited university) with a grade of C or better.

CORE COURSES (24 credits)

ACCT 6000*  Accounting for Managers
ECON 6000  Economics for Business
FIN 6000  Financial Management and Strategy
IS 6005  Information Systems Management
MGMT 6000  Foundations of Teamwork and Leadership
MGMT 6020  The Regulatory and Ethical Environment of Business
MKTG 6000  Marketing Strategy for Managers
MS 6000  Decision Models for Managers

*Accounting/CPA Preparation students are excused from ACCT 6000.

INTERNATIONAL BUSINESS ELECTIVE COURSES (3 credits)
Three (3) credit hours of courses must be selected from the International Business Concentration List (see below). These course credits cannot be used towards a specific MBA concentration. Students who are pursuing the International Business concentration may fulfill this requirement by selecting three (3) credit hours of courses from any other MBA concentration.

CAPSTONE COURSES (6 credits)

MGMT 7001  Strategic Management I
MGMT 7002  Strategic Management II
CONCENTRATIONS
To earn an MBA concentration, the student must successfully complete nine (9) credit hours from one of the following concentration lists. Some courses require specific prerequisites, which are listed in the actual course descriptions.

MBA students who do not desire a concentration must complete nine (9) credit hours from any of the courses listed below.

MBA students must earn a 3.0 or higher GPA in their concentration courses in order to earn the concentration. If the concentration GPA is lower than a 3.0, the student will earn the MBA degree without the concentration.

A dual MBA concentration may be earned by adding an additional nine (9) credit hours from a particular area. Courses may not be concurrently applied toward more than one concentration.

MBA students may count up to three (3) credit hours of concentration-related practicum/internship hours toward a specific concentration.

Accounting
The Accounting/CPA Preparation concentration is for MBA students without an accounting undergraduate degree who wish to prepare for the Uniform CPA exam. This concentration requires a student to successfully complete eighteen (18) credit hours in six (6) undergraduate preparatory CPA courses in lieu of twelve (12) credit hours of graduate MBA courses. The courses are:

- ACCT 3000 Intermediate Accounting I
- ACCT 3010 Intermediate Accounting II
- ACCT 3020 Intermediate Accounting III
- ACCT 3200 Managerial Accounting
- ACCT 3300 Federal Income Tax – Individual
- ACCT 4100 Auditing

Economics

- ECON 6020 Managerial Economics
- ECON 6200 Industrial Organization
- ECON 6400 International Trade and Finance
- ECON 6410 International Financial Markets
- ECON 6450 The World Economy
- GLSD 6500 Ecological Economics and Sustainable Development

Finance

- FIN 6100 International Finance
- FIN 6170 International Financial Markets
- FIN 6300 Investment Analysis
- FIN 6310 Portfolio Management
- FIN 6400 Corporate Finance
- FIN 6530 Estate Planning
- FIN 6600 Trading Derivatives
- FIN 6610 Advanced Derivatives

Hospitality and Tourism Management

- HTM 6110 Seminar in Hotel and Resort Management
- HTM 6220 Special Events Management
HTM 6310  Issues in Passenger Management
HTM 6410  Destination Area Planning
HTM 6635  Advanced Business Law: Hotel and Travel

**Human Resource Management**

GLSD 6000  Sustainable Human Systems
GLSD 6330  Industrial Ecology and Sustainability
HR 6120  Employment Law
HR 6320  Human Resource Management: A Global Perspective
HR 6400  Human Resource Management
HR 6410  Public Personnel Administration
HR 6420  Compensation Management
HR 6450  Safety and Health Management
HR 6460  Human Resource Development
MGMT 6510  Managerial Communications
MGMT 6520  Professional Ethics
OC 6445  Organizational Behavior

**Information Systems**

IS 6020  Modern Methods in Project Management
IS 6070  Systems Architecture
IS 6230  Knowledge Management
IS 6250  Global Information Systems
IS 6260  Network Analysis
IS 6280  Data Mining for Business Intelligence

**International Business**

Note: Students who are pursuing the International Business concentration must also select three (1) credit hours of courses from any other concentration. All other MBA students must select three (3) credit hours of courses from the International Business Concentration List (see below).

ECON 6400  International Trade and Finance
ECON 6410  International Financial Markets
FIN 6100  International Finance
HR 6320  Human Resource Management: A Global Perspective
IS 6250  Global Information Systems
MGMT 6300  International Business Management
MGMT 6310  Contemporary Japan-U.S. Relations
MKTG 6420  International Marketing

**Management**

MGMT 6010  Production and Operations Management
MGMT 6210  Entrepreneurship
MGMT 6300  International Business Management
MGMT 6310  Contemporary Japan-U.S. Relations
MGMT 6510  Managerial Communications
MGMT 6520  Professional Ethics
MGMT 6530  American Business History

**Marketing**

MKTG 6100  Global Consumer
MKTG 6110  Market Research
MKTG 6200  Strategic Brand Management
MKTG 6310  Sales Force Management
MKTG 6410  Advertising Management
MKTG 6420  International Marketing
MKTG 6700  Electronic Marketing

Organizational Change and Development

OC  6440  Organizational Development
OC  6441  National and Community Change and Development
OC  6442  Culture and Human Organizations
OC  6443  Change Leadership Models and Methods
OC  6444  Innovation and Creativity
OC  6445  Organizational Behavior
OC  6446  Consulting Theory and Practice
OC  6447  Consulting and Group Process
OC  6448  Assessing Culture
OC  6449  Applications of Cultural Competence
MASTER OF SCIENCE IN INFORMATION SYSTEMS

PROGRAM OBJECTIVES
Students who complete the Master of Science in Information Systems will:
1. Be a specialist in information and systems, not just technology.
2. Be comfortable with large-scale, complex problems and issues.
3. Be able to recognize the seminal ideas in information systems and to apply them to advantage to all consumers, internal and external.
4. Be used to change and know how to resolve uncertain, confused, and misunderstood conditions.
5. Be skilled in the science of building recommendations from an intellectually sound base.
6. Be committed to the idea that people, not hardware and software, are responsible for the effective performance of systems.
7. Understand the dynamic nature of modern organizations; recognize that assumptions, ideas, actions, and policies must be re-validated on a timely basis; and that flexibility is a powerful strategic tool.

The Master of Science in Information Systems is designed to create a generation of problem solvers and decision makers who are expert in the areas of information, technology, systems design, and problem solving with automated resources. The program intends that students study and become sensitive to the role of information systems in the health and welfare of any organization. In every class, students will be asked to: comprehensively identify problems; create viable solutions, evaluate competing solutions for efficiency, effectiveness, and appropriateness; and implement chosen solutions in a manner consistent with the heuristic of the IS discipline.

PREREQUISITES
Students from a variety of backgrounds are attracted to this graduate program. Students without experience in technical, scientific, and analytical fields must satisfactorily complete the following selected courses to fully prepare for the academic rigors of the program.

COLLEGE OF EXTENDED AND INTERDISCIPLINARY EDUCATION
MASTER OF EDUCATION IN ELEMENTARY EDUCATION

PROGRAM OBJECTIVES

Students who complete the Master of Education in Elementary Education will:
1. Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. Use an understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
4. Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.
5. Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
7. Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. Engage in ongoing professional learning and use evidence to continually evaluate their practice, particularly the effects of their choices and actions on others (learners, families, other professionals, and the community), and adapt practice to meet the needs of each learner.
10. Seek appropriate leadership roles and opportunities to take responsibility for student learning and collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

The HPU School of Education provides a master’s degree program in elementary education that prepares candidates for licensing in Hawai‘i and 49 other states in grades K-6.

Guided by a profound belief in active, collaborative, experiential, reflective, and transformative learning as well as a deep commitment to diversity and educational technology, this degree program is based on an innovative, inquiry-oriented, standards-driven, and field-based curriculum that integrates content and pedagogy and employs an electronic portfolio assessment system to evaluate the teacher candidate’s progress toward achieving professional standards. In addition, HPU provides teacher candidates with cutting edge, course web page technology tools and access to online periodical databases in education.

University faculty, mentor teachers, and principals join in a unique partnership to deliver an innovative curriculum that has been designed to develop professional educators who are reflective practitioners, dedicated to the scholarship of teaching and learning and school renewal.

Prior to admission to clinical practice, teacher candidates seeking the licensure in Elementary Education must have successfully passed the PRAXIS II Elementary Content Knowledge Test.
CORE COURSES IN EDUCATION
ED  6000  The Professional Educator (3 credits)
ED  6100  Child and Adolescent Development for Educators (3 credits)
ED  6200  The Scholarly Teacher (3 credits)
ED  6310  Culturally Responsive Education in Hawai‘i (3 credits)
ED  6401  Elementary Education, Instruction, and Assessment I (3 credits)
ED  6402  Elementary Education, Instruction, and Assessment II (3 credits)
ED  6430  The English Language Learner (3 credits)
ED   6700  The Exceptional Learner (3 credits)

CAPSTONE COURSES IN EDUCATION
Next, teacher candidates must then take the following capstone courses before being recommended for licensure:
ED  6510  Elementary Education Clinical Practice Seminar (3 credits)
ED  6511  Elementary Education Clinical Practice I (3 credits)
ED  6512  Elementary Education Clinical Practice II (6 credits)
MASTER OF EDUCATION IN SECONDARY EDUCATION

PROGRAM OBJECTIVES
Students who complete the Master of Education in Secondary Education Program will:

1. Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. Use understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
4. Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.
5. Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
7. Plan instruction that support every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. Engages in ongoing professional learning and use evidence to continually evaluate their practice, particularly the effects of their choices and action on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.
10. Seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

The HPU School of Education provides a master’s degree program in secondary education that prepares candidates for licensing in Hawai‘i and 49 other states in grades 7-12 in the disciplines of English, Mathematics, Science, Social Studies, and World Languages.

Guided by a profound belief in active, collaborative, experiential, reflective, and transformative learning as well as a deep commitment to diversity and educational technology, this degree program is based on an innovative, inquiry-oriented, standards-driven, and field-based curriculum that integrates content and pedagogy and employs an electronic portfolio assessment system to evaluate the teacher candidate’s progress toward achieving professional standards and proficiencies. In addition, HPU provides teacher candidates with cutting edge, course web page technology tools and access to online periodical databases in education.

University faculty, mentor teachers, and principals will join in a unique partnership to deliver an innovative curriculum that has been designed to develop professional educators who are reflective practitioners, dedicated to the scholarship of teaching and learning and school renewal.

255
ENGLISH CONCENTRATION

Prior to admission to the English concentration, teacher candidates seeking licensure in Secondary Education must have attained:

- A passing score on a licensure test adopted by the Hawai‘i Teacher Standards Board in the content field; or
- National Board for Professional Teaching Standards certification in the content field; or
- A content major consisting of a minimum of thirty credit hours in the content field for a bachelor’s degree awarded by an accredited institution of higher education; or
- A minimum of thirty credit hours in the content field from an accredited institution of higher education, at least fifteen of which must be upper-division level; or
- A master’s, specialist, or doctoral degree in the license field awarded by an accredited institution of higher education.

CORE COURSES IN EDUCATION

ED 6000  The Professional Educator (3 credits)
ED 6100  Child and Adolescent Development for Educators (3 credits)
ED 6200  The Scholarly Teacher (3 credits)
ED 6300  The Reflective Practitioner (3 credits)
ED 6310  Culturally Responsive Education in Hawai‘i (3 credits)
ED 6420  English Curriculum and Instruction (3 credits)
ED 6430  The English Language Learner (3 credits)
ED 6700  The Exceptional Learner (3 credits)

Prior to admission to the clinical practice courses, teacher candidates seeking licensure in Secondary English must have successfully passed the PRAXIS II Secondary English Content Knowledge Test.

CAPSTONE COURSES IN EDUCATION

Next, teacher candidates must take the following capstone courses before being recommended for licensure:

ED 6520  Secondary Education Clinical Practice Seminar (3 credits)
ED 6521  Secondary Education Clinical Practice I (3 credits)
ED 6522  Secondary Education Clinical Practice II (6 credits)

MATHEMATICS CONCENTRATION

Prior to admission to the Mathematics concentration, teacher candidates seeking licensure in Secondary Education must have attained:

- A passing score on a licensure test adopted by the Hawai‘i Teacher Standards Board in the content field; or
- National Board for Professional Teaching Standards certification in the content field; or
- A content major consisting of a minimum of thirty credit hours in the content field for a bachelor’s degree awarded by an accredited institution of higher education; or
- A minimum of thirty credit hours in the content field from an accredited institution of higher education, at least fifteen of which must be upper-division level; or
- A master’s, specialist or doctoral degree in the license field awarded by an accredited institution of higher education.
CORE COURSES IN EDUCATION
ED 6000 The Professional Educator (3 credits)
ED 6100 Child and Adolescent Development for Educators (3 credits)
ED 6200 The Scholarly Teacher (3 credits)
ED 6300 The Reflective Practitioner (3 credits)
ED 6310 Culturally-Responsive Education in Hawai‘i (3 credits)
ED 6430 The English Language Learner (3 credits)
ED 6440 Mathematics Curriculum and Instruction (3 credits)
ED 6700 The Exceptional Learner (3 credits)

Prior to admission to the clinical practice courses, teacher candidates seeking licensure in Secondary Mathematics must have successfully passed the PRAXIS II Secondary Mathematics Content Knowledge Test.

CAPSTONE COURSES IN EDUCATION
Next, teacher candidates must take the following capstone courses before being recommended for licensure:

ED 6520 Secondary Education Clinical Practice Seminar (3 credits)
ED 6521 Secondary Education Clinical Practice I (3 credits)
ED 6522 Secondary Education Clinical Practice II (6 credits)

SCIENCE CONCENTRATION
Prior to admission to the Science concentration, teacher candidates seeking licensure in Secondary Education must have attained:

- A passing score on a licensure test adopted by the Hawai‘i Teacher Standards Board in the content field; or
- National Board for Professional Teaching Standards certification in the content field; or
- A content major consisting of a minimum of thirty credit hours in the content field for a bachelor’s degree awarded by an accredited institution of higher education; or
- A minimum of thirty credit hours in the content field from an accredited institution of higher education, at least fifteen of which must be upper-division level; or
- A master’s, specialist or doctoral degree in the license field awarded by an accredited institution of higher education.

COLLEGE OF HEALTH AND SOCIETY
MASTER OF SCIENCE IN NURSING

The MSN FNP Program is fully accredited and the graduate is eligible to sit for the national FNP credentialing exam with either AANP or ANCC.

PROGRAM OUTCOMES
Family Nurse Practitioner (FNP)

The MSN FNP graduate will:

1. Advanced Clinical Practice
   Demonstrate and apply the knowledge, skill, and judgment to independently provide direct patient care that incorporates assessment, diagnosis and treatment across the life span (geriatrics, adult, women’s and pediatrics) within a variety of settings.

2. Evidence-Based Practice
   Synthesize the evidence based practice guidelines, critical thinking, and reflection to provide appropriate care as the foundation to practice.

3. Transformational Leadership
   Demonstrate transformational leadership in the nursing profession.

4. Professionalism/Ethics
   Practice as an independent provider ethically bound to operate within the guidelines, standards and scope of practice.

5. Quality Improvement and Safety
   Integrate current evidence to improve the quality of clinical practice and promote safe care.

6. Health Care Informatics
   Incorporate knowledge of clinical decision support tools to assist in charting, decision making, research and scholarship.

7. Health Policy and Advocacy
   Appraise the interdependence of health policy to act as an advocate of policy that promotes access to care, equity and cost efficacy.

8. Interprofessional Collaboration
   Collaborative practice with other professionals in the health care system.

9. Transcultural Care
   Maximize the client’s health and wellbeing within the parameters of the client’s own cultural traditions and beliefs.

International students who qualify as registered nurses in their country of present practice will be required to take the NLN Ace II examinations to demonstrate their nursing knowledge base. A decision score is utilized.

**Adult-Gero Acute Care NP Track**

The Adult-Gero Acute Care Nurse Practitioner (A-GACNP) track is an option track of the MSN program that prepares the successful graduate to sit for the national board exam for the A-GACNP credential required for licensure. This track focuses on the role, function and utilization of the Adult Gerontology Acute Care Nurse Practitioner in providing acute care for the adult and gerontologic patient populations.

The Master’s in Nursing Science Adult Gerontology Acute Care Nurse Practitioner graduate will:

1. **Advanced Clinical Practice**
   - Demonstrate and apply the knowledge, skill, and judgment to independently provide direct patient care that incorporates the evaluation, assessment, diagnosis and treatment across the adult life span (adult & geriatrics) within acute care and critical care hospital settings.
   - Assess the complex acute, critical, and chronically-ill patient for urgent and emergent conditions, using both physiologically and technologically derived data, to evaluate for physiologic instability and risk for potential life-threatening conditions.
   - Develop effective collaboration with both formal and informal caregivers and professional staff to achieve optimal care outcomes during complex acute, critical and chronic illness attending to variations across the lifespan.
   - Serve as a knowledge resource regarding clinical and/or care issues related to the design and development of complex acute, critical, and chronic health services for care of the adult-gerontology population.

2. **Evidence-Based Practice**
   - Promote the delivery of evidence-based care for patients with complex acute, critical, and chronic physical and mental illness
   - Participate in the design and/or implementation, and evaluation of evidence-based,
age-appropriate professional standards and guidelines for care.

- Contribute to knowledge development for improved care of the adult-gerontology acute care population, by participation in quality improvement, program evaluation, translation of evidence into practice, and/or dissemination of evidence.

3. Transformational Leadership

- Demonstrate leadership to promote improved health care outcomes for the adult–older adult population in practice, policy, and other venues.

4. Professionalism/Ethics

- Practice as an autonomous and independent provider ethically bound to operate within the guidelines, standards and scope of practice of the health care institution and state.
- Advocate for the patient’s and family’s rights regarding healthcare decision-making such as emancipation, conservatorship, guardianship, durable power of attorney, health care proxy, advance directives and informed consent, taking into account ethical and legal standards

5. Quality Improvement and Safety

- Integrate current evidence to improve the quality of clinical practice and promote safe care.

6. Health Care Informatics

- Incorporate knowledge of clinical decision support tools to assist in charting, decision making and delineation of resources, evidence based research and scholarship.

7. Health Policy and Advocacy

- Appraise the interdependence of health policy to act as an advocate of policy that promotes access to care, equity, quality and cost efficacy.

8. Interprofessional Collaboration

- Works collaboratively with a variety of health professionals to achieve patient care goals, promote stabilization and restoration of health in complex acute, critical, and chronic illness.
- Promote collaboration among members of the multidisciplinary healthcare team to facilitate optimal care for patients with complex acute, critical, and chronic illnesses considering variations across the adult lifespan

9. Transcultural care

- Collaborate with the individual, family, and caregivers in the development of educational interventions appropriate to the complex acute, critical, and chronically-ill patient’s needs, values, developmental and cognitive level, and health literacy.
- Educate individuals, families, caregivers, and groups regarding strategies to manage the interaction among normal development, aging, and mental and physical disorders.
- Adapt teaching-learning approaches based on physiological and psychological changes, age, developmental stage, cognitive status, readiness to learn, health literacy, the environment, and available resources.

RN-MSN PATH

The RN-MSN path allows registered nurses without baccalaureate degrees in nursing to transition into the MSN program. These students entering the RN-MSN Path will be granted provisional admission status until all prerequisites have been completed. Students who successfully complete the program will receive an MSN degree.

Applicants who have graduated from a nursing program without National League for Nursing Accreditation Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE) accreditation will be required to complete the following NLN Nursing Acceleration Challenge Exam (ACE II) tests:

**BOOK ONE**  Care of the Adult Client
**BOOK TWO**  Care of the Client During Childbearing and Care of the Child
**BOOK THREE**  Care of the Client with a Mental Disorder

Arrangements for these tests can be made by contacting the nursing program.

Applicants without a baccalaureate degree in nursing must complete the following upper-division courses:

- **WRI 1200**  Research, Argument, and Writing
- **MATH 1123**  Statistics
- **NUR 3900**  Leadership and Management in Nursing
- **NUR 4700**  Nursing Research
- **NUR 4960**  Developing a Healthy Community
- **NUR 4961**  Developing a Healthy Community - Lab

A 3.0 GPA in these courses is required before acceptance into the master’s program. Equivalent courses may be accepted for transfer credit.

This provides 9 credits per term for two terms, then the candidate transitions into the MSN curriculum, with a 3.0 GPA as noted above.

International students who qualify as registered nurses in their country of present practice will be required to take the NLN Ace II examinations to demonstrate their nursing knowledge base. A decision score is utilized.

MBA-MSN

**Hawai’i Pacific University offers the joint Master of Science in Nursing and Master of Business Administration** to help meet those demands, and to complement a nurse’s clinical skills with a solid foundation in management. The joint degree program focuses on skills needed by both health care and business leaders; analytical reasoning, leadership, and effective communication. The successful candidate is eligible to sit for the ANCC Nurse Executive, Advanced Certification Eligibility Criteria (Credential Awarded: NEA-BC), with 2 years recent experience in nursing administration role.

All applicants must meet the admission criteria for both the MSN and MBA programs, including all applicants must have taken a statistics course (MATH 1123) and an undergraduate nursing research course (NUR 4700) or the equivalent. If the applicant does not have an educational foundation in business he/she will be required to enroll preparatory courses or their equivalents for accounting, economics and finance. NOTE: An applicant with an Associate Degree in Nursing and a Bachelor Degree in another field are eligible for this joint degree as an RN to MSN/ MBA (See RN to MSN/MBA Degree Plan).
All MSN/MBA students must complete core business and nursing courses (36 credits) as well as 6 credits of specified elective courses and 6 credits for the capstone project. Total degree requirements are 48 credits.

**MSN/MBA Core Courses (36 credits)**

*Core Business Courses (24 credits)*

- **ACCT 6000**  
  Accounting for Managers
- **ECON 6000**  
  Economics for Business
- **FIN 6000**  
  Financial Management and Strategy
- **IS 6005**

  Organizational Change and Development, or another approved OC course
- **MGMT 6445**  
  Management for Healthcare Professionals, or another approved MGMT course

*Capstone Courses (6 credits)*

- **MGMT 7001**  
  Strategic Management I (cross-listed with NUR 7000)
- **MGMT 7002**  
  Strategic Management II
MASTER OF SOCIAL WORK

PROGRAM GOALS

Goal 1. To prepare graduates who will demonstrate competence in social work practice at an advanced level with client systems of all sizes.

Goal 2. To prepare graduates to work effectively with diverse populations in multicultural settings

Goal 3. To prepare graduates to understand the contexts of social work practice at micro, mezzo, and macro levels, including the changing nature of those contexts, and who advocate for social and economic justice.

Goal 4. To promote the values and ethics of professional social work in the program and in its graduates’ practice.

Goal 5. To develop in graduates an appropriate foundation for a valuing of lifelong learning, leadership, and generation of knowledge.

PREREQUISITES
Bachelor’s degree in Social work from a College or University accredited by the Council on Social Work Education (or international equivalent)

OR

Bachelor’s Degree in one of the Liberal Arts, including courses equivalent to the following:
MATH 1123 Statistics, or SOC 3200 Social Statistics
SOC 3100 Methods of Inquiry

OR

Bachelor’s Degree in a field other than Liberal Arts, including courses equivalent to the following:
MATH 1123 Statistics, or SOC 3200 Social Statistics
SOC 3100 Methods of Inquiry

TWO YEAR PROGRAM (60 credits)

YEAR ONE:

SWRK 6001 Fundraising and Resources Development for Non-Profit Organizations and Agencies or SWRK 6002 Crisis Intervention and Prevention or SWRK 6003 Global Social Work Practice
SWRK 6100 Social Work Methods I
SWRK 6102 Social Work Methods II
SWRK 6103 Social Work Methods III
SWRK 6200 Human Behavior in Social Environment I
SWRK 6201 Human Behavior in Social Environment II
SWRK 6300 Social Work Research I
SWRK 6500 Social Welfare Policy I
SWRK 6900 Graduate Practicum I
SWRK 6901 Graduate Practicum II

YEAR TWO:

SWRK 6510 Legal and Ethical Issues in Social Work
SWRK 7100 Culture and Diversity in Advanced Generalist Practice
SWRK 7101 Advanced Practice with Diverse Individuals
SWRK 7102 Advanced Practice with Diverse Organizations and Communities
SWRK 7300 Social Work Research II
SWRK 7500 Social Welfare Policy II
SWRK 7900 Graduate Practicum III
SWRK 7901 Graduate Practicum IV

**CAPSTONE COURSE**
SWRK 7350 Professional Paper

**ADVANCED STANDING OPTION (30 credits)**
Students with adequate preparation in a BSW program accredited by the Council on Social Work Education may not have to repeat subject material at the MSW level. Advanced standing (admission with exemption from up to one year of the MSW curriculum) will be granted to students who provide evidence of satisfactory scholastic performance at the BSW level.

Advanced standing students take the following course plus the "Year Two" courses listed for the two year program:

- SWRK 6050 Graduate Study of Social Work for Advanced Standing Students
- SWRK 6510 Legal and Ethical Issues in Social Work (Optional)
MASTER OF ARTS IN
CLINICAL MENTAL HEALTH COUNSELING

PROGRAM OBJECTIVES

Students who complete the Master of Arts in Clinical Mental Health Counseling will:

1. Understand professional issues relevant to the practice of counseling and psychology; and demonstrate the ability to apply and adhere to the legal and ethical guidelines of the counseling profession.

2. Demonstrate knowledge of and appreciation for individual differences and the diversity of social, cultural and environmental influences on human behavior, and apply multicultural competencies in practice.

4. Develop an understanding of career development and related life factors and the effects on an individual’s mental health and lifestyle.

5. Demonstrate knowledge, skill and multicultural competency related to counseling needs in the clinical mental health setting: etiology, diagnosis, assessment, treatment, and prevention of mental, emotional, and behavioral disorders.

6. Demonstrate theoretical and experiential understanding of the principles, issues, and dynamics of group work; and be able to ethically and competently conduct group counseling.

7. Be able to accurately interpret, evaluate and contribute to professional research literature, and to guide and evaluate counseling practices through research and program evaluation.

8. Demonstrate self-awareness, social and environmental responsibility, and a commitment to services and life-long learning.

The Clinical Mental Health Counseling Program is a post-baccalaureate program in psychology that prepares students for careers as professional clinical mental health counselors. The program provides students with intensive instruction in the theoretical framework of psychology and counseling and broad experience in empirically supported methods of practice in counseling.

The program design and training philosophy are informed by the scientist-practitioner model of training in psychology. A primary training goal of the program is to produce clinicians who can integrate the science of mental health research with practice. The program curriculum has been developed in keeping with standards set by the Masters in Psychology Accreditation Council (MPAC) and by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Curriculum fulfills the academic requirements for state licensure as a Clinical Mental Health Counselor; and for counselor credentialing at the national level.

MISSION STATEMENT

The mission of the Master of Arts in Clinical Mental Health Counseling is to prepare students for socially-responsible careers as professional clinical counselors. Embedded in the richly-diverse cultural context that is Hawai‘i, our program strives to meet the changing needs of the global community in which we live and work. Within this multicultural learning environment and in collaborative partnership with community-based and interdisciplinary training sites, we strive to create a learning environment that is grounded in an appreciation for both psychological science and human diversity. Training is based on a scientist-practitioner model, emphasizing evidence-based practice, ethical and cultural competence, and development across the lifespan. Our shared goal is to graduate skilled, productive and compassionate counseling professionals who are committed to service and life-long learning.

PREREQUISITES

Admission to the program is based on academic ability and potential for success at the graduate level. Academic ability is evaluated by the applicant’s past academic performance, recommendations, and performance on the GRE.

1. A baccalaureate degree from a regionally accredited college or university in the United States
or an equivalent degree from another country.
2. A minimum of 3.0 cumulative undergraduate grade-point average (GPA) based on a 4.0 scale.
3. A minimum of 15 credits hours of work in psychology including at least one course in statistics and one course in research methods.
4. Verbal and Quantitative scores on the Graduate Record Examination.
5. Applicants must demonstrate proficiency in written and verbal English. A Test of English as a Foreign Language (TOEFL) examination is required of all foreign applicants from countries in which English is not the native language and who have not attended an American college or university for two consecutive years.

Meeting the minimum requirements does not guarantee admission. Eligible applications are reviewed by the Admissions Committee which uses multiple criteria for the assessment of applicants. Admission is selective. Priority is given to full-time students, but a limited number of exceptional part-time students may be admitted.

**COURSE OF STUDY**
The Master of Arts in Clinical and Mental Health Counseling program consists of 60 credit hours of required coursework. Typically these may be taken over two full calendar years (i.e., fall, spring, and summer sessions). The program includes a core curriculum of 48 hours and 12 hours of elective courses. The core curriculum includes course work in theory, methods, and skills. During the second year of study, students complete 2 terms of internship designed to provide them with counseling experience in community settings. The course electives enable students to choose courses in specialty areas such as substance abuse counseling and family therapy. Students who wish to prepare for future studies at the doctoral level can also elect to prepare an defend a Master’s thesis.

MASTER OF ARTS IN DIPLOMACY AND MILITARY STUDIES

PROGRAM OBJECTIVES
Students who complete the Master of Arts in Diplomacy and Military Studies will:

1. Discuss and apply at an advanced and current level the various methodologies and approaches to the study of history, political science, and international relations in a diplomatic and military context.

2. Place questions and issues concerning the role of the military within their chronological and geographical context in the course of more in depth inquiries.

3. Make use of critically reflective tools for interpreting pertinent historical, cultural, philosophical, and political issues.

4. Articulate the moral and ethical concerns raised through the study of the relationship of force and diplomacy to society and technology.

5. Demonstrate the ability to integrate complex issues relating to the role of diplomacy and the military in a substantial piece of research, producing a professional paper of quality.

6. Be prepared to undertake further graduate study in history, political science, international relations, and related fields.

PREREQUISITES
Students from a variety of backgrounds are attracted to this degree program. Therefore, to ensure that each student is adequately prepared for the academic rigors of a graduate-level program, the following courses must be satisfactorily completed as a foundation for graduate studies:

Any two HIST 2xxx introductory level History courses
HIST 3XXX: Any Upper Division History elective
HIST 4661 (History of Military Thought) or HIST 4961 (Seminar: Military History)
PSCI 2000 (Introduction to Politics)
INTR 3000 (International Relations)

OR: 18 undergraduate credits in History, Political Science, and International Relations, including Upper Division coursework in Military and/or Diplomatic History and International Relations.

AND/OR: combination of experience in diplomatic or military affairs.

CORE COURSES (9 credits)
HIST 6600 Seminar: Military History: Methods, Approaches & Historiography (3 credits)
HIST 6601 Seminar: Theory and Practice of Diplomacy from Antiquity to the Present
PSCI 6601 Seminar: Diplomacy and International Relations

MILITARY AND DIPLOMATIC HISTORY COURSES (9 credits)
Choose three HIST courses from the following list. At least one must be a Diplomatic History Elective (HIST 666X):

HIST 6611 Seminar: War in the Ancient World
HIST 6622 Seminar: The Military Revolution
HIST 6624 Seminar: Revolutionary & Napoleonic Warfare
HIST 6627 Seminar: The First World War
HIST 6628 Seminar: The Second World War
HIST 6631 Seminar: Ways of War in China
HIST 6632 Seminar: Ways of War in Japan
HIST 6641 Seminar: The American Way of War
HIST 6643 Seminar: The American Revolution
HIST 6645 Seminar: The American Civil War
HIST 6648 Seminar: 20th Century US Military History
HIST 6658 Seminar: 20th Century Naval Warfare
HIST 6661 Seminar: European Diplomatic History
HIST 6662 Seminar: US Diplomatic History
HIST 6663 Seminar: East Asian Diplomatic History
HIST 6664 Seminar: Middle Eastern Diplomatic History
HIST 6665 Seminar: International History of the Cold War
HIST 6667 Seminar: Modern American Cultural Diplomacy: A Diplomacy of Peoples’
HIST 6670 Seminar: History of Genocide
HIST 6680 Seminar: History of Military Thought
HIST 6686 Seminar: War and Society in Wilhelmine Germany, 1871-1918
HIST 6997 Seminar: Directed Readings in History
HIST 6998 Seminar: Special Topics in Diplomatic History
HIST 6999 Seminar: Special Topics in Military History

POLITICAL SCIENCE AND INTERNATIONAL STUDIES ELECTIVE COURSE (6 credits)
Choose any two of the following Political Science (PSCI) and/or International Studies (INTR) courses:

Political Science
PSCI 6151 Seminar: Global Governance
PSCI 6300 Seminar: Indian Foreign and Security Policy
PSCI 6400 Seminar: Chinese Foreign Policy
PSCI 6451 Seminar: The Military in Latin American Politics
PSCI 6605 Seminar: Islam & Politics
PSCI 6610 Seminar: Politics of Developing Nations
PSCI 6620 Seminar: Peacebuilding & Conflict Management
PSCI 6630 Seminar: National and International Security
PSCI 6650 Seminar: Foreign Intelligence
PSCI 6660 Seminar: Resistance and Rebellion
PSCI 6661 Seminar: Politics of Terrorism
PSCI 6670 Seminar: Democratization and Human Rights
PSCI 6671 Seminar: Transitions to Democracy
PSCI 6680 Seminar: International Negotiating
PSCI 6690 Unpaid Internship
PSCI 6691 Paid Internship
PSCI 6997 Seminar: Special Topics in International Relations

International Studies
INTR 6300 Seminar: International and Domestic Emergency Management
INTR 6997 Seminar: Special Topics in International Studies

SUPPORTING FIELD ELECTIVE COURSES (6 credits)
Choose two Supporting Field Elective courses from among the following Supporting Fields: ANTH; ARTH; GLSD; HUM; LIT; PHIL; STSS

Anthropology
ANTH 6601 Seminar: Violence, Conflict, and War

Art History
ARTH 6601 Seminar: Artists and Images of War

Global Leadership and Sustainable Development
GLSD 6001 Seminar: Environmental Governance
GLSD 6340 Seminar: Environmental History of the Modern World
GLSD 6350 Seminar: Global Markets in Transition
GLSD 6360 Seminar: Sustainability Strategies and Indicators

MASTER OF ARTS IN GLOBAL LEADERSHIP AND SUSTAINABLE DEVELOPMENT

PROGRAM OBJECTIVES

Students who successfully complete the Master of Arts in Global Leadership and Sustainable Development program will:

1. Think systemically and thus identify and analyze the structural causes that underlie global issues and problems.
2. Search collaboratively for solutions to global problems and issues that meet the expectations of multiple stakeholders within ecological limits.
3. Critique events decisions, and issues related to globalization in terms of both their short and long-term consequences across multiple stakeholders, including the natural world.
4. Recognize that the dynamic, complex and interdependent nature of globalization forces requires transparency and democratic processes for optimum solutions if social justice is to be achieved.
5. Analyze global issues using systems thinking concepts and tools, e.g. causal-loop diagrams, timeline analysis, structural analysis.
6. Engage in self-reflection of their leadership potential and put in place a personalized plan to develop the leader within.
7. Conceptualize, initiate, and lead change programs that enhance the sustainable development dimension of human systems.

The Master of Arts in Global Leadership and Sustainable Development is designed to prepare students to lead change initiatives designed to enhance environmental performance, convert economic development into sustainable development, and increase environmental sustainability in all human systems. Students learn to simultaneously search for the underlying causes of global environmental, economic and social problems, while also learning to design and lead initiatives that produce sustainable outcomes for the current and future generations.

The program requires a minimum of 42 credit hours of graduate work. The 42 credit hours are divided into 24 credit hours of core courses, 9 credit hours of a supporting field, and 9 credit hours of research and capstone courses.

PREREQUISITES

Students from a variety of backgrounds are attracted to this graduate program. Therefore, to ensure each student is adequately prepared for the academic rigors of a graduate-level program, the following courses must be satisfactorily completed as a foundation for graduate studies:

MASTER OF ARTS IN
TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES

PROGRAM OBJECTIVES
Students who complete the Master of Arts in Teaching English to Speakers of Other Languages will be prepared to demonstrate ASK:

1. Attitudes of a professional. Towards colleagues and students, MA holders will demonstrate teamwork and sensitivity. Towards the discipline, MA holders will demonstrate a spirit of inquiry and reflection. Towards the global community, MA holders will demonstrate cultural sensitivity and global citizenship.
2. Skills in spoken and written communication, in academic and pedagogic research, and in teaching including materials development and lesson planning, delivery, management, and assessment.
3. Knowledge of the major subfields of linguistics, the theories of second language acquisition, and the principles of language teaching methods; and be able to articulate their own philosophy of language teaching, explaining the principles on which it is based.

PREREQUISITES
AL 2000 Introduction to Linguistics

SECOND LANGUAGE REQUIREMENT
MATESOL graduates will have at least an intermediate competence in a second modern language. Native speakers of English must take (or have taken previously at the tertiary level) two years of a language, other than English. A student who may have developed a competency in a language, in some other way than formal study, may also meet this requirement by taking the HPU placement test (or its equivalent) for a language, and by placing on a level beyond the equivalent of the second college year of foreign language.

CORE COURSES (24 credits)
AL 6000 Teaching Second Languages: Theory and Practice
AL 6110* English Phonology and the Teaching of Pronunciation
AL 6120* English Syntax and the Teaching of Grammar
AL 6730 Assessment in TESOL
AL 6961 Practicum I in TESOL
AL 6962 Practicum II in TESOL

And two of the following courses:
AL 6710 Methods of Teaching Oral/Aural English
AL 6715 Second Language Reading
AL 6725 Second Language Writing

*Students may be exempted by exam from taking these courses. Exempted courses do not count toward the 37-credit requirement. Electives must be taken in their place.

ELECTIVE COURSES (12 credits)
Choose four courses from the following:
AL 6130 Semantics
AL 6140 Discourse Analysis for Language Teachers
AL 6310 History of the English Language
AL 6320 Language and Society
AL 6330 Second Language Acquisition
AL 6340 Translation in Second Language Acquisition
AL 6350 Group Dynamics in the Language Classroom
AL 6600 Seminar in Second/Foreign Language Teaching
AL 6725 Methods of Teaching Writing in ESOL
AL       6740   Research and Issues in Computer-Assisted Language Learning
AL       6750   TESOL Materials Development
AL       6760   Teaching English to Children

New courses may appear on course schedules with the designation 68xx. These courses may also be counted as elective courses. Examples include AL 6806 Using Corpora in the Language Classroom and AL 6807 Curriculum Development in TESOL.

**CAPSTONE COURSE (1 credit)**
AL       7099   Capstone Requirement

The capstone activity is one of the following:

- A portfolio developed over the time of study in the MA TESOL program.
- A comprehensive examination based on the core courses and the electives taken by the student.
- An in-service project connected with a teaching position the student holds or held prior to entering the program and one to which they will return after the program. The project must be at the request of the other institution and likely to be implemented.
COLLEGE OF NATURAL AND COMPUTATIONAL SCIENCES
MASTER OF SCIENCE IN MARINE SCIENCE

PROGRAM OBJECTIVES
Students who successfully complete the Master of Science in Marine Science will:
1. Demonstrate an interdisciplinary knowledge of marine systems.
2. Demonstrate the ability to plan and implement observational, theoretical, and experimental studies.
3. Interpret and critique professional scientific literature.
4. Demonstrate an advanced ability to apply and integrate scientific principles and research data to address complex questions in marine systems.
5. Demonstrate competence in scientific communication through technical and scientific reports, publications and oral presentations.
6. Demonstrate professionalism and scientific ethics.
7. Have the competence to gain employment in advanced positions or entrance to a doctoral program in related fields.

PREREQUISITES
A baccalaureate degree in the natural sciences is required for entry into the MSMS program. Certain course prerequisites may be required before enrolling in graduate MSMS courses, depending on the student’s academic preparation and research interests. For students in the thesis (T) track, the graduate thesis committee will determine whether any deficiencies exist and how these deficiencies will be addressed.

THESIS (T) TRACK (36 credits)

CORE COURSES (9 credits)

Student must take at least 3 of the following:
MARS 6050 Marine Ecology (3) or MARS 6090 Biological Oceanography (3)
MARS 6060 Geological Oceanography (3)
MARS 6070 Chemical Oceanography (3)
MARS 6080 Physical Oceanography (3)

NATURAL SCIENCE REQUIRED COURSES (12 credits)

A minimum of 6 credits of NSCI 6900 must be completed by graduation.
NSCI 6110 Graduate Seminar I - 1st term (1)
NSCI 6112 Graduate Seminar I - 2nd term (1)
NSCI 6120 Graduate Seminar II - 3rd or 4th term (1)
NSCI 6900 Master’s Research (6)
NSCI 7000 Master’s Thesis Capstone Course (3)

ELECTIVE COURSES (15 credits)

A maximum of 6 credits of advanced undergraduate courses (4000-level) can be taken as a graduate student. A maximum of 5 additional credits of NSCI 6900 Masters Research can be taken as electives. Elective courses are chosen by each student in consultation with their graduate thesis committee.
Graduate Courses

BIOL 6090 Advanced Biometry (3)
BIOL 6120 Ichthyology (3)
BIOL 6170 Larval Biology (3)
BIOL 6210 Neuroscience (3)
BIOL 6220 Immunology (3)
CHEM 6310 Marine Natural Products (3)

ENVS 6200 Advanced Photovoltaic Systems Design (3)
ENVS 6920 Special Topics in Environmental Science (3)
GEOL 6010 Containment Hydrology (3)
GLSD 6500 Ecological Economics and Sustainable Development (3)
MARS 6010 Toxicology and Stress Responses in Marine Communities (3)
MARS 6020 Marine Science Field Methods (3)
MARS 6030 Marine Science Mammal Biology (3)
MARS 6040 Seabird Ecology and Conservation (3)
MARS 6050 Marine Ecology (3)
MARS 6090 Biological Oceanography (3)
MARS 6120 Coral Reef Ecology (3)
MARS 6210 Marine Fisheries and Management (3)
MARS 6300 Multivariate Applications in Marine Science (3)
MARS 6400 Marine Conservation Biology (3)
MARS 6910 Current Topics in Marine Science (1)
MARS 6920 Special Topics in Marine Science (3)
NSCI 6450 Teaching Undergraduate Science (3)
NSCI 6900 Masters Research (1-5)

Advanced Undergraduate Courses

BIOL 4040 Environmental Microbiology (3)
BIOL 4041 Environmental Microbiology Laboratory (1)
BIOL 4090 Biometry (3)
CHEM 4020 Advanced Organic Chemistry (3)
CHEM 4030 General Biochemistry I (3)
CHEM 4031 General Biochemistry I Laboratory (1)
CHEM 4032 General Biochemistry II (3)
CHEM 4033 General Biochemistry II Laboratory (1)
CHEM 4054 Aquatic Chemistry (3)
ENVS 4000 Methods of Environmental Science (3)
ENVS 4001 Methods of Environmental Science Laboratory (1)
ENVS 4050 Remote Sensing (3)
GEOG 4700 Geographic Information Systems (3)
MARS 4031 Marine Mammal Physiology Laboratory (1)
MARS 4051 Marine Ecology Laboratory (2)

APPLIED (A) TRACK: 39 credits

The applied track requires that all students take a comprehensive exam after the completion of the core courses. The exam will have written and oral components so that the student can demonstrate competency in the main marine science disciplines and in oral and written communication.
CORE COURSES (15 credits)

Student must take at least 5 of the following:
BIOL 4090 Biometry (3)
MARS 6050 Marine Ecology (3) or MARS 6090 Biological Oceanography (3)
MARS 6060 Geological Oceanography (3)
MARS 6070 Chemical Oceanography (3)
MARS 6080 Physical Oceanography (3)

COMPREHENSIVE SEMINAR (1 credit)
MARS 6890 Comprehensive Marine Science Seminar (1)

*Successful completion of this seminar is linked with passing the comprehensive examination of the five core knowledge areas listed above.

REQUIRED FOUNDATIONAL COURSES (11 credits)
ENVS 6300 Modeling and Simulation (3)
MARS 6020 Marine Science Field Methods (3) or MARS 6950 Marine Science Practicum (3)
MARS 6910 Current Topics in Marine Science (2)
NSCI 6110 Graduate Seminar I - 1st term (1)
NSCI 6130 Communicating Marine Science (2)

RESTRICTED ELECTIVE COURSES (6 credits)

STATISTICS ELECTIVE (Take one of these three options)
BIOL 6090 Advanced Biometry (3)
GLSD 6005 Research Methods for Environmental and Social Policy Formation (3)
MARS 6300 Multivariate Applications in Marine Science (3)

MATH AND MODELING ELECTIVE (Take one of these three options)
ENVS 6060 Geographical Information Systems 2: Spatial Analysis (3)
MARS 6500 Computational Methods in Marine Science (3)
MARS 6600 Geospatial Analysis in Marine Science (3)

ELECTIVE COURSES (6 credits)
A maximum of 3 credits of advanced undergraduate courses (4000-level).

Graduate Courses
BIOL 6024 Algal Biology and Diversity (3)
BIOL 6090 Advanced Biometry (3)
BIOL 6120 Ichthyology (3)
BIOL 6170 Larval Biology (3)
CHEM 6310 Marine Natural Products (3)
ENVS 6060 Geographical Information Systems 2: Spatial Analysis (3)
GLSD 6005 Research Methods for Environmental and Social Policy Formation (3)
GLSD 6500 Ecological Economics and Sustainable Development (3)
MARS 6010 Toxicology and Stress Responses in Marine Communities (3)
MARS 6020 Marine Science Field Method (3)
MARS 6030 Marine Science Mammal Biology (3)
MARS 6040 Seabird Ecology and Conservation (3)
MARS 6050 Marine Ecology (3)
MARS 6090 Biological Oceanography (3)
MARS 6120 Coral Reef Ecology (3)
MARS 6210 Marine Fisheries and Management (3)
MARS 6300 Multivariate Applications in Marine Science (3)
MARS 6400 Marine Conservation Biology
MARS 6500    Computational Methods in Marine Science (3)
MARS 6600    Geospatial Analysis in Marine Science (3)
NSCI 6450    Teaching Undergraduate Science (3)

Advanced Undergraduate Courses
GEOG 4700    Geographic Information Systems (3)
MARS 4100    Marine Resource Management: Culture and Sustainability (3)
GRADUATE CERTIFICATES

Hawai‘i Pacific University offers several graduate certificate programs that new or continuing HPU students may earn. Application and registration information is listed below followed by specific requirements for each program.

Admission Requirements

Students who have earned a baccalaureate degree (or the equivalent to a U.S. college or university degree for international students) with a GPA of 2.7 or higher are encouraged to apply for admission.

Application Procedures

Applicants are required to:

1. Complete the appropriate sections of the graduate application form.
2. Submit application fee of $50 (U.S. dollars).
3. Send official certified transcripts from all colleges and universities previously attended.

Applications should be sent to:

Admissions Office
1 Aloha Tower Drive
Honolulu, HI 96813

Continuing HPU graduate students should consult with a Graduate Advisor for registration details.

Course Prerequisites

Students enrolled in a graduate certificate program must comply with applicable course prerequisites.

Completion Requirements

Certificate candidates must complete all program requirements with at least a cumulative 3.0 GPA to be awarded a graduate certificate.
COLLEGE OF BUSINESS

Professional Certificate in Business Analytics
The Professional Certificate in Business Analytics involves information technologies, applications, and practices for collection, integration, analysis, and presentation of business data and information to gain insight and drive business planning. This certificate will appeal to working professionals who are interested gaining additional knowledge in information systems and business analytics that enable companies to be more competitive. Additionally, certificates are gateway products that lead some students to become matriculated.

Select four out of the five following courses:
IS  6040  Business Analytics
IS  6230  Knowledge Management
IS  6260  Network Analysis
IS  6280  Data Mining for Business Intelligence
IS  6360  Big Data

Professional Certificate in Consulting
This Professional Certificate in Consulting is offered for MA/OC students and students from other appropriate graduate degree programs. In particular, students in the MSIS, MAHRM, MAGLSD, MBA, and MACOM Programs may also have interest.

Certificate candidates must complete the following courses:
OC  6440  Organizational Change and Development
OC  6445  Organizational Behavior
OC  6446  Organizational Consulting Theory and Practice
OC  6447  Consulting and Group Process Facilitation

Professional Certificate in Culturally Adaptive Leadership
This professional certificate program focuses on the emerging theory, applications and practice related to culturally adaptive leadership. Dealing with the influence of culturally adaptive leadership in education, training, assessment, and institutional practices is a challenge faced by almost all professionals around the world. This certificate can be valuable for corporate, community, government, military, and social and human services leaders. Students have the opportunity to learn an important field of knowledge and develop culturally adaptive leadership in a framework for creating and implementing successful organizational change. Students can complete the certificate by attending classes on HPU’s campus in Honolulu, through on-line distance learning, or with a combination of the two.

Certificate candidates must complete the following courses:
OC  6440  Organizational Change and Development
OC  6442  Culture and Human Organizations
OC  6448  Assessing Culture
OC  6449  Applications of Cultural Competence

Certificate in Healthcare Management
This certificate program acknowledges the importance of the growing healthcare industry and allows HPU Graduate and MBA students as well as healthcare professionals to address the unique and critical management issues in the field. Four core business courses are supported by two additional courses, an internship and a leadership seminar allowing students to discuss
and synthesize the information obtained during the certificate program.

Certificate candidates must complete the following courses:

- **FIN 6445** Financial Management in Healthcare
- **MGMT 6000** Individuals, Group Dynamics and Teams
- **MGMT 6445** Management for Healthcare Professionals
- **MGMT 6930** Leadership Seminar (1) concurrent with
- **HS 6990** Internship in Health Sciences (2)
- **MKTG 6445** Healthcare Marketing

**Professional Certificate in Human Resource Management**
The Certificate in Human Resource Management was designed for HR professionals who would like to update their skills or prepare for promotion or relocation into another functional area of HR. The certificate program caters to those whose professional or personal responsibilities preclude completion of the MAHRM program, as well as graduate students who seek specialized coursework and credentialing in human resource management.

Certificate candidates must complete the following courses:

- **HR 6400** Human Resource Management
- **HR 6420** Compensation Management
- **HR 6450** Safety and Health Management
- **HR 6460** Human Resource Development

**Professional Certificate in Information Systems**
The Professional Certificate in Information Systems program is designed to provide knowledge, tools and techniques for those who are working in, or plan to work in, the field of information systems and information technology. It is appropriate for students who cannot complete all the requirements for a master’s degree in Information Systems, but who want a concentrated study in information systems and technology.

To obtain the certificate, a student needs to complete any four IS 6000-level courses.

**Graduate Certificate in Insurance**
The Graduate Certificate in Insurance program provides awareness of contemporary issues affecting the industry, clients, and regulators. The program provides professional knowledge and the opportunity to examine proposed solutions to issues by using tools and products available through insurance companies. Participants learn analysis tools, become aware of best practices, accumulate knowledge, and are able to immediately apply these to resolving current issues.

Course descriptions and permanent course numbers were not available for some of these courses when the catalog was published. Please consult the HPU web site for updated information.

**Required Courses (12 credits)**

- INS 6801 Insurance, Risk Management, and Professionalism
- INS 6802 Property and Casualty
- INS 6803 Financial Services
- INS 6804 Insurance Quantitative Methods
**Graduate Certificate in International Management**

The Graduate Certificate in International Management program prepares students for employment in the international/global environment as more companies of all sizes do business around the globe and in the Pacific region.

Certificate candidates must complete the following courses:

- MGMT 6300  International Business Management
- GLSD 6330  Comparative Management Systems

Choose two of the following courses:

- ECON 6400  International Trade
- ECON 6450  The World Economy
- FIN 6100  International Finance
- IS 6005  Information Systems Management
- MKTG 6420  International Marketing
- HR 6320  HRM: A Global Perspective

**Professional Certificate in Organizational Change and Development**

This professional certificate program focuses on change and development at the organizational level. Constant technological, economic, political, and social change have become the norm, and dealing with the rapid pace of change is a challenge faced by almost all professionals around the world. This certificate can be valuable for corporate, community, government, military, and social and human services leaders. Students have the opportunity to study an important field of knowledge and develop valuable skills for creating and implementing successful change. Students can complete the certificate by attending classes on HPU’s campus in Honolulu, through on-line distance learning, or with a combination of the two. Certificate candidates must complete the following courses:

- OC 6440  Organizational Change and Development
- OC 6442  Culture and Intervention Strategies
- OC 6443  Change Leadership Models and Methods
- OC 6444  Innovations and Creativity

**Professional Certificate in Project Management**

The Professional Certificate in Project Management is designed for those who must provide quicker and more focused responses to organizational initiatives. The certificate introduces the modern methods and standards of project management and extends their practice into a larger and more complex programmatic and organizational governance perspective. The certificate program caters to professionals, as well as graduate students who seek coursework and credentialing in project management.

Certificate candidates must complete the following courses:

- IS 6020  Modern Methods in Project Management
- IS 6150  Global Project Management Standards
- IS 6220  Portfolio and Program Management
- IS 6350  IT Governance
Professional Certificate in Software Engineering
The Professional Certificate in Software Engineering explores the effective management of software engineering and development projects. This certificate will appeal to working professionals who are interested gaining additional knowledge in the software development process, project management, and strategic management. Additionally, certificates are gateway products that lead some students to become matriculated.

Certificate candidates must complete four out of the five following courses:
IS 6020  Modern Methods in Project Management
IS 6050  Software Design and Construction
IS 6065  Database Management
IS 6110  Comparative Methods in Software Engineering
IS 6120  Software Engineering Practicum

Professional Certificate in Telecommunications Security
The Professional Certificate in Telecommunications Security is designed for those who wish to enhance their understanding of telecommunications security. This certificate will appeal to working professionals whose responsibilities include information, Internet and network security. Additionally, certificates are gateway products that lead some students to become matriculated.

Certificate candidates must complete four out of the five following courses:
IS 6070  Systems Architecture
IS 6130  Telecommunications
IS 6250  Global Information Systems
IS 6330  Advanced Issues in Connectivity
IS 6340  Information Systems Security
IS 6380  Systems Forensics

COLLEGE OF HEALTH AND SOCIETY

Post Master’s Adult-Gero Acute Care NP track (or concentration)
The Adult-Gero Acute Care Nurse Practitioner (A-GACNP) track is an option track of the MSN program that prepares the successful graduate to sit for the national board exam for the A-GACNP credential required for licensure. This track focuses on the role, function and utilization of the Adult Gerontology Acute Care Nurse Practitioner in providing acute care for the adult and gerontologic patient populations.

A-GACNP track Outcomes: All course outcomes are linked directly to these program outcomes. Some courses may not include all elements.
The Master’s in Nursing Science Adult Gerontology Acute Care Nurse Practitioner graduate will:

PROGRAM OF STUDY
Adult-Gero Acute Care Nurse Practitioner track: Total 53 MSN credits
MSN Core - 20 credits
(research, epidemiology, the 3 P’s, Roles/theory, Health Policy)
AGAC NP track - 30 credits + 3cr capstone = 53 cr

After successful completion of the 20-credit MSN core, A-GACNP track:

Fall 2015:
- NUR 6980 Fundamentals ACI 3 cr
- NUR 6981 Diagnostics & technologies 3 cr
- NUR 6982 Clinical Decision-making 3 cr

Spring 2016:
- NUR 6983 AC-II, 3cr
- NUR 6984 Practicum I 6 cr

Summer 2016:
- NUR 6985 AC-III. 3 cr
- NUR 6986 Practicum II 3 cr

Fall 2016:
- NUR 6987 Practicum III 6 cr
- NUR 7000 Capstone 3 cr

Post Master’s Family Nurse Practitioner Certificate
This certificate allows nurses with a master’s degree in nursing from any schools accredited by one of the nursing organizations to retool into a family nurse practitioner without completing another masters degree.

Applicants for this certificate program must meet the HPU graduate nursing admissions guidelines and apply in the same manner.

Prerequisites
Graduate level Advanced Pathophysiology, Pharmacology and Physical Assessment or their equivalent within the past five years. Applicants may be admitted without these prerequisites, but will be required to complete them prior to beginning practicum studies.

Certificate candidates must complete the following courses:
- NUR 6960 Advanced Theory: Primary Care of Children
- NUR 6961 Practicum I
- NUR 6962 Advanced Theory: Primary Care of Women
- NUR 6963 Practicum II
- NUR 6964 Advanced Theory: Primary Care of Adults
- NUR 6965 Practicum III
- NUR 6966 Advanced Theory: Primary Care of the Geriatric Adult
- NUR 6967 Practicum IV
- NUR 6969 Practicum V

A master’s prepared nurse professionally certified in one of the three practicum components (adult, pediatrics, or women’s health) of the family nurse practitioner program would receive
credit for previous completion of the equivalent course and practicum.

**Nurse Practitioner Certificate Program**
The MSN FNP Program is fully accredited, and the graduate is eligible for the national FNP credentialing exam with either AANP or ANCC. This certificate allows nurses with a master’s degree in nursing from any schools accredited by one of the nursing organizations to retool into a family nurse practitioner without completing another master’s degree.

Applicants for this certificate program must meet the HPU graduate nursing admissions guidelines and apply in the same manner.

Graduate level Advanced Pathophysiology, Physical Assessment, and Pharmacology or their equivalent within the past five years. Applicants may be admitted without these prerequisites, but will be required to complete them prior to beginning practicum studies.

Certificate candidates must complete the following courses:
- NUR 6960 Advanced Theory: Primary Care of Children
- NUR 6961 Practicum I
- NUR 6962 Advanced Theory: Primary Care of Women
- NUR 6963 Practicum II
- NUR 6964 Advanced Theory: Primary Care of Adults
- NUR 6965 Practicum III
- NUR 6966 Advanced Theory: Primary Care of the Geriatric Adult
- NUR 6967 Practicum IV: Primary Care of the Geriatric Adult
- NUR 6969 Practicum V

**COLLEGE OF LIBERAL ARTS**

**Certificate in Environmental Policy**
The Graduate Certificate in Environment, Policy is designed for students interested in understanding the impact of human activities on natural and environmental systems, designing policies to improve, remediate and restore environmental health, encourage sustainable development, and lead the organizational and institutional changes necessary for successful policy implementation.

Certificate candidates must complete the following courses:
- GLSD 6000 Sustainable Human Systems
- GLSD 6500 Ecological Economics and Sustainable Development

*One pre-approved ENVS/MARS 6XXX course*

*The ENVS/MARS 6XXX course should be pre-approved by the program. Students should consult with their graduate academic advisor first before registering for this course.*

**Certificate in Global Leadership and Sustainable Development**
The graduate certificate prepares students for leadership positions in organizational and that transform globalization dynamics into sustainable economic, social, and environmental development practices and programs. Students will learn to put the needs of local traditions, cultures and communities at the forefront of the globalization dynamic. The certificate emphasizes the import of systemic thinking and critical analysis for understanding the forces of globalization on local cultures, traditions, the natural environment, and social organization.
Certificate candidates must complete the following courses:
GLSD 6000  Sustainable Human Systems
GLSD 6001  Seminar in Environmental Governance or ENVS 6150 Environment, Power and Society
GLSD 6350  Global Markets in Transition
GLSD 6500  Ecological Economics and Sustainable Development

**Graduate Certificate Program in International Disaster and Emergency Management**
The Graduate Certificate Program in International Disaster and Emergency Management offers professional education for graduate students planning careers in government or non-governmental organizations (NGOs) and for practitioners in the field seeking to broaden their knowledge and skills. It provides the tools to manage disasters and address difficult public policy issues facing public and private sector officials, with a regional focus on Asia and the Pacific region.

*Course descriptions were not available for some of these courses when the catalog was published. Please consult the HPU web site for updated information.*

Certificate candidates must fulfill the following prerequisites:
INTR 6300  International and Domestic Emergency Management
INTR 6950  Capstone/Internship Project

And two of the following core courses:
INTR 6320  Complex Emergencies
INTR 6340  Disaster Command, Control, Communications, and Coordination
GEOG 6300  Geography and Geology of National Disasters

And one of the following elective courses:
GEOG 4700  Geographic Information Systems
PSCI 6151  Global Governance
PSCI 6330  National Security and Policy Making
PSCI 6610  Seminar: Politics of Developing Nations
PSCI 6620  Peacebuilding and Conflict Management

**Certificate in Mediation and Conflict**
The Certificate Program in Mediation and Conflict at Hawai‘i Pacific University provides post-baccalaureate training for professionals, students, and individuals who seek a better understanding of the nature of conflict and appropriate and effective methods to settle disputes in business, professional, personal, and social settings. Graduates will also be able to employ the communication skills necessary for a mediation practice.

Students will complete 12 units of graduate-level coursework as specified below. The program is designed to be completed in as little as one summer.

COM 6600  Mediation and Conflict
COM 6610  Negotiation
COM 6620  Communication Strategies for Professionals, or COM 6670 Communication and Legal Practices
COM 6630  Mediation Practice
Graduate Certificate in National Security and Strategic Studies
The Graduate Certificate in National Security & Strategic Studies addresses the increasing global, regional, and local concern about contemporary security and strategic issues. It provides tools to help individuals understand contemporary national and international security issues as well as appreciate processes and themes at the cornerstone of strategic planning and decision-making. The program seeks to enhance students’ understanding of the complexity and nature of contemporary security challenges and the range of possible responses to such threats. It thus combines study of theories, strategies, and doctrines related to the causes, conduct, and resolution of conflicts as well as the maintenance of peace.

PROGRAM OF STUDY
The Graduate Certificate in National Security & Strategic Studies offers professional education for graduate students interested in studying the intersections between force and statecraft as well as national security and strategic decision-making in both domestic U.S. and international contexts. It affords opportunities for regional specialization as well as thematic concentrations in diplomacy, intelligence studies, insurgency/counterinsurgency, conflict resolution, and regional security.

CORE COURSES (6 credits):
HIST 6601 Seminar: Theory & Practice of Diplomacy
PSCI 6601 Seminar: Diplomacy & International Relations OR:
PSCI 6630 Seminar: National & International Security

ELECTIVE COURSES (9 CREDITS)
And any three courses from at least two different alphas from the following elective courses

HIST 6650 Seminar: Oil: History, Security and Sustainability
HIST 6661 Seminar: European Diplomatic History
HIST 6662 Seminar: US Diplomatic History
HIST 6663 Seminar: East Asian Diplomatic History
HIST 6664 Seminar: Middle Eastern Diplomatic History
HIST 6665 Seminar: International History of the Cold War
HIST 6667 Seminar: Modern American Cultural Diplomacy
HIST 6670 Seminar: History of Genocide
HIST 6998 Seminar: Special Topics in Diplomatic History
HIST 6999 Seminar: Special Topics in Military History
INTR 6997 Seminar: Special Topics in International Studies
PSCI 6300 Seminar: Indian Foreign and Security Policy
PSCI 6400 Seminar: Chinese Foreign Policy
PSCI 6601 Seminar: Diplomacy and International Relations
PSCI 6605 Seminar: Islam & Politics
PSCI 6620 Seminar: Peacebuilding & Conflict Management
PSCI 6630 Seminar: National and International Security
PSCI 6650 Seminar: Foreign Intelligence
PSCI 6660 Seminar: Resistance & Rebellion
PSCI 6661 Seminar: Politics of Terrorism
PSCI 6680 Seminar: International Negotiating
PSCI 6690 Unpaid Internship
PSCI 6691 Paid Internship
Graduate Teaching English to Speakers of Other Languages (TESOL) Certificate

The Graduate Teaching English to Speakers of Other Languages (TESOL) Certificate is an 18-credit program designed with courses in three areas: linguistic theory, pedagogy (teaching methods), and practicum. With this balanced curriculum, students can prepare themselves for TESOL teaching in the United States or overseas. A full-time student can finish the program in an academic year or one academic year plus a summer session. Part-time students can move through the program at their own pace.

Prerequisite course: AL 2000 Introduction to Linguistics

CORE COURSES
Certificate candidates must take two of the following:
AL 6000 Teaching Second Languages: Theory and Practice
AL 6110 English Phonology and the Teaching of Pronunciation
AL 6120 English Syntax and the Teaching of Grammar

METHODS COURSES
Certificate candidates must take two of the following:
AL 6710 Methods of Teaching Oral/Aural English
AL 6715 Second Language Reading
AL 6725 Second Language Writing
AL 6730 Assessment in TESOL

PRACTICUM COURSES
Certificate candidates must take the following:
AL 6961 Practicum I in TESOL

ELECTIVE COURSES
Certificate candidates must also take one elective course. Students may select any graduate AL elective course, including a course taken but not counted in the Core Courses, Methods Courses, or Practicum Course sections above.

Transfer Credit: Students may transfer in as many as 6 credits in lieu of required credits in the HPU Graduate TESOL Certificate (GTC). The courses must substitute appropriately for courses in the GTC.

ACCT 2000 (3)
Principles of Accounting I
An introduction to fundamental accounting principles that include the accounting cycle, records, classification of accounts, financial statements, accounting aids to internal control; current assets and liabilities; depreciation accounting; payroll accounting, accounting principles; and partnerships.

Pre: Any WCIL I course and MATH 1105 or higher.

Course prerequisites—These must be met in order to enroll.
ACCT – Accounting

ACCT 2000 (3)
**Principles of Accounting I**
An introduction to fundamental accounting principles that include: the accounting cycle, records, classification of accounts, financial statements, accounting aids to internal control; current assets and liabilities; depreciation accounting; payroll accounting; accounting principles; and partnerships.
Prerequisite: Any WCIL I course MATH 1105 or higher.

ACCT 2010 (3)
**Principles of Accounting II**
An emphasis on the elements of accounting for corporations. Topics covered include: long-term liabilities; statement of cash flows; introduction to manufacturing accounting; and cost-volume profit analysis.
Prerequisite: ACCT 2000.

ACCT 3000 (3)
**Intermediate Accounting I**
An emphasis on accounting theory and practical application. Topics covered include: accounting process; financial statements; cash receivables; inventories; and plant, property, and equipment.
Prerequisite: ACCT 2010 and MATH 1130 or higher.

ACCT 3010 (3)
**Intermediate Accounting II**
A continuation of Intermediate Accounting I with the course covering long-term investments and assets, current and long-term liabilities, stockholders equity, and temporary and long-term investments.
Prerequisite: ACCT 3000.

ACCT 3020 (3)
**Intermediate Accounting III**
A further extension of accounting theory and practical applications through course topics such as: leases and pension plans; income tax allocations; in-depth analysis of cash flows and financial statements; effects of inflation on accounting; and financial statement disclosures.
Prerequisite: ACCT 3010.

ACCT 3200 (3)
**Managerial Accounting**
A course on the elements of managerial accounting, including: cost accounting principles and procedures; job and process cost accounting; budgets; standard costs; variable costing; profit-volume analysis; capital budgeting.
Prerequisite: ACCT 2010 and MATH 1130 or higher; Any WCIL II course.

ACCT 3300 (3)
**Federal Income Tax - Individual**
A course on income tax laws affecting individuals. Topics include: gross income exclusions; adjusted gross income; deductions from adjusted gross income; personal exemptions; and review of various income tax forms.
Prerequisite: ACCT 2010.

ACCT 3350 (3)
**Federal Income Tax - Organization**
An examination of income taxation of partnerships, corporations, estates, and trusts. Emphasis is placed on special corporate problems, personal holding companies, sub-chapter S corporations, and related matters.
Prerequisite: ACCT 3300.

ACCT 3380 (3)
**Tax Planning and Research**
An advanced federal income tax course examining tax research methods and the advantages of tax planning in the making of tactical and strategic management decisions. A problem-oriented course.
Prerequisite: ACCT 3300.

ACCT 3390 (3)
**Estate Planning**
A course that introduces the student to the estate planning process and includes an overview of Federal Estate and Gift Taxes, wills, trusts, and powers of attorney. The student also learns various planning techniques to minimize Federal Estate and Gift Taxes and avoid the probate system.
Prerequisite: FIN 3000.

ACCT 3400 (3)
**Governmental Accounting**
A course on accounting concepts and principles germane to government. Topics include budgetary controls and fund accounting systems.
Prerequisite: ACCT 3010.

ACCT 3700 (3)
**Accounting and Information Systems**
An introduction to accounting information systems that examines the analysis, design, and implementation of both manual and computer-based systems, and compares their relative merits. Emphasis is given to accounting procedures and internal controls, using the case study method.
Prerequisite: ACCT 2010 and CSCI 3201.

ACCT 3990 (1 to 3)
**Nonpaid Internship**
See Internship Section.

ACCT 3991 (1 to 3)
**Paid Internship**
See Internship Section.

ACCT 4000 (3)
**Advanced Accounting**
An introduction to specialized aspects of financial accounting. Topics include: partnerships; consolidations; branch and home office; estates and trusts; consignments and installment sales; fiduciary accounting; and liquidations.
Prerequisite: ACCT 3020 and FIN 3000.

ACCT 4100 (3)
**Auditing**
An examination of the theory and practice of auditing according to generally accepted auditing standards. The course includes the audit procedures for each transaction cycle and the preparation of auditors’ reports.
Prerequisite: ACCT 3020 and 3200; ACCT 3700 or IS 6100.

ACCT 4150 (3)
**EDP Auditing**
A multidiscipline course covering the theory and practice of auditing EDP systems using the case study method. Course topics include: framework; concerns and objectives; audit procedures; and management perspectives.
Prerequisite: ACCT 3700 and 4100.

ACCT 4997 (1 to 3)
**Directed Readings in Accounting**
Directed individualized reading.
ACCT 6000 (3)
Accounting for Managers
An examination of the application of financial and managerial accounting principles to the process of planning and controlling activities of an ongoing enterprise. Budgeting is examined as a means for implementing and communicating the planning process. Integration of cost accounting, capital budgeting, and management by objectives into the planning function are studied.
Prerequisite: ACCT 2000 and FIN 3000 or equivalents. Graduate standing.

ACCT 6100 (3)
Advanced Auditing
An advanced course on auditing and reporting. Auditing standards, auditing computer systems, legal liabilities, professional ethics, audit planning, sampling techniques, and internal auditing are studied.
Prerequisite: ACCT 4100. Graduate standing.

ACCT 6200 (3)
Advanced Managerial Accounting
A managerial accounting course that develops skills in gathering and analyzing business data developed in three areas of management concern: planning and controlling current operations, special quantitative decisions, and long-range planning.
Prerequisite: ACCT 3200, ACCT 6000, and MS 6000. Graduate standing.

ACCT 6500 (3)
Contemporary Accounting Theory
An advanced study of accounting theory that undertakes analyzing generally accepted accounting principles. Both historical and current principles as articulated by the AICPA, FASB, and other accounting organizations are reviewed. Additional topics include application of accounting theory and current trends.
Prerequisite: ACCT 6000. Graduate standing.

ACCT 6700 (3)
Advanced Computer Applications to Accounting
A course on the applications of computer software to accounting. Management issues are explored and include: security; automated and manual controls; audibility; backup/recovery; system integration and conversion considerations. Financial and managerial accounting issues from the perspective of corporate systems implementation and use are discussed.
Prerequisite: ACCT 6000 and MGMT 6050. Graduate standing.

ADPR – Advertising and Public Relations

ADPR 2000 (3)
Introduction to Integrated Advertising and Public Relations
This course is an introduction to the concept of strategic and integrated communication and provides an overview of the history, rationale and landscape of advertising, public relations related activities, illustrated by case studies and examples. The course includes a survey of integrated communication theory, techniques and applications including an exploration of specific campaigns and case studies and a basic hands-on introduction to copywriting and design.
Prerequisite: Any WCIL I course. Undergraduate standing.

ADPR 2500 (3)
Creativity
This course brings to light the creative process as it lives in the Advertising and Public Relations industry. Creativity will be explored through major theories and modern research in the field of creativity; case studies of creative individuals, organizations, and campaigns; and through play with creative elements of expression such as music, art, theatre, story, design, dance, and photography. At the end of this course students will have a foundation of ideation, creative strategy, and creative execution techniques.

ADPR 3200 (3)
Public Relations Writing
An advanced study of public relations writing, dealing with the tools of public relations writing, strategies for choosing the right message and medium, legal and ethical issues, media relations, internal and external publications, speeches, desk top publishing, digital media and the basics of style.
Prerequisite: A grade of C- or higher in any WCIL II course; ADPR 2000. Undergraduate standing.

ADPR 3250 (3)
Communication Media Research
Introduction to quantitative and qualitative methods used to study audiences, contents, and effects of mass media. Course content focuses on advertising and public relations communication using social science research skills and statistical analysis. Approaches include content analysis, survey research, focus groups, and other empirical methodologies.
Prerequisite: A grade of C- or higher in any WCIL II course; ADPR 2000.

ADPR 3320 (3)
Consumer Behavior
A course on consumer behavior that discusses various techniques for profit target market and analyzing decision-making strategies and buying behavior. The course explores demographics, psychographics, values and lifestyles system, PRISM, and high- and low-involvement decisions. It provides insight essential to marketing, public relations, and advertising campaign planning.
Prerequisite: ADPR 2000; A grade of C- or higher in any WCIL II course

ADPR 3400 (3)
Media Strategies
This course introduces students to the research, planning and relationship development with the media outlets and their representatives who are vital to the development of effective long and short-term strategic communication programs and campaigns. It includes lessons on how to analyze and evaluate both advertising and news/editorial media, how to plan
a media program, and how to work with the various media representatives; in some cases advertising representatives for purchased space or HTM and in other cases editorial staff for placement of public relations material.

**Prerequisite:** A grade of C- or higher in any WCIL II course; ADPR 2000. Undergraduate standing.

**ADPR 3500** (3)  
**Creativity and Copywriting**  
A course that introduces strategies for creative and critical thinking, methods of testing creative themes, and techniques for creating, writing, and testing advertising copy. Students learn that creativity and copywriting are critical elements in the creation of an advertising campaign.

**Prerequisite:** ADPR 2000; Any WCIL II course.

**ADPR 3600** (3)  
**Advertising Sales**  
A course that presents a balance of theory and practical applications concerning selling, persuasion communication, advertising, and promotion. Topics include: management of the sales force, compensation, training, and motivation; and individual selling techniques for newspaper, magazine, radio, television, and other media.

**Prerequisite:** A grade of C- or higher in any WCIL II course; ADPR 2000.

**ADPR 3700** (3)  
**Integrated Promotion Management**  
An overview of nonpersonal promotional strategies including planning, budgeting, media selection, message design, and HTM. Case studies illustrate using mass media special events, in-store displays, advertising, public relations, and visual communication to affect consumer buying behavior. Industry dynamics, controversies, trends and implications are analyzed.

**Prerequisite:** A grade of C- or higher in any WCIL II course; ADPR 2000.

**ADPR 3910** (1 to 3)  
**Selected Topics in Advertising/Public Relations**  
Course title, content, and prerequisites will vary. May be repeated for a total of 9 credits when title and content have changed.

**Prerequisite:** ADPR 2000. Undergraduate standing.

**ADPR 3990** (1 to 3)  
**Nonpaid Internship**  
See Internship Section.

**ADPR 3991** (1 to 3)  
**Paid Internship**  
See Internship Section.

**ADPR 4900** (3)  
**Strategic Communication Seminar**  
This course is the capstone for the Strategic Communication Program of the College of Communication. It is the course that prepares the student for entry into the professional world of strategic communication including advertising, public relations and all of the fields included in those general categories. The course guides the students to utilize all of the theories and models of communication, the planning strategies and implementation techniques in order to develop a strong strategic plan for an existing organization in the Honolulu community.

**Prerequisite:** ADPR 3400 and 3500. Undergraduate standing.

**AIR – Aerospace Studies**

**AIR 1010**  
**Foundations of US Air Force I**  
The study of the total force structure, strategic offensive and defensive, general purpose, and aerospace support forces of the Air Force in the contemporary world.

**AIR 1011**  
**Initial Military Training I**  
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

**AIR 1020**  
**Foundations of US Air Force II**  
The study of the total force structure, strategic offensive and defensive, general purpose, and aerospace support forces of the Air Force in the contemporary world.

**AIR 1021**  
**Initial Military Training II**  
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

**AIR 2010** (1 to 2)  
**Evolution of US Air Force Air and Space Power I**  
The study of air power from balloons and dirigibles through the jet age: historical review of air power employment in military and nonmilitary operations in support of national objectives; the evolution of air power concepts and doctrine.

**AIR 2011**  
**Field Training Preparation I**  
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

**AIR 2020** (1 to 2)  
**Evolution of US Air Force Air and Space Power II**  
The study of air power from balloons and dirigibles through the jet age; historical review of air power employment in military and nonmilitary operations in support of national objectives; the evolution of air power concepts and doctrine.

**AIR 2021**  
**Field Training Preparation II**  
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

**AIR 2510**  
**Leadership Laboratory**

**AIR 3040**  
**AFROTC Field Training I**  
Four-week field experience and training at selected Air Force bases on the mainland. This course is required of AFROTC students for Air Force commission.

**AIR 3060**  
**AFROTC Field Training II**  
Six-week field experience and training at selected Air Force bases on the mainland.
bases on the mainland. This course is required of AFROTC students for Air Force commission.

AIR 3511
Intermediate Cadet Leader I
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

AIR 3521
Intermediate Cadet Leader II
Conducted within the framework of organized cadet corps with progression of experiences designed to develop leadership potential. Involves Air Force customs and courtesies, drills, and career progression.

AIR 4011
Senior Cadet Leader I
Practical application in adventure training, one-robe bridges, rifle marksmanship, land navigation, drill and ceremonies, physical training.

AIR 4021
Senior Cadet Leader II
Practical application in adventure training, one-robe bridges, rifle marksmanship, land navigation, drill and ceremonies, physical training.

AL – Applied Linguistics

AL 1000
Language Awareness
AL 1000 develops an awareness of language as an important component of culture and of communication. Students investigate the nature of language and examine ways in which the study of language, and the cultural forces that influence its use, may result in better understanding of, and participation in, everyday communication encounters. Prerequisite: Undergraduate standing.

AL 1050
Languages in the Pacific
Language plays an important role in all matters of human life. In AL 1050, students examine historical and contemporary language use throughout the Pacific Basin, as well as in Hawai‘i. Through exploring topics such as, but not limited to, the effects of language contact, characteristics of pidgins and creoles, and stories of language loss and preservation, students develop a better understanding of, and appreciation for, cultural, political, and social issues in the world where they will live, work, and study.

AL 2000
Introduction to Linguistics
A general introduction to the nature of language and to the various fields of linguistics: human language vs. animal communication, phonetics, phonology, morphology, syntax, sociolinguistics, and language acquisition. Emphasis is on language situations familiar to students. Prerequisite: Any WCIL I course.

AL 3110
Phonetics and English Phonology
A basic phonetics/phonology course focusing on English. Topics include: articulatory phonetics, phonetic transcription, the phonetic/phonemic distinction, syllable structure, word and sentence stress, intonation, phonological pro-
cesses, and the problems that second language learners have in acquiring the phonology of English. Prerequisite: C- or better in AL 2000 or concurrent.

AL 3120
English Syntax
A course in English syntax for the prospective language teacher. Terms and constructs from transformational grammar are introduced to describe grammatical phenomena, but the focus is on the analysis of problems that second language learners have with English syntax. Prerequisite: C- or better in AL 2000 or concurrent.

AL 3130
Semantics
A study of the use of language to communicate meaning. Topics include: the nature of meaning, the semantic relationship between words, the way meaning is encoded in sentences, interpreting utterances in actual speech, morphemes, historical semantics, idioms, and figures of speech. Prerequisite: AL 2000.

AL 3310
History of the English Language
The study of the origins and evolution of the English language from Indo-European through Germanic, Old English, Middle English, and Modern English. Other topics include the development of writing and the position of English in the world today. The course is presented from the perspective of applied linguistics. Prerequisite: C- or better in AL 2000 or concurrent.

AL 3320
Sociolinguistics
An investigation of the relationship between language variation and the following: social class, ethnic group, gender, region, and content. Also discussed are language planning, bilingualism, pidgin/creole languages, and English as a world language. The class focuses on applying the topics above to English language teaching situations. Prerequisite: A grade of C- or better in AL 2000, SOC 1000, SOC 2000, or SOC 2100.

AL 3340
Translation in Second Language Acquisition
An investigation of translation problems due to differences in structure, concept, culture, and style among languages. Other topics include equivalence, untranslatability, languages in contact, and the use of translation as a tool for teaching and learning a second language. Prerequisite: C- or better in AL 2000 or concurrent.

AL 3350
Group Dynamics for Language Teachers
A systematic study of group dynamics in foreign language classrooms, including how groups come together, form productive working relationships, navigate conflicts and problems, respond to environmental elements, and complete their tasks. Prerequisite: A grade of C or better in AL 2000.

AL 3500
Second Language Learning and Teaching
An introduction to the major theories and issues in the field of second language learning and second language teaching. Topics include first language acquisition, theories of second language acquisition, factors affecting second language acquisition, and learner language. Contemporary perspectives on designing, managing, and assessing language classes.
will also be covered.

Prerequisite: C- or better in AL 2000 or instructor/departmental consent. Undergraduate standing.

**AL 3740**
**Technology in Language Teaching**
An exploration of the effective uses of computers and video in language teaching. Criteria to evaluate computer programs and video series are developed and used to evaluate commercially available language learning materials. In addition, classroom activities that incorporate this technology and original materials are developed.

**Prerequisite:** C- or better in AL 2000 or concurrent.

**AL 3750**
**Creating Language Teaching Materials**
A course in materials development for language teaching. We will investigate the various conditions under which teachers need to develop materials, the basic principles which different methodologies suggest for the ordering and types of activities, and the process of evaluating, adapting and piloting materials.

**Prerequisite:** C- or better in AL 2000 or concurrent.

**AL 3760**
**Teaching English to Children**
A course exploring an activity-based approach and featuring a wide array of instructional techniques that promote successful teaching of English to children in both second and foreign language settings. Additional topics include, but are not limited to, characteristics of language learners at different ages and stages of development, cognitive and social needs of young language learners, and local and global factors influencing policy and practice in teaching English to children.

**Prerequisite:** C- or better in AL 2000 or concurrent.

**AL 3950**
**Language Classroom Experience**
This course is usually taken one credit at a HTMe over three terms. TESOL students observe language classes. For the second or third credit, the student may assist language teachers if practicable. The course includes periodic seminars and a final written report.

**Prerequisite:** C- or better in AL 2000 or concurrent.

**AL 3990**
**Non-paid Internship**
See internship section.

**AL 3991**
**Paid Internship**
See internship section.

**AL 4710**
**Materials, Methods, Testing I: Spoken English**
An investigation of current materials and methods for teaching oral fluency, pronunciation, listening skills, and oral grammar. Also included are methods and materials for evaluating speaking and listening. Students observe oral fluency/listening classes, as well as prepare and present short teaching demonstrations.

**Prerequisite:** AL 3110, 3120, and 3950 (all courses may be taken concurrently).

**Materials, Methods, Testing II: Written English**
An investigation of current materials and methods for teaching composition, reading, study skills, and written grammar. Also included are methods and materials used for evaluating writing and reading. Students observe writing, grammar, and reading classes and prepare and present short teaching demonstrations.

**Prerequisite:** AL 3110, 3120, and 3950 (all courses may be taken concurrently).

**AL 4960**
**Practice Teaching I**
Closely supervised practice teaching in an English language program, most often in Honolulu. The course includes periodic seminars and a final written report and should be taken in the last term of a student's program.

**Capstone course.**

**Prerequisite:** AL 3950; AL 4710 or 4720.

**AL 4970**
**Practice Teaching II**
Closely supervised practice teaching in a language other than English of which the student is a native or near-native speaker. The class includes periodic seminars and a final written report and should be taken in the last term of a student's program. Does not substitute for AL 4960.

**Prerequisite:** AL 4960 and consent of the instructor.

**AL 6000**
**Teaching Second Languages: Theory and Practice**
The course examines major theories of second language acquisition and covers the key concepts and principles in second language learning, second language teaching, and second language research within the field of Teaching English to Speakers of Other Languages (TESOL). Lesson planning, classroom management, and teacher development are also discussed.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6110**
**English Phonology and the Teaching of Pronunciation**
An advanced course in English phonology for the prospective teacher of spoken English. Topics include the sound system of North American English, the interaction of the sound system with listening, grammar, and orthography, and methods of teaching and improving pronunciation.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6120**
**English Syntax and the Teaching of Grammar**
An advanced, practical course in English syntax for the prospective teacher of English, using the framework of transformational grammar to analyze problems of non-native speakers in acquiring English syntax. Also included are pedagogical considerations to deal with these difficulties.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6130**
**Semantics**
Analyzing the use of language to communicate meaning, this course focuses on language-specific differences in meaning representations and how these differences lead to difficulties for learners of second languages.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6140**
(3)
Discourse Analysis for Language Teachers
This course focuses on the analysis of language use in written texts or in spoken social interaction. Students will learn key concepts about how language works at the discourse level and develop analytical skills on authentic language samples. They will relate these concepts and analytical skills to the development of communicative competence in language learning and teaching.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6310 (3)
History of the English Language
A course investigating the origins and evolution of the English language. A survey of the development of English from Proto-Indo-European through Old, Middle, and Modern English is presented using linguistic, literary, and historical data. The spread of English in recent HTMes and the implications for TESOL are explored.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6320 (3)
Language and Society
Scrutinizing the relationship between language and society, this course applies such findings to the language teaching situation. Topics include variation based on social class, ethnic group, gender, region, and content. Additional topics may include one or more of the following: language planning, bilingualism, pidgin/creole languages, and English as a world language.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6330 (3)
Second Language Acquisition
A survey of the scope and meaning of second language acquisition. This course includes a brief historical investigation of important works and concepts in SLA and examines the most current theories, applying them to the ESOL classroom.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6340 (3)
Translation in Second Language Acquisition
A course exploring the differences in structure, concept, culture and style among languages and the resulting problems in translating from one to another. Equivalence, untranslatability, languages in contact, and the use of translation in second language teaching are also examined.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6350 (3)
Group Dynamics in the Language Classroom
Group dynamics in the language classroom is a systematic study of group dynamics in language classrooms. Students investigate how groups come together, form productive working relationships, navigate conflicts and problems, respond to environmental elements, and eventually close.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6600 (3)
Seminar in Second/Foreign Language Teaching
Visiting scholars or HPU instructors present topics within their expertise. Topics are those related to language teaching but not currently in the curriculum. Example topics are English in a global context, language policies and language planning, bilingual education, pragmatics, and discourse analysis. There is no limit to the number of HTMes the course is taken as long as the topic is different each HTMe it is taken.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6710 (3)
Second Language Listening and Speaking
This course examines both pedagogical and research issues in the teaching of second language speaking and communication processes, communicative competence, language-focused learning, ameaning-focused input, meaning-focused output, fluency, syllabus design and lesson planning, and the assessment of listening and speaking skills.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6715 (3)
Second Language Reading
This course examines both pedagogical and research issues in the teaching of second language reading across a range of educational contexts. Topics include first and second language literacy, selection and adaptation of materials, intensive and extensive reading, building vocabulary and fluency, syllabus design and lesson planning, and the assessment of reading skills.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6720 (3)
Methods of Teaching English Reading and Writing
A seminar designed for pre-service and in-service language teachers, providing them with an understanding of ESOL learning and teaching principles as they apply to reading and writing skills. Materials selection and adaptation, lesson and unit planning, and demonstration teaching are also components of this course. Emphasis is on methods that foster improved literacy skills and both fluency and accuracy in writing skills.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6725 (3)
Second Language Writing
This course examines both pedagogical and research issues in teaching second language writing across a range of educational contexts. Topics include process- and genre-based theories of teaching writing, constraint rhetoric, assessing student writing, responding to student writing, syllabus design, lesson planning, and materials selection.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6730 (3)
Assessment in TESOL
A course in the principles and practices of evaluation in language learning and teaching. While classroom use of teacher-made tests is emphasized, other topics include program and institutional testing, methods of evaluation without tests, and teacher and program evaluation. Students develop, administer, and evaluate tests.
Prerequisite: C- or better in AL 2000 or concurrent. Graduate standing.

AL 6740 (3)
Research and Issues in Computer-Assisted Language Learning
After investigating current research in CALL, this course explores methods of using CALL and video in language teaching. Students conduct a critical review of commercially available language learning materials and develop classroom activities that incorporate CALL.

**Prerequisite:** AL 2000 or concurrent. Graduate standing.

**AL 6750**

**TESOL Materials Development**

A seminar that explores the principles of textbook selection and evaluation, task adaptation and design, and the process of materials development for use in ESOL teaching and learning.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6760**

**Teaching English to Children**

A course exploring the approaches and implementation of activities for teaching English to young learners who are speakers of other languages. Characteristics of children of different ages are discussed along with what they can be expected to do linguistically. Other topics include: classroom management, lesson planning, and multisensory activity development.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6961**

**Practicum I in TESOL**

A practicum course offering the student opportunities to observe, participate, and assist in ESOL classes both on and off campus. Also included is a professional development project. The individual student’s background is considered in designing the practicum. Periodic seminars help students explore insights gained while carrying out practicum components.

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AL 6962**

**Practicum II in TESOL**

Supervised practice teaching in an ESOL program at HPU or, if specific criteria are met, in another Honolulu-area ESOL program. The individual student’s background is considered in designing the practicum. The course includes periodic seminars and a final course notebook.

**Prerequisite:** C- or better in AL 2000 or concurrent; AL 6961. Graduate standing.

**AL 6990**

**Nonpaid Internship**

See Internship Section.

**Prerequisite:** Graduate standing.

**AL 6991**

**Paid Internship**

See Internship Section.

**Prerequisite:** Graduate standing.

**AL 7099**

**Capstone Requirement**

The MA TESOL student has three choices for a capstone activity: (1) compiling an acceptable portfolio, (2) passing a comprehensive examination, or (3) completing an acceptable in-service project. **Capstone course.**

**Prerequisite:** C- or better in AL 2000 or concurrent. Graduate standing.

**AMST – American Studies**

**AMST 1776**

**Essential America**

The basic ideas, events, and people that have shaped the USA today, focusing on what one needs to know for better participation and success in American society, politics, and business. Short readings and images from past and present are related to current options and viewpoints by extensive student discussion and audio-visual interpretive commentary.

**ANTH – Anthropology**

**ANTH 2000**

**Cultural Anthropology**

A general introduction to cultural anthropology. Topics covered include: the nature of culture; basic concepts for analyzing cultural behavior; and consideration of the effects of culture upon the individual and society.

**ANTH 2400**

**The Anthropology of Polynesian Surfing**

The Anthropology of Polynesian Surfing provides students with an understanding of surf culture in the Pacific Basin. Environmental and cultural factors are assessed in relation to surfing's development in Polynesia, integration into Hawaiian culture, decline due to Western influence, and revitalization as a modern recreational activity. The importance of surfing then and now is studied in regards to greater social and cultural events and issues in Hawai‘i and abroad. An overview of various natural sciences is given as each relates to surfing.

**Prerequisite:** Any WCIL I course.

**ANTH 2401**

**Island Surfing Sites: A Cultural Field Study**

Island Surfing Sites: A Cultural Field Study provides students with an understanding of surf culture in the Pacific Basin by using various islands as models to highlight the importance of surfing in ancient and modern culture in Hawai‘i. Field activities may include surf demonstrations and instruction, opportunities to speak with local culture informants, and fi trips to various cultural sites and museums to study Hawai‘i’s surfing heritage. This elective course provides students with an experiential ethnographic opportunity that is critical to anthropology as a discipline and complementary to other courses offered by the college.

**Prerequisite:** Any WCIL I course.

**ANTH 3000**

**Is Global Citizenship Possible?**

This course addresses “global citizenship” by focusing on two questions: (1) Given that cultural diversity is a key characteristic of our species, how can we organize political communities so different people with different beliefs and behaviors feel a part of the same political community? And (2) how can we address the political and economic disparities that pervade our current global networks in order to build broader political communities that unite through shared interests and hopes rather than common hatreds?

**Prerequisite:** Any WCIL II course.

**ANTH 3110**

**Symbolism, Myth, and Ritual**

An examination of non-Western belief systems through interpretation of myths, rituals, and symbolism. Underlying meanings of religious practices, beliefs, and possible explanations for their origins are examined.

303
ANTH 3115
Culture, Religion, and the Environment
Western and non-Western cultural and religious perspectives on the relationships between people and the environment. Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

ANTH 3180
Culture, Economic Systems, and Management
Selected economic questions regarding exchange, development, and business management within a broad cross-cultural perspective. The applicability of Western economic concepts to non-Western societies, theories of development and underdevelopment for third world countries, and economic development of the Hawaiian islands pre-and post-contact are explored. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3200
Medical Anthropology
The study of health issues and disease within a broad cross-cultural perspective. Organization of medical beliefs and services in non-Western settings is explored as a means of better understanding aspects of our own medical system. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3250
The Anthropology of "First" Contact and Colonialism
This course will examine the ways in which centralized Asian and European powers interacted with and came to politically dominate nations and locations in the Pacific, Asia, the Americas, and Africa. Colonialism will be studied as a complex set of evolving power relationships that fundamentally altered both colonizers and colonized. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3300
Japanese Society and Culture
This course examines the culture of Japan with particular attention to values and behavior patterns. Issues to be addressed include the role of the family, gender, popular culture, economic and political issues, historical changes in Japanese society and Japan's responses to the outside world. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3302
Chinese Culture and Society
By focusing on factors such as nationalism, kinship, gender, modernization, food, popular culture, and society and individual, this course will investigate modern Chinese society and culture in the People's Republic of China, Hong Kong, Taiwan and other locations. Materials including feature films, documentaries and ethnographic footage will be used. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3350
Diversity in the Workplace
The study of the dynamic changes taking place in the world of work due to increasing ethnic diversity and the numbers of women entering the work place. Using the concept of culture as developed by anthropologists, the course explores such topics as wage differentials, stereotypical careers, equal employment opportunity, management styles, discrimination, communication styles, and harassment. Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

ANTH 3360
Men and Women in Modern Society
The roles and relationships of women and men in modern society. The course explores such topics as marriage, love, sexuality, finance, harassment, and violence. The roles of women and men in other societies are explored, but major emphasis is placed on American culture. Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

ANTH 3365
Gender in Asia
This course examines the way in which men and women in Asia think about and enact ideas about gender, family, sexuality and the body. The geographical emphasis will be on East and Southeast Asia, but South Asian case studies will be used as appropriate. We will look at the interrelationship between gender and politics, economics, culture and society both in the past and the present. Prerequisite: Any introductory social science course; Any WCIL II course.

ANTH 3400
The Anthropology of Food
The course focuses on the political economy of food, agriculture, and nutrition from a cultural and historical perspective at both the local and global or ("glocal") levels. It explores local, national, and global food systems to answer puzzling questions such as: How does obesity in the U.S. link to "global" hunger? Why do people keep talking about "eating local," food sovereignty, and "grass-fed beef"? At a time that we are producing more food than ever in history, why are there still starving people in the world? What does cultural history tell us about how and why we eat the way we do? Prerequisite: A grade of C- or higher in any WCIL II course; any introductory social science course.

ANTH 3403
Rhythm and Culture
This course examines the ways in which rhythm functions in the music of different cultures. By looking at the ritual, secular, economic and political functions of percussion, we will use rhythm as a lens for understanding the human condition. Guest artists and hands-on experience will be included. Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

ANTH 3500
Appreciating Pacific Worlds
The cultural and historical traditions of Pacific peoples - in
Polynesia, Melanesia and Micronesia. Also considers how Pacific Islanders have coped with change during the past two centuries as well as the perceptions and misperceptions of Islanders by Western writers.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3550**

**Hawai'i in the Pacific: Selected Issues**

(3)

Considers the key issues relating to Hawai'i's place in the Pacific and the Pacific's place in Hawai'i. Involves guest speakers and debates regarding topics, such as sovereignty and economic development, that are central to the current politics of the archipelago and region.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3556**

**Hawaiian Archaeology**

(3)

Examines the archaeology of Hawai'i from the first arrival of Polynesian voyagers through the early contact period of the mid 19th century. Considers issues of colonization, adaptation and interaction between human groups and their environments, the role of landscape in ancient Hawaiian social and political systems, settlement archaeology, the roles of ritual and power in the development of Hawaiian society and the impact of European arrival upon Hawaiian society.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3580**

**Impact of Tourism on Local Cultures**

(3)

The study of the impact of tourism upon the cultures where it has developed. Case studies are presented to illustrate these influences, with particular emphasis given to the Pacific region. Adaptive strategies to create cultural and environmental synergy are also discussed, including management by values, proactive cultural ecology, and compatible destination community development.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3600**

**Poverty and Culture**

(3)

This is a service-learning course offering direct participant-observation with homeless in Hawai'i. The seminar will meet both on the off campus with social service organizations. Students examine the discursive role social science, social work, and political economy play in the identification and enactment of public policies and ideology regarding impoverished people. Students will work with social work practitioners and particular Hawai'i and Micronesia. The course offers students training in ethnographic methods, community education, political activism and globalization. The course satisfies the upper division citizenship requirement.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3650**

**Taboos**

(3)

This course examines what taboos are and how they operate in our lives and society. Tabu serves as an entrance into broader cultural analysis through examination of context and, when possible, explanation of prohibited behavior in various western and non-western societies. Discussions of subjects rich in religious, social, and political sensitivity including sexuality, witchcraft, cannibalism, human-animal relations, madness, deformity, body modification, and death are explored and analyzed in the course.

Prerequisite: ANTH or SOC 2000

**ANTH 3700**

**Culture and Language**

(3)

An examination of interrelationship of culture and language. The course explores how culture shapes the form and content of how we communicate with one another as well as how language gives form and depth to the way culture is expressed.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3900**

**Anthropological Thoughts and Theories**

(3)

The purpose of this course is to facilitate an understanding of recent developments in anthropology and the related human sciences. Students are introduced to dominant theoretical approaches that have shaped anthropological research and writing over the past century and a half. This course constitute a attempt both to supply such an historical context and to explore the potential uses of anthropology in the contemporary world. This is a require course for the BA in Anthropology.

Any WCIL II course; ANTH 1000 or 2000.

**ANTH 3922**

**Managing Our Mortality**

(3)

Dying in America is often described as a lonely, isolating and painful experience. Drawing on cross-cultural insights, the course explores ways for changing how we cope with the end of life - for our loved ones, our patients, and ourselves.

Prerequisite: A grade of C- or higher in any WCIL II course; Any 3000-level social science or nursing course.

**ANTH 3950**

**Anthropology Practicum**

(3)

The anthropology practicum is designed to give students a working knowledge of the discipline through a variety of experiences. These experiences can include fieldwork and/or field placement with an agency; developing an extended bibliography of the literature of anthropology; working closely with the anthropology faculty on a research project; and fulfilling other academic requirements as requested by the supervising professor.

Prerequisite: Any introductory social science course; Any WCIL II course.

**ANTH 3951**

**Anthropology Practicum**

(3)

**ANTH 3980**

**Hawaiian Sovereignty**

(3)

Working with Hawaiian activists, the instructor and students will explore key issues regarding cultural and economic sovereignty in the Hawaiian archipelago. Placing today's concerns within an historical perspective, the course asks where we go from here. Students will hear views that provide a spectrum or continuum of the concerns involving the Hawaiian community.

Prerequisite: A grade of C- or higher in any WCIL II course; Any introductory social science course.

**ANTH 3990**

**Nonpaid Internship**

(1 to 3)

**ANTH 3991**

**Paid Internship**

(1 to 3)
ANTH 4900
Reflections on Anthropology
(3)
A culminating course for anthropology majors that brings together students course work, certificate program, and internship experiences to reflect on the broader questions that anthropology deals with: What might we say about the human experience and anthropology’s place in understanding it? How do differences enrich our everyday parochializing perspectives? How might anthropology encourage needed change? Capstone course.
Prerequisite: A grade of C- or higher in any WCIL II course; ANTH 2000 or any 3000-level anthropology course.

ANTH 6601
Seminar: Violence, Conflict, and War
(3)
A course that looks at war and conflict from an anthropological perspective. Topics that are considered in the course may include the relationships between social organization and war, the biological factor in violence, and the role played by gender in conflict and violence.
Prerequisite: Graduate standing.

ART – Art

ART 1010
Color Flow
(2)
This class is for all who wish to enjoy the unique flow and spontaneity of watercolor. Students will explore various techniques including wet into wet, blended wet, negative glazing, layering color on color, using resists, opaque and textures. Different drawing techniques will also be introduced. Nature will be our subject matter. Beginners are welcome.

ART 1040
Introduction to Pastel
(2)
The first half of this course will cover pastel safely, controlling the mess, lifting and cleaning areas, techniques (applying pastel to paper to create effects and textures) and layering and mixing color. The second half will cover integrating the color and value of toned paper as part of the painting. Painting will be done from still life set ups. Basic drawing skills will be helpful. Each class will include demonstrations, personal help and critiques.

ART 1050
Introduction to Painting
(2)
An exciting beginning course that covers materials, techniques, composition and color theory, through lecture and beginning painting projects. The class projects and demonstrations will emphasize seeing value and interpreting it into paint. Acrylic paints are suggested for this class. Beginners or students looking to refresh their fundamental skills are welcome.

ART 1060
Color Flow: Watercolor Plus
(2)
Enjoy the flow and spontaneity of watercolor. Contrast the transparent, luminous color with highlights of other water media, including opaque gouache, watercolor crayon, pastel, and a bit of collage. All students, including beginners, are welcome who wish to explore the many possibilities of this versatile, joyful medium.

ART 1070
Watercolor I and II
(2)
This course is open to all levels including beginners and experienced painters. The studio will have a cooperative atmosphere where students will learn from each other.
Subjects will center around still life and occasionally figure painting from a live model. Each session will conclude with a round table critique of student work.

ART 1071
Watercolor I and II: Exploring Creativity
(2)
This class is designed to stimulate creativity and to encourage the development and growth of personal expression. Beginning as well as advanced students are welcome. Students will experiment with different ways of handling color, value and composition using both traditional and contemporary water media techniques. Personal imagery, still life, landscape and painting from life will be explored.

ART 1072
Beginning Watercolor
(2)
Students will learn a fresh approach to watercolor painting as they develop skills in drawing, brushwork, paint handling, composition and color. Students will be encouraged to paint subjects that interest them. Individual concerns will be addressed. Demonstrations, discussions and critiques will be offered in each class. Beginners and intermediates welcome.

ART 1073
Introduction to Oil Painting
(2)
Receive one-on-one instruction and be inspired by other artists in this open studio format for novice to advanced students. From technical improvements in brush, medium, drawing, and color choices to conceptual developments in composition, subject, scale, and series. Oil Painting will help achieve personal art goals in a relaxed setting.

ART 1074
Painting People
(2)
This in-depth class is for students wishing to greatly improve their ability to draw and paint people. Open to artists working in oil, pastel, watercolor, and drawing media, the heart of this class involves working from the live model in short and longer poses, culminating in creating situational, true-to-life studies. Artistic seeing, practical anatomy, artistic judgment, color and color mixing are some of the many topics that will be covered.

ART 1075
Drawing and Painting Adventures
(2)
Lessons that enhance visual awareness and creativity will develop your artistic abilities. You will see and create differently. Learn basic drawing and painting techniques and fundamental art principles through group exercises and individualized instruction.

ART 1076
Soft Pastel
(2)
Learn the techniques for successful “painting” with soft pastels. Working from still life, students will be introduced to the fundamentals of composition and use of color mixing with pastels. Each class includes demonstrations, personal help and critiques. The class is geared to beginners but is open to all levels of experience. Advanced students will receive individualized coaching.

ART 1080
Transparent Watercolor
(2)
The uniqueness of transparent watercolor will be explored. Students will concentrate on achieving color glow and intensity, transparent layering, strong design and shape making, and personal expression. Beginning as well as advanced students are welcome.
ART 1110  (2)
Ceramics  
This course is for beginners as well as experienced ceramists. Hand building and wheel skills will be demonstrated. Instruction will be presented in clay types, glaze application and chemistry as well as kiln styles and construction. The operation of kilns, loading, firing, maintenance will be explained in detail and practice. Teaching will be individualized and will be culturally diverse and inclusive. The most recent changes concerning art, art making by practice, and the spiritual will be explained. Cross cultural comparisons will be a regular part of this course.

ART 1111  (2)
Ceramics: Basic  
Emphasis of the course will be on handbuilding in pinch, coil, and slab techniques to create ceramic forms/sculptures with attention to individual projects. A variety of basic glazing techniques will be covered. The course will also use supplemental videos, films, books, etc. Open to beginning students.

ART 1112  (2)
Ceramics: Creative Clay  
Learn beginning and intermediate clay handling techniques. Slab, coiled and wheel thrown forms will be explored. Individual projects will be encouraged. Course includes discussions on high fire glazes, glaze application and kiln operation.

ART 1113  (2)
Ceramics: Figurative  
Open to intermediate and advanced students with prior experience in clay handbuilding; knowledge of figurative art and anatomy very helpful. Learn a variety of really fussy techniques for forming hollow, handbuilt stoneware figures, starting with a female or male nude. Specific construction and detailing will be covered in an intensive class that offers one on one attention. The primary focus is on clay handling, expression and multiple-part joinery.

ART 1114  (2)
Ceramics: Handbuilding  
Emphasis of the course will be on handbuilding in pinch, coil, and slab techniques to create ceramic forms/sculptures with attention to individual projects. A variety of basic glazing techniques in the low to medium range will be covered. The course will also use supplemental videos, films, books, etc. Open to continuing, intermediate and advanced students with prior basic handbuilding and glazing experience.

ART 1115  (2)
Ceramics: Surface  
Students will have the opportunity to work with stoneware and/or porcelain clay. Basic slab, coil, and wheel thrown techniques will be covered. Emphasis will be on individual projects exploring various building technique and surface treatment. Course includes discussion on high fire glaze, glaze application and kiln operation.

ART 1116  (2)
Ceramics, Smoke and Fire  
Discover the poetic relationship between fire and clay and be immersed in an age-old creative process. This class focuses on different methods and techniques of raku, pit and sawdust firing. Student will gain understanding of the history and science behind these techniques and create ceramic objects suitable for these firing methods. They will also experience the process up close and personal, learning about kiln placement, fit and smoke management, and ware transfer. Students should have some experience in ceramics and expect physical activity, excessive heat and smoke.

ART 1117  (2)
Ceramics: Wheel Throwing  
Explore forms from the basic bowl to the more complex teapot. Basic wheel throwing skills will be developed to create forms such as bowls, mugs, plates, bottles, and vases as well as expressive functional and nonfunctional pieces. Techniques covered will include stacking, coiling, joining, cutting, distorting, and basic glazing. Individualized instruction will be emphasized to meet all skill levels from the beginner to the advanced wheel thrower.

ART 1118  (2)
Ceramics: Clay Another Way  
In this class for beginning and advanced ceramic enthusiasts, one will learn unconventional and esoteric ways of building with clay to create functional and sculptural works of art. Both hand building and wheel throwing techniques are covered in this class as well as a number of firing processes including high fire and raku. No experience necessary, though open minds are required in this fun, fast paced class.

ART 1119  (2)
Gemology  
Students will learn how to identify precious stones and metals including jade, diamonds, sapphires, rubies, gold, silver and platinum. The course will also cover how gems are graded and cut and how to shop for jewelry. Both beginning and repeat students welcome.

ART 1120  (2)
Basic Jewelry  
This class will provide the student with a well rounded solid foundation in basic metal working techniques. These include soldering, piercing, forging, centrifugal casting, fabrication and finishing techniques.

ART 1121  (2)
Jewelry with an Attitude  
Metal, stone and fire up close and personal! The pragmatic approach to basic jewelry techniques through a series of projects emphasizing direct fabrication in metal. Students will be encouraged to incorporate found objects in their work.

ART 1122  (2)
Beads with an Attitude  
Learn to knot pearls, refurbish old necklaces and create new ones while having a great time in a synergistic environment.

ART 1123  (2)
Metalsmithing & Jewelry Design  
This course will develop your knowledge and skills in the area of metalsmithing and jewelry design through the use of various techniques, tools and equipment. A strong sense of craftsmanship and attention to detail will be emphasized. Projects will cover piercing, riveting, soldering, construction, stretching and finishing.

ART 1124  (2)
Jewelry: Moving Metal  
Basic fabricating, forging and finishing techniques will
be covered with attention to craftsmanship and caring for the tools. Students will explore the movement of metal through forging and surface textures and then incorporate their discoveries by designing and creating jewelry. Open to all levels.

ART 1125
Narrative Jewelry Design
Design and create a narrative jewelry that makes a personal statement. Students will be encouraged to express their personal stories by incorporating stones, found objects, photographs and more. Students will explore a range of techniques such as basic soldering, piercing, and riveting; forming (pressing, forging), stone setting and embellishing surface (stamping, embossing, roll printing). Beginning and intermediate students welcome.

ART 1126
Beginning Metals
This course will develop student’s knowledge and skills through the various techniques, tools and equipment. Projects will include piercing, riveting, soldering, and finishing.

ART 1127
Jewelry: Basic Fabrication
Learn the basics of making jewelry from metal sheet and wire. You will learn how to saw, solder, cold connect, shape, and finish metal to create jewelry via assigned projects and your own ideas. Class will also cover texturing (hammered, stamped, roller printed) and simple stone setting. Some tools provided, personal hand tools recommended (list available). Additional fees for metals used.

ART 1130
Basic Drawing
A course in the fundamentals of drawing: line, shape, value, proportion, form and space. The media can be as simple as a lead pencil or mixed media depending on the desire of the student.

ART 1131
Drawing I
This course is designed to familiarize the student with the mechanics and materials of drawing. The student will use a variety of traditional and non traditional materials to learn the techniques of line, contour, gesture, and shading. Emphasis will be on developing the student’s confidence in his or her drawing abilities.

ART 1132
Drawing II

ART 1133
The Art of the Sketch
Looking, seeing, finding a line, a tone, a movement, a page, a book, an image, freedom, limitation, and style. A beginning and also an end.

ART 1134
Life Drawing Studio
This class is for those who want to explore personal approaches to figure study in a shiMulating informal setting. Motivated models will provide creative poses ranging from two minutes to 20 minutes. Individual critique will be available and group discussions will be encouraged. Students at all levels are welcome.

ART 1135

Figures Without Fear
Capture the essence of the human form using an intuitive approach with an emphasis on gesture and simplification. Through demonstration and critique, students will be encouraged to find a personal viewpoint to explore the model’s attitude rather than anatomy. A variety of drawing and painting media will be used and students at all levels are welcome.

ART 1136
Cartooning for Adults
Rediscover the joy of drawing through cartooning. If you skip past the dreary headlines of the daily paper straight to the comics page, this class is for you. Lots of hands on exercises will help the student in the discovery of his or her own unique style

ART 1137
Design
A new class in design is offered to beginners or advanced students. Color theory, painting, collage interior design and other design forms will be covered in the class and students may choose the area of design they would like to pursue.

ART 1138
Portrait Drawing and Painting
This course addresses the structural nature of the human head and the effects of various lighting when depicting the head in charcoal and various paint media. The anatomy of the head will be studied beginning with the skull then focusing on the drawing of details such as the nose, eyes, lips and hair. Photographs will be used as reference at first followed by live models. Special attention will be given to the particular interests and styles of the students so they can develop techniques according to their goals.

ART 1139
Illustrated Comics
We are looking for people who like to tell stories through 80 years of comic history. Drawing with a focus structure, themes, and sequential art will be emphasized. The class is open to all levels although prior drawing experience is preferred.

ART 1140
Drawing the Landscape
See the dramatic surroundings of Honolulu and O‘ahu with new eyes as you discover the pleasures of plein-air drawing with colored pencils or pastel. Explore new techniques and materials and learn about the long and rich tradition of landscape art.

ART 1141
Basic Design
This design class will be useful to people at all levels of expertise from beginners to advanced. Many design forms will be covered including color theory, painting, collage, and interior design as well as others. In this creative, supportive learning environment, students will be able to choose the area of design on which they prefer to focus. Students will learn to see design all around them and/or fine tune what they already know.

ART 1150
Chinese Brush Painting
The class introduces students to various Chinese painting techniques. The subjects to be covered will include landscapes, flowers, birds, and other animals. Emphasis will be placed on the selection of paint brushes, color blending.
form, contour, composition, and proportion. Beginners with a strong interest or students with experience in the art of Chinese painting are welcome.

ART 1151
Intuitive Painting I
This class is for anyone who is interested in exploring new and unusual approaches to painting and drawing on paper and canvas with a variety of media. Serious but lively investigations of techniques with emphasis placed upon both emotional and mental responses each student wishes to explore in his or her work. This class is designed to shTMu late creatively in all forms of art.

ART 1152
Go with the Flow of Watercolor
Explore the joy of watching paint and water mingle on paper. Students will learn how to apply just the right amount of control to bring the composition together and bring forth their own unique creations. All levels are welcome.

ART 1160
Shodo-Japanese Calligraphy
With a history of over 2000 years, Japanese calligraphy has evolved into a highly revered Asian art form. The class will introduce students to various calligraphy materials, different writing styles, and the esthetics of a well balanced work. The class is geared for beginning students but those with prior experience in Japanese or Chinese calligraphy are welcome.

ART 1161
Flower Arranging
Sogetsu Ikebana is a form of contemporary art. Students will learn how to use a variety of materials and create beautiful flower arrangements. The class also offers lessons in basic creativity. Students will learn how to arrange any HTMe, anywhere. Only 15 students will be accepted. Offered in two ongoing seven-week sessions. Both beginners and advanced students welcome.

ART 1180
Life Drawing
Traditional and contemporary approaches to seeing and interpreting the figure that will encourage and strengthen the drawing skills of the beginner and the experienced student. Materials include charcoal, pastel, and acrylics.

ART 1190
Beginning Painting
An exploration of the exciting world of color and composition while learning to paint with oils or acrylics in different techniques. Students with previous experience welcome.

ART 1200
Watercolor I
Instruction in fundamental watercolor technique with introduction of materials. Emphasis will be on increasing control of the media and compositional elements. Various exercises will be introduced to develop a color, light, texture, and shape awareness. Most classes will be concerned with a still life set up in the classroom. There will be some experience with landscape on location.

ART 1201
Watercolor
Students learn from each other in a cooperative studio atmosphere. Students work with still life and occasionally from a live model. Each session concludes with a round table critique of student work. All levels of experience are welcome.

ART 1202
Projects in Painting
Problem solving is the core of painting at any level of proficiency. New students are assigned projects to match their needs and improve skills, focusing on value, color, composition, subject matter, and the creative process. Experienced students are encouraged to create their own projects and will be coached through the problem-solving process that their paintings dictate. Students benefit from the camaraderie and creative energy of a class environment designed to nurture the painting process at all levels. Students may work in any painting media.

ART 1203
Collage: The Elements of Art
Collage art offers a unique way to express yourself. Instruction is focused on the formal elements of art. Using various collage techniques, students improvise and experiment with the principles of design. Unity, variety, repetition and rhythm, balance, emphasis and color theory will be explained. A progression of projects will challenge and instruct students in this nourishing review of the building blocks of art making.

ART 1204
Painting: The Social Life of Colors
Explore the world of color. This class is for anyone interested in developing their understanding of color and individual artistic potential. Group exercises and individual instruction will guide students in the selection of art supplies, mixing of color, the application of paint, understanding color theory, developing visual awareness and energizing your creative process. Students may choose to work with oils or acrylics.

ART 1205
Painting with the Modern Masters
In this studio class, students put brush to canvas and paint using the techniques and styles of the masters of Impressionism, Fauvism, Cubism, Surrealism, and Expressionism. No prior painting experience is necessary, just a passion to paint and explore.

ART 1206
Portraiture: Me, Myself and You
Explore the world of color. This class is for anyone interested in developing their understanding of color and individual artistic potential. Group exercises and individual instruction will guide students in the selection of art supplies, mixing of color, the application of paint, understanding color theory, developing visual awareness and energizing your creative process. Students may choose to work with oils or acrylics.

ART 1207
Painting and Drawing the Portrait
Open to painting and drawing media, this studio class provides an opportunity to learn and practice the basics of painting and drawing the human head from a live model. A practical approach to portraiture, topics include: anatomy and structure, lighting, color selection, color mixing, and techniques that will opHTMize your ability to see and paint the human head in a convincing, expressive way.

ART 1208
Figure Drawing
This course addresses essential drawing principles and relates them to the human figure in pictorial space. Students will gain in-depth understanding of the body’s underlying anatomical structure and geometry. Students will address
New Bamboo Sculpture
Explore the fabrication of bamboo into satisfying works of art. Students prepare the raw materials—splitting, sizing, sanding and soaking the bamboo. Learn construction techniques such as weaving, pegging, gluing and binding. Make pieces suitable for wall hanging and freestanding works for an outdoor environment. The class is scheduled for the morning when the light and temperature are best in the inspiring setting of Spalding House.

ART 1220 (2)
Breakthrough Painting
This class is for the intermediate painter who wants to work in a lively studio workshop environment. The class will enhance your ability to see, think and paint with an emphasis on subject matter. Individual and group projects will be designed to encourage each person’s own style of painting. Group discussion in historical art movements and theory will be an added bonus. Oil or acrylic paints can be used for this class.

ART 1230 (2)
Watercolor II
An exploration in watercolor with emphasis on developing personal approaches and techniques primarily in landscape on location and in the studio. Still life, color studies, composition, memory painting, and sketching will also be covered. Watercolor I or its equivalent is required. There will be an introduction to figure sketching. Optional neighbor island painting experience on Kauai or the Big Island (trip price to be announced).

ART 1240 (2)
Painting Studio I
This class is for experienced painters who would like to set aside the HTMe to explore individual projects in a supportive, informally structured “open studio” environment. One-on-one coaching and group interaction will assist students in resolving problems and finding the confidence to generate their own aesthetic voice. All painting mediums are welcomed.

ART 1250 (2)
Introduction to Printmaking
A course designed to acquaint the student with basic techniques of printmaking and an understanding of their application in producing fi prints. Emphasis will be placed on the intaglio (etching) process. The student will have the opportunity to produce line etchings, aquatint, and soft ground etchings, and to deepen his or her appreciation of the art of printmaking.

ART 1251 (2)
Photo Printmaking
This class offers students the chance to explore photographic printmaking through a variety of methods. The methods covered will be Digital Photo Etching, Digital Photo Lithography, Cyanotype and Van Dyke Brown Alternative photo processes. Students will need to have access to a computer with Adobe Photoshop program on it.

ART 1255 (2)
Screen Printing: An Introduction
Students will be introduced to a variety of stencil making techniques, including cut-paper, drawing fluid resist and photomechanical emulsion. Screen-printing topics will also include strategies for registration, reductive editions, color layering and types of flocking (collage by screen-printing). Students will be invited to participate in an volume, movement, proportion, perspective, light notation and anatomy while drawing from a live model. Processes taught include gesture drawing, contour drawing and full value drawing.

ART 1209 (2)
Intaglio II
A studio experience for students familiar with basic intaglio technique. Students work independently with individualized guidance. Prerequisite: Intro to Intaglio or permission by instructor.

ART 1210 (2)
Painting I and II
Two classes in one! For the beginning student this course will provide a solid foundation in oil or acrylic painting in a simplified and painless way. A variety of methods and subject matter will be explored. Advanced students will be guided in the development of their artistic vision and personal expression.

ART 1211 (2)
Advanced Painting
This class is for students who wish to explore gesture as a means and an end to painting. Gesture, in this case will be thought of as direction or inclination and will require of students a strong sense of purpose. Any painting media and choice of content can be used. Emphasis will be given to the push and pull concept of the painting process. Class projects will be a collaboration of student and teacher with the student providing direction and the teacher guidance.

ART 1212 (2)
Color Flow: Watercolor Plus
Enjoy the flow and spontaneity of watercolor. Contrast the transparent, luminous color with highlights of other water media, including opaque gouache, watercolor crayon, pastel, and a bit of collage. All students, including beginners, are welcome who wish to explore the many possibilities of this versatile, joyful medium.

ART 1213 (2)
Painting the Head and Figure from Life
This class is for all artists interested in drawing and painting from the model in an unhurried, systematic fashion. Ideally suited for painters in oil, pastel, and drawing media, the heart of this class is the extended-length study, with both clothed and nude models. The class includes numerous demonstrations by the instructor as well as personal critiques and encouraging one-on-one dialogue.

ART 1214 (2)
Screen Printing
Using hand-drawn and photographic images, students learn to use a photomechanical technique to develop multiple-color screen prints. Students learn basic hand-printing techniques, multiple-layer registration, color application and theory. Most printing is on paper, but students are encouraged to experiment with textiles, wood, etc. Course culminates with a portfolio exchange.

ART 1215 (2)
Raku
Students work with hand-built and wheel-thrown stoneware as they learn about raku firing, glazing, resist application and more. Tools and safety are also covered, as well as other low-fire methods including “popcorn” and horsehair firing.

ART 1216 (2)
ART 1260  (2)
Printmaking II
A class that offers the opportunity for individuals who are familiar with basic intaglio techniques to pursue their own interests within those techniques and/or explore the possibilities of the calligraphy, monoprint, woodcut, etc. Admittance to the class is subject to the approval of the instructor. Individualized attention by the instructor will be offered as each student pursues the development of all aspects of his or her work.

ART 1270  (2)
The Painting Studio
This class is for all levels of painters who would like to set aside the HTMe to explore individual projects in a supportive, informally structured "open studio" environment. One-on-one coaching and group interaction will assist students in resolving problems and finding the confidence to generate their own aesthetic voice. All painting mediums are welcomed.

ART 1280  (2)
Papermaking
An exploration of the artistic potential of handmade paper using simple processes utilizing recyclable papers, cotton linens, and abaca pulps. Students will learn to make screens, prepare and color pulps, and make sheets of paper. Three dimensional and casting techniques will also be explored. Students will have an opportunity to develop a personal approach to papermaking projects and incorporate other media with handmade paper.

ART 1290  (2)
Studio Visits With the Masters
Explore the roots of the 20th century modern art in America by viewing rare historical videos on ground-breaking artists like Picasso, Duchamp, Pollock, and many more. Listening to these master speak about their own work and seeing them in action in their studios provides students with an inHTMe knowledge of art history that doesn't exist in text books or university lecture halls. At each session different artists will be highlighted. Lively discussion sessions will follow each video with selected bibliographies and handouts on key artists provided.

ART 1380  (2)
Abstract Painting or Drawing
A course that emphasizes on composition and working with primary colors. The first half of the course will be semi abstract with still life, landscape, self-portrait, portrait, and the human figure. The second half will concentrate on nonobjective, pop art, abstract expressionism, and minimal art. Students may work in oil, acrylic, or watercolor paint. Course includes art appreciation video.

ART 1400  (2)
Introduction to Intaglio
Students will become familiar with basic techniques of intaglio printmaking. Emphasis is placed on etching but students will have opportunity to work with aquatint and soft grounds. Beginners and repeat students are welcome.

ART 1410  (2)
Lithography
Instruction in the methods of recording an original image on lithographic stone or metal plate to create lithographic prints on paper in black and white. Advanced students will include color printing.

ART 1411  (2)
Lithography: The Art of Drawing & Painting on Stone
This course begins with an introduction to basic stone lithography, branching out later in the semester to include other print processes. The course will be structured with an emphasis on personal artistic development.

ART 1420  (2)
Basketry
A course that introduces the student to basic skills, techniques, and concepts in creating beautiful and functional baskets. Students will learn to use a variety of natural, manmade and local materials and incorporate a number of weaving techniques. Advanced students are also welcome.

ART 1425  (2)
Fiber Arts
Students will explore a wide variety of fiber art techniques including batik, fabric painting, felting, simple weaving on frame looms and papermaking. Emphasis will be on creative self-expression and exploring the possibilities of working with fiber and fabric.

ART 1431  (2)
Textile Design
Students will have the opportunity to learn the craft of textile design. The course includes an introduction to printing on fabric and creating drapery, dress fabric, or fabric panels for display. Students will have the sHTMeating adventure of working on original designs on paper and printing them on fabric. Course includes slide lectures and a trip to the Honolulu Academy of Arts to familiarize students with the background of textile design.

ART 1432  (2)
Weaving I and II
This session students will learn about Ripsmatta or what is now called Rep Weave, a warp-faced block design technique that produces a ridged fabric. Used mainly to make rugs, it can be adapted to make other items such as a table runner or bag. To help the first HTMe weaver, a simple sampler will be required. Students should bring measuring tape, scissors, notebook and pencil to class. Not all materials will be provided and students will need to purchase own yarns.

ART 1433  (1 to 3)
Shibori and Indigo Dyeing
This class will combine the classical techniques of tie-dye (shibori, bhandani, tritik, plangi) with the magical process of vat dyeing with indigo. The basics of both traditional and contemporary tie-dye will be covered. Students will be encouraged to apply these techniques to their own creative projects.

ART 1450  (2)
Smaller Than Your Head Art Object Art
Create small toy-like sculptures, work-intensive jewelry that you will never make money selling and other mystery forms. A variety of craft mediums such as wire, scalp, fake fur, celluclay and doll parts will be used. Since playing with your work is important, simple movements will be explored. Your mixed media amusements will open and close, spin around, and fall apart, not necessarily in that order. Creations include: a petting zoo, a mirror into the self, a six-inch bear rug (with claws and teeth). Share your
sculptures with your friends and watch them nod politely and slowly back away to the door. This course is suitable for anyone who has a sense of humor and small pliers.

**ART 1451**
*Collage I & II* (2)
The art of collage offers a unique alternative in self expression and composition through the application and deconstruction of visual surfaces. Using various collage techniques, students will experiment with elements of art, such as color, texture and shape in both formal and improvisational ways. The historical background of collage and various conservation methods will be discussed. In addition, selected guest artists will share their work and processes adding to the students' overall collage vocabulary.

**ART 1510**
*Origins of Modern Art in America* (2)
A unique way to explore modern art in America! Students will learn by viewing rare historical videos on groundbreaking artists like O'Keefe, Picasso, Duchamp, Pollock and more. Listening to these artists speak about their work and seeing them in action in their studios provides students with an in-depth knowledge of art history that doesn't exist in textbooks. Lively discussion sessions will follow each video with selected bibliographies and handouts on key artists provided.

**ART 1520**
*Pop Art to the Present* (2)
A unique way to explore contemporary art movements from 1960 to the present. Students will learn by viewing rare historical videos on groundbreaking artists like Andy Warhol, Robert Rauschenberg, Jasper Johns, Ray Johnson, Elizabeth Murray and more. The course will start with a video reviewing art from the first part of the 20th century. At each session a different artist will be examined. Lively discussions will follow each video with selected bibliographies and handouts on key artists provided.

**ART 1700**
*American Film Directors* (1)
Tired of all those mindless movies at the multiplexes? Try this refresher course in the classics, exploring the artistry and excellence of great film directors throughout cinema history. D.W. Griffith, Howard Hawks, John Ford, Billy Wilder and Charlie Chaplin are among the innovators whose work continues to inspire filmmakers to this day. This course will explore their remarkable achievements through clips, discussions and exclusive screenings of key films.

**ART 1701**
*Rediscovering French Film 2* (1)

**ARTH – Art History**

**ARTH 1001**
*Arts of Oceania* (3)
The arts and architecture of the indigenous peoples of the Pacific rim and center. The course covers the aesthetic traditions of diverse peoples and non-European civilizations whose cultures inhabit the Pacific Ocean. Hawaiian culture and arts are interpreted within this context. The primary discipline of the course is Art History, however, Anthropology, Archeology, Geography and Colonial history are integral to the course.

**ARTH 2000**
*The Art of Asia* (3)
The artistic traditions of India, China, and Japan from earliest HTMes to the present. Emphasis is upon indigenous aesthetics as well as historical interrelationships.

**ARTH 2100**
*Tribal Arts* (3)
The indigenous art and architecture of sub-Saharan Africa, Native America, and the Pacific are examined.

**ARTH 2200**
*Foundations of Western Art* (3)
An examination of Western art from its beginnings in Paleolithic Europe, through the ancient Mediterranean era, to the European Renaissance.

**ARTH 2301**
*Topics in World Art History* (3)
An examination of the artistic traditions of the world from earliest HTMes to the present. The central theme will alternate each semester among the following: I: Arts of Asia, II: Tribal Arts, III: Foundations of Western Art. Course is repeatable for credit if the topic is different.

**ARTH 3206**
*Renaissance to Modern Art* (3)
The art and architecture of Europe and America from the Renaissance to modern HTMes. The course explores values, ideas, and propaganda as expressed in art. 
*Prerequisite: Any WCIL II course.*

**ARTH 3301**
*Art of China* (3)
The art of China from the Neolithic to the Qing Dynasty. Major trends and folk arts are discussed. 
*Prerequisite: Any WCIL II course.*

**ARTH 3321**
*Art of Japan* (3)
The art of Japan from earliest HTMes to the nineteenth century. Painting, sculpture, and architecture in light of indigenous ideas and foreign contacts are examined. 
*Prerequisite: Any WCIL II course.*

**ARTH 3351**
*Art of India and South East Asia* (3)
The history of the spread of Indian art and its transformation in the cultures of Southeast Asia. 
*Prerequisite: Any WCIL II course.*

**ARTH 3355**
*Art of the Pacific* (3)
The art and architecture of Indonesia, Melanesia, Micronesia, and Polynesia in its pre-Euroean context. 
*Prerequisite: Any WCIL II course.*

**ARTH 3552**
*Art of Polynesia* (3)
The art and architectural tradition of cultures within the Polynesian triangle. 
*Prerequisite: Any WCIL II course.*

**ARTH 3556**
*Art of Hawai‘i* (3)
The art of Hawai‘i from its possible origins to the arrival of Christianity is examined. The course includes sculpture, architecture, temple structures, petroglyphs, feather works, and bark cloth. 
*Prerequisite: Any WCIL II course.*
ARTH 3611 (3)
Art and the Human Body
An overview of how societies and cultures around the world have related to the form of the human body. The course surveys ideal body types and concepts of deformity as depicted in art. Body art is examined including tattooing, scarification, surgical procedures, body painting, and the use of jewelry and textiles. The course also covers how medical treatment has been the subject of art and how art has been used to heal or harm the human body.
Prerequisite: Any WCIL II course.

ARTH 6011 (3)
World Art History
This course will cover broad themes in the cultures of the West, Asia, the Tribal world and Pre-Columbian civilizations. It will explore how different cultures conceptualized artistic problems and esthetic solutions according to their own standards and those imposed upon them by history and circumstances. The class will combine class topical presentations by the instructor, and students, reviews and critiques based upon the reading list and a research paper.
Prerequisite: Graduate standing.

ARTH 6601 (3)
Seminar: Artists and Images of War
A seminar that discusses how war has been portrayed by artists from earliest HTMs until the present day. Some of the themes that may be included are war as depicted in public art, war as shown by soldier-artists (and photographers), the power of military images, and art for war memorials.
Prerequisite: Graduate standing.

ARTS – Arts

ARTS 1000 (3)
Introduction to Visual Arts
An introductory visual arts course covering elements of art, principles or design, and the creative process. Major historical movements in art are covered as well as student expressions in various visual media and forms. Lectures and studio demonstrations.

ARTS 1003 (3)
Sustainable Art & Design
An introductory visual arts course that covers sustainability as it relates to art and design. Artists and designers who consciously implement sustainability practices will be explored, with an attention to historical context and larger cultural meaning. Students also complete basic studio art projects and group projects that relate to sustainability. Lectures and studio demonstrations.

ARTS 2010 (3)
Beginning Drawing
This course is an introduction to basic drawing techniques. Students will use various media to create form-space relationships through contour line, value, shape, perspective and composition. Emphasis is on developing confidence in observational drawing skills and visual problem solving.

ARTS 2020 (3)
Intermediate Drawing
A course designed to allow the serious student to further develop their drawing skills as an artist and to begin to develop their work more independently. Projects will have an emphasis on expressiveness and originality, using various drawing materials and explorations of color.

Prerequisite: ARTS 2010.

ARTS 2150 (3)
Introduction to Design
Introduction to Design is a broad, introductory visual arts course that covers elements of design as it relates to your daily life and to art in general. Major historical movements in design will be covered and major designers will be introduced through an examination of 2D design (graphic design), interiors (product design, furniture design, and interior design), and exteriors (architecture). Students will be exposed to the practice of design through guided projects in basic two-dimensional design and color that emphasize concepts presented in class. Lectures and studio demonstrations.

ARTS 3010 (3)
Introduction to Sculpture
This course is an introduction to cultural three-dimensional techniques as well as an introduction to the theory and practice of sculpture. Students will explore a variety of media, techniques, and concepts.
Prerequisite: Any ARTS or ARTH course.

ARTS 3020 (3)
Introduction to Painting
This course introduces basic painting techniques and provides an introduction to the theory and practice of painting. Students will explore a variety of media, techniques, and concepts that pertain to painting.
Prerequisite: Any ARTS or ARTH course.

ARTS 3051 (3)
Photography
This course introduces the student to the principles and techniques of photography. It includes an understanding of how cameras work, the history of photography, ethics of photography, photojournalism, and specialized photographic applications. Students must have an adjustable digital camera. Printing and photo editing will be introduced utilizing the latest versions of Photoshop.
Prerequisite: y WCIL II course.

ARTS 4901 (3)
Advanced Studio Projects
This course covers advanced projects in sculpture, drawing, painting, or photography. Students will participate in advanced interdisciplinary critiques, read contemporary critical theory in the visual arts, and do presentations about their work and the work of other relevant artists. Students will also complete a capstone project that will involve an exhibition on the HPU campus.
Prerequisite: Graduate standing.

AS – Aerospace Science

AS 3510 (3)
Air Force Leadership Studies I
Integrated management course emphasizing the military officer as a manager in the Air Force, including individual motivational and behavioral processes, leadership, communication and group dynamics. A-F only.

AS 3520 (3)
Air Force Leadership Studies II
Continuation of AS 3510. A-F only.
Prerequisite: Must have completed AS 3510
AS 4010 (3)
National Security Affairs I
Study of the national security process, regional studies, advanced leadership, ethics, and Air Force doctrine. Special focus placed on preparation for active duty and current issues affecting professionalism. A-F only
Prerequisite: AS 3520 or consent. (Fall Only)

AS 4020 (3)
National Security Affairs II
Continuation of AS 4010. A-F only
Prerequisite: AS 4010 or consent

ASIA – Asian Studies

ASIA 3950 (3)
Asian and Pacific Studies Practicum
This course is an individual project which is geared around the idea of personal application of ideas and skills learned in the Asian Studies Program to practical situations and analysis. Capstone course.
Prerequisite: Any WCIL II course and Junior or Senior standing

ASIA 4900 (3)
Asian and Pacific Studies Seminar
This course is the capstone course in Asian Studies. It seeks to give students an understanding of key issues in the discipline, and to encourage students to reflect on the larger intellectual contexts that frame their own particular interests within the field. Capstone course.
Prerequisite: Any WCIL II course and Junior or Senior standing

BIOL – Biology

BIOL 0900 (3)
A course intended to prepare selected nursing and pre-medical studies majors for BIOL 2030 (Human Anatomy and Physiology) and BIOL 2050 (General Biology). It imparts a general knowledge of the fundamentals of chemistry and biology, as needed by students entering these three lower-division courses.

BIOL 1000 (3)
Introductory Biology
An introductory survey of the major areas of the biological sciences designed to equip students with information enabling them to make rational, informed decisions about biologically relevant issues. The course includes topics such as cell structure and function, metabolism, mitosis and meiosis, protein synthesis, evolution, animal diversity, anatomy and physiology, ecology, and conservation biology.

BIOL 1200 (3)
Human Biology
Human Biology is a survey course for non-science majors covering topics such as the scientific method, human evolution, hierarchical anatomical structures (atoms to organs), and the normal physiology of organ systems in humans. Although an emphasis is placed on students' understanding of the non-discussed systems, topics such as AIDS, Cancer, use of supplements, and other environmental impacts are introduced.
Prerequisite: Undergraduate standing.

BIOL 1300 (3)
Nutrition: Eat Smarter
This course is an introduction to nutrition and its relationship to health. Macronutrients are categorized by their function in the body (tissue guardians, antioxidants, energy generators, essential electrolytes, mineral power plants, blood fortifiers, bone builders). To personalize these concepts, students conduct an assessment of their own eating habits. Students evaluate sources of nutrition information, conflicting opinions and motives, and develop their own value system as a foundation for studying ethical and moral issues concerning food and nutrition.

BIOL 1500 (3)
Conservation Biology
An introductory undergraduate course designed to introduce students to the biological sciences. The course will emphasize the nature of biodiversity, the growing threats to biodiversity, and ecologically sound conservation and resource management practices designed to slow its loss.

BIOL 2010 (3)
The Human Life Cycle
An introduction to the biochemical and hormonal control of human growth and reproduction.

BIOL 2030 (3)
Anatomy and Physiology I
The first semester of a comprehensive introduction to the structure and function of the human body. The course includes topics such as gross body organization and related terminology, review of cell structure and function, anatomy and physiology of the integumentary, muscoskeleton, nervous, and endocrine systems from the molecular level in cells to the integrated working of the human body.
Prerequisite: Any WCIL I course MATH 1115 or higher except MATH 1123.

BIOL 2031 (1)
Anatomy and Physiology I Laboratory
Laboratory component of BIOL 2030.
Prerequisite: BIOL 2030 or concurrent.

BIOL 2032 (3)
Anatomy and Physiology II
A continuation of BIOL 2030. The course includes topics such as the circulatory and immune systems, respiration, body fluid balance, urinary system, reproduction and inheritance, and human development.
Prerequisite: BIOL 2030.

BIOL 2033 (1)
Anatomy and Physiology II Laboratory
Laboratory component of BIOL 2032.
Prerequisite: A grade of C or better in BIOL 2031; BIOL 2032 or concurrent.

BIOL 2040 (3)
Microbes and Human Health
A survey of the biology of microbes and their effects on human health designed to give health professionals an appreciation of the importance of microbes in our world as well as concepts of how to promote healthy microbial interactions and inhibit those that may lead to disease.
Prerequisite: BIOL 1000 or CHEM 1000

BIOL 2050 (4)
General Biology I
The first semester of a rigorous introduction to modern biology for students intending to major in the natural sciences.
The course includes topics related to biological structure and function, from the molecular level in cells to the integrated workings of organisms. Darwinian evolution is emphasized as a unifying theme in biology.

Prerequisite: A grade of C or better in MATH 1130 or higher (or a math SAT of at least 550 or a math ACT of 24 or greater); A grade of C or better in Any WCIL I course (or a verbal SAT of 510 or an English ACT of 21 or greater).

BIOL 2051
General Biology I Laboratory
Laboratory component of BIOL 2050.
Prerequisite: BIOL 2050 or concurrent.

BIOL 2052
General Biology II
A continuation of BIOL 2050. The course includes mechanisms of heredity and biological evolution, the history of life in all its major forms, and the ecological contexts and constraints of its existence.
Prerequisite: A grade of C- or better in BIOL 2050.

BIOL 2053
General Biology II Laboratory
Laboratory component of BIOL 2052.
Prerequisite: A grade of C or better in BIOL 2051; BIOL 2052 or concurrent.

BIOL 2170
Ethnobotany: People and Plants
An introduction to the history of human use of plants as food, medicine and materials, with emphasis on examples from the Hawaiian Islands. Patterns of cultural interchange promoting the collection and spread of knowledge of plants and their cultivation and use will be examined, as well as prospects for future discoveries from ethnobotanical study of different cultures.
Prerequisite: WRI 1100.

BIOL 3010
Hawaiian Natural History
The unique biota in marine, freshwater, and terrestrial habitats of the Hawaiian Islands: evolutionary history, ecology, and human impacts on Hawaiian ecosystems are focuses.
Prerequisite: BIOL 2052; Any WCIL II course.

BIOL 3012
Hawaiian Natural History Field Studies
This field course surveys the geology, climate and ecology of the island of O’ahu and explores the approaches for the integrated management of its terrestrial, freshwater and marine habitats. The course is structured around the ahupua’a concept, the traditional land divisions used for the integrated management of natural resources from mountain tops to coral reefs. Class activities integrate lectures, guest presentations by resource managers, and field trips to diverse native habitats. The pre-requisite for this class is general knowledge of evolutionary biology and ecology.
Prerequisite: BIOL 2052 or equivalent.

BIOL 3020
Plant Biology
The evolution, comparative anatomy, physiology, and life cycles of members of the plant kingdom from algae to flowering plants.
Prerequisite: BIOL 2052; Any WCIL II course.

BIOL 3021
Plant Biology Laboratory
Laboratory component of BIOL 3020.
Prerequisite: A grade of C- or better in any WCIL II course; BIOL 2053, 3020 or concurrent.

BIOL 3025
Algal Biology & Diversity Laboratory
This course will accompany BIOL 4024 (Algal Biology and Diversity) to teach students how to identify local species of marine algae in the laboratory and, when possible, in the field. Students will also begin preparing their own herbarium of local marine seaweeds, and will conduct laboratory experiments using local marine phytoplankton and seaweeds. Emphasis will be placed on the major groups of algae found in Hawaiian waters.
Prerequisite: BIOL 3024.

BIOL 3030
Comparative Animal Physiology
Vertebrate and invertebrate mechanisms regarding gas exchange, food and energy metabolism, temperature, salt, water, and nitrogen regulation, bodily coordination, integration and information processing; adaptation to environment is emphasized.
Prerequisite: A grade of C- or better in any WCIL II course; BIOL 2052 and CHEM 2052.

BIOL 3031
Comparative Animal Physiology Laboratory
Laboratory component of BIOL 3030.
Prerequisite: A grade of C- or better in any WCIL II course; BIOL 2053, 3030 or concurrent; and CHEM 2053.

BIOL 3034
Human Physiology
A course designed to help students understand the major functional systems of the human body. Topics include: organ systems, biochemical interactions of cells and tissues, hormonal control, fluid dynamics and osmotic regulation, development, homeostasis, and pathology. Consideration is given to both classic and recent physiological research.
Prerequisite: A grade of C- or better in any WCIL II course; BIOL 2052; CHEM 2052 or concurrent.

BIOL 3035
Human Physiology Laboratory
The Human Physiology Laboratory course complements BIOL 3034 lecture. The course helps students apply their knowledge by carrying out experiments in basic cellular functions (e.g., osmosis/diffusion), electrophysiology, sensory system physiology, reflexes, muscle physiology, cardiovascular physiology, respiratory physiology, metabolism, endocrinology, reproduction, and embryology.
Prerequisite: BIOL 2052 or and BIOL 3034 or concurrent.* (* must have a grade of C or higher).

BIOL 3036
Human Anatomy
Human Anatomy is an advanced introduction to basic gross anatomy from both a systems and regional approach. Topics include medical imaging and some common pathological conditions. This course complements BIOL 3034 Human Physiology.
Prerequisite: A grade of C or better in BIOL 2052.

BIOL 3037
Human Anatomy Laboratory
The Human Anatomy Laboratory course complements BIOL 3036 lecture. This course will enhance students...
learning and understanding of human anatomy by providing
hands-on exercises and activities to explore human anatomy. The course will cover both gross anatomy and histology and utilize various learning tools including microscopy and dissection.

**Prerequisite:** BIOL 2053; recommend BIOL 3036 be taken concurrently.

**BIOL 3040**  
**General Microbiology**  
An introduction to the structure and function of microorganisms including genetics, metabolism, and comparative studies of prokaryotic and eukaryotic organisms; emphasis is on organisms of clinical significance.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; A grade of C- or better in BIOL 2030 or 2052.

**BIOL 3041**  
**General Microbiology Laboratory**  
Laboratory component of BIOL 3040.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2033 or 2053; BIOL 3040 or concurrent.

**BIOL 3050**  
**Genetics**  
Classical genetics in light of modern advances in molecular biology, including identification and structure of genetic material, its arrangement and transmission, and the molecular studies of genes.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2052 and CHEM 2052.

**BIOL 3054**  
**Evolutionary Genetics**  
Current theories of the genetic basis of evolution, emphasizing evolution at the molecular level, adapting a phylogenetic approach for prokaryotic and eukaryotic organisms.  
**Prerequisite:** BIOL 2052 and CHEM 2052; Any WCIL II course.

**BIOL 3060**  
**Marine Invertebrate Zoology**  
An evolutionary perspective emphasizing functional morphology and life histories of marine, freshwater, and terrestrial invertebrates.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2052.

**BIOL 3061**  
**Marine Invertebrate Zoology Laboratory**  
Laboratory component of BIOL 3060.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2053; 3060 or concurrent.

**BIOL 3070**  
**Marine Vertebrate Zoology**  
An examination of the diversity, evolution, comparative morphology, and physiology of fishes. The course surveys marine reptiles, birds, and mammals.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2052.

**BIOL 3071**  
**Marine Vertebrate Zoology Laboratory**  
Laboratory component of BIOL 3070.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2053; 3070 or concurrent.

**BIOL 3080**  
**Ecology**  
A study of the adaptive structure and function at the individual, population, community, and ecosystem levels; theoretical and experimental studies pertaining to the distribution and abundance of marine, freshwater, and terrestrial organisms.  
**Prerequisite:** BIOL 2052 and CHEM 2052; Any WCIL II course.

**BIOL 3081**  
**Ecology Laboratory**  
Laboratory component of BIOL 3080. Includes introduction to, and analysis of, ecological journal articles.  
**Prerequisite:** BIOL 2053, 3080 or concurrent; CHEM 2053; MATH 1123 or 3323; Any WCIL II course.

**BIOL 3170**  
**Cell and Molecular Biology**  
Principles governing metabolism, reproduction, genetics, and other aspects of biological activity at the cellular level in both prokaryotic and eukaryotic organisms.  
**Prerequisite:** BIOL 2052 and CHEM 2052; Any WCIL II course.

**BIOL 3171**  
**Cell and Molecular Biology Laboratory**  
Laboratory component of BIOL 3170.  
**Prerequisite:** A grade of C- or higher in any WCIL II course; BIOL 2053, BIOL 3170 or concurrent; CHEM 2053.

**BIOL 3090**  
**Biometry**  
AThis course is designed to provide an introduction to experimental design, hypothesis testing, analysis of data and data presentation. Topics covered include ANOVA, regression and correlation analysis, experimental design, power analysis, and multivariate analysis. Instruction on statistical methods and theories will be enhanced by conducting analyses using SPSS software and examples drawn from the biological sciences.  
**Prerequisite:** Any WCIL II course.  
**Junior standing.**

**BIOL 3930**  
**Nutrition and Society**  
A seminar course investigating current philosophical, societal, and scientific issues in the field of nutrition. Topics include the role of nutrition in holistic health and preventive medicine, food and behavior, world hunger, eating disorders, nutrition and fitness, nutritional fads and fallacies, ethics in food manufacturing and advertising, food additives, pesticide residues, and changing nutritional needs during the human life cycle.  
**Prerequisite:** Any WCIL II course.  
**Junior standing.**

**BIOL 3990**  
**Nonpaid Internship**  
(1 to 3)

**BIOL 3991**  
**Biology Internship**  
(1 to 3)

**BIOL 4020**  
**Cancer Biology**  
Cancer Biology considers perspectives in population epidemiology cell growth pattern/rates, carcinogens, and molecular interactions in a number of the more prevalent
cancers within the last 20 years. This course will provide beneficial background information to students considering graduate cancer research or for students considering a career in medicine.

**Prerequisite:** BION 2052* and CHEM 3032*. (* must have a grade of C or higher).

**BION 4024**
Algal Biology and Diversity
This course will provide students with a basic understanding of algal biology, classification and evolutionary history as well as current information on the role of algae in marine ecosystems, global climate and human health. Emphasis will be placed on the major groups of algae found in Hawaiian waters.

**Prerequisite:** BION 2052 and any 3000 level course in BION, CHEM, ENVS, GEOL or MARS; or consent of instructor.

**BION 4040**
Environmental Microbiology
General microbiological principles emphasizing the nature of the microbial world, microbial metabolism, and energetics, microbial diversity, population interactions, human interactions. Emphasis is on the importance of micro-organisms in the biosphere.

**Prerequisite:** BION 2052 and CHEM 2052; Any WCIL II course.

**BION 4041**
Environmental Microbiology Laboratory
Laboratory component of BION 4040.

**Prerequisite:** A grade of C- or higher in any WCIL II course; BION 2053, 4040 or concurrent; CHEM 2053.

**BION 4050**
Developmental Biology
Developmental Biology is the study of early eukaryotic development of multi-cellular organisms, from fertilization to the development of primordial organ systems. The course will introduce students to several biological models currently used in laboratory research settings.

**Prerequisite:** A grade of C+ or better in BION 2050.

**BION 4090**
Biometry
Prerequisite: A grade of C- or higher in any WCIL II course; BION 2052; MATH 1123, 3323, or SOC 3200.

**BION 4210**
Neuroscience
Examination of the organization and function of the nervous system at molecular, cellular and systemic levels.

**Prerequisite:** BION 3170

**BION 4220**
Immunology
An examination of immune system organization and function at molecular, cellular and systemic levels. Evolution and development of individual immunity, the role of the immune system in defense and disease, immune system dysfunction, and immunotherapeutic approaches to cancer and other diseases are among the topics that will be addressed.

**Prerequisite:** BION 3170

**BION 4940**
Biology Seminar
A critical analysis of recent biological literature. Includes formal seminars, informal group discussions, a comprehensive review article, and research project proposal.

**Capstone course.**

**Prerequisite:** A grade of C- or higher in any WCIL II course; BION 2052. Senior standing.

**BION 4950**
Biology Practicum
Senior practicum opportunity for students interested in working on special topics in biology under the direction of the biology faculty.

**BION 6090**
Advanced Biometry
Biometry II begins with a review of univariate inferential statistics and introduces multivariate methods including multivariate analysis of variance, principle components analysis, multidimensional scaling, and cluster analysis. Graphical and tabular presentation of results and will be covered and students will analyze case studies provided by HPU graduate mentors. Analysis methods will be taught in the context of experimental design and hypothesis testing.

**Prerequisite:** BION 4090. Graduate standing.

**BION 6120**
Ichthyology
Ichthyology is the study of fish biology. This course will cover areas of systematics, evolution, anatomy, physiology, behavior, ecology, biogeography, and conservation of fishes. This course will emphasize the incredible diversity of fishes and comparative study of adaptations in relation to the environment, focusing on the marine habitat.

**Prerequisite:** BION 2052. Graduate standing.

**BION 6170**
Larval Biology
Biology of embryos, larvae and juveniles of marine animals including freshwater species with marine larvae. Topics include life history differences, evolutionary transitions between developmental modes, parental investment, and dispersal, feeding and settlement mechanisms. Methods of sampling, identification, culture and experimental study of common invertebrate and fish larvae will be emphasized.

**Prerequisite:** BION 2052.

**BR – Bridge**

**BR 1000**
International Education
This course develops an awareness of select issues in international education. Students will examine issues such as Pilgrim and Standard English usage in schools in Hawai‘i, single-sex schooling in the U.S. and the role of sport in higher education. The course also examines similarities and differences in educational values in the U.S. and other countries. Coursework emphasizes the development of critical thinking and visual literacy skills, along with academic reading, writing, and vocabulary development.

**BR 1010**
Global Issues
This course develops an awareness of selected concepts that underscore contemporary issues of global concern. In this project-based course, students examine topics, careers, people, history, and geographical regions pertaining to chosen themes. Students are required to be informed about current world news stories through following many national and international news sources. Students also undertake a modest research project based on secondary sources, writing their findings in a short paper using APA documentation.
BR 1020 (3) Cultural Studies
BR 1020 develops awareness of selected concepts, which are used to interpret cultures and cultural practices. Students examine cultural practices in the contest of a changing, globalizing world as a means of reflecting on their own values and customs. Reflections are stimulated and supported by readings and novels, which address facets of selected cultures and individuals in transition. Students share their insights in discussions, field notes, journal writing, mul-HTMedia presentations, and an interactive poster session.

BR 1030 (3 ea) Sustainability and Local Action
This course develops an awareness of selected issues that influence the modern need for movement toward sustainability. Students examines how changes in one area can impact seemingly distant or unrelated areas, using the Hawaiian Islands as a model for this concept of interconnectedness. Students also consider the personal choices they face with respect to sustainability, both as individuals and as members of larger communities.

BUS – Business

BUS 1000 (3) Introduction to Business
An introduction to the managerial process and the functioning of business. This course integrates findings of the behavioral sciences with classical, quantitative systems, and other approaches to business. Prerequisite: Any WCIL I course.

BUS 1040 (3 ea) International Travel and Tourism
This course is designed to introduce students to the tourism and hospitality industry by examining the infrastructure, service and marketing in these industries. The course focuses on the interdependence of hotel/resorts, food and beverage establishments, attractions, casinos, meetings and conventions. Examples from Hawai’i and international destinations are used in class.

BUS 1041, 1042, 1043 (1 ea) International Travel and Tourism
The BUS 1040 series of course modules is designed to introduce International Bridge Program students to the tourism and hospitality industry by examining the infrastructure, service and marketing in these industries. Coursework focuses on the interdependence of hotel/resorts, food and beverage establishments, attractions, casino, meetings and conventions. Examples from Hawai’i and international destinations are used in class.

BUS 1050 (3 ea) Business in Global Markets
This course is an introductory course in modern business. Emphasis is placed on basic business terms, concepts, principles, practices, organization structures, and functions of business. Class discussions focus on examples from Hawai’i and around the world.

BUS 1051, 1052, 1053 (1) Business in Global Markets
The BUS 1050 series of modules is an introductory course in modern business. Emphasis is placed on basic business terms, concepts, principles, practices, organization structures, and functions of business. Class discussions focus on examples from Hawai’i and around the world.

BUS 5000 (3) Introduction to Economics and Statistical Analysis
The course uses theory and real world cases to examine the concepts of demand; pricing; the firm; market theory; interaction between markets; and the impact of government policy on macroeconomics outcomes. The students will also learn basic spreadsheet modeling, data analysis techniques, and statistical inference. Prerequisite: Graduate standing.

BUS 5100 (3) Introduction to Accounting and Finance
This course is an introduction to accounting and finance fundamentals, financial statements analysis and cash flows, interest rate concepts and the HTM value of money, financial markets and market efficiency, cost of capital and financial structure. Prerequisite: Graduate standing.

BUS 5200 (3) Introduction to Management and Marketing
A general introduction to managerial process, business functions, fundamental marketing principles and policies. The first half of the course will focus on marketing functions and integration of marketing with other activities of the business enterprise. In the second part the focus will be on management activities. Prerequisite: Graduate standing.

CHEM – Chemistry

CHEM 1000 (3) Introductory Chemistry
An introductory survey of chemistry designed to equip students with information that will enable them to make rational, informed decisions about chemically relevant issues. Includes fundamental chemical principles as well as applications of chemical knowledge and the interactions between chemistry and society. Prerequisite: A grade of C- or higher in MATH 1101; or placement into MATH 1105; or minimum Math scores ACT 21 or SAT 480; or passed MATH 0990.

CHEM 1020 (3) Introduction to Chemistry and the Environment
A one-semester introduction to chemistry for students with a major or minor in environmental studies. The course will stress basic chemistry with applications that relate to the environment and set chemistry in its political, economic, social, and ethical context.

CHEM 1021 (1) Introduction to Chemistry and the Environment Laboratory
Laboratory component of CHEM 1020. This course will introduce and develop principles of quantitative and qualitative techniques and safety awareness and appropriate safety precautions. Laboratory experiments will be related to material covered in lecture and/or experimental techniques that are valuable tools for chemists. Prerequisite: CHEM 1020 or concurrent. Corequisite: CHEM 1020.

CHEM 2030 (3) Introduction to Organic Chemistry and Biochemistry
A basic introduction to organic chemical groups such as alkanes, alkenes, aromatic compounds, esters, acids, amines, and alcohols; molecules of special importance in the
body such as carbohydrates, lipids, proteins, and enzymes. Prerequisite: CHEM 1000 or CHEM 2052.

CHEM 2050
General Chemistry I
The first semester of a rigorous introduction to chemistry for students intending to major in the natural sciences. Includes topics related to the atomic-molecular basis of matter, the relationship of chemical reactions to the periodic table, states of matter, solution chemistry, acids and bases, and stoichiometry. Prerequisite: A grade of C or better in any WCIL I course. A grade of C or better in MATH 1130 or higher (or a math SAT of at least 550 or a math ACT of 24 or greater).

CHEM 2051
General Chemistry I Laboratory
Laboratory component of CHEM 2050. Prerequisite: CHEM 2050 or concurrent.

CHEM 2052
General Chemistry II
A continuation of CHEM 2050. Includes chemical equilibrium, thermodynamics, electrochemistry, nuclear chemistry, coordination compounds, and the comparative chemistry of major groups of elements in the periodic table. Prerequisite: CHEM 2050.

CHEM 2053
General Chemistry II Laboratory
Laboratory component of CHEM 2052. Prerequisite: CHEM 2051 or CHEM 2052 or concurrent. (* must have a grade of C or higher).

CHEM 3010
Fundamental Organic Chemistry
A one-semester course in Organic Chemistry for students majoring in natural sciences. The course stresses nomenclature, structure, reactions, and basic syntheses within the common families of organic compounds. Prerequisite: CHEM 2052; Any WCIL II course.

CHEM 3020
Physical Chemistry
Physical and mathematical principles of chemistry. Topics include the first and second laws of thermodynamics, free energy, phase equilibrium and chemical equilibrium. Prerequisite: CHEM 2052; PHYS 2032 or PHYS 2052; MATH 2214 or higher except.

CHEM 3022
Physical Chemistry II

CHEM 3023
Physical Chemistry Laboratory
Laboratory component of Physical Chemistry. Exercises are designed to reinforce concepts learned in CHEM 3020 and 3022, ranging over topics from classical thermodynamics, kinetics, and molecular spectroscopy. Prerequisite: CHEM 3020; CHEM 3022 or concurrent.

CHEM 3030
Organic Chemistry I
This is the first of a two-semester course on the chemistry of carbon-containing compounds. Organic molecules are the functional components of living organisms, the food we eat, the drugs we take, the clothes we wear, the fuels we burn, and most of the products in our lives. Students learn the basic language and tools for describing organic compounds and their reactions, including curved arrows, resonance, reaction schemes, energy diagrams, and structural drawings. Topics include bonding theories, acid-base chemistry, stereochemistry, and the nomenclature, structure, and reactivity of alkanes, alkenes, alkyenes, and alkyl halides. Students also learn the theory, processing and interpretation of magnetic resonance spectroscopy. Prerequisite: CHEM 2052; Any WCIL II course.

CHEM 3031
Organic Chemistry I Laboratory
Laboratory component of CHEM 3030. By applying concepts from the lecture course, students learn to synthesize, purify, analyze, and model organic compounds. Reactions include substitutions, eliminations, and additions. Analysis techniques include thin layer and gas chromatography, ultraviolet and infrared spectroscopy, mass spectrometry, and magnetic resonance spectroscopy. These techniques are used to test hypotheses relating to reaction mechanisms, purity, solubility, and biological activities. Prerequisite: A grade of C- or higher in any WCIL II course; CHEM 2053; 3030 or concurrent.

CHEM 3032
Organic Chemistry II
Continuation of CHEM 3030. Building on basic skills and concepts from the first semester, students learn the nomenclature, structure, and reactivity of alcohols, ethers, epoxides, conjugated alkenes, aromatic compounds, aldehydes, ketones, carboxylic acids, esters, amides, acid halides, and amines. Emphasis is given to reaction mechanisms, three-dimensional aspects of organic reactions, and multi-step syntheses of organic molecules. Students also learn the theory and interpretation of mass spectrometry and infrared spectroscopy, while expanding their knowledge of magnetic resonance spectroscopy. Students learn to integrate this data to determine the structures of organic compounds. Prerequisite: CHEM 3030.

CHEM 3033
Organic Chemistry II Laboratory
Laboratory component of CHEM 3032. Prerequisite: CHEM 3031, 3032 or concurrent.

CHEM 3040
Quantitative Analysis
Theoretical principles of techniques used in the separation and analysis of chemical substances. The course includes gravimetric, volumetric, spectrophotometric, electroanalytical, and ion-exchange methods. Prerequisite: CHEM 2052; Any WCIL II course.

CHEM 3041
Quantitative Analysis Lab
Laboratory component of CHEM 3040. Prerequisite: A grade of C- or higher in any WCIL II course;
CHEM 2053: 3040 or concurrent.

CHEM 3042 (3)
Instrumental Analysis
Lecture course on the use of instrumentation in chemical analysis. Chemical separation techniques covered include gas, liquid, thin layer, supercritical fluid, and size exclusion chromatography and electrophoresis. Spectrochemical techniques include ultraviolet-visible light and infrared absorption, fluorimetry, atomic absorption, and nuclear magnetic resonance. Additional methods include potentiometry, elemental analysis, and mass spectrometry.
Prerequisite: CHEM 3041.

CHEM 3043 (1)
Instrumental Analysis Laboratory
This course involves the laboratory use of instrumentation in chemical analysis, and interpretation and analysis of resulting data. Topics to be covered include various forms of chromatography including high performance liquid gas, thin layer, size exclusion, and chiral-selective chromatography. Other topics include spectroscopic techniques, such as infrared and ultraviolet-visible absorption spectroscopy, fluorimetry, and other techniques such as inclusion potentiometry and mass spectrometry.
Prerequisite: CHEM 3041.

CHEM 3050 (3)
Environmental Chemistry
Basic and applied chemistry of the lithosphere, hydrosphere, and atmosphere, with emphasis on natural and global biogeochemical cycles and perturbations caused by human activities.
Prerequisite: A grade of C- or higher in any WCIL II course; CHEM 2052.

CHEM 3054 (3)
Aquatic Chemistry
Applications of chemical principles to describe processes controlling the composition of natural water systems.
Prerequisite: CHEM 2052; CSCI 1011; MATH 2214 or higher except MATH 2326 or 3301; Any WCIL II course.

CHEM 3060 (3)
Inorganic Chemistry
The chemistry of non-carbon based compounds. Topics include atomic structure, periodic chemical and physical trends, covalent compounds, ionic compounds, thermodynamics, hydrogen bonding, acids and bases, organometallic compounds and coordination compounds.
Prerequisite: CHEM 3032.

CHEM 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

CHEM 3991 (1 to 3)
Paid Internship
See Internship Section.

CHEM 4020 (3)
Advanced Organic Chemistry
This course will focus on modern organic synthesis strategies and methodologies, with a strong emphasis on mechanistic understanding of these reactions. Topics include advanced reactions and general synthesis strategies that are currently used in fields such as medicinal chemistry, biotechnology, materials science, agricultural science, food science and alternative fuels. Synthesis of natural products, traditionally one of the most important and challenging areas in organic chemistry, will be emphasized, with examples drawn from current primary literature.
Prerequisite: CHEM 3032.

CHEM 4030 (3)
Biochemistry I
Structure of biochemical macromolecules and their components. Emphasis is on cellular metabolism and energy transformations.
Prerequisite: CHEM 3032.

CHEM 4031 (1 to 2)
Biochemistry I Laboratory
Laboratory component of CHEM 4030.
Prerequisite: CHEM 3033, 4030 or concurrent.

CHEM 4032 (3)
Biochemistry II
Biochemistry delves into the chemical aspects of living organisms. This course is the second half of a two semester survey of this vast and growing field. The structure and function of biological macromolecules, with an emphasis on enzyme function and metabolism, will be examined. Topics to be covered include advanced metabolism and biosynthesis, DNA replication, transcription and translation and gene expression.
Prerequisite: CHEM 4030.

CHEM 4033 (1)
Biochemistry II Laboratory
This course is the second semester of a two-semester laboratory sequence in biochemistry. It serves as the laboratory component of the associated lecture course CHEM 4032. The emphasis is on DNA related techniques such as the polymerase chain reaction (PCR) and gel electrophoresis (DNA fingerprinting). Students also have the opportunity to carry out self-designed experiments and to report their results in a seminar format.
Prerequisite: CHEM 4031, 4032 or concurrent.

CHEM 4095 (3)
Biochemistry Seminar
This course is a critical analysis of recent biochemical literature. It includes formal seminars, informal group discussions, analysis of a comprehensive review article, and the development of a research proposal. Capstone course.
Prerequisite: CHEM 4032 or concurrent.

CHEM 4910 (3)
Senior Seminar
Senior Seminar is the first semester of a capstone sequence, preparing students for Senior Research. This course is designed to immerse students intensively in the primary literature of chemistry, to provide them with opportunities to present critical reviews and analysis of recent chemical research and to help them write and independent research proposal. Capstone course.
Prerequisite: CHEM 3032. Junior or Senior standing.

CHEM 4911 (2)
Senior Research
This course is the second in a capstone sequence for the chemistry degree (Senior Seminar and Senior Research), designed to expose students to "real-world" research situations and environments. They will undertake interesting projects where the expected outcomes are unknown. This
is an important extension from the laboratory courses they
have taken to this point where the procedures and outcome
are all fairly scripted. Students will choose a willing profes-
sor to work with. Students will present their finding in two
forums: a seminar presentation and a written final report in
addition to weekly updates.
Prerequisite: CHEM 4910.

CHEM 4920 Special Topics in Chemistry
Selected topics in chemistry for upper division science stu-
dents. A single topic may be explored in depth, or a related
series of topics may be addressed. May be team taught.
Prerequisite: CHEM 2052.

CHEM 4950 (1 to 4) Practicum

CHEM 4951 (1 to 3) Practicum

CHEM 4952 Practicum

CHEM 4984 Practicum

CHEM 6310 Marine Natural Products Chemistry
Marine microbes, algae, and invertebrates are productive
sources of structurally diverse, biologically active, and
ecologically significant natural products. This course will
cover the structures, biosyntheses, biological activities,
isoalation methods, and structure determination techniques
for representative compounds from major structural classes
including terpenoids, polyketides, alkaloids, and non-
rhombosmal peptides.
Prerequisite: CHEM 4030. Graduate standing.

CHIN – Chinese

CHIN 1100 Beginning Mandarin I
An introduction to written and spoken Mandarin. This is
the first semester of a two-semester sequence.

CHIN 1200 Beginning Mandarin II
An introduction to written and spoken Mandarin. This is the
second semester of a two-semester sequence.
Prerequisite: CHIN 1100.

CHIN 2100 Intermediate Mandarin I
Conversation, reading, grammar, and introduction to Chi-
nese culture. This is the first semester of a two-semester
sequence.
Prerequisite: CHIN 1200.

CHIN 2200 Intermediate Mandarin II
Conversation, reading, grammar, and introduction to Chi-
nese culture. This is the second semester of a two-
semester sequence.
Prerequisite: CHIN 2100.

CHIN 3100 Advanced Mandarin I
Further development of written and oral language skills and
the study of literary and cultural writings.
Prerequisite: CHIN 2200.

CHIN 3200 Advanced Mandarin II
Further development of written and oral language skills and
the study of literary and cultural writings.
Prerequisite: CHIN 3100.

CJ-- Criminal Justice

CJ 1000 Crimes and Criminals
This course focuses at the patterns and correlates interper-
sonal and collective violence using the most contemporary
research, theories, and cases. Today violence remains one
of the most pressing issues facing not only American society,
but throughout the world. The course looks at a variety of
different, yet connected forms of violence which includes
homicide, assault, rape, domestic violence, robberies, geno-
cide, riots, lynching, and terrorism another others. While
engaging in individual and cooperative projects, students
will consider the theoretical cuses and explanations of the
deviant behavior of infamous criminals that have plagued
out American society.

CJ 1500 Cyber Security
This course explores developments and changes in the
practice of criminal justice brought about by technology
and crime as well as the rapid technological change in
computers, and other internet access devices. Specific
topics include: cybercrime, overview of the concepts and
investigative requirements when dealing with cybersecurity,
globalization of cybersecurity investigations, how different
cybercrimes are committed, the rapid evolution of technol-
ogy and its effects on crime, cybercrimes against persons,
and criminal justice agencies involved in the investigation
and prevention of cybercrimes.

CJ 2050 Basic Criminology
The study of why people break the law, drawing upon classi-
cal and contemporary theories from the behavioral sciences.
Among topics covered are the nature and types of crimes,
Victims' rights, types of punishment, and crime prevention.
Prerequisite: A grade of C- or higher in any WC & IL
II course.

CJ 2060 Justice Systems
An overview of civil and criminal justice systems, pro-
cesses, and personnel in the US. The course the processing
of individuals through the civil and criminal justice system
as well as the functions of investigators, prosecutors, plain-
tiffs’ attorneys, defense counsel, judges, and court personnel
within the criminal justice system. Prerequisite: PSCI 1400

CJ 3000 Ethics and Justice
The course explores the standards and codes of professional
responsibility in various professions as well as examine
the theoretical and philosophical basis of ethics and the
standards of professional conduct and leadership applicable
to justice and the other agencies. It also explores analysis
and evaluation of ethical dilemmas, roles of professional or-
organizations. Emphasis is placed on the inter-related nature
of ethics, morality, legal responsibility, and social issues.
Prerequisite: Any WC & IL II course and any lower division
criminal justice course.

CJ 3070
Justice Management
The application of management skills to civil and criminal justice systems. Topics include: concepts of justice administration; planning; programming; budgeting; staffing; labor relations; and operations. Contemporary theories of organization behavior and development are utilized.
Prerequisite: A grade C- or higher in WC & IL II course and any lower division criminal justice course.

CJ 3300
Criminal Procedures
A critical examination of the steps involved in a criminal case, from arrest to final court disposition. The course reviews landmark law cases affecting pretrial and trial rights of criminal defendants. Topics include: laws governing arrest, including confession and search and seizure; right to counsel; identification procedures; and self-incrimination.
Prerequisite: A grade of C- or higher in any WC * IL II course and any lower division criminal justice course.

CJ 3330
Law Enforcement: Contemporary Issues
The study of contemporary issues facing law enforcement agencies at the local, state, and federal levels. The course examines problems affecting regulatory and law enforcement organizations dealing with agency discretion, selective enforcement, investigations, and forensics.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course

CJ 3320
Corrections: Processes and Programs
A close consideration of civil and criminal law remedies used to "correct" behavior of wrong-doers in the community. Included are tort liability lawsuits, civil damages, community services, criminal restitution, probation, imprisonment, use of halfway houses, and parole.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3500
Crime Law
The study of criminal lawsuits fundamental concepts, evolution, and functioning, using seminal cases and examining the interaction between criminal laws and the U.S. Constitution.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3510
Crime Victims and Justice
A course designed to provide the student with an understanding of crime victimization and its impact on individuals and society. The course identifies and explores the role of the victim within the criminal justice system and the rights of crime Victims. Participants also examine special crime victim issues and community interventions and resources.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3520
Drug Abuse and Justice
The study of the policies and practices of the judicial system relating to the pressing social problem of drug abuse. The course presents a historical perspective of drug and substance abuse in the U.S. and an examination of the community's response to this problem. Students become acquainted with new civil penalties calling for the forfeiture of property, and with the use of noncriminal treatment programs for drug abuse.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3530
Juvenile Deviancy and Justice
An analysis, using classical theories and contemporary research of "normal" and "defi juvenile behavior. The course examines society's responses to deviancy, causes of juvenile criminal behavior, and the treatment of juveniles within the criminal and civil justice systems.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3540
Women, Minorities, and Justice
A historical, political, and sociological study of the treatment of women and minority groups within the criminal justice systems in the United States. The course places special emphasis on historical stereotypes of, and changing perspectives toward, women and minorities.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3550
Crime Scene Investigation: Theories and Practices
The study of academic theories underlying crime scene investigations and of practical applications of these theories. Topics include historical origins, principles underlying such investigations, and real-life studies of crimes such as homicide, arson, identity theft, white-collar crime, and terrorist attacks.
Prerequisite: A grade of C- or higher in any WC & IL II course and any lower division criminal justice course.

CJ 3600
Special Topics in Criminal Justice
An examination of significant and controversial criminal justice topics currently faced by the criminal justice system focusing upon contemporary issues which are projected to have a major impact upon the quality of life for the community and the ability of the criminal justice system to provide services to the community. This course can be repeated twice by the student if the topic of the course is different.
Prerequisite: Any WC & IL II course

CJ 4900
Seminar Criminal Justice
This course serves to synthesize the knowledge gained from each course in the program. The course provides students with an integration of acquired knowledge of theory to practical approaches to solve practical problems in the criminal justice environment. Student will assess the impact of their education experiences on their professional competence and values, critical thinking and problem solving, communication, and information utilization and collaboration skills. Topics include problem solving, case study and analysis, teamwork, and professional writing.
Prerequisite: Departmental approval.

CLST – Classical Studies

CLST 1000
Great Books, East and West
War, brutality, compassion, love, despair, and hope are just
a few of the enduring themes which stem from the foundational epics of eastern and western classical civilizations. This course explores some of those epics for the signifi-
tant issues in the field. The course examines the history of the discipline, essential communica-
tion skills, and central issues in the field. The course examines the history of the discipline, essential communica-
tion skills, key communication theories, and contexts such as intercultural, relational, group, organizational, rhetorical, and mediated communication.

COM 1400  Critical Reading and Rhetoric
This course integrates research, writing, and oral commu-
nication skills through a semester long examination of a current policy topic. With an emphasis on reasoning through argument, students will develop the understanding and ability to perform university level research and writing through a process of data collection, draft revision, and oral defense. Some students may enroll concurrently in WRI 1201 for additional support.
Prerequisite: An appropriate score on a placement test and a grade of B- or better in Any WCIL I course or a grade if C- or better in Any WCIL I course (JOUR 1100, WRI 1100, 1150) and concurrent enrollment in WRI 1201; or an appropriate score on a placement test.

COM 1500  Public Speaking in a Mediated World
This course advances theoretical knowledge of communi-
cation processes and enhances understanding of the basic principles of and skills involved in oral communication within professional settings and situations. Fundamentals of effective oral communication are examined from both speaker and listener perspectives with emphasis on deliver-
ing presentations in a mediated environment. Students will apply fundamental knowledge of organizing, writing, and delivering oral presentations designed to entertain, inform, and persuade. The course also examines computer-mediated forms of communication and the influence of communica-
tion technologies on human interaction.
Prerequisite: Undergraduate standing.

COM 2000  Public Speaking
Instruction and practice in the principal modes of public speaking: interpretive reading, informational speech, per-
suasive speech, debate, and formal presentation with use of aids. Theories of oral communication are introduced, and critiques of presentations are provided.
Prerequisite: Any WCIL I course.

COM 2100  Interpersonal Communication

COM 2300  Communication and Culture
This course examines the relationship between culture and communication in order to develop an understanding of the process of communicating across cultures. Communication patterns and practices enact or produce culture, and cul-
tural patterns and practices produce communication. This relationship is especially important because, perhaps more than ever, an appreciation of communication processes is an es-
ential factor in promoting positive intercultural relations.
Prerequisite: Any WCIL I course.

COM 2500  Sex, Gender, and Communication
Through communication processes we form and maintain our sexual identities and gender roles. These identities and roles, in turn, influence our communication competence and style. This course examines the complexities of sex, gender, and communication in interpersonal relationships, ee
educational environments, mass media, and the workplace. Students will study aspects of communication that influence individuals to behave in gender-specific ways, as well as sex differences in language use, conversational moves, and nonverbal behavior.

Prerequisite: Any WCIL I course.

COM 2640 Argumentation and Debate
Basic argumentation theory including burden of proof, logical analysis, research, strategies, and tactics of persuasive communication in the context of politics, business, and cultural venues; gathering and weighing evidence, reasoning, case construction, refutation; presentation of public address and debate.

Prerequisite: COM 1000 or 1200; Any WCIL I course.

COM 3000 Mass Media
An examination of the development of mass media and consideration of its interaction with technology. The course features specific media and considers contemporary research findings regarding the effects of media upon attitudes and behavior. Media strategies, messages, outcomes, and campaigns are all covered.

Prerequisite: A grade of C- or higher in any WCIL II course; COM 1000, 1200, or ADPR 2000.

COM 3010 Advanced Career Skills
Instruction and practice in various career skills involving both personal planning and interpersonal relations. Focus is on fine tuning and improving competence in such skill areas as HTMe management, goal setting, informational interviews, negotiation, assertiveness, and networking.

COM 3200 Interpersonal Communication
An overview covering the theories, strategies, and outcomes of interpersonal communication. Topics include: principles and practices of communication, message development, and communication strategies. Contemporary research findings that contribute to an understanding of interpersonal communication are also covered, and opportunities to practice effective communication techniques are provided.

Prerequisite: Any WCIL I course ADPR 2000, COM 1000, 1200, 2500, or JOUR 3000.

COM 3210 Mediated Interpersonal Communications
This course examines the basic principles and skills of mediated interpersonal communication, specifically online communication in interpersonal settings. The fundamentals of mediated communication are examined with an emphasis on analyzing different forms of electronic media. Students will learn to organize, create, present, and analyze media designed to entertain, inform and persuade. Emphasis is given to the theory and application of mediated communication in individual and group contexts, on choice and organization of material, audience analysis, sound reasoning, style, and delivery of media. The course also examines the effects of computer-mediated forms of communication technologies on society.

Prerequisite: COM 3200; Any WCIL II course.

COM 3250 Communication Research
An introduction to the logic, concepts, process, and methods of quantitative and qualitative research. This course provides both theory and application. Basic statistics and data analysis are also covered. Emphasis is on primary research frequently used in the communication field.

Prerequisite: Any WCIL II course.

COM 3260 Film as Communication
An exploration of film: its power, potential, and limits as a medium of philosophic thought, as a means to moral and social insight, and as a tool in international understanding.

COM 3270 Film Genre
The study of genre offers a qualitative window onto how audiences perceive and evaluate cinematic form and content. Through the analysis of especially characteristic films, the course explores key topics in genre studies: notions of popular and cultural value, how genres move across and between different media, and the ways that industrial, social, technological, and aesthetic factors shape the development, circulation, and reception of a film genre. Various “case studies” are explored from year-to-year and may include: film noir, comedy, the musical, the Western, science fiction, the road movie and others.

Prerequisite: MULT 2000 or COM 3260, and any WCIL II course.

COM 3300 Intercultural Communication
An exploration of how culture influences the way we perceive the world, think, value, and behave, and therefore how culture both facilitates and impedes communication. Special emphasis is placed upon cross-cultural communication.

Prerequisite: Any WCIL I course.

COM 3320 Persuasion
An exploration of how persuasion influences us through the mass media, public relations, marketing, advertising, and culture.

Prerequisite: COM 2000; ADPR 2000, COM 1000, or COM 1200.

COM 3340 Nonverbal Communication
An exploration of nonverbal communication including semiotics, paralanguage, proxemics, kinesics, haptics, chronemics, eye contact, and facial expression.

Prerequisite: COM 1000 or 1200; Any WCIL II course.

COM 3350 Team Building
Team building helps work groups function as a cohesive unit, promoting morale, communication, and productivity. This course provides theory and practice in how to build team commitment, improve communication, deal with team conflict, set team goals, and use creativity in problem solving and decision making.

Prerequisite: Any WCIL II course.

COM 3361 Environmental Communication
Students will examine how environmental issues have been and continue to be framed and represented by various media, ranging from public relations to journalistic approaches. Students will learn how to report on and write about environmental issues in journalistic style and complete a
final project based on hands-on work with HPU-affiliated Environmental Sciences faculty.  
Prerequisite: JOUR 3300 or ENV 2000.

COM 3400 (3)  
Communicating Professionally  
This course emphasizes epistemology and the basic processes of communicating to general audiences in various media formats for informative and persuasive purposes. Special attention is given to research, media literacy, critical thinking, logical organization, and clear communication in written and orally presented reports, news releases, position papers, and feature articles.  
Prerequisite: Any WCIL II course.

COM 3420 (3)  
Business Communication  
Writing of business documents, including reports, letters, and memos required to meet the needs of today's competitive business world. Research and documentation skills are reviewed. The course also includes units on teamwork, conflict management, interpersonal business communication, and cultural communication, and requires individual and team oral presentations.  
Prerequisite: Any WCIL II course.

COM 3440 (3)  
Advanced Public Speaking  
An advanced course in public address that combines theory of rhetoric with application and experiential learning. Students evaluate various types of public speeches, present a broad spectrum of speeches, and critically evaluate reasoning and evidence.  
Prerequisite: COM 2000.

COM 3500 (3)  
Technical Communication  
The development of written and oral skills focusing on communication of technical and scientific information to people with and without technical backgrounds.  
Prerequisite: Any WCIL II course.

COM 3641 (3)  
Argumentation and Debate Practicum  
Students will learn and practice oral and written argumentation skills in a debate environment. Emphasis is placed on understanding and discussing controversial philosophical and pragmatic issues through research and weekly, extemporaneous oral defense and presentation of arguments. Students will participate in out of class debating events such as debating tournaments, public debates and workshops.  
Prerequisite: Any WCIL I course or concurrent.

COM 3650 (3)  
Media Ethics and Law  
A course designed to give students a basic understanding of what is legal and what is ethical when communicating through the media. Ethical aspects of subject matter in the media will be explored.  
Prerequisite: Any WCIL II course.

COM 3670 (3)  
Legal Communication  
This course brings the legal trial to the classroom, providing students an opportunity to incorporate an array of communication principles and skills with the experience of trial practice. Students are introduced progressively to key aspects of communication and litigation and participate in exercises that culminate in mock trials before a jury.  
Prerequisite: ; Any WCIL II course.

COM 3680 (3)  
Rhetorical Theory  
This course provides a survey of major rhetorical themes and theories, including classical, symbolic, argumentation, critical, and non-Western approaches to rhetoric. Students will explore the relationship between rhetorical theory and practice, the contributions of rhetorical theory to the social world, and the potential for rhetorical studies to inform issues surrounding democratic governance, marginalized groups, social justice, and technology in society.  
Prerequisite: COM 1000 or 1200; COM 2000.

COM 3750 (3)  
Global Communication Cases  
The utilization of current and historical problems, situation, and cases involving international mass communications systems: news, public relations, advertising, radio/TV, and promotion. Discussion includes ethical and practical solutions.  
Prerequisite: A grade of C- or higher in any WCIL II course; COM 3000.

COM 3760 (3)  
Communication Futures  
An examination of the effects of technology on communication, including mass media, telecommunications, and other emerging trends. The role of society and government in shaping future communication systems is examined.  
Prerequisite: A grade of C- or higher in any WCIL II course; COM 3000.

COM 3765 (3)  
Introduction to Telecommunications  
This course will allow a student to fully understand telecommunications and Internet principles. The course will provide the student with the tools required to understand, communicate and solve moderate to complex issues in real-life business organizations.  
Prerequisite: COM 3000 and 3760; Any WCIL II course.

COM 3770 (3)  
Media Literacy  
Inquiry into media messages, be they informative, persuasive, or entertainment, shape cultural practices and legacies. Focus is on critiquing media messages in ways that reveal the distinctions and similarities between mediated and non-mediated messages. Various critical frameworks (e.g., rhetorical, feminist, Marxist) will be examined and applied to media messages.  
Prerequisite: A grade of C- or higher in any WC & IL A course; COM 3000.

COM 3780 (3)  
Media Convergence  
This course offers training in understanding and managing the changing media landscape. The course examines the technical foundations of telecommunication systems such as the Internet, mobile phones, digital video, social media networks, haptic and immersive interfacing and other emerging communication technologies. Guest speakers who work in these fast developing areas will be a feature of the course as students are guided toward both theoretical and practical negotiation of the emerging communication technosphere.  
Prerequisite: A grade of C- or higher in any WC &IL cours
COM 3900
Communication Theory
A course designed to give students a practical understanding of theories of the communication process from interpersonal relationships to mass media and advertising. Through hands-on projects and discussion, students apply theoretical constructs to media effects, advertising, persuasion, and motivation. Prerequisite: COM 3000, 3250, 3680, or 3900. Senior standing.

COM 3910
Selected Topics in Communication
Course title, content, and prerequisites will vary. May be repeated when title and content have changed.

COM 3950
Communication Practicum
An internship offering actual experience in a professional setting. Students select internships in any area of communication including advertising, corporate communication, journalism, public relations, speech, theater, or visual communication. Supervision is both by a professional on site and by HPU faculty. Prerequisite: 9 credits of upper-division communication courses, 2.7 GPA or above, and instructor approval.

COM 3990
Nonpaid Internship
See Internship Section.

COM 3991
Paid Internship
See Internship Section.

COM 4900
Seminar in Communication Criticism
A "capstone" course that allows senior communication students to use acquired skills on a longer in-depth paper. This course gives students the chance to use their chosen area of communication to create a portfolio-quality paper for graduate school and the job market. Prerequisite: COM 3000, 3250, and 3680; Any WCIL II course.

COM 4990
Portfolio Development
A "capstone" course that allows senior visual communication students to use acquired production skill on a longer, in-depth program. This course gives students the chance to use the technical and academic skills of creating video programming for clients and will provide a portfolio piece for students to use for graduate school and the job market.

COM 4997
Directed individualized readings.

COM 5050
Communication Writing
This is a graduate-level English writing course for students requiring additional experience prior to starting their graduate education in the College of Communication. Prerequisite: Graduate standing.

COM 5060
Oral Presentations
This is a graduate-level English speaking course for students requiring additional experiences in academic and professional speaking situations to facilitate their graduate performance in the College of Communication. Prerequisite: Graduate standing.

COM 6000
Communication Theory
A survey course of communication theories with an emphasis on those that address persuasive methods from the rhetorical and social science perspectives. Theories address interpersonal, media, group and cultural communication situations. Students will develop skills as critical listeners and writers and become fluent in vocabulary for describing and analyzing persuasive messaging. Prerequisite: Graduate standing.

COM 6010
Strategic Communication
A comprehensive view of strategic communication including persuasion theory, public relations, creativity, audience analysis, research, media selection and scheduling, script and copywriting, layout, budgeting, evaluation, and campaign management. The course explores the legal, regulatory, and ethical environment of advertising, current industry trends, and major contributors to the field. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6050
Communication Research Methods
Focuses on the theory and practices of writing and presenting communication research including the elements of conducting rigorous research and writing. The course explores various qualitative and quantitative methodologies including various techniques such as descriptive, contextual/historical and empirical analysis. Students also develop skills using various databases and communication research sources. Prerequisite: Graduate standing.

COM 6060
Qualitative Research Methods in Communication
This course focuses on how we come to know in communication research through molding theories into descriptive, historical methodologies and applying those approaches onto specific artifacts. Prerequisite: COM 6000 and 6050.

COM 6070
Advanced Media Research
This course focuses on methodologies and their applications, including survey, content analysis, and experiments. Data analysis features descriptive and inferential statistics frequently used in empirical research. This is an elective research course for students seeking working in mass communication disciplines. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6080
Critical and Rhetorical Studies
This course gives students the skills needed to recognize the situational, substantive and stylistic rhetoric that cultural producers use to edify, persuade and entertain. Students will learn as well, how to explore the variety of rhetorical strategies used by audiences to make sense of media and cultural artifacts. The goal is to guide students towards contemporary views of language and visuality that are most conducive for success in the creative and critical tasks of professional careers in communication.
Prerequisite: COM 6000 and 6050. Graduate standing.

COM 6085 (3)  
Speech Making and Writing  
The history of and current trends in speechwriting and speechmaking with an emphasis on persuasion, the strategic employment of language and the interface of speechmaking and technology. Students will learn and practice the art of effective speechmaking by studying both effective and inadequate models of oratory. Students will learn how to prepare various types of speeches for a variety of audiences and rhetorical situations, be they political, corporate or professional.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6100 (3)  
Integrated Communication  
A survey of the dynamics, practices, and interrelationships among information outlets, consumers, and organizations while upon the base of current theories and models of communication. It provides a mix of the art and science of marketing, public relations, organizational communication, and the mass media and includes strategic applications for a variety of topics specific to public communication and the private sector.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6200 (3)  
Organizational Communication  
An examination of organizational elements that affect communication including formal and informal hierarchies, corporate culture, conflict resolution, leadership style, and technology. It develops in students the ability to manage a diverse workforce, communicate effectively and efficiently in a group or through mass media, and plan strategic communication campaigns. Emphasis is on problem-solving and critical-thinking skills.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6250 (3)  
Public Relations  
This class is for graduate students interested in public relations as a discipline and field. The course will explore PR’s foundations from history, theory, advocacy, and persuasion, including historical controversies, evolution from image-building and community action through marketing and financial positioning, risk & health, gender, ethics and management issues.  
Prerequisite: COM 6000 and 6050. Graduate standing.

COM 6300 (3)  
Corporate Communication  
This course will examine corporate communication including formal and informal hierarchies, corporate culture, conflict resolution, leadership style, crisis management, and technology. Emphasis will be on problem-solving and critical-thinking skills.  
Prerequisite: COM 6050 or concurrent; COM 6250. Graduate standing.

COM 6305 (3)  
Crisis Communication  
This course provides an in-depth study of key aspects of Crisis Communication, and prepares students to anticipate, identify clues, and initiate pre-emptive programs for natural, financial, personnel and domestic terror threats. The course covers related research, strategic planning, presentations, media relations, government relations, and international relations.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6310 (3)  
International Communication  
This course will examine the elements that affect communication across cultural and national boundaries. It will investigate those effects on conflict development and management, leadership style, and technology. It will develop in students the ability to communicate effectively and efficiently when cross-cultural and world view boundaries.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6315 (3)  
Tourism and Cross-Cultural Communication  
This course explores communicative/rhetorical, cultural, and political issues surrounding the experience of “tourism”. People experience tourism differently: for some it is a leisure activity, for others, a form of inter-cultural encounter; for some, it is a development strategy, for others, another form of imperialism. From the view point of this course, tourism offers an interesting window for understanding globalization, the culture of post/modernity and post-coloniality, and who we/they are. In advancing these issues, this course will highlight how communication/rhetoric plays a pivotal role in tourism.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6320 (3)  
Health Communication  
This course will explore the role of integrated communication in the health care field. It begins with an examination of the context of the communication program and activities, then examines the definitions and nature of communication, models and theory as appropriate to health care, the importance of behavior change and how communication is used to encourage it, the planning and programming of communication programs, and the elements of a health care communication.  
Prerequisite: COM 6050 and 6250. Graduate standing.

COM 6460 (3)  
Digital Graphic Design  
Students create digital designs and illustrations usable for web and print purposes. Graphic design principles and skills will be taught, as well as use of photography, color, type, etc. Students design such items as advertisements, posters, logos, newsletters, brochures, information graphics, etc.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6500 (3)  
Teaching Techniques  
This course will explore teaching and learning strategies including syllabus construction, content structure, assessment methods, learning and instructional methods and similar topics. Student will also have an opportunity to assist faculty in the delivery of undergraduate courses at HPU.  
Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6510 (3)  
Web Design  
In these HTMes of exciting changes in media technolo
com as examines mediation. Graduate explores COM 6000, 6050 or concurrent enrollment. Prerequisite: Graduate standing.

COM 6540 History of American News Media
This course is an examination of the history of American news media from Colonial HTMes to the present. The course will place an emphasis on the role of decisive individuals; the theory of American democracy and the Fourth Estate; technology; economics; the creed of objectivity; First Amendment issues; political speech; ethics; the courts; warHTMe reporting; the treatment of ethnic groups; the cult of celebrity; and matters of taste. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6545 Literary Journalism
An examination of the fictive techniques employed in the writing of American journalism. This can include newspaper hard news, features, magazine pieces, essays, memoir and non-fiction novels. The course will place an emphasis on writing techniques that many critics call “fiction,” research, and the writing of actual compositions of varying lengths that employ the narrative techniques of fiction writers. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6555 Photожournalism
Students assemble their own photojournalism portfolio as they complete assignments based on those of professional photojournalists in this digital photojournalism course. Students learn principles of photojournalism. Techniques, ethics, and legal considerations in photojournalism will be discussed. Students supply their own digital SLR cameras. Only digital SLR cameras approved by the instructor may be used for the course. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6590 Feature Film Screenwriting
Students in this course study narrative design and screenwriting techniques. The course is project-oriented and the final deliverable is a feature-length screenplay. The course explores narrative pedagogy, story structure, character development, plot strategy, dialogue, and other screenwriting techniques. Participants engage in rigorous close textual analysis of their own and other screenplays. Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6600 Mediation and Conflict
This study of mediation as facilitated communication examines how mediation can be used in various contexts as well as significant legal, ethical, and situational considerations. The course also provides an overview of the nature of conflict, conflict styles and patterns, management and resolution processes, and the role of communication. Prerequisite: Graduate standing.

COM 6610 Negotiation
This course examines the art and science of influence. Topics included sources of influence, managing power relationships, and the use of effective techniques of persuasion in mediation. Students also learn theoretical foundations and practical applications of negotiation strategies, processes, and skills. Students will participate in individual and group negotiations. Prerequisite: Graduate standing.

COM 6620 Communication Strategies for Professionals
This course focuses on communication strategies designed to promote productive interaction and competent management of disagreements in professional settings. Topics include the role of perception and its influence on communication and conflict, listening, and paraphrasing, verbal and nonverbal communication, gender and cultural differences, and working with people when their behavior is unpleasant or difficult. Prerequisite: COM 6600, concurrent. Graduate standing.

COM 6630 Mediation Practice
This course focuses on the further development of mediation skills through intensive practice. Topics include convening the parties, delivering an articulate opening statement, conducting all stages of the mediation process, and drafting a cohesive written agreement. Students also work under the leadership of a professional mediator on actual mediation projects. Prerequisite: COM 6600, 6610, and 6620 (* may be taken concurrently). Graduate standing.

COM 6650 Intellectual Property and Media Ethics
Students will be exposed to a survey of major areas of media law: governmental regulation of political speech; defamation; privacy torts; news gathering rights, and intellectual property issues such as trademark, patent, copyright and fair use. This course concentrates on the interplay between new media, cutting-edge technologies, privacy, and other civil liberties. Students can expect to engage in a conversation about the ethical, cultural and political issues facing media. Prerequisite: Graduate standing.

COM 6670 Communication and Legal Practice
This course uses the courtroom as a context for the study of communication and conflict. Students will apply theories of verbal and non-verbal behavior, public speaking and persuasion, and small group behavior and communication, while managing conflict that occurs on multiple levels. Students will participate in progressively challenging legal activities, including case analysis, opening statement, witness examination, jury selection, and mock trial. Prerequisite: COM 6600. Graduate standing.

COM 6700 Promotion Management
A survey of promotional strategies for modern businesses including techniques for planning, budgeting, scheduling, and implementing a coordinated promotional campaign of advertising, personal selling, sales promotion, and public relations. Prerequisite: COM 6600 and 6650. Graduate standing.

COM 6750 Gender Communication
Gender Communication studies how gender is produced
through communication practices and cultural contexts. Students will gain competence in the theoretical traditions pertaining to gender and acquire analytical insight into cultural variance. This course will explore how social norms and gender expectations both construct and affect communication practices in interpersonal, intercultural, and organizational settings as well as how they are reflected, reproduced, and altered in mass media.

Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6760 (3)
Film Criticism
The study of film as a communication medium. Students will study film aesthetics, how those aesthetics give rise to rhetorical implications, explore various ways to approach the film artifact, how to identify the genre of the artifact, and critique the effectiveness of film.

Prerequisite: COM 6000 and 6050 or concurrent enrollment. Graduate standing.

COM 6770 (3)
Media Criticism
This course provides a focused survey of contemporary methods for the analysis and evaluation of mediated messages. Students will learn techniques for choosing a representative artifact and how to select relevant details and examples from the artifact to demonstrate how media communicate culturally and stylistically to a variety of audiences. Particular attention is given to emerging new forms of media and methods appropriate to their evaluation.

Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6910 (3)
Selected Topics in Communication
Course title, content, and prerequisites will vary. May be repeated when title and content have changed.

Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6970 (3)
Current Issues in Communication
This course will be taught seminar style, based on discussion of current issues in communication. Topics will vary weekly. Students will be assigned topics and will be expected to facilitate discussions on those topics. Other students should be prepared to actively participate in those discussions.

Prerequisite: COM 6000, 6050 or concurrent enrollment. Graduate standing.

COM 6990 (1 to 3)
Nonpaid Internship
Prerequisite: Graduate standing.

COM 6991 (1 to 3)
Paid Internship
Prerequisite: Graduate standing.

COM 7150 (3)
Capstone I
Initial design and development of the academic thesis or professional project.

Prerequisite: COM 6000, 6050, 6650 and advisor approval. Graduate standing.

COM 7250 (3)
Capstone II
Final preparation and presentation of the academic thesis or professional project. This will include an oral presentation and defense.

Prerequisite: COM 7150. Graduate standing.

COM 7299 (1)
Continuing Thesis II Writing
This course will be a continuation of the COM 7250 Thesis II capstone seminar in which students will continue to research and write their thesis paper with guidance from their three committee faculty mentors approved during COM 7150/7250.

Prerequisite: COM 7150. Graduate standing.

COOP – Cooperative Education

COOP 2990 (1)
Cooperative Education I
Introductory supervised paid work experience for a minimum of 200 hours directly related to major. The student report and evaluation are assigned by an HPU instructor who assesses progress toward curricular and career objectives. Emphasis is on entry level work and the course is meant to be exploratory in nature.

Prerequisite: COM 1000 or concurrent.

COOP 2991 (1 to 3)
Cooperative Education II
Advanced supervised paid work experience for a minimum of 200 hours directly related to major. The student report and evaluation are assigned by an HPU instructor who assesses progress toward curricular and career objectives. Emphasis is on entry level work and the course is meant to be exploratory in nature. Course may be repeated for credit.

Prerequisite: COOP 2990.

COOP 2992 (1 to 3)
Cooperative Education III
Prerequisite: COOP 2991.

COOP 3990 (1 to 3)
Cooperative Education III
Introductory supervised paid work experience for a minimum of 200 hours directly related to major. The student report and evaluation are assigned by an HPU instructor who assesses progress toward curricular and career objectives. Emphasis is on entry level work and the course is meant to be exploratory in nature.

Prerequisite: COM 1000 or concurrent.

COOP 3991 (1 to 3)
Cooperative Education III
Advanced supervised paid work experience for a minimum of 200 hours directly related to major. The student report and evaluation are assigned by an HPU instructor who assesses progress toward curricular and career objectives. Emphasis is on entry level work and the course is meant to be exploratory in nature. Course may be repeated for credit.

Prerequisite: COOP 2990, 2991, or 3990.

COOP 6990 (1)
Cooperative Education IV
Introductory supervised paid work experience for a minimum of 200 hours directly related to degree/concentration. The student report and evaluation are assigned by an HPU instructor who assesses progress toward curricular and career objectives. Emphasis is on entry level work and the course is meant to be exploratory in nature.
CSCI 1011 (3) Introduction to Computer Information Systems
Students will learn to enhance their personal productivity and problem solving skills by applying information technologies to problem situations and by designing and using word processing, spreadsheets, and presentation software. Other topics include technology concepts and the impact of computer technology on society.

CSCI 1041 (3) Digital Literacy in a Global Society
This course gives students tools to be active participants in today’s global culture of digital literacy. Students acquire technology skills to create digital products such as spreadsheets, presentations, and podcasts; analytical skills to understand, organize, and analyze numeric and graphic data; communication skills to convey information in a context appropriate to the receiving audience; and knowledge of international standards and treaties that govern rights and responsibilities in creating and disseminating original works. The course is presented in a global context with local details drawn from a variety of countries and cultures.

CSCI 1061 (3) Mobile Technologies for the 21st Century
Current mobile technologies and non-proprietary applications are used in this course to promote information and technology literacy for academic and personal productivity. In a project-based approach, students work on realistic projects that focus on critical thinking and computational skills. The course work draws from the unique opportunities offered by mobile technologies to communicate, work collaboratively, and share knowledge. For example, students may practice creating on-line surveys, use mobile technologies to survey subjects, use formulas, functions, and charts in spreadsheets to evaluate survey findings, and finally publish their findings in course websites.

CSCI 1301 (3) Discrete Mathematics for Computer Science
An introduction to the theory and applications of discrete mathematics including set theory, functions, zero- and first-order logic, induction, proofs (including direct, by cases, contradiction, contradiction, counterexample), logical inferences, truth tables, sequences, summations, formal counting techniques, number theory, growth of functions and their asymptotic bounds, logarithms, and simple recurrence relations. Sample computer-programming topics include design; pseudocode; sorting, searching and other common algorithms; recursion; tracing; debugging; testing; trees; strings; encryption; and bitwise operations. This course provides foundation material for other courses that require mathematical problem-solving skills.
Prerequisite: MATH 1105 or higher. Recommended: CSCI 1011 or 1041.

CSCI 1911 (3) Foundations of Programming
An introduction to computer science and computer information systems in preparation to study computer programming and problem solving. Students are introduced to the foundations of algorithms required for intermediate level problem solving, and programming language elements and environments required to create, compile, and execute high-level language programs.
Prerequisite: MATH 990 or higher or an appropriate test score.

CSCI 2611 (3) A Gentle Introduction to Computer Programming
A gentle introduction to computer programming using a fun, popular, and powerful programming language such as Ruby or Python. Designed to teach computer programming to non-programmers, this course is also valuable to programmers. Students learn fundamental and universal programming concepts, as well as problem-solving and critical-thinking skills valuable for other courses and in life. Extensive programming assignments. Topics include: variables and assignment, basic data types, strings, arrays, conditional and iterative control structures, control flow, modularization, objects, methods, parameters, testing, and debugging. Mastery of Ruby or Python also provides a foundation for learning Web programming frameworks Rails or Django.
Place out option for General Education Program: Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.
Prerequisite: CSCI 1011, 1041, or instructor permission; MATH 1105 or higher or an appropriate test score.

CSCI 2761 (3) HTML and Web Design
An introduction to HTML and website design. Students learn the mechanics and aesthetics of good web design while creating their own website projects. Topics include (X)HTML, text, graphics, page layout, style sheets, rich media, JavaScript, search engine optimization, Internet security, and web standards. Access to a computer with an Internet connection is essential.
Prerequisite: CSCI 1011 or 1041.

CSCI 2911 (3) Computer Science I
The fundamentals of algorithmic problem solving, plus structured and object-oriented programming. Topics include: problem analysis and decomposition; stepwise refinement; pseudocode and charting techniques; basic control structures and data types; modularization and parameter passing; object-oriented design and classes; introduction to GUIs, files and arrays; testing, program tracing, and debugging. Extensive programming assignments.
Prerequisite: CSCI 1911 and MATH 1105 or higher. Recommended: CSCI 1011 or 1041; and MATH 1130. Corequisite: CSCI 2916.

CSCI 2912 (3) Computer Science II
An intermediate problem-solving and programming course using the Java programming language. Topics include composite and abstract data structures, GUI beyond the
Prerequisite: CSCI 2911 and MATH 1130 or higher.

CSCI 2913 (3)
Data Structures
Third course of the core problem-solving and programming sequence for computer science majors. Students advance problem-solving and programming skills by learning to separate solutions for computation problems into two fundamental parts: algorithm and data structure. Extensive programming assignments to create, implement, use, and modify programs that manipulate standard data structures. Topics include: abstract data types, big-O complexity, linked lists, stacks, queues, trees, binary search trees, heaps, hash, heap sort, hashing, and recursion. Prerequisite: CSCI 2911, 2912; MATH 1140; and CSCI 1301 or MATH 3301.

CSCI 2916 (1)
Computer Science 1 Lab
Lab component to accompany CSCI 2911. This course will provide directed lab exercises for students to improve their understanding of the content of CSCI 2911 and their skills in creating and debugging computer programs. Prerequisite: CSCI 2911 or concurrent; MATH 1105 or higher. Recommended: CSCI 1011 or CSCI 1041 or concurrent; MATH 1130.

CSCI 3001 (3)
Assembly Language and Systems Programming
Students learn about the internal organization of modern computers and assembly-level programming on contemporary processors. Topics include: integration of assembly language with high-level programming languages such as C and C++, runHTML stack, pointers, efficient coding strategies, and assembly language as the foundation for higher-level programming languages. Course material is reinforced by programming assignments. Prerequisite: CSCI 1301 or MATH 3301; CSCI 2911.

CSCI 3101 (3)
Algorithms
This course covers the analysis and design of algorithms. Good algorithm design is crucial for software performance. Topics include: efficiency analysis; big-O, omega, and theta notation for asymptotic upper, lower, and tight bounds on algorithm HTMe complexity; recurrence equations; proof by induction and contradiction; brute-force, greedy, and divide-and-conquer algorithms; sorting algorithms including heapsort, mergesort, quicksort; graphs, trees, heaps; binary search; breadth and depth-first search; Dijkstra’s shortest-path algorithm; minimum spanning trees, Prim’s algorithm; maximum network fl dynamic programming; tractable and intractable problems; NP-complete problems and the P and NP classes; uncomputable functions. In-depth programming assignments. Prerequisite: CSCI 2911, 2912, 2913; MATH 1130 and 1140, or 1150; CSCI 1301 or MATH 3301.

CSCI 3106 (3)
Programming Challenges
Students solve and implement advanced programming problems covering a wide range of algorithmic topics. The course is structured around preparation to participate in an annual programming contest conducted by the Association for Computing Machinery (ACM). CSCI 3106 complements CSCI 3101, Algorithms, by providing students with less theoretical, more hands-on problem solving and programming. Topics include: data structures, strings, sorting, arithmetic and algebra, combinatorics, number theory, backtracking, graph algorithms, dynamic programming, grids, and geometry. Prerequisite: CSCI 2911 and 2912.

CSCI 3201 (3)
Information Management Using Spreadsheets and Databases
Students obtain experience managing information using spreadsheet and database software applications for business and personal productivity through a problem-solving approach. Spreadsheet topics include formulas and functions, nested functions, representation of dates and date arithmetic, IF functions and nested IF functions, loan payment calculations, relative and absolute cell references, basic charts, filtering, what-if analysis such as goal seek and data tables. Database topics include tables, queries, forms, reports, relationships (one-to-many and many-to-many), primary and foreign keys, and validation. General topics include application design, testing and correctness, reliability, and usability. Prerequisite: CSCI 1011 or 1041.

CSCI 3211 (3)
Systems Analysis
An overview of the systems development life cycle with emphasis on techniques and tools of system specifications. The course covers the strategies and techniques of modern systems development. Prerequisite: CSCI 2911, 2912, and 3301.

CSCI 3242 (3)
Modeling and Simulation
This course introduces concepts of analytic modeling and computer simulation. It encompasses mathematical techniques, algorithms, and applications available to assist and improve decision making and understanding of various types of systems. Sample topics include discrete event simulation, mathematical and computational modeling, virtual reality, and GUI simulations. Models will progress sequentially through steps such as problem statement, formalization, implementation and simulation, visualization, and comparisons to analysis, experiment and observation. Students work on projects drawn from a variety of areas such as management, behavioral, and natural sciences; applied mathematics; engineering; gaming; computer networking; and scheduling. Prerequisite: CSCI 1301 or MATH 3301; or MATH 1123 and 2214; CSCI 2911, 2611, or consent of instructor.

CSCI 3301 (3)
Database Technologies
An introduction to the design, development, and implementation of database management systems (DBMS). Topics include conceptual data modeling, logical and physical design, the relational model, normalization, SQL and high level language programming, transaction processing and concurrency control, database architecture, data warehouses, and database administration. Upon successful completion of this course the student will be able to design.
and implement database solutions for future academic or industry projects.

Prerequisite: CSCI 1011 or 1041; CSCI 2911; and CSCI 1301 or MATH 3301.

CSCI 3302
Data Mining and Knowledge Engineering
An introduction to the discovery of knowledge through data mining and knowledge engineering. These techniques have widespread practical importance in domains such as bioinformatics, genetics, medicine, natural sciences, engineering, business, marketing, intelligence gathering, and computer security. General topics include: basic statistics, machine learning, data warehouse structure and design, the knowledge discovery process, data coding, data mining and knowledge engineering approaches and mathematical techniques, pattern recognition, and mitigating the impact of missing data and noise on knowledge discovery. Possible specific topics include: DNA sequencing, customer satisfaction, credit card and cell phone fraud, computer forensics, spatial applications, Bayesian networks, and surveillance.

Prerequisite: CSCI 1301 or MATH 3301; or MATH 1123 and 2214; and CSCI 2611 or 2911.

CSCI 3401
Data Communications
An examination of the principles of data communications for computers and computer terminals, including data transmission performance, communications software, protocols, switching, and simple networks.

Prerequisite: CSCI 2911, 2912; MATH 1105, MATH 1123, MATH 1130; and CSCI 1301 or MATH 3301.

CSCI 3501
Computer Organization
A computer is regarded as a hierarchy of levels, each one performing a well-defined function. This course provides detailed coverage of the digital logic, microarchitecture, and instruction-set architecture levels. Students are required to implement a simulator for a microprogrammed computer architecture using a contemporary high-level object-oriented programming language.

Prerequisite: CSCI 2911, 3001; CSCI 1301 or MATH 3301.

CSCI 3601
Operating Systems
An introduction to the fundamental processes of operating systems, covering system structure, process creation and management, memory allocation and management, scheduling, I/O, and device drivers.

Prerequisite: CSCI 2911, 2912, 2913, 3001, 3501; CSCI 1301 or MATH 3301.

CSCI 3611
Unix Systems Administration
This course covers the Unix operating system and system administration responsibilities. Topics include: system startup and shutdown, managing startup services, hard drive partitioning and filesystem concepts, file management, user administration, networking and applications installation and administration, shells and scripts, regular expressions, performance monitoring and tuning, logs, basic system security, and kernel reconfiguration. Extensive hands-on assignments.

Prerequisite: CSCI 1301 or MATH 3301; CSCI 2911.

CSCI 3621
Networking
This course describes how voice, data, image, and video information are communicated through networking, how it is accomplished, protocol and network configuration, and LAN system software.

Prerequisite: CSCI 2911, 2912, 3001, and 3401; MATH 1123 or 3323; MATH 1130 or higher.

CSCI 3632
Internet Programming
This course focuses on strategies for providing secure, reliable, and useful Web-based applications. Topics include: the development of dynamic Web sites; client-side programming; server-side programming; back-end databases; RESTful Web services; secure transaction processing; other features of commercial quality web sites; and selected current topics such as Google Maps, Facebook, and Twitter APIs. Extensive programming assignments.

Prerequisite: CSCI 2911 and 2912.

CSCI 3640
Computer Security and Information Assurance
The assessment of potential security threats to computer systems. Topics include: controlling site and system access; protecting and maintaining data integrity; environmental/facility considerations such as power and climatological factors; assessing intrusion detection consideration; theft, espionage, sabotage, and incompetence; backups and alternative systems.

Prerequisite: CSCI 2911; CSCI 1011 or 1041; MATH 1123.

CSCI 3651
Game Programming
An introduction to the many types of computer game programming. This course reviews the computer-science theory and programming behind classic games such as Tetris and Space Invaders, genre creators such as SimCity and Civilization, as well as modern techniques behind sophisticated games such as Quake, Grand Theft Auto and Red Dead Redemption. Students get hands-on experience creating 2D games in JavaScript/HTML5 and 3D games in systems such as the Unreal Engine. Course also briefly covers interactive narrative text adventures, mobile games and game Artificial Intelligence.

Prerequisite: CSCI 2911 and 2912.

CSCI 3721
C#
This course provides the fundamental skills that are required to design and develop object-oriented applications for the Web and Microsoft Windows using C#, the Microsoft Visual Studio.Net development environment and Microsoft Foundation Classes. Business and scientific problems are solved through object-oriented analysis and design using features inherent to C# and .Net.

Prerequisite: CSCI 2911 and 2912.

CSCI 3722
C# II
This course covers the major topics for Windows client application programming using the .NET Framework. Topics include: Windows Forms, Microsoft Foundation Classes, simple data access, interoperating with unmanaged code, threading and asynchronous programming issues, simple remoting, Web access, Web Services consumption, debugging, security, and development issues for desktop applications.

Prerequisite: CSCI 2911, 2912, and 3721.

CSCI 3723
Visual Basic
(3)
An introduction to scientific and business problems that are solved through software engineering techniques and the capabilities inherent in the language presented. Topics may include: functions, structures, formats, exception handling, I/O, objects, and recursion, where applicable. 

Prerequisite: CSCI 2911 and 2912.

CSCI 3724 Visual Basic II (3) 
An advanced course that draws upon concepts and skills mastered in CSCI 3723. Sophisticated and complex applications of the language and interfaces presented are featured. Major topics may include: routine oPHMization, modular integration, GUI, large scale implementation, multitasking, and multiprocessing. 

Prerequisite: CSCI 2911, 2912, 3723.

CSCI 3731 Problem Solving and Programming Using C++ (3) 
An advanced problem-solving and programming course with emphasis on the systems programming features provided by the C++ programming language. Objects, memory management, and systems programming are stressed. Extensive programming assignments are required. 

Prerequisite: CSCI 2911 and 2912.

CSCI 3753 Java (3) 
An introduction to scientific and business problems that are solved through software engineering techniques and the capabilities inherent in the language presented. Topics may include: functions, structures, formats, exception handling, I/O, objects, and recursion, where applicable. 

Prerequisite: CSCI 2911 and 2912.

CSCI 3754 Java II (3) 
An advanced course that draws upon concepts and skills mastered in CSCI 3753. Sophisticated and complex applications of the language and interfaces presented are featured. Major topics may include: routine oPHMization, modular integration, GUI, large scale implementation, multitasking, and multiprocessing. 

Prerequisite: CSCI 2911, 2912, 3753.

CSCI 3771 Python (3) 
An introduction to programming in the popular Python programming language. Topics include data types, simple statements, control structures, strings, functions, recursion, the Python interpreter, system command lines and files, module imports, object types, dynamic typing, scope, classes, operator overloading, exceptions, testing and debugging. The course will enable students to program fluently in Python and move on to advanced topics such as programming collective intelligence and natural language processing. Mastery of Python also provides a foundation for learning the Web programming framework Django. 

Prerequisite: CSCI 2911 and 2912.

CSCI 3776 Ruby on Rails (3) 
This course covers the fun, popular, and powerful Web programming framework Ruby on Rails, which enables programmers to rapidly develop sophisticated websites with databases. Topics include: Ruby programming language, embedded Ruby, Model-View-Controller (MVC) software architectural pattern, Rails directory structure, database object-relational mapping (ORM) using active records, database migrations, maintaining user state with database sessions, asynchronous JavaScript and XML (Ajax) development techniques for interactive Web applications, testing, and debugging. Extensive programming assignments to create websites with relational databases. 

Prerequisite: CSCI 2912.

CSCI 3911 Software Engineering (3) 
The course teaches software engineering techniques and system analysis methodologies based on the Software Engineering Body of Knowledge (SWEBOK) using Software as a Service (SaaS), Agile development methodologies, and Cloud based applications. This course covers Design Patterns, code version repositories and open source project software engineering methodologies, critical for every programmer. It also covers systems analysis and business analysis skills of talking to a customer, creating prototypes and alternative development methodologies. 

Prerequisite: CSCI 2911, 2912.

CSCI 3990 Nonpaid Internship (1 to 3) 
See Internship section. 

Prerequisite: CSCI 2911, 2912.

CSCI 3991 Paid Internship (1 to 3) 
See Internship section. 

Prerequisite: CSCI 2911, 2912.

CSCI 4620 Computer System Forensics (3) 
This course is an in-depth study of computer system forensics including methodologies used for analysis of computer security breaches. Forensics is the use of science and technology to investigate and establish facts in criminal or civil courts of law. The student will be introduced to digital forensics and practiced by local, state, and federal law enforcement. Assignments will reinforce the theory presented in the lecture and will provide students with hands-on experience using well-know, publicly available, digital forensic tools. Students will work on one of two separate networks dedicated to cyber security teaching and research. 

Prerequisite: CSCI 2911, 2912, 3401 and 3640; CSCI 1301 or MATH 3301; CSCI 3001 or 3501; MATH 1123; MATH 1130 or higher.

CSCI 4640 Advanced Topics in Cybersecurity (3) 
A lecture and project-based course on advanced topics in cybersecurity. Students learn and apply the principles, skills, and art of building and defending a secure network. Topics address current issues in areas such as: ethical hacking, network defense, countermeasures, writing secure code, network penetration testing, and basic forensics. Students work in teams using contemporary tools to analyze hack, and defend network systems. 

Prerequisite: CSCI 2911, 2912, 3401 and 3640; CSCI 1301 or MATH 3301; CSCI 3001 or 3501; MATH 1123; MATH 1130 or higher.

CSCI 4701 Introduction to the Theory of Computation (3) 
Students will learn about formal models of computation and how these are used as the basis for the design of all computer systems and programming languages. Students will gain practical hands-on knowledge of computation.
theory as it applies to programming language translation (compilers and interpreters). To help comprehend virus protection programs and computer security, the creation of self-replicating programs (the basis of most viruses) will be explored. Students will learn how computational problems are classified as solvable, unsolvable, tractable, and intractable. The material covered ties together the theory of computer base computation and the application of this theory to problem solving and programming. 

Prerequisite: CSCI 3101; CSCI 1301 or MATH 3301.

CSCI 4702 (3) 
Mobile Programming
A course on the programming of applications for mobile computing including devices such as mobile phones, pads, and tablets. Students will learn best practices in programming for mobile devices including iPhones, iPads, and Android smart phones. At the end of the course students will be proficient in developing mobile applications and using device emulators for coding and testing. This course will at HTMes include joint projects with students in the mobile design course, MULT 4702.

Prerequisite: CSCI 2911, 2912.

CSCI 4705 (3) 
Artificial Intelligence
This course provides an introduction to Artificial Intelligence (AI), an area of computer science that tackles problems requiring human intelligence. In recent years, AI has become pervasive in society, and is found in applications such as automated phone operators, map directions, face recognition of photos, and product recommendations. This course focuses on real-world applications such as expert systems, chatbots, computer game AI, natural language processing, knowledge representation, automated reasoning, machine learning, search, planning and decision making. In-depth programming assignments.

Prerequisite: CSCI 2911, 2912, and 2913.

CSCI 4911 (3) 
Software Project I
A lecture and project-oriented course dealing with the application of the principles, skills, and art of the design and construction of software systems in a realistic environment. Topics include: modern software development strategies; integrating program subsystems into efficient and aesthetic systems; systems standardization; information engineering; and testing.

Prerequisite: CSCI 2911, 2912, 2913, 3001, 3211, 3301, 3401, 3501, 37XX; MATH 1123; MATH 1140 or 1150; MATH 3301 or CSCI 1301; and last semester before graduation.

CSCI 4921 (3) 
Software Project Management
A lecture and project-based course dealing with the application of principles, skills, and the art of managing a software development project in a realistic environment. Topics include: software development models and economics, team effectiveness, software life-cycle phases, determination of software requirements, software development metrics and standards, testing, and documentation. Capstone course.

Prerequisite: BUS 1000; CSCI 2911, 2912, 3201, 3211, 3301, 3401; ECON 3020; MATH 1123, 1130, 2326; MGMT 3100, 3400; and last semester before graduation.

CSCI 4931 (3) 
Systems Administration
A lecture and project-oriented capstone course dealing with the principles, construction, monitoring, maintenance, testing, and art of system administration, for open and closed client and server systems. Topics include: project management, security, system accounting, system maintenance, services, diagnostic methods, security, and disaster recovery. 

Prerequisite: CSCI 3601, 3621.

CSCI 4997 (1 to 3) 
Directed Readings in Computer Science
Directed individualized readings.

Prerequisite: Consent of instructor.

ECON – Economics

ECON 1000 (3) 
Naked Economies
This course introduces the core tenets of economic thought through a variety of disciplines, media, and mechanisms. Primary economic topics include: incentives and choice, the functioning of markets, public policy, poverty, fairness, information, and social choice theory.

ECON 1010 (3) 
Introduction to Global Economic Issues
This course will introduce students to the economic forces and controversies behind globalization. It will also provide background to students for an increased awareness and sensitivity to multicultural communities. Students are expected to develop skills for critical analysis of the elements of prosperity, sustainability, and conflict.

ECON 2010 (3) 
Principles of Microeconomics
A general introduction to microeconomics, the study of individual consumers, groups of consumers, and firms. This course examines: demand theory; the theory of the firm; demand for labor; market theory; interaction between markets; and welfare economics.

Prerequisite: Any WCIL I course MATH 1105 or higher.

ECON 2015 (3) 
Principles of Macroeconomics
A general introduction to macroeconomics, the study of the aggregate economy. This course examines: how levels of output, employment, interest rates, and prices in a nation are interrelated; what causes these levels to change; and the use of policy measures to regulate them.

Prerequisite: MATH 1105 or higher; Any WCIL I course.

ECON 3010 (3) 
Intermediate Microeconomics
An advanced treatment of the major topics of microeconomics with additional emphasis on the free market, private enterprise, competition, and international trade and finance. Subject matter includes: theory of the firm, consumer behavior, resource allocation, profit maximization, and competitive pricing.

Prerequisite: ECON 2010, 2015; MATH 2214 or 2326; Any WCIL II course.

ECON 3015 (3) 
Intermediate Macroeconomics
An advanced discussion of topics covered in macroeconomics, including: relationships among output, employment, interest rates, and prices; cause of change in these levels; role of government. Special emphasis on the distinctions among the Classical, Keynesian, Neoclassical, and Mon-
ECON 2010 and 2015. The application of economic theory to managerial practices including both public and private sector management. Various topics revolve around the nature of market structures and the business environment including: barriers to entry, product differentiation, and exclusivity. Topics include: supply and demand analysis, profit maximization in varying market structures, and the role of competition.

**ECON 3020**
Managerial Economics
A study of the analysis of quantitative data, with special emphasis on the application of statistical methods to economic and business problems.

**ECON 3100**
Introduction to Econometrics
A study of the analysis of quantitative data, with special emphasis on the application of statistical methods to economic and business problems. The course covers both static and dynamic games as well as games with varying degrees of information. The breadth of applications spans labor economics, international trade, environmental economics, industrial organization, corporate finance, and public choice.

**ECON 3110**
Game Theory
An introduction to the tool of game theoretic analysis with a strong emphasis on applications. The course covers both static and dynamic games as well as games with varying degrees of information. The breadth of applications spans labor economics, international trade, environmental economics, industrial organization, corporate finance, and public choice.

**ECON 3200**
Industrial Organization
An advanced course in modern industrial organization that studies the rational functioning of markets. Topics include: coverage of price discrimination; vertical control; price competition; entry and accommodation; reputation; predation; and the adoption of new technologies.

**ECON 3220**
Labor Economics
An extensive study of the labor market, this course begins with an overview of demand and supply in labor markets and then explores a variety of topics including the relationship between pay and productivity; the earnings of women and minorities; collective bargaining; earnings inequality; and the economic impact of unemployment.

**ECON 3300**
Money and Banking
A focus on the study of money: its nature, its function in society, its role in the economy. Representative units include: commercial banking; central banking; international banking; the Federal Reserve System; and credit and its effect and regulation.

**ECON 3310**
Public Finance
An analysis of government expenditures, redistribution programs, budgetary process, and financial methods; their economic impacts; and their political ramifications. Topics include: taxation and its economic effects; fiscal policy; and intergovernmental fiscal relations.

**ECON 3400**
International Trade and Finance
An advanced economics and finance course surveying topics in international trade and finance. Topics include: international trade theories; impacts of free trade, tariffs, quotas, and exchange controls; foreign exchange markets; balance of payments; and international monetary arrangements.

**ECON 3409**
Contemporary Issues in the Hawai'i Economy
Course analyzes various issues in today's Hawai'i economy. Topics include, but might not be limited to: economic diversification, the future of tourism, agriculture, high-tech, the military, construction, the local airlines, other industries, the role of government and taxation, the business climate, Neighbor Island economies, Hawaiian sovereignty.

**ECON 3410**
International Monetary Relations
An advanced course surveying topics in international monetary relations. Topics include: balance of payments; foreign exchange markets; international payments adjustment; past and present international and European monetary arrangements.

**ECON 3420**
Economic Development
The study of the economic development theory and problems faced by less developed countries trying to achieve economic development. The influence of population, entrepreneurship, and values are also examined.

**ECON 3430**
Environmental Economics
Economic principles applied to the analysis of contemporary environmental problems and their potential solutions.

**ECON 3500**
History of Economic Thought
An examination of the historical underpinnings of the private enterprise system, its characteristics, vitality, and dynamism in the context of classical and democratic capitalism. The dynamic system is examined in relation to the freedom and welfare of the individual and the society. Theorists such as Adam Smith, Karl Marx, John Maynard Keynes, Ludwig von Mises, and Milton Friedman, among others, are examined.

**ECON 3900**
Economic Issues of Asia
Contemporary issues such as trade, immigration, development, and international institutions of concern to Asian economies. 
Prerequisite: A grade of C- or higher in any WCIL II course; ECON 2015.

ECON 3990 (1 to 3)  
Nonpaid Internship  
See Internship Section.

ECON 3991 (1 to 3)  
Paid Internship  
See Internship Section.

ECON 4450 (3)  
The World Economy  
An examination of the complex set of internal and external variables that shape the progress and interrelatedness of economies of the world at various stages of development. Specific reference is made to selected data and reports.  
Prerequisite: ECON 2010 and 2015; Any WCIL II course.

ECON 4900 (3)  
Seminar in Economics  
A seminar in which students participate in class discussions and give oral presentations on contemporary economic issues. In addition, students will prepare a research paper on a topic of their choice. The issues discussed will vary depending on the course instructor and student interests.  
Capstone course.  
Prerequisite: ECON 3010 or 3020; ECON 3015. Senior standing.

ECON 4997 (1 to 3)  
Directed Readings in Economics  
Directed individualized readings.

ECON 6000 (3)  
Economics for Business  
Microeconomic and macroeconomic issues relevant to business managers. The course provides the tools necessary for efficient business decision-making and for an understanding of the economic environment in which business enterprises must operate. Topics include market structures, pricing strategies, cost analysis, monetary and fiscal policies, and the open economy.  
Prerequisite: ECON 2010 and MATH 1123, or equivalents. Graduate standing.

ECON 6020 (3)  
Managerial Economics  
Advanced applications of economic concepts in business decision-making. Oral and written presentations by seminar participants. Major topics include: practical applications of the theory of the firm; business decision-making under risk and uncertainty; demand analysis and consumer behavior; techniques in demand estimation; production analysis; cost analysis; profit measurements; planning and control; pricing strategies; and competitive strategies. Case studies based on actual business and economic conditions.  
Prerequisite: ECON 6000. Graduate standing.

ECON 6200 (3)  
Industrial Organization  
An intensive analysis and evaluation of the theories, quantitative measures, and institutional descriptions associated with the structure, conduct, and performance that characterize industry. The operations of the business firms are studied, including advanced principles of price and distribution theory and the determinants and consequences of market power.  
Prerequisite: ECON 6000 and MS 6000. Graduate standing.

ECON 6210 (3)  
Economics of Managerial Strategy  
An analysis of the determinants and nature of strategy. This course considers how the structure of a firm's industry affects its strategic choices and competitive behavior. Topics discussed include: aspects of pricing, entry, and exit in concentrated industries; and product differentiation, advertising, and technological change as competitive strategies.  
Prerequisite: ECON 6000. Graduate standing.

ECON 6400 (3)  
International Trade and Finance  
An advanced study of selected problems in international trade including: trade policy and theory; current issues in free trade vs. protectionism; trade and economic growth; the international monetary system; multinationals and international capital mobility; issues and prospects.  
Prerequisite: ECON 6000. Graduate standing.

ECON 6410 (3)  
International Financial Markets  
Explorations of the functions of the international financial markets. Course topics include: foreign exchange rates and their determination; international payment adjustments; currency futures; international arbitrage; and international cash management.  
Prerequisite: ECON 6000. Graduate standing.

ECON 6450 (3)  
The World Economy  
An examination of the complex set of internal and external variables that shape the progress and interrelatedness of economies of the world at various stages of development.  
Prerequisite: ECON 6000. Graduate standing.

ECON 6700 (3)  
Economics of Electronic Commerce  
Students develop a strategic understanding of the evolving electronic marketplace based on fundamental economics of the digital economy. This is accomplished by working on case studies, group projects, and individual research papers. Topics include electronic payment systems, pricing of service providers, and examining risk associated with uncertainty of product quality.  
Prerequisite: ECON 3010 and 3020. Graduate standing.

ECON 6990 (1 to 3)  
Nonpaid Internship  
See Internship Section.  
Prerequisite: Graduate standing.

ECON 6991 (1 to 3)  
Paid Internship  
See Internship Section.  
Prerequisite: Graduate standing.

ECON 6997 (1 to 3)  
Directed Readings in Economics  
Directed individualized readings.  
Repeatable for credit.
Prerequisite: Graduate Standing

ED – Education

ED 3000 Foundations of American Education (3)
Provide an introduction to the knowledge, skills, and dispositions that characterize the profession of education. Highlights the social, political, legal, historical, philosophical, and curricular foundations of American education. Advisor approval required.
Prerequisite: Advisor approval required.

ED 3040 Mathematics Concepts for Elementary Teachers (3)
An introduction to teaching strategies that facilitate effective learning experience in mathematics classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Advisor approval required.

ED 3100 Child and Adolescent Development for Educators (3)
An overview of the major concepts, principles, theories, and research related to the growth and development of children and young adolescents so that teacher candidates may construct learning opportunities that support the intellectual, psychological, and social development of diverse learners.
Prerequisite: Advisor approval required.

ED 3200 Education Research and Writing (3)
An introduction to the scholarship of teaching and learning. Engages teacher candidates in disciplined reflection about teaching and learning. Candidates conduct a literature review; develop a research plan; collect, analyze, and interpret data; and engage in action planning.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3300 Introduction to Teaching (3)
Provides an introduction to general principles of reflective teaching. Focuses on the recursive process of planning, teaching, assessment of student learning, and reflection on professional practice. Emphasizes strategies for effective classroom management and teaching. Culminates in the delivery of a lesson plan in a school setting.
Prerequisite: Advisor approval required.

ED 3310 Foundations of Culturally Based Education in Hawai‘i (3)
This course utilizes culturally responsive principles of teaching and learning, expert guest speakers from the Hawaiian community, guided reflection, critical discourse, and the practical application of the Na Honua Mauli Ola Hawaiian Cultural Pathways for Healthy and Responsive Learning Environments to the design of a culture-based unit plan. Participants in this course experience the land, history, culture and language of Hawai‘i to develop pedagogical practices that support the learning and well-being of Hawai‘i’s children.
Prerequisite: Completion of all General Education requirements and formally admitted into the School of Education.

ED 3400 Arts for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in arts classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.

ED 3420 Language Arts for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in language arts classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3421 Reading for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in reading classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3430 Foundations of English Language Learning (3)
An introduction to teaching strategies that facilitate an effective learning experience for English Language Learners. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.
Prerequisite: Completion of all General Education requirements and formally admitted into the School of Education.

ED 3440 Mathematics for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in mathematics classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3450 Science for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in science classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3460 Social Studies for Elementary Education (3)
An introduction to teaching strategies that facilitate effective learning experiences in social studies classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.
Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 3470 Health and P.E. for Elementary Education (3)
An introduction to teaching strategies that facilitate effective
tive learning experiences in health and physical education classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, assessment of student learning, and reflective teaching.

ED 3500 
(1 to 3) 
Service Learning in Elementary Education
Integrates practical classroom-based activities into the academic content of the accompanying education course. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession. Prerequisite: Restricted to Elementary Education majors or consent of instructor.

ED 3501 
(3) 
Elementary Education Field Experience in Arts and Humanities
Elementary Education Field Experience in the Arts and Humanities. Integrates practical classroom-based activities into the academic content of methods courses that address teaching and learning in the Arts, Language Arts, Reading, and Social Studies. Highlights refection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession. Teacher candidates observe and participate in elementary classrooms with the support of a mentor teacher. Prerequisite: Admission to the School of Education.

ED 3502 
(3) 
Elementary Education Field Experience in Math and Science
Elementary Education Field Experience in Math and Science. Integrates practical classroom-based activities into the academic content of accompanying methods courses that address teaching and learning in Mathematics and Science. The course highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession. Teacher candidates observe and participate in elementary classrooms with the support of a mentor teacher. Prerequisite: Admission to the School of Education.

ED 3600 
(3) 
Foundations of Special Education
An overview of the different categories of exceptionality, special education law, identification and placement procedures, current delivery systems, and basic philosophies and strategies relating to special education practice in an inclusion environment. Prerequisite: Admission to the B.Ed. in Elementary Education Program or consent.

ED 4500 
(3 or 9) 
Student Teaching
Provides teacher candidates with the opportunity to participate in a full-HTMe, supervised student teaching experience in a public or private school. This culminating experience engages teacher candidates in a practical application of their professional and pedagogical knowledge, skills, and dispositions in a school setting. Teacher candidates set learning goals, plan and implement instruction, analyze student learning, and reflect upon their professional practice in cooperation with a mentor teacher. They also participate in parent-teacher conferences, department meetings, and extracurricular activities. Capstone course. Prerequisite: Completion of all major courses for the B.Ed. degree and passing score on the PRAXIS II Content Knowledge Test. Corequisite: ED 4501.

ED 4501 
(3) 
Student Teaching Seminar
Provides teacher candidates with the opportunity to examine the complexities of curriculum planning, teaching, classroom management, assessment, and synthesis during the student teaching experience. Emphasizes reflection and provides opportunities for student teachers to interact with each other, receive continuous support during the student teaching experience, prepare for licensing and employment, and complete their professional portfolios. Prerequisite: Advisor approval required.

ED 4510 
(3) 
Elementary Clinical Experience Seminar
This course is a capstone course for the Elementary Education major that provides an opportunity to examine the complexities of curriculum planning, teaching, classroom management, assessment, and synthesis of the clinical practice experience. Emphasizes reflection by providing opportunities for teacher candidates to interact with each other, receive continuous support from their professor and mentor teacher, prepare for licensing and employment, and complete their professional portfolios. Capstone course. Prerequisite: Completion of all major courses for the B.Ed. degree and a passing score on the PRAXIS II Content Knowledge Test. Corequisite: ED 4512.

ED 4511 
(3-12) 
Elementary Clinical Experience I
This course is a capstone clinical practice course for the Bachelor of Education in Elementary Education. Full-HTMe, supervised clinical practice in a public or private school. Cumulating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects. Prerequisite: Completion of all major courses for the B.Ed. degree and a passing score on the PRAXIS II Content Knowledge Test.

ED 4512 
(3) 
Elementary Clinical Experience II
This course is a capstone practice course for the Bachelor of Education in Elementary Education. Full-HTMe, supervised clinical practice in a public or private school. Cumulating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects. Prerequisite: Completion of all major courses for the B.Ed. degree and passing score on the PRAXIS II Content Knowledge Test. Corequisite: ED 4510.

ED 6000 
(3) 
The Professional Educator
An introduction to the knowledge, skills, and dispositions that characterize the profession of education. Highlights the practical, historical, philosophical, political, legal, ethical, social, and cultural aspects of teaching in the American educational system. Prerequisite: Graduate standing.

ED 6100 
(3) 
Child and Adolescent Development for Educators
Provides an overview of the major concepts, principles, theories, and research related to development of children
and adolescents so that teacher candidates can construct learning opportunities that are adapted to diverse learners and support individual students’ development, acquisition of knowledge, and motivation.

Prerequisite: Graduate standing.

ED 6200 (3)
The Scholarly Teacher
An introduction to the scholarship of teaching and learning. This course engages candidates in disciplined reflection about teaching and learning. Candidates conduct classroom-based research to study the problems or issues in education, apply research results to practice, communicate results, and engage in self-reflection and peer review.

Prerequisite: Graduate standing.

ED 6300 (3)
The Reflective Practitioner
An introduction to general principles of reflective teaching. Focuses on the recursive process of planning, implementing, assessing, and refining teaching practices; developing teaching strategies and materials; and evaluating student learning through various assessments.

Prerequisite: Graduate standing.

ED 6310 (3)
Culturally-Responsive Education in Hawai‘i
This course utilizes culturally-responsive principles of teaching and learning, expert guest speakers from the Hawaiian community, guided reflection, critical discourse, and the practical application of the Na Honua Mauli Ola Hawaiian Cultural Pathways for Healthy and Responsive Learning Environments to the design of a culture-based unit plan. Participants in this course experience the land, history, culture and language of Hawai‘i to develop pedagogical practices that support the learning and well-being of Hawai‘i’s children.

Prerequisite: Graduate standing.

ED 6401 (3)
Elementary Curriculum I
An introduction to teaching strategies that facilitate effective learning experiences in Elementary Arts, Language Arts, Reading, and Social Studies classes. Major areas of focus include curriculum theory and practice, instructional design, classroom management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6402 (3)
Elementary Curriculum II
An introduction to teaching strategies that facilitate and effective learning experience in Elementary mathematics and science classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6420 (3)
English Curriculum and Instruction
An introduction to teaching strategies that facilitate an effective learning experience in English classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6430 (3)
The English Language Learner
An introduction to teaching strategies that facilitate an effective learning experience for English Language Learners. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6440 (3)
Math Curriculum and Instruction
An introduction to teaching strategies that facilitate an effective learning experience in Mathematics classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6450 (3)
Science Curriculum and Instruction
An introduction to teaching strategies that facilitate an effective learning experience in science classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6460 (3)
Social Studies Curriculum and Instruction
An introduction to teaching strategies that facilitate an effective learning experience in social studies classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6470 (3)
World Languages Curriculum and Instruction
An introduction to teaching strategies that facilitate an effective learning experience in World Languages classes. Major areas of focus include curriculum theory and practice, instructional design, classroom and lab management, and assessment techniques.

Prerequisite: Graduate standing.

ED 6501 (1 to 3)
Elementary Education Field Experience I
Field experience that integrates practical classroom-based activities into the academic content of the accompanying elementary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: Graduate standing.

ED 6502 (1 to 3)
Elementary Education Field Experience II
Field experience that integrates practical classroom-based activities into the academic content of the accompanying elementary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: Graduate standing.

ED 6503 (3)
Elementary Education Field Experience III
Field Experience that integrates practical classroom-based
activities into the academic content of the accompanying elementary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: ED 6501 and 6502.

ED 6505 (3) 
Secondary Education Field Experience I  
Field Experience that integrates practical classroom-based activities into the academic content of the accompanying secondary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: Graduate standing.

ED 6506 (3) 
Secondary Education Field Experience II  
Field Experience that integrates practical classroom-based activities into the academic content of the accompanying secondary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: Graduate standing.

ED 6507 (3) 
Secondary Education Field Experience III  
Field Experience that integrates practical classroom-based activities into the academic content of the accompanying secondary education seminar courses. Highlights reflection; develops the candidate’s professional and pedagogical knowledge, skills, and dispositions; and fosters a commitment to the teaching profession.

Prerequisite: ED 6505 and 6506.

ED 6510 (3) 
Elementary Clinical Practice Seminar  
Provides an opportunity to examine the complexities of curriculum planning, teaching, classroom management, assessment, and synthesis of the elementary clinical practice experience. Emphasizes reflective practice by providing opportunities for teacher candidates to interact with each other, receive continuous support from their professor and mentor teacher, prepare for licensing and employment, and complete their professional portfolios.

Prerequisite: Successful completion of all required core, field, and specialized courses. Passing score on the PRAXIS II Elementary Content Knowledge Test.

Corequisite: ED 6512.

ED 6511 (3-9) 
Elementary Clinical Practice I  
Full-HTMe, supervised clinical practice experience in a public or private elementary school. Culminating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects.

Prerequisite: Successful completion of all required core, field, and specialized courses. Passing score on the PRAXIS II Elementary Content Knowledge Test.

ED 6512 (6) 
Elementary Clinical Practice II  
Full-HTMe, supervised clinical practice experience in a public or private elementary school. Culminating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects.

Prerequisite: Successful completion of all required core, field, and specialized courses. Passing score on the PRAXIS II Elementary Content Knowledge Test.

ED 6520 (3) 
Secondary Clinical Practice Seminar  
Provides an opportunity to examine the complexities of curriculum planning, teaching, classroom management, assessment, and synthesis of the secondary clinical practice experience. Emphasizes reflective practice by providing opportunities for teacher candidates to interact with each other, receive continuous support from their professor and mentor teacher, prepare for licensing and employment, and complete their professional portfolios.

Prerequisite: Successful completion of all required core, field, and specialized courses. Verification of content knowledge in the concentration area, in accordance with HTSB requirements.

Corequisite: ED 6522.

ED 6521 (3-9) 
Secondary Clinical Practice I  
Full-HTMe, supervised clinical practice experience in a public or private secondary school. Culminating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects.

Prerequisite: Successful completion of all required core, field, and specialized courses. Passing score on the PRAXIS II Elementary Content Knowledge Test.

ED 6522 (6) 
Secondary Clinical Practice II  
Full-HTMe, supervised clinical practice experience in a public or private secondary school. Culminating experience that involves practical application of professional and pedagogical knowledge, skills, and dispositions in a school setting. Opportunities to engage in reflective practices, such as planning, implementing, and assessing curriculum initiatives and projects.

Prerequisite: Successful completion of all required core, field, and specialized courses. Verification of content knowledge in the concentration area, in accordance with HTSB requirements.

Corequisite: ED 6510.

ED 6700 (3) 
The Exceptional Learner  
This course provides an overview of the different categories of exceptionality with regard to students with special needs. Candidates will also be introduced to special education law, identification and placement procedures, current delivery systems, and basic philosophies and strategies relating to special education practice in an inclusion environment.

Prerequisite: Graduate standing.

ED 6950 (1 to 3) 
Practicum in Education  
Prerequisite: Graduate standing.
ED 6997  
Directed Readings in Education  
Directed individualized readings.  
Prerequisite: Graduate standing.

ED 7000  
Research Methods in Education  
Introduction to research design and both qualitative and quantitative methods for conducting educational research. Students will learn how to read and synthesize educational research, design a research study that improves the practice of teaching, analyze and interpret data, and formally report research findings. This course is designed to equip students with the epistemological, methodological, analytical, and ethical knowledge as well as the practical expertise required of a professional educational researcher. Capstone course.  
Prerequisite: ED 6500. Graduate standing.

ED 7100  
Professional Paper I  
Initial design and development of a major research paper. The professional paper should be of the highest quality and should reflect the student's best efforts in applying the knowledge, skills, and professional dispositions gained in graduate studies. Capstone course.  
Prerequisite: ED 7000 or concurrent. Graduate standing.

ED 7200  
Professional Paper II  
Continuing design and development of the major research paper. The professional paper should be of the highest quality and should reflect the student's best efforts in applying the knowledge, skills, and professional dispositions gained in graduate studies. Capstone course.  
Prerequisite: ED 7100. Graduate standing.

ENG – English  

ENG 1500  
Ways of Reading: Literature, Film, Culture  
This course explores ways to interpret, analyze, and compose writing. Students are introduced to film and literary analysis, interpretive theories, and to the study of English in history and culture. The course also explores career opportunities for Writing minors, English majors and minors, and Film Studies minors.  
Prerequisite: Any WCIL I course.

ENG 2000  
Introduction to Literature  
A general introduction to poetry, drama, and fiction. This course focuses on the characteristics of different literary genres, interpretation of literature, and the application of literary concepts. Emphasis is on writing about literature.  
Prerequisite: Any WCIL I course.

ENG 2101  
Representations of Pacific Life  
This course introduces students to selected texts from some of the many cultures of Oceania and to the critical skills they will need to get the most out of these cultural productions. It focuses on an overview of Oceanic literature, emphasizing prose fiction, poetry, drama, and other genres such as journalism, film, and media.  
Prerequisite: Any WCIL I course.

ENG 2201  
Literary Utopias and Dystopias  
Students will study texts evoking imaginary futures, both utopic and dystopic. Students will analyze utopian/dystopian literature not only as idealistic/nighHTMarish visions of human potentials, but also as historicized social critiques, explorations of social, political, and economic systems, and ruminations on moral choices.  
Prerequisite: Any WCIL I course.

ENG 2202  
Popular Fiction  
This course examines mass-marketed commercial fiction. Students will distinguish between critical and popular reception and consider each as possible measurements of literary quality. We will study the systems and institutions that create commercially successful books – from the publishing industry to reviewers to book awards – and analyze the cultural values reflected in these systems. The course will cover both contemporary and historically popular books.  
Prerequisite: Any WCIL I course.

ENG 2203  
Banned Books  
This course examines some of the many written works that have been challenged based on their political or religious views or their perceived obscenity, violence, or sexual explicitness. Students will consider concepts such as intellectual freedom and freedom of speech and the potential reasons for and results of limiting such freedoms.  
Prerequisite: Any WCIL I course.

ENG 2204  
Monsters, Mutants and Aliens in Literature and Pop Culture  
This course explores literary and pop culture texts about the non-human to articulate ethical questions concerning beliefs about what it means to be human. Class materials explore the experiences of those generally seen to be outside humanity: monsters, mutants, and aliens. They include classic and contemporary novels such as Mary Shelley's Frankenstein and Octavia Butler's gender-bending alien novel, Dawn, and modern television and film including Buffy the Vampire Slayer, The X-Files, Alien, and The X-Men. Class discussion and written work will ask students to develop and defend their own broadly informed, nuanced, and thoughtful definition of what it means to be human.  
Prerequisite: Any WCIL I course.

ENG 2301  
World Film Studies  
World Film Studies examines important feature films that are rarely seen in the United States. This course briefly surveys several national cinemas and international trends, with particular attention to the increasing globalization of the film industry. Basic film concepts and techniques of critical analysis will be explained.  
Prerequisite: Any WCIL I course.

ENG 2510  
World Literature I  
This course examines texts from ancient HTMes through the 16th century, including works originally written in English and works translated into English, from both Western and non-Western traditions. Students will explore questions of context, audience, purpose, structure, and technique while improving their own writing and analytical skills.  
Prerequisite: Any WCIL I course.

ENG 2520  
World Literature II  
This course examines texts from the late 16th century to the
present, including works originally written in English (in British, American, colonial, and postcolonial contexts), and works translated into English. Students will explore questions of context, audience, purpose, structure, and technique while improving their own writing and analytical skills. **Prerequisite:** Any WCIL I course.

**ENG 3100**

**British Literature to 1800**

The study of Medieval, Elizabethan, Restoration, and 18th-Century British literature, beginning with Beowulf and ending with 18th-century novelists. Chaucer, The Gawain Poet, Marlowe, Sidney, Surrey, Spenser, Shakespeare, Donne, Jonson, Milton, Behn, Congreve, Swift, and Fielding may be among the writers studied. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3101**

**Shakespeare on Screen**

Examines the history and impact of film and television adaptations of Shakespeare's plays. Special emphasis is placed on how culture, events, and narrative and cinematic traditions shape the production and reception of Shakespeare's works. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150; any 2000-level ENG course.

**ENG 3102**

**19th-Century British Literature**

The course examines works in various genres by Romantic and Victorian British authors, such as Blake, Byron, Keats, Wordsworth, Austen, Tennyson, the Brontes, and Dickens. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3122**

**19th-Century American Literature**

A survey of authors of the American Renaissance, such as Emerson, Thoreau, Hawthorne, Melville, Poe, and Whitman, and/or the Gilded Age, such as Twain, Howells, James, and Dickinson. The instructor may choose to include some Puritan or early national writers or to read the canonical writers mentioned above in light of some of the more popular genres of the nineteenth century, such as women's fiction, protest novels, and slave narratives. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3134**

**Chinese Literature**

The course covers China's historical development of literary forms (tales, histories, essays, poems, plays) leading up to fiction (short stories and novels) as a genre, from the earliest dynastic era up through the 21st century. The examination of literary works will be contextualized through the social and intellectual milieu that shaped Chinese writers as they endured successive waves of transformation brought about by violent revolutions: political, philosophical, economic, ideological, cultural, and technological. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3135**

**Japanese Literature**

The course provides a solid grounding in the historical development of Japanese literature from the Yamato era up through the 21st century. Narrative forms examined may include classical forms such as the tale, diary, monogatari, and zuihitsu, and the modern form of short stories, I-novels, graphic novels and serial phone novels. Special focus will be on the social and intellectual milieu that shaped Japanese writers and their literary works as Japan faced political and economic pressures to open itself to Western values and notions of modernity. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3140**

**Biography**

An introduction to the literary genre known as biography: its nature, purpose, uses, relationship to history and to fiction, and varieties of format. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3145**

**Nonfiction Film**

Students are introduced to the genres of nonfiction film - documentary, docudrama, and historical features - and to the theory, history, and ideology of fact-based film. The focus is not a given film's historical accuracy so much as the writers' and directors' strategies of representation, which profoundly affect the audience's perceptions. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3150**

**Television Studies**

Television is often casually dismissed as mindless entertainment, but it is also a powerful cultural form that shapes how people see the world. This course will focus on critical “readings” of television’s past and present forms as well as its influence on literature, film, music, and digital media. Students will watch influential TV shows, examine different TV genres (sitcoms, talk shows, news programming and “reality” TV), read representative scripts and teleplays, and study the evolution of the medium of television from its early beginnings up to its current integration with other forms of digital communication. **Prerequisite:** Any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3202**

**Literature of Slavery**

Though slavery was abolished after the Civil War, its legacy persists and continues to provide a compelling subject for American literary artists. This course will focus on representations of slavery and its aftermath in American literature, from antebellum slave narratives to twentieth-century novels, dramas, and films. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

**ENG 3203**

**Pidgin Literature**

This class offers an introduction to Pidgin literature in Hawai‘i, focusing on fiction, poetry, drama, and essays. Some of the topics covered include the historical development of Pidgin literature, the establishment of a narrative voice reflecting the ethnic populations of Hawai‘i, serious and intellectual themes conveyed through Hawai‘i Creole English writings, debates around Pidgin’s linguistic and dialectal authenticity, and the connection between Pidgin literature and Hawai‘i’s local comedy. Proficiency in Pidgin is recommended but not required. **Prerequisite:** A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.
ENG 3206 (3)
British Comic Literature
Students will study comic British texts across literary periods, from medieval through contemporary, within theoretical frameworks of culture, class, and gender. Students will study comic theory, consider how sociocultural factors shape responses to humor, and gain a deeper understanding of British literature, culture, and the multiple dimensions of humor.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3222 (3)
Asian Dramatic Literature
An overview of Asian dramatic literatures, dramatic theories, and theater histories, focusing on traditional theater genres still practiced by the peoples of India, Indonesia, China, and Japan. The course draws on dramatic texts, transcriptions of plays, scholarly texts, video documentation, and performance techniques.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3223 (3)
Asian Literature
The course provides a survey of various Asian literatures that may include both classical and modern works from a variety of regions of Asia—Asia Minor, S. Asia, S.E. Asia, and E. Asia, except China and Japan. Literary genres examined may include poetry, fiction, drama, histories, biographies, and essays.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3224 (3)
Ethnic Literature
The experience of ethnic groups in America's pluralistic society, as expressed in novels, short stories, poetry, drama, autobiography, and film. Groups studied may include Asian Americans, Black and Native Americans, Hawaiians, Hispanics, and White Ethnics.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3226 (3)
Hawai'i Writers
A course that involves students with the literary genres of poetry, fiction, and drama. While short works by several well-known authors writing about Hawai'i are examined for historical perspectives (Captain James Cook, Mark Twain, Jack London), the emphasis is on contemporary writers who make Hawai'i their subject. Ozzie Bushnell, Aldyth Morris, Maxine Kingston, Eric Chock, Darrell Lum, Lois-Ann Yamanaka, Cathy Song, and Marie Hara are among the current Hawai'i writers studied.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3227 (3)
Hawai'i and the Pacific in Film
This class offers a general introduction to popular, art, indigenous, and nonfiction films focused on Hawai'i and the Pacific. Particular emphasis is given to the shifting cultural and rhetorical contexts of films, and to their social impact on the Pacific region and beyond.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3228 (3)
Fantasy Literature
Great works from past to present that have endured through their relevance to the human condition. The course includes works by Poe, James, Borges, LeGuin, and others.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3229 (3)
Literature of Travel
Great travel writers take you not only on an exterior journey to places and people described freshly and vigorously, but also on an interior journey as the authors' adventures challenge them to reevaluate their philosophies of life. This course will introduce you to the development of travel writing from the early Greek historian Herodotus, through explorers such as Marco Polo to the modern era of travelers who seek to learn about other cultures.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3250 (3)
Texts and Gender
This course examines the concept of gender in relation to texts. The particular emphasis varies. Students may analyze texts by writers of a particular gender or sexual orientation, representations of femininity and masculinity, or social constructions of gender in and by texts. Repeatable for a total of six credits when the focus has changed.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3251 (3)
Sex, Power and Narrative
The course examines stories by and about women, and yet it is not a course about women. We will look at the windows through which various women have looked at life, but that life, and even those windows, are not exclusively theirs. We will find in women's stories the conventions that have become integral parts of what all of us think of as story. We will move some HTMs chronologically, some HTMs by theme, to see how women's story conventions have evolved, and we will be inclusive in our definition of "story." We will look at works from Japan, from Europe, from America - and from American women of several cultures. We will look at novels, short stories, and also movies and television.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3252 (3)
20th-Century American Women Writers of Color
This upper-division literature course explores identity politics shaped by class, race, gender, and sexuality within the poetry, prose fiction, drama, biographical and critical essays by Native-American, African-American, Asian-American, Latina/Chicana, and Pacific-Islander writers. Discussion themes include power and status, erasure and marginality, and the establishment of narrative voice as counter-narrative within dominant forms of literary discourse.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3300 (3)
Theoretical Perspectives
Courses in the 3300 series explore ways theories shape interpretations in both academe and everyday life. Contemporary theories are usually emphasized, but a study of earlier, alternative, minority, indigenous, and non-Western approaches may also be included. Selected themes and foci will be reflected in each course title.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3310 (3)
Reading Everyday Life
This course will examine how texts encountered in daily life shape consciousness and direct people to accept social arrangements involving work routines, gender roles, relationships with technology and interactions with other people and other cultures. It is based on the premise that cultural life involves constantly “reading” and interpreting the world around us—a world of advertising, literature, visual art, music, media messages, body language and dress codes. Students will learn to critically analyze this rich world of meaning by reading both primary source material and relevant works of cultural theory, rhetoric, literary studies and media studies.
Any WCIL II course; WRI 1150 or any 2000-level ENG course

ENG 3330 (3)
Film Theory and Criticism
An introduction to the critical analysis of film. Examines narrative form in movies from a variety of theoretical perspectives. The course also explores how cinematic narratives are affected by changes in aesthetics, culture, economics, politics, and technology.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 3350 (3)
Literature Adapted to Screen
A comparative study of the poetics and rhetorics of narratives captured on page and on screen. By examining written texts (prose, plays, myths, biographies and histories) and their adaptations to the screen (or vice versa), students will learn how texts change as they are translated from one medium to another.
Prerequisite: A grade of C- or higher in any WCIL II course; WRI 1150 or any 2000-level ENG course.

ENG 4100 (3)
Shakespeare Seminar
A critical study of Shakespeare, taking into account the cultural, historical, and literary context in which he wrote. Six to nine plays are studied, among them: Hamlet, King Lear, Macbeth, A Midsummer Night’s Dream, The Tempest, Henry IV, Part I, and The Merchant of Venice. Capstone Course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4120 (3)
Seminar in Modernism
The forms and themes particular to the modernist and postmodernist movements through the works of writers such as Woolf, Faulkner, Conrad, Atwood, Kingston, and others. Innovations in narrative technique, the movement away from traditional plot, and social criticism are emphasized. Capstone Course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4300 (3)
Seminar in Textual Criticism
An examination of competing approaches to the analysis of texts. The course reviews perspectives that emphasize differences between rhetorical and creative texts, as well as perspectives that collapse generic categories. Attention may be given to traditional and contemporary Euro-American approaches as well as to alternative minority, indigenous, and non-Western approaches. Capstone course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4320 (3)
Seminar on Postcolonial Literature
The study of texts written in English by authors from countries or territories that have experienced some form of colonization. Altogether, the production of literature through the influence of the West on the peoples of previously remote parts of the world is the subject of this course. This literature often addresses situations and problems encountered by the natives and their relationship to the colonizing country, how they adapt to the new culture, how they will continue under their own rule after independence, and how the postmodern global society affects their experience of culture. Such writers as Chinua Achebe, Wole Soyinka, Bharati Mukherjee, and Haunani Kay Trask are included. Capstone Course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4901 (3)
Senior Thesis I
Part one of a two-part capstone experience that requires an extensive research paper (approximately 50 pages) on a special topic in English, or a substantial creative project. The student is required to spend two semesters on the project. The first semester is devoted to designing the project, conducting research, constructing a reading list or working bibliography, and making notes on the readings in consultation with the instructor. Completion of an outline and a draft of one chapter is a typical goal by the end of the first semester. A thesis committee will be selected by the semester’s end. Capstone course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4902 (3)
Senior Thesis II
A continuation of ENG 4901. The student undertakes writing and defense of the thesis. Capstone course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENG 4910 (1)
English Major Portfolio Capstone
In this Directed Study capstone to the English major, students compile their best work into a portfolio and reflect on their progress in the major. Students will meet individually with the Portfolio Advisor to determine the final contents of the Major Portfolio, select what they consider the best six artifacts (or more if desired), and write a reflective essay that makes connections among courses, evaluates their progress as majors, and describes their major work as a whole. Capstone course.
Prerequisite: HUM 3900 and two upper-division ENG or WRI courses, or department approval.

ENVS – Environmental Science/Studies

ENVS 1020 (3)
Introductory Meteorology
A survey of the physical and chemical principles of atmospheric science applied to elementary descriptions and interpretations of atmospheric phenomena.
Prerequisite: CHEM 1000 or 1020.
ENVS 1030  Tropical Ecology and Sustainability (3)
This summer General Education course consists of a travel component to Costa Rica. After an introduction to the issues and questions pertaining to sustainability and the impact of humans on tropical ecosystems, students will examine how human values and choices affect ecosystems and develop their own perspectives on sustainability from in-country experiences.

ENVS 1040  Introduction to Fresh Water Systems (3)
A survey of the biology, chemistry, physics, and geology of fresh water systems such as lakes, wetlands, and rivers. Prerequisite: Any 1000-level BIOL course, BIOL 2030, or 2050; CHEM 1000 or 1020.

ENVS 1500  Natural Disasters (3)
The Earth experiences natural disasters as a result of volcanic eruptions, earthquakes, landslides, flooding, storms, drought and wildfires. These events dramatically impact humanity and the environment. Increasing population and poor land use practices compound the effects of natural disasters. This course is designed for undergraduate students of any major who are interested in understanding natural disasters and how we can minimize the dangers and damages of these events. We will review case histories of recent and historical events, focusing on how forecasting, prediction, warning systems, education, and planning can reduce human vulnerability to natural disasters.

ENVS 2000  Principles of Environmental Science (3)
An introduction to the analysis of environmental problems from a scientific perspective using fundamental principles from the biological and physical sciences.

ENVS 2001  Principles of Environmental Science Laboratory (1)
Laboratory and field component of ENVS 2000. Prerequisite: ENVS 2000 (or concurrent); CHEM 1021 or 2051.

ENVS 3000  Sustainability and the Environment (3)
Sustainability offers a rich framework for addressing complex human-environment interactions within our society; environmental science provides a basis for inquiry into how those interactions shape and are shaped by ecosystems. This course uses both to examine the nexus between human innovation and consequent ecological impacts (both negative and positive) as related to current and often controversial environmental and social issues. The goal of the course is to provide students with not only an understanding of the basic science behind the issues, but also an ability to think across disciplines to assess how these issues might be addressed sustainably. Prerequisite: Any Written Communication and Information Literacy II course.

ENVS 3002  Applications of Environmental Science (3)
The course emphasizes the use of the scientific method and the results of scientific study to explore and understand issues of environmental concern. The major objective is the presentation of the human inhabited biosphere as a system amenable to study and scientific understanding. Prerequisite: ENVS 2000; or [BIOL 1000 or 1500] and [CHEM 1020, GEOL 1000, or MARS 1000]; or BIOL 2052, CHEM 2052, and GEOL 2000.

ENVS 3003  Applications of Environmental Science Laboratory (1)
Laboratory and field component of ENVS 3002. Prerequisite: ENVS 2001; Any WCIL II course.

ENVS 3010  Environmental Impact Analysis (1 to 3)
Methods of assessing and predicting physical, chemical, biological, social, and economic impacts on the environment resulting from human activities. The course includes preparation and review of environmental impact reports. Prerequisite: ENVS 2000.

ENVS 3020  The Environmental Policy Process (3)
Students will examine the environmental policy making process from different points of view, whether as an environmental scientist or citizen activist, at different government levels (city, state or federal), and across different media (air, water, waste). Students will gain a practical understanding of existing environmental policies as well as the process by which new environmental policies are proposed, designed, implemented and evaluated. An understanding of the process helps students to identify opportunities to advocate for environmental change. Prerequisite: ENVS 2000 or 3000 and any Com Skill A.

ENVS 3030  Earth Systems and Global Change (3)

ENVS 3200  Photovoltaic Systems Design (3)
This course introduces the fundamental principles of solar energy and photovoltaic systems design. It includes the design of a safe, code-compliant photovoltaic system and preparation of permit-quality technical drawings. The course provides the skills suitable for a supervised, entry level position in the photovoltaic industry, as specified by the North American Board of Certified Energy Practitioners (NABCEP). Prerequisite: ENVS 2000, MATH 1115, or MATH 1130.

ENVS 3990  Nonpaid Internship (1 to 3)

ENVS 3991  Paid Internship (1 to 3)

ENVS 4000  Methods of Environmental Science (3)
This course will present advanced analytical technologies current in real world applications of environmental science. Computer-driven data analysis, modeling, and presentation technology has become vital to the understanding and reporting of problems and issues that constitute today's ap
Applications of environmental science. This course will present specific applications in a hands on approach. 
Prerequisite: ENVS 3002.

ENVS 4001 Methods of Environmental Science Laboratory
Laboratory component of ENVS 4000. 
Prerequisite: ENVS 3003 and 4000 or concurrent.

ENVS 4040 Sustainable Building Science
This course examines the fundamentals of integrated building design, including the history, science, and technology of green building. Emphasis is placed on the Leadership in Energy and Environmental Design (LEED) rating system and this course helps prepare students to obtain one of the U.S. Green Building Council’s credentials (LEED Green Associate or LEED Accredited Professional).
Prerequisite: ENVS 3000.

ENVS 4050 Remote Sensing
The physics and techniques of remote sensing presented through an exploration of physical characteristics of terrestrial and marine environments.
Prerequisite: ENVS 2000; MATH 3306; PHYS 2052; Any WCIL II course.

ENVS 4100 Society and Environment: Contemporary Issues Seminar
A critical analysis of contemporary environmental issues that face society. The course includes formal seminars, informal group discussions, and a comprehensive review paper. Capstone course. 
Prerequisite: ENVS 3002.

ENVS 4200 Business and Environment: Contemporary Issues Seminar
A critical analysis of contemporary environmental management issues. The course includes formal seminars, informal group discussions, and a comprehensive review paper. 
Prerequisite: ENVS 3002. Senior standing.

ENVS 4300 Advanced Photovoltaic Systems Design
This is an advanced course in photovoltaic systems design for people considering a career in the solar electric industry. The detailed design of stand-alone and utility-interactive photovoltaic systems is covered with emphasis on compliance with the National Electric Code. Both residential and small commercial/institutional systems are covered (up to 30 kW). This course is based, in part, on the knowledge typically required of industry practitioners as specified by the North American Board of Certified Energy Practitioners (NABCEP) and can help in preparation for the NBCEP PV installer certification exam. 
Prerequisite: ENVS 3200 or MATH 2214.

ENVS 4400 Environmental Science Seminar
A critical analysis of recent environmental scientific literature. The course includes formal seminars, informal group discussions, a comprehensive review article, and a research project proposal. 
Prerequisite: ENVS 3002.

ENVS 4600 Environmental Science Research
The execution of the research project proposed in ENVS 4400. The course includes oral status reports, a final written report, a final formal seminar, and a poster presentation of research project results. 
Prerequisite: ENVS 4400.

ENVS 4950 Environmental Studies Practicum
Senior practicum opportunity in environmental studies. 
Prerequisite: ENVS 3002.

ENVS 6010 Global Climate Change
This course discusses the history of the Earth’s climate since its formation to the present HTMe. Focus will be placed on natural mechanisms that cause large-scale, global climate change, from the long-term to the abrupt, and how anthropogenic climate change fits into this context. 
Prerequisite: Graduate standing.

ENVS 6030 Sustainable Energy Systems
This course examines energy systems, including resource exploration, environmental effects and economics. The current mix of energy sources and technologies are examined along with sustainable options, with an emphasis on quantitative analysis based on scientific principles (thermodynamics and kinetics). Sustainable energy options examined include nuclear energy, biofuels, hydropower, ocean, geothermal, wind and solar energy. 
Prerequisite: Graduate standing.

ENVS 6040 Sustainable Building Science
This course examines the fundamentals of integrated building design, including the history, science, and technology of green building. Emphasis is placed on the Leadership in Energy and Environmental Design (LEED) rating system and this course helps prepare students for obtaining one of the U.S. Green Building Council’s credentials (LEED Green Associate or LEED Accredited Professional). 
Prerequisite: Graduate standing.

ENVS 6050 Watershed and Wetland Systems
An integrated view of ecological systems. An introduction to concepts in geomorphology, hydrology, biogeochemistry, primary production, carbon cycling, and abiotic and biotic controls on nutrient cycling. Emphasis on research investigating the effects of natural and anthropogenic stressors on ecological resources at multiple spatial and temporal scales. Development of indicators of watershed/wetland condition, and comparative values of ecological systems. 
Prerequisite: Graduate standing.

ENVS 6060 Geographical Information Systems 2: Spatial Analysis
GIS is about getting answers to questions so you can make intelligent decisions. In this course you will use ArcGIS to describe the distribution of a set of features, and to discern patterns and measure relationships among these features. Topics in this course include the use of raster GIS tools for natural resource modeling and environmental analysis; the raster structure and its advantages and limitations; appropriate date and procedures; simple raster surface modeling and image integration; map algebra concepts using ArcGIS Spatial Analyst; proximity and dispersion modeling; cost surfaces and many of the vector-based analytical tools and
techniques available within ArcGIS.
Prerequisite: GEOG 4700 or permission of instructor. Graduate standing.

ENVS 6070  Conservation and Sustainability in the Tropics  (3)
This summer graduate course consists of a two week travel component to a tropical ecosystem, after a four week online introduction to the issues and questions involved in understanding the impact of humans on tropical ecology and sustainability. Students will examine how human values and choices affect tropical ecosystems, conservation and sustainability so they can develop their own perspective from their experiences, culminating in a final assignment and discussion submitted after returning home.
Prerequisite: Graduate standing.

ENVS 6150  Environment, Power and Society  (3)
With the publication of Environment, Power, and Society in 1971, H.T. Odum changed the lives of countless individuals; altering their worldviews by starting them along a quantitative, systems-oriented path toward holistic thinking. This course will introduce the Energy Systems Language, a visual mathematics capable of representing the details and bringing into focus the complexities of any system, and through the macroscope, his tool for eliminating detail and gaining an overview of the entire system. For many, the concepts in Environment, Power, and Society are profound ideas and methods that clear away much of the mystery about integrating nature and humanity to the benefit of both.
Prerequisite: Graduate standing.

ENVS 6200  Advanced Photovoltaic Systems Design  (3)
This is an advanced course in photovoltaic systems design for people considering a career in the solar electric industry. The detailed design of stand-alone and utility-interactive photovoltaic systems is covered with emphasis on compliance with the National Electric Code. Both residential and small commercial/institutional systems are covered (up to 30kW). This course is based, in part, on the knowledge typically required of industry practitioners as specified by the North American Board of Certified Energy Practitioners (NABCEP) and can help in preparation for the NBCEP PV installer certification exam.
Prerequisite: ENVS 3200 or MATH 2441. Graduate standing.

ENVS 6300  Modeling and Simulation  (3)
This course introduces concepts of analytic modeling and computer simulation to improve and assist in the understanding of and decision-making about environmental systems. Topics include: introduction of modeling and simulation concepts; review of relevant math and statistics; extensive hands-on use of computer tools; and application to a variety of environmental problems.

ENVS 6920  Special Topics in Environmental Science  (3)
The title, content and prerequisites for this course will vary with instructor and need in the program. The course may be repeated when the title and content have changed.
Prerequisite: Graduate standing.

ENVS 6990  Nonpaid Internship  (1 to 3)
Prerequisite: Graduate standing.

FIN – Finance

FIN 2200  Introduction to Personal Finance  (3)
Patterns of individual and family earnings; budgeting principles, consumer credit practices and sources; insurance, savings, investment, and home ownership guidance. The course has been designed to be practical and comprehensive. Students cannot receive credit for both this course and FIN 3200.
Prerequisite: MATH 1130 or higher.

FIN 3000  Business Finance  (3)
A survey of finance and introduction to investments. Course units include: financial analysis, forecasting, and valuation; alternative sources of financing, including analysis of debt and equity securities from the viewpoints of both the firm and the investor; and management of current, intermediate, and long-term assets.
Prerequisite: ACCT 2010; MATH 1130 or higher.

FIN 3200  Personal Finance  (3)
Patterns of individual and family earnings; budgeting principles, consumer credit practices and sources; insurance, savings, investment, and home ownership guidance. The course has been designed to be practical and comprehensive.
Prerequisite: MATH 1130 or higher; Any WCIL II course.

FIN 3300  Investments  (3)
A fundamental course in investments. The course features: security analysis and portfolio management; analysis of financial statements; valuation of stocks and fixed-income securities; and the study of efficient diversification and risk-return management.
Prerequisite: FIN 3000.

FIN 3400  Financing the Money and Capital Markets  (3)
A course on obtaining short-term funds and investing cash in marketable securities in the money markets; rating reviews in connection with the sale of bonds and preferred stock through private placement, negotiated, or competitive public offering; selling common stock through direct or rights offering. Detailed steps and complete example in selling fixed income securities and selling common stock.
Prerequisite: FIN 3000.

FIN 3500  Planning: Business Owners  (3)
A course that focuses on common business problems and planning objectives. It includes business continuation issues, buy-sell agreements, stock redemptions, planning for the disability of a business owner, and managing risk in a closely held business.
Prerequisite: FIN 3000.

FIN 3510  Insurance and Financial Planning  (3)
A course that discusses the basic concepts of risk management and insurance. It includes legal principles; different kinds of risks and insurance; and the insurance industry. It also focuses on the financial planning process that includes the HTMe-value-of-money concepts; income tax planning issues; and the regulatory and ethical environment of financial planning.
Prerequisite: FIN 3000.
FIN 3600 Trading Derivatives (3) A course that covers the theory and application of futures, swaps, and options. It analyzes the valuation and risk of derivatives as well as focuses on the practical application of derivatives in debt and portfolio management. Prerequisite: FIN 3000.

FIN 3610 Advanced Derivatives (3) A continuation and extension of the study of a basic course in derivatives. The theory and application of futures, swaps, and options are reviewed. It includes advanced methods for the analysis of the valuation and the risk of derivatives in debt and portfolio management. Prerequisite: FIN 3600.

FIN 3650 Corporate Risk Management (3) The course will make the student familiar with the mathematical and statistical concepts and methods of modern risk management, covering all modern types of risk (market risk, credit risk, and operational risk), their assessment and management. The risks will be discussed on an individual as well as on a portfolio level. Prerequisite: FIN 3000.

FIN 3700 Real Estate Finance (3) A basic course in real estate finance, focusing on methods, processes, and caveats. Course units include: money markets, interest rates, real estate financing; case illustrations demonstrating lending policies; typical problems involved in financing real property; evaluation of income property investment alternatives. Prerequisite: FIN 3000.

FIN 3990 Nonpaid Internship (1 to 3) See Internship Section.

FIN 3991 Paid Internship (1 to 3) See Internship Section.

FIN 4097 Directed Readings in Finance (1 to 3) Directed individualized readings.

FIN 6000 Financial Management and Strategy (3) The planning, acquisition, use, and management of the resources needed by a business concern. The course examines asset management, capital structure, portfolio management, and risk analysis. Investment decision theory and practice are studied, and quantitative methods for financial analysis are reviewed. Prerequisite: ACCT 2000 and FIN 3000, or equivalents. Graduate standing.

FIN 6100 International Finance (3) A seminar that includes contemporary issues in international finance. Technical financial issues of importance to international managers operating in the world arena are examined, as well as contemporary source material that focuses on current data. Prerequisite: FIN 6000. Graduate standing.

FIN 6170 International Financial Markets (3) Explorations of the functions of the international financial markets. Course topics include: foreign exchange rates and their determination; international payment adjustments; currency futures; international arbitrage; and international cash management. Prerequisite: ECON 6000. Graduate standing.

FIN 6300 Investment Analysis (3) An examination of topics such as: capital markets, security analysis, risk strategies, and portfolio selection from the perspective of the professional investment manager, all constituting the decision process in building and managing a portfolio. Methods of security valuation, asset appraisal, and risk analysis are also examined. Prerequisite: ECON 6000, FIN 6000, and MS 6000. Graduate standing.

FIN 6310 Portfolio Management (3) A course that affords students the opportunity to actively select and manage investment portfolios that have varying objectives. Techniques for evaluating stocks, bonds, and options are discussed and used in the selection of these portfolios. Students are challenged to understand and evaluate the complexities of a dynamic investment environment in which competition is keen and performance the goal. Prerequisite: FIN 6300. Graduate standing.

FIN 6400 Corporate Finance (3) A course that presents the perspective of the Chief Financial Officer (CFO) and deals with advanced techniques for determining the capital budget and structure, dividend policy, risk analysis, long-term financing decisions, and forecasting. Financial decision-making as an integral, practical component of the leadership and managerial functions within the firm constitutes the major unit of study in this course. Prerequisite: FIN 6000 and MS 6000. Graduate standing.

FIN 6445 Financial Management in Healthcare (3) This course introduces MBA and professional students to healthcare's dynamic financial landscape and covers all aspects of the financial accounting issues, costs, reimbursement, coding, billing and budgeting as well as the complex regulatory environment in healthcare. The course takes a customized approach to meet the needs of students in healthcare finance. Prerequisite: ACCT 6000, FIN 6000 and MGMT 6050. Graduate standing.

FIN 6500 Planning: Business Owners (3) A course that focuses on common business problems and planning objectives. It includes business continuation issues, buy-sell agreements, stock redemptions, planning for the disability of a business owner, and managing risk in a closely held business. Prerequisite: BUS 5100 or FIN 6000*. (* must have a grade of C or higher). Graduate standing.

FIN 6510 Insurance and Financial Planning (3) A course that discusses the basic concepts of risk management and insurance. It includes legal principles; different kinds of risks and insurance; and the insurance industry. It also focuses on the financial planning process that includes
Directed individualized readings.  
Repeateable for credit  
Prerequisite: Graduate Standing

FR – French

FR 1100  
Beginning French I  
An introduction to written and spoken French. This is the first semester of a two-semester sequence.

FR 1200  
Beginning French II  
An introduction to written and spoken French. This is the second semester of a two-semester sequence.  
Prerequisite: FR 1100.

FR 2100  
Intermediate French I  
Conversation, reading, grammar, and introduction to French culture. This is the first semester of a two-semester sequence.  
Prerequisite: FR 1200.

FR 2200  
Intermediate French II  
Conversation, reading, grammar, and introduction to French culture. This is the second semester of a two-semester sequence.  
Prerequisite: FR 2100.

GEOG – Geography

GEOG 1000  
Introduction to Physical Geography  
A non-laboratory introduction and survey of Earth's natural environment, including earth-sun relationships, weather and climate, landforms, soils, and vegetation. The effects of these physical elements on human activity are also stressed. The course presents both global and regional perspectives.

GEOG 1500  
World Regional Geography  
This course studies the geography of the world's major culture regions. Emphasis is placed on the geographic foundations and cultural characteristics, changes, and divisions that provide insight and understanding to current world events and issues.

GEOG 2000  
Introduction to Human Geography  
An introduction to the concepts and major topics of human geography. This course uses a dynamic, hands-on approach to explore concepts such as mapping techniques, regions, diffusion, population growth, migration, regional and global economic development, growth of cities, cultural landscapes, market areas, and the human impact on the environment.  
Prerequisite: Any WCIL I course.

GEOG 2500  
Maps and Civilization  
A study of how maps reflect the politics, economics, culture, and aesthetics of both Eastern and Western societies throughout history. How maps are used to communicate or distort information is also explored. Other topics include map reading, cartographic conventions and techniques,
map types and uses, maps as art, and automated mapping techniques.  
Prerequisite: Any WCIL I course.

GEOG 3200 (3)  
Geography of Hawai‘i and The Pacific  
An introduction to the human and physical geography of Oceania. Class readings, discussions, presentations, and writing assignments will illustrate the complex socigeo- 
graphic aspects of this region. Special attention is given to Hawai‘i, emphasizing its unique physical geography and its contemporary and historical links to the Pacific.  
Prerequisite: Any WCIL II course.

GEOG 3310 (3)  
Geography of Japan  
A course that begins with the physical and cultural foundations of Japan, including the origin of the Japanese islands, climate, and natural hazards and how various historic pe-
riods are visible on the Japanese cultural landscape today. Other topics include populations, agriculture, industry, urbanization, recreation, minority groups, and Japanese concepts of living space.  
Prerequisite: Any introductory social science course.

GEOG 3600 (3)  
Geography of Travel and Tourism  
An exploration of the major themes, concepts, and contempor-
ary issues focused on in tourism geography. The major areas of focus involve defining tourism and its relationship to geographic inquiry, an overview of tourism from a world regional perspective, and more specifically the impact of tourism in Hawai‘i and Oceania.  
Prerequisite: Any WCIL II course.

GEOG 3720 (3)  
Population Dynamics  
This course begins with historical growth, current trends, and future projections of global population distributions and their resource needs. The course then moves to its core emphasis on the major components of human population change, namely fertility, mortality, and migration. Special attention is given to the role of population structure as a predictor of political instability.  
Prerequisite: Any introductory social science course.

GEOG 3730 (3)  
Economic Geography  
An analysis of human economic activities in relation to resources; spatial dimensions of economic systems; social and environmental consequences of location decisions; and alternative use of resources.  
Prerequisite: ECON 2010 or 2015; GEOG 2000 or 2600.

GEOG 3750 (3)  
Military Geography  
Military operations are inherently geographic in nature, so this course studies the impact of physical and human geography on the conduct and outcome of such operations. In addition to specific war fighting cases from history, the course covers geopolitics and the geographics aspects of peacekeeping, terrorism, disaster management, humanitar-
ian assistance, recruiting, and training.  
Prerequisite: GEOG 1000; Any introductory social science course.

GEOG 4700 (3)  
Geographic Information Systems  
A course that provides students with the fundamental con-
cepts underlying geographic information systems (GIS). The nature and analytical use of spatial information are discussed. During the laboratories, students acquire skills in utilizing the popular software package ArcView GIS. Labo-
ratories provide hands on experience with ArcView GIS.  
Prerequisite: GEOG 1000 or 2000.

GEOL – Geology

GEOL 1000 (3)  
The Dynamic Earth  
An introductory survey of the geology of the earth. Topics include geologic HTMe and earth history, internal earth processes (plate tectonics, volcanoes, earthquakes), and surface processes (streams, coasts, climate).

GEOL 2000 (3 or 4)  
Physical Geology: The Science of Earth  
A comprehensive introduction to the fundamentals of geology for students intending to major in the natural sciences. Topics include formation and evolution of the earth, as well as a broad range of surface and internal geological processes.  
Prerequisite: CHEM 2052.

GEOL 3010 (3)  
Volcanoes: Effects on Humanity and the Environment  
This course explores the different types of volcanoes on Earth. Case studies of historical and prehistorical eru-
ptions will examine the effects of volcanic eruptions on humanity and the environment. Planning and prediction of volcanic eruptions will be investigated. There will be a field trip to the Island of Hawai‘i to observe recent and active volcanic activity.  
Prerequisite: GEOG 2000; may be taken concurrently.

GEOL 3020 (3)  
Hydrogeology  
Quantitative treatment of the freshwater components of the hydrologic cycle including stream flow, ground water flow, and water quality.  
Prerequisite: GEOL 2000; MATH 2214 or higher except MATH 2326/3301; Any WCIL II course.

GEOL 3030 (3)  
The History of Life and the Earth  
This course explores the history of life and of planet Earth recorded in the rocks and fossils from the ocean and con-
tinents. We will investigate topics such as early Earth, the earliest life forms, emergence and diversification of life forms through geologic HTMe, continental drift, geomag-
netic reversals, paleoenvironments, the study of fossils, mass extinctions, dinosaurs, and the evolution of mammals.  
Prerequisite: GEOG 2000; may be taken concurrently

GEOL 3040 (3)  
Geochemistry  
A chemical view of the composition of the earth and its component parts, including the present distribution of chemical species and their movement over HTMe.  
Prerequisite: A grade of C- or higher in any WCIL II course; GEOG 2000.

GEOL 3950 (3)  
Geology Practicum  
Geology practicum.
GEOL 4010 (3)
Contaminant Hydrogeology
This course examines theoretical and practical considerations of the fate and transport of contaminants through porous geologic materials. Topics include physical and chemical processes governing the transport of contaminants in groundwater; multiphase flow; chemistry of organic and inorganic contaminants; microbial degradation of contaminants; monitoring and remediation site characterization; remediation technologies; application of hydrogeologic and geochemical theory and practice to the protection of aquifers from contaminations; quantitative aspects (computer modeling of contaminant transport).
Prerequisite: CHEM 2050, 2051, 2052, 2053, and GEOL 3020.

GEOL 4950 (3)
Geology Practicum
Geology Practicum.

GEOL 6010 (3)
Contaminant Hydrogeology
This course examines theoretical and practical considerations of the fate and transport of contaminants through porous geologic materials. Topics include physical and chemical processes governing the transport of contaminants in groundwater; multiphase flow; chemistry and microbial degradation of organic and inorganic contaminants; monitoring and remediation site characterizations; remediation technologies; application of hydrogeologic and geochemical theory and practice to the protection of aquifers using quantitative methods and computer modeling.
Prerequisite: CHEM 2050, 2051, 2052, 2053, and GEOL 3020.

GLSD – Global Leadership and Sustainable Development

GLSD 6000 (3)
Sustainable Human Systems
Students will learn to think systematically through the study of the systemic structure and values that underlie the modern world view. Alternative, emerging world views focused on sustainable structures will be emphasized. Systems thinking and a systems perspective will be developed through the study of environmental, cultural, and social systems. A critical perspective is emphasized throughout the course.
Prerequisite: Graduate standing.

GLSD 6001 (3)
Seminar in Environmental Governance
Increasingly, citizens, civil society institutions, and international governmental organizations are playing crucial roles in environmental and natural resource management. This shift of power away from states, both “upward” to the international level and “downward” to citizens, begs several questions: What roles should the various actors play in these multi-level governance systems in order to ensure the most favorable, and most just, environmental and social outcomes? To what extent can they work together to achieve mutual, or at least mutually-compatible, goals? Is it necessary, even productive, for groups to maintain their own identities and distinct agendas, nurturing not a stifling consensus but a perpetual – yet respectful – debate? This seminar course will engage with these questions.
Prerequisite: Graduate standing.

GLSD 6002 (3)
Sustainable Community Development
Sustainable Community Development provides students with the knowledge, skills, and concepts for enabling communities to self-organize for sustainable development. Students will learn to lead community development initiatives aimed at empowering communities to develop themselves sustainably. They will also learn to assess and compile actionable knowledge and use that knowledge to design interventions that lead to sustainable community practices through collaborative relationships within communities.
Prerequisite: Graduate standing.

GLSD 6005 (3)
Research Methods for Environmental and Social Policy Formation
Students will learn to conduct and evaluate environmental and social science research design, data quality, quality of reasoning, judgments in interpretation of evidence and alternative interpretations of environmental and sustainability research. Emphasis will be placed on the design and generation of evidence acquired by interview, focus group, field research, and other approaches as used in environmental science and sustainability research. Small research teams will design and conduct a multi-faceted pilot study on some contested environmental or social issues related to sustainability using one or multiples of the following: survey research, action research, environmental impact assessments, environmental audits, case studies, in-depth interviews, focus groups, sustainability audits, organization environmental assessments, and campus sustainability audits.
Prerequisite: Graduate standing.

GLSD 6330 (3)
Industrial Ecology and Sustainability
Industrial Ecology and Sustainability is the systematic study of the global, regional and local material and energy flows of industrial production systems as they interact with the environment and human communities. Ecological science concepts are used to redesign the primary features of the modern production system, including: energy consumption, renewable and non-renewable materials consumption, pollutant effluents, cost externalization and solid waste generation. Analytical tools covered are: life cycle assessment, materials flow analyses, waste flow analyses, environmental performance metrics, and design for environment tools.
Prerequisite: Graduate standing.

GLSD 6340 (3)
An Environmental History of the Modern World
This course examines the impact of human activities on the environmental world that have occurred since the 15th century, with a focus on the 20th and 21st centuries. Historical, institutional, and cultural forces are studies to gain a contextual understanding of contemporary environmental issues. Implicit assumptions about the natural world imbedded in economic, religious, and cultural models will be identified and explored in terms of their environmental implications.
Prerequisite: Graduate standing.

GLSD 6350 (3)
Global Markets in Transition
An examination of the forces promoting globalization and the development of business in evolving markets. The course focuses on related contemporary managerial issues. Included is the study of market transformations in s
cases of regional economic integration. Technology transfer and patterns of business development are also introduced. Additionally, price mechanisms for regulating international exchange and comparative costs studies related to the geometry of location are investigated.
Prerequisite: Graduate standing.

GLSD 6360
Sustainability Strategies and Indicators
Institutions and organizations are increasingly faced with the challenge of embedding sustainability into their strategies and then assessing the success of those strategies using relevant sustainability performance indicators and metrics. Students will learn strategic planning techniques, including futuring, visioning, forecasting and backcasting. Sustainability indicators and metrics will be studied to assess each type of strategy. Emphasis is placed on the monitoring and reporting on the trends and interaction associated with sustainable strategies.

GLSD 6500
Ecological Economics and Sustainable Development
This course addresses the topic of sustainable development focusing on economics at the interface of nations and the global economy. Students will complete a comprehensive study of the emerging field of ecological economics and contrast/compare it to the neoclassical economic model of development. Students will conduct an in-depth analysis of a developing nation in terms of economic development based on population, agriculture, industrial development, and natural capital (ecosystem goods and services). Students will be required to propose policy options for sustainable development within a nation and provide a means by which the nation's development will move towards global sustainability.
Prerequisite: Graduate standing.

GLSD 6920
Special Topics in Global Leadership and Sustainable Development
The title, content and prerequisites for this course will vary with instructor and need in the MAGLSD program. The course may be repeated when the title and content have changed.
Prerequisite: Graduate standing.

GLSD 6950
Globalization, Environment, and Sustainability Development Practicum
The GLSD 6950 Practicum offers students the opportunity to integrate the theoretical knowledge of sustainability, environmental policy/science, or sustainable development with practical experience in either a research project or an organizational employment setting related to their MAGLSD studies. The practicum goal is to allow students to gain practical, first hand experiences in sustainability and greater awareness of career possibilities that lie before them upon graduation. A practicum may or may not receive compensation. Hosting organizations will have agreed to provide practicum students with an intellectually challenging primary task related to their studies. In turn, each practicum experience will be design to benefit the host institution as well.
Prerequisite: Graduate standing.

GLSD 6997
Directed Readings in Global Leadership and Sustainable Development
Directed individualized readings.

Prerequisite: Graduate standing or permission of the instructor.

GLSD 7100
GLSD Professional Paper I
Initial design and development of the major research paper for students in the MA/OC program.
Prerequisite: SOC 3100, 3200, and GLSD 6005, Graduate standing.

GLSD 7200
GLSD Professional Paper II Capstone
Continuing design and development of the major research paper for students in the MA/OC program.
Prerequisite: GLSD 7100. Graduate standing.

HAWN – Hawaiian

HAWN 1100
Beginning Hawaiian I
An introduction to written and spoken Hawaiian, as well as various aspects of traditional Hawaiian culture. This is the first semester of a two-semester sequence.

HAWN 1200
Beginning Hawaiian II
An introduction to written and spoken Hawaiian, as well as various aspects of traditional Hawaiian culture. This is the second semester of a two-semester sequence.
Prerequisite: HAWN 1100.

HAWN 2100
Intermediate Hawaiian I
Conversation, reading, writing, grammar, and traditional Hawaiian culture. This is the first semester of a two-semester sequence.
Prerequisite: HAWN 1200.

HAWN 2200
Intermediate Hawaiian II
Conversation, reading, writing, grammar, and traditional Hawaiian culture. This is the second semester of a two-semester sequence.
Prerequisite: HAWN 2100.

HIST – History

HIST 1717
Reacting to the Past
An introduction to major ideas and texts using “role playing” games to replicate the context in which these ideas acquired historical significance. Students explore moments of cultural and political crisis in a variety of cultures and HTMe periods, including Ancient Greece, Ming China, and Puritan New England.

HIST 2001
History of World Cultures to 1500
An interpretive survey of the development of civilizations from prehistoric HTMecs to A.D. 1500. Considerations of the principal contributions, forces, and trends found among the major cultures of the world. HIST 2001 and HIST 2002 need not be taken in sequence.
Prerequisite: Any WCIL I course.

HIST 2002
Global Historical Experience Since 1500
An interpretive survey of the development of civilizations
and of the principal contributions, forces, and trends found among the major cultures of the world since A.D. 1300. HIST 2001 and HIST 2002 need not be taken in sequence. 
Prerequisite: Any WCIL I course.

HIST 2111 (3)
Introduction to Greco-Roman Civilization
A survey of European civilization from the classical Greeks until the barbarian invasions and the fall of Rome. Topics include the rise of the Greek polis, the spread of Greek culture under Alexander the Great, the history of the Roman empire, and the establishment of Christianity.
Prerequisite: Any WCIL I course.

HIST 2112 (3)
Medieval and Early Modern Europe
This course will explore the political, social, economic, intellectual, and religious characteristics of Europe during the Medieval and Early Modern periods. Material will emphasize how medieval and early modern beliefs (religious and secular) molded social, cultural, political, military, and economic institutions. Topics covered in the course will include, but are not limited to, Christianity and Islam, the interaction of the Christian, Muslim and Byzantine worlds, the creation of nation states, the relationship between spiritual and secular power and culture, intellectual "recovery" in the Renaissance, and European expansionism.
Prerequisite: Any WCIL I course.

HIST 2113 (3)
Modern Europe
An introduction to the history of modern Europe. Students examine the major intellectual, political, economic and social developments of this era, including the rise of the nation-state, the Industrial Revolution, the emergence of mass culture, and the impact of two world wars.
Prerequisite: Any WCIL I course.

HIST 2251 (3)
Introduction to Russian Civilization
A course survey of the origins, development, and decline of the Russian Empire. Special attention is given to intellectual, religious, social, literary, and cultural history. The origin and consequences of the 1917 Russian Revolution are explored. Additional coverage is given to contemporary Russian culture.
Prerequisite: Any WCIL I course.

HIST 2301 (3)
Introduction to Asian Civilizations
An introduction to the essential values and traditions of selected civilizations in East, Southeast and South Asia, examining them in their indigenous contexts while exploring exchanges among them over HTMe. The course shows how the major cultures of these regions developed, came into contact, absorbed and/or rejected elements of each other’s civilization and produced institutions, values and ideas that give an historical identity to each. The ramifications of these encounters are also studied by looking at how earlier values and ethical concerns are manifested in recent political and other developments within Asia.
Prerequisite: Any WCIL I course.

HIST 2311 (3)
Introduction to Chinese Civilization
An introductory exploration of the society, ideas, political institutions, economy, culture, language, literature, and other characteristic features of traditional China in a historical and contemporary context.
Prerequisite: Any WCIL II course.

HIST 2321 (3)
Introduction to Japanese Civilization
Japanese history from its prehistoric origins to contemporary developments. Focuses on significant themes: art, political institutions, literature, and socio-economic structures. 
Prerequisite: Any WCIL II course.

HIST 2401 (3)
American History to 1877
A study of the discovery and colonization of America, the Revolution, the forming of the government, and internal and foreign affairs down through Reconstruction.
Prerequisite: Any WCIL I course.

HIST 2402 (3)
American History Since 1865
The Civil War and its aftermath, industrialization, external expansion, two world wars, and domestic affairs from 1865 to the present.
Prerequisite: Any WCIL I course.

HIST 2451 (3)
History of Latin America
A study of Spanish and Portuguese settlement of Latin America from the European conquest to the present. Topics include Iberian and Native American institutions, economy, social structure, politics, and cultural evolution in Latin America.
Prerequisite: Any WCIL I course.

HIST 2630 (3)
The History of Science and Technology
This course is designed to introduce major themes in the history of science and technology since the Sixteenth Century. It will introduce the major trends in science since the Scientific Revolution. It will discuss the origins of the Scientific Method and explore great scientific minds and events in science. We will cover the evolution of math, biology, physics, as well as quantum theory and mechanics. In addition, we will discuss the corresponding technological advances of science applied to technology including (but not limited to) celestial mechanics, evolutionary theory, atomic power, and the personal computer.
Prerequisite: Any WCIL I course.

HIST 2900 (3)
The Historian's Craft
This course will introduce students to reading, research, and interpretation in history. It will focus on a specific topic or theme from a comparative perspective and on the global connections and broad implications of that issue. The course will include guest lectures by history faculty.
Prerequisite: Any 2000-level HIST course or STSS 2601; courses may be taken concurrently.

HIST 3000 (3)
Citizenship and Border Identities in European History
As the world becomes increasingly inter-connected and inter-dependent, notions of citizenship and identity are shifting. Will national citizenship become obsolete as new regional and even global identities are created? This course seeks to provide a historical perspective for the concept of citizenship and address some of the complexities associated with establishing identities within cross-cultural environments. Specifically, the first section of the class will focus on how various European societies from ancient Greece to the twentieth century have defined citizenship. The second
HIST 3070 (3)
Sex in History
This course examines the historical construction of sexuality using a comparative and global perspective. The focus will be on the relationship between gender and sexuality and how cultural beliefs about religion, race, and romantic love have shaped our attitudes towards sex.
Prerequisite: A grade of C- or higher in any WCIL II course; ARTH 1000, CLST 1000, HUM 1000, MUS 1000, PHIL 1000, REL 1000, or THEA 1000; any one 2000-level HIST course.

HIST 3101 (3)
Greek History to Alexander
The history of the Greek world from Mycenaean HTMes until the break up of Alexander’s empire. A variety of topics include the origins of the classical Greeks, the evolution and decline of the polis as a political and social unit, the rise of Macedonia, and the conquests of Alexander the Great. The course stresses the use of primary source materials.
Prerequisite: HIST 2900; or A grade of C- or higher in any WCIL II course and one of the following: HIST 2001, 2111, 2311, 2321, CLST 2600, STSS 2601.

HIST 3102 (3)
The Age of Alexander the Great
This course examines the career of Alexander the Great, 336-323 B.C.E., with due consideration to the historical conditions that created the opportunities for Alexander’s conquest, as well as the aftermath of his campaigns. The reading and analysis of primary historical sources and modern interpretations will be emphasized.
Prerequisite: HIST 2900; or A grade of C- or higher in any WCIL II course and one of the following: HIST 2001, 2111, 2311, 2321, CLST 2600, STSS 2601.

HIST 3111 (3)
Roman Republic and Empire
The history of Rome from its foundations until the overthrow of the last emperor in the West by the Germans. A variety of topics include myths and legends of early Rome, the Roman constitution, growth and defense of the empire, life at the imperial court, Roman society, and religion. The course stresses the use of primary source materials.
Prerequisite: HIST 2900; or A grade of C- or higher in any WCIL II course and one of the following: HIST 2001, 2111, 2311, 2321, CLST 2600, STSS 2601.

HIST 3151 (3)
Medieval Europe
A history of European civilization from the fall of the Roman empire until the Renaissance. Some of the themes discussed include the establishment of the Germanic kingdoms, origins of feudalism, the relationship between Church and State, the Crusades, and the creation of nation-states.
Prerequisite: HIST 2900; or A grade of C- or higher in any WCIL II course and one of the following: HIST 2001, 2111, 2311, 2321, CLST 2600, STSS 2601.

HIST 3170 (3)
Gender and Sexuality in the Classical World
This course explores the construction of gender identity in the Greco-Roman world. Through readings of poetry, drama, history, legal and scientific texts, ancient novels, and more, the student will examine how deities of masculinity and femininity shaped ancient society. Artistic and archaeological evidence will also be considered.
Prerequisite: HIST 2900; or A grade of C- or higher in any WCIL II course and one of the following: HIST 2001, 2111, 2311, 2321, CLST 2600, STSS 2601.

HIST 3222 (3)
Europe and the Age of Revolution
The cultural and political transformation of Europe from the eighteenth century to the end of the nineteenth century. The course focuses on changes in the structure of European society and politics between 1750 and 1870 including the origins and impact of the French Revolution and Napoleon.
Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3225 (3)
The Enlightenment and the French Revolution
This course examines the relationship between ideas, culture and politics in eighteenth-century France. Students will read works by major Enlightenment thinkers, and become familiar with the events and diverse historical interpretations of the French Revolution.
Prerequisite: Any 2000-level HIST course.

HIST 3231 (3)
Europe: the 20th Century
A study of the crisis in European civilization from 1890 to present. The course emphasizes the outbreak and impact of World Wars I and II, the Russian Revolution, the rise of fascism in the 1930s, and the major impact of the Cold War on Europe.
Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3242 (3)
History of Spain
This course explores the history of Spain from the ancient Iberians to the post-Franco era. Although the class will examine the ancient and medieval periods, it will focus on early modern and modern Spain.
Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3252 (3)
Modern Russian History
A course designed to trace the origins of the USSR in its Tsarist past, explore the Revolutions of 1917, and examine the subsequent 70 years of Communist rule. Supplementing historical evidence with political theory, literature, and economic data, the course raises broad questions about social change.
Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3270 (3)
Gender in Medieval and Early Modern Europe
The history of women and gender roles in western Europe from the birth of Christianity to around 1800. The course examines how women’s and men’s sexual and gender identities were shaped by the major historical developments of the period. Topics include family, work, religion, politics and sexuality.
Prerequisite: ARTH 1000, CLST 1000, HUM 1000, MUS 1000, PHIL 1000, REL 1000, or THEA 1000; any one 2000-level HIST course; Any WCIL II course.
HIST 3302 (3) History of Modern China
An analytical exploration of Chinese history from the mid-Qing period to the current People’s Republic of China focusing on the factors that changed China over HTMe, including the impact of foreign intervention, attempts to change traditional institutions and ideas, the forces of revolution, the rivalry between the Nationalist and Communist parties and the emergence of China after 1949 into a major world power. 
Prerequisite: Any 2000-level HIST course.

HIST 3322 (3) History of Modern Japan
An in-depth analysis of Japan, from its transition from the feudal mid-Tokugawa era to its emergence as a major power in the 21st century, focusing on the impact of the West, the Meiji Restoration, Japanese imperialism in Asia and the Pacific, the drift towards World War II and its consequences, the U.S. Occupation and Japan’s transformation into an economic powerhouse and the strains produced by such growth. Prerequisite: Any 2000-level HIST course.

HIST 3326 (3) Cultural History of Japan
An historical and thematic study of Japan’s traditional culture focusing on the emergence, adaptation and maturation of those aspects of its art, institutions, literature, religion, drama, music, ideas and other cultural developments that define Japanese aesthetics. Prerequisite: Any 2000-level HIST course.

HIST 3352 (3) History of Modern South East Asia
A survey of southeast Asian cultures, religions, institutions, and politics as experienced in Burma, Thailand, Laos, Cambodia, Vietnam, Malaysia, Indonesia, and the Philippines during the last century. Prerequisite: Any 2000-level HIST course.

HIST 3362 (3) History of India
This course offers an introduction to the history and culture of the Indian subcontinent. It will examine the roots of Indic civilization, explore it classical past, survey the rise and decline of the region’s Buddhist, Hindu and Muslim empires, study its experience of European colonialism and trace the development of the region's modern nation states. Its special focus is the region’s place in world history, from its role as the birthplace of several of the world’s major religious and philosophical traditions to its current status as a major player in the process of cultural as well as economic globalization. Prerequisite: Any 2000-level HIST course; Any WCIL II course.

HIST 3411 (3) US: Jackson to Civil War
A class survey of the course of American history during one of its key formative periods includes the expansion of the United States up to the Civil war, the growth of sectional conflict, the slavery and abolitionist movement, the events leading up to and the course of the civil war, and the problem of reconstructing the Union. Students will have the opportunity to read and discuss the variety of primary source materials as well as the interpretations of modern historians. 
Prerequisite: HIST 2002, 2251, 2401, 2402, 2451 or STSS 2601.

HIST 3414 (3) "United States:” Race and Ethnicity in American History
This course examines race and ethnicity in American history from the colonial period to the present. It will contrast the historical experiences of various racial and ethnic groups and will examine how each group was treated in relationship to other groups. In particular, we will examine how the racial and ethnic diversity of the U.S. has informed debates about American identity. The course also integrates Hawaiian history into the wider history of race and ethnicity in the U.S., showcasing "local" cultural patterns as both exceptions to and exemplars of wider American and global patterns of race and ethnicity. Prerequisite: Any course from Research and Epistemology A; any course from World Cultures A, B, or C or Global Systems A, B or C.

HIST 3421 (3) Gilded Age/Progressive Era
A course that covers the new urban/industrial order at the turn of the century and examines the responses that this new landscape engendered both at home and abroad. The course is organized around the theme of conflict, including class, cultural, and political conflict. Topics include industrialization, imperialism, populism, progressivism, race relations, roaring twenties, and the onset of the Great Depression. Prerequisite: HIST 2002, 2251, 2401, 2402, 2451 or STSS 2601.

HIST 3441 (3) U.S. History since World War II
The study of social, political, economic, and cultural forces shaping the United States since 1945 through the 1990s. Featured units include surveys of influential people, development and conflict of political and economic ideas and policies, and cultural trends. Prerequisite: HIST 2002, 2251, 2401, 2402, 2451 or STSS 2601.

HIST 3461 (3) American Intellectual History
The major ideas and trends in thought from colonization to the present, with particular emphases on the beliefs that shape American society today. 
Prerequisite: HIST 2002, 2251, 2401, 2402, 2451 or STSS 2601.

HIST 3465 (3) US - Japanese Relations 1853-Present
This course studies the relationship between Japan and the United States in the modern world. It will begin with the forcible opening of Japan to the West by the United States in 1853 and it will run up to the present day. We will concentrate on each country’s perception of the other and their interactions with each other someHTMes called cultural relations, formal diplomatic relations, economic relations, and military relations. This course will define the fundamental nature of the relationship as one of conflict. 
Prerequisite: Any 2000-level HIST course.

HIST 3470 (3) Women in America
An introduction to the history of women in America from the colonial period to the present. The course traces the major turning points in the history of women as a sociological group and also analyzes how ethnicity, class, identity, and regionalism intersect with gender in creating diverse experiences for women.
Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3480 History of Leisure and Sport in America (3)
This course examines the evolution of leisure and the role of sporting activities in the development of American culture from the colonial period to the present. The first part of the course looks at the growth of leisure HTMe and its experiential qualities (class, gender, and ethnicity) in Early America. The second part focuses on the distinctive post-industrial construction of leisure HTMe and the rise of modern sports in recent America. Students will examine why Americans needed these “passHTMes” and how this need changed over HTMe, accounting for the political, economic, and social significance of leisure and sports in America. Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3501 Islam and the Middle East (3)
The history of the Middle East and the role played by Islam in the region. Topics include: the Middle East before the coming of Islam; Mohammed and the evolution of Islam; the creation and growth of Muslim states; and the modern Middle East and its interaction with the West. Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3551 Pacific Island History (3)
The origins and development of the cultural attributes of the island peoples of the Pacific and their response to the impact of the West. The course employs perspectives of history, anthropology, and the humanities. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3556 History of Hawai‘i (3)
A course that deals with the heritage, history, and folkways of the various groups who have come to the Hawaiian Islands, with emphasis upon local historical and cultural events. The course employs the perspectives of history, anthropology, and the humanities. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3558 Living History of Hawai‘i (3)
This course traces the history of the Hawaiian Islands from the first Polynesian settlements to the establishments of the territory of Hawai‘i in 1900. It focuses on the era from the arrival of the first Westerners in 1778 to the overthrow of the monarchy in 1893. A key theme of the course will be the interaction between native Hawaiian culture and Western civilization. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3559 Preservation-Hawai‘i's Heritage (3)
A course designed to investigate the theory, methods, and approaches to historic preservation in Hawai‘i. Through readings, lectures by various people active in the preservation field in Hawai‘i, case studies, and visits to significant historic sites, students develop a more thorough understanding of historic preservation and a deeper appreciation of ways to carry Hawai‘i’s past into the twenty-first century. Prerequisite: Any WCIL II course.

HIST 3571 The African Diaspora (3)
The course introduces the history of the African Diaspora from the A.D. 1500 to the present. It focuses primarily on the African impact on the Americans, Europe, and the Pacific Islands. It will examine important themes associated with identity formation, imperialism, nationalism, and slavery. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3576 The Atlantic World in the Age of Empire (3)
This course examines the development of the Atlantic World from the mid-fifteenth through the early nineteenth centuries. We will examine how the Atlantic acted as a powerful connective force, uniting diverse peoples through economic, intellectual, cultural, and ecological systems and promoting the interchange of ideas, people, and technology. The course will take a thematic, systems approach by examining topics such as colonization, migration, slavery, mercantile capitalism, imperialism, and revolution as they manifested themselves in this Atlantic world. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3650 History of Oil in the Modern World (3)
The History of Oil in the Modern World will explore the rise of oil as a strategic commodity and its influence on world politics and economic systems in the modern period, form its discovery in 1859 to its role in the strategic relationships between the Middle East and other nations today. We will study its uses, and the dominance of Western oil companies in its extraction in Russia, the Middle East, Indonesia, Venezuela, Nigeria, and Libya. The role of oil in our daily lives and the global and local impacts of the use of oil will also be examined. Prerequisite: Any Global Systems A, B, or C course, Undergraduate standing.

HIST 3655 Bubbles, Panics, and Depressions: A World History of Economic Crisis (3)
This course will study the recurring economic crises in world history since 1500. The class seeks to understand the causes of economic crises within the context of the rise of mercantile capitalism from 1500-1800, post-mercantilist capitalism in the 19th century and early 20th century and the rise of free market capitalism of today’s world. The course will explore the ideological foundations of capitalism and the debates between Keynesianism and Neo-Classical economics to explain the origins of economic crises and their solution. Then students will study recurring crises over HTMe and in different parts of the world. Pre-requisite: Any 2000-level HIST or STSS course.

HIST 3661 History of Warfare to 1500 (3)
The history of warfare from earliest HTMes until A.D. 1500. It is not, however, merely the study of battles, weapons, and tactics, although these topics are covered. The course also examines how changes in society and technology affected the conduct of war, conversely, the impact of war on society and technology are discussed. Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3662 War and Society Since 1500 (3)
The history of warfare from A.D. 1500 to the present. Examines how changes in society and technology have altered the conduct of war and how war affects society and technology. The primary focus is on Europe and the United States with some study of the Middle East and East Asia. 

Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3666

U.S. Military History
A survey of the development of U.S. military forces to the present day, including organizational, tactical, technological, and strategic aspects, with an emphasis on operations. The Revolutionary War, the Civil War, the Spanish American War, the U.S. role in World War II (stressing the Greater East Asian War), the Korean War, and the Vietnam War are discussed.

Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3668

Military History of Hawai‘i
This course examines the Military History of Hawai‘i from the HTMe of the unification of the Hawaiian Kingdom to present. A “new military history” approach will be used that emphasizes institution as well as “battle studies”. The course content is organized around field study visits of significant battlefield and historical sites in Hawai‘i.

Prerequisite: Any WCIL II course.

HIST 3670

Racism, Violence, and Genocide in Modern World History
This course examines the emergence, evolution, varieties, and causes of the systematic exclusion of, and violence towards, populations defined by ethnicity, nationality, or race. Initially it examines instances of mass violence within the context of pre-20th Century European imperialism and explores contested categories of ethnicity, nationality, and race. The second half explores cases of 20th Century violence involving mass murder, “ethnic cleansing”, and war crimes. The course culminates by studying the impact of 21st Century global terrorism, its effects on the Nation-State and its citizens, and the role of the international community in preventing future genocide.

Prerequisite: Any WCIL II course and any 2000 level HIST course.

HIST 3676

U.S. Diplomatic History
A survey of U.S. diplomatic history from the American Revolution to the 1990s, emphasizing forces that have shaped America’s behavior in the international arena. Themes include: landed and commercial expansion that drove the nation outward between the 1750s and 1940s; steady centralization of power at home, especially in the executive branch of government after 1890, and the role of foreign policy therein; isolationism; the singular importance of the transitional 1850 to 1914 era; and the interrelationship between U.S. social and diplomatic history.

Prerequisite: HIST 2900 or Any WCIL II course.

HIST 3777

Hawai‘i in World History
This course will examine how Hawai‘i became integrated into global networks through its experience of trans-Pacific migrations, the rise and fall of the global whaling and sandalwood industries, the arrival of missionaries, the advent of colonialism, the rise and fall of its uniquely outward looking monarchy, its engagement in global conflict and the global context in which Hawaiians formed their unique cultural values, performance art, and music admired around the world.

Prerequisite: Any 2000 level HIST course.

HIST 3780

Modern World Revolutions
This course examines the underlying causes and effects associated with revolutionary movements with emphasis on the twentieth century. It explores revolutionary philosophies and strategies of world leaders, analyzes how political, environmental and economic conditions spark popular uprisings and explores the ways in which these interact with perceptions of poverty, oppression and foreign domination to inspire people to struggle for reform and seek a better way of life. The Russian, Chinese, Vietnamese, Cuban, Nicaraguan, and Islamic revolutionary movements will receive close attention.

Prerequisite: Any 2000-level HIST course.

HIST 3788

Food in World History
This course enables students to approach world history through an overview of food and foodways. Students will explore how world historical processes, such as famine, religious practice, national identity, social organization, imperialism, and war are expressed, influenced or illuminated by cuisine, diet, and nutrition. Students will also study how food choices and consumption patterns are affected by encounters between cultures. The impact of increasing industrialization of food production and globalization of dietary choices and patterns of food consumption will also be examined.

Prerequisite: A grade of C- or higher in any WCIL II course or HIST 2900.

HIST 3792

Encounters and Exchanges in Modern World History
This course examines the nature, course and impact of encounters and exchanges, cultural and economic, between civilizations and across global regions from the early modern period (c. 1500) to the present. It explores how much interaction confirms, alters or changes the way societies see themselves as well as their view of those with whom they come into contact. The impact of trade networks, the role of intermediaries between cultures in contact, the cross-regional impact of the exchange of crops, diseases and animals, and the processes of colonialism and globalization are among those topics which will receive close attention.

Prerequisite: Any 2000-level HIST course.

HIST 3900

Research and Writing Across HTMe and Culture
This course provides general training in research and writing. The course is not geared to history majors alone, but rather develops broadly applicable cognitive skills of value to students in many disciplines and in any future career. Among the skills developed in this course are source identification and evaluation, generating an effective research
genda, formulating a research hypothesis, constructing a persuasive argument, and enhancing written and oral communication skills. In addition, the course explores the role and function of the historian and the value of historical approaches in a multi-disciplinary and multi-cultural setting. 

Prerequisite: Any WCIL II course.

HIST 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

HIST 3991 (1 to 3)
Paid Internship
See Internship Section.

HIST 4661 (3)
History of Military Thought
An examination of the role of military theorists throughout history and their impact both on the military and political establishments. Some of the authors who may be considered include Sun-tzu, Machiavelli, Clausewitz, and Jomini, and their impact on both strategy and policy is discussed. 

Prerequisite: Any 3000-level history course.

HIST 4900 (3)
Seminar in History
A seminar style course that incorporates class discussions, oral presentations, and a major written research project. The focus varies depending on the instructor, but possibilities include historiography, a specific geographical region, or a chronological period. Includes discussion of methods of historical research and inquiry. 

Capstone course. 

Prerequisite: Any 3000-level history course.

HIST 4901 (3)
Seminar: World History
An examination of the field of world (or global) history. It is not designed to be a comprehensive view of the human experience. Instead it looks at some of the important themes in world history (such as the cross-cultural contact, frontiers, etc.) and the approaches used in the study of world and comparative history. 

Capstone course. 

Prerequisite: Any 3000-level history course.

HIST 4911 (3)
Seminar: Ancient History
An examination of selected topics in antiquity from the earliest civilizations of the ancient near east through the fall of Rome. Topics vary but may include the fall of bronze age civilizations, the Greek polis as a political/social institution, the rise of Rome, etc. In each case, students are acquainted with the pertinent primary source material as well as the works of modern authorities. 

Capstone course. 

Prerequisite: Any 3000-level history course.

HIST 4961 (3)
Seminar: Military History
An examination of selected topics in military history, possible topics for the course may include the development of the art of war in Western Europe, or the clash between western military methods and those of other regions including the Middle east and Asia. Students will read some of the latest works in military history that show the trends in the "new military history" that emphasizes institutions as well as "battle studies." 

Capstone course. 

Prerequisite: Any 3000-level history course.

HIST 6011 (3)
Approaches to World History
This course provides an introduction to the most important literature, themes, theories, interpretations, concepts, and methods of world history as a field of research, teaching and scholarship. 

Prerequisite: Graduate standing.

HIST 6061 (3)
Modern Imperialism
This is a graduate level seminar on imperialism in modern history. The course will study the origins of the imperial idea, formal and informal, its apex in the 19th century, its waning if persistent influence in the second half of the twentieth century and its contemporary manifestations. It will discuss various interpretations of the phenomenon in comparative perspective and analyze it in terms of its associated political, economic and social relations (especially ethnic and gender issues). 

Prerequisite: Graduate standing.

HIST 6062 (3)
Modern World Revolutions
This course examines the origins, course and legacy of modern revolutionary movements with an emphasis on the twentieth century. It examines in both comparative and global perspective the role of ideology, culture, foreign intervention, religion, gender, and patterns of leadership, recruitment and tactics employed by these movements and their opponents. It also examines their legacies as currently interpreted by contemporary movement leaders and historians. 

Prerequisite: Graduate standing.

HIST 6063 (3)
Seminar: Atlantic System
This graduate level seminar introduces students to the concept of the Atlantic System. The course will promote understanding of the Atlantic Ocean as a connective rather than a divisive force in history. Topics of examination will include colonialism, economic structures, slavery, ecology, social construction and identity formation, and anti-systemic movements. 

Prerequisite: Graduate standing.

HIST 6065 (3)
Modern Nationalism
This is a graduate level readings course on modern nationalism covering both the breadth of the topic and delving in-depth in certain areas of it. The course will study the development of nationalism, its apex in the 19th century and its waning influence in the second half of the twentieth century. The course will begin with definitions of nationalism, national-identity, and nation-building. The course will also demonstrate the significance of nationalism for modern life. Nationalism is the beating heart of the modern world, comprising what some historians have described as the most powerful form of collective identity other than the family in the modern world and overwhelming religion as the path to modern immortality. 

Prerequisite: Graduate standing.

HIST 6066 (3)
Comparative Slavery
This graduate level seminar in Comparative Slavery will examine systems of involuntary servitude from the ancient through modern periods. The course will examine the history of slavery as a political, social, intellectual, and cultural as well as economic and racial construct thus seeking to escape the stereotypes of slavery created by the U.S. institu-
This course studies Japanese history by focusing on important themes explored in specialist literature, from earliest to contemporary HTMes. It poses questions relevant to understanding these themes and in the process presents a thorough overview of the scholarship available to answer these questions.

Prerequisite: Graduate standing.

HIST 6401
U.S. History to 1877
This graduate level reading seminar is designed to introduce students to major topics and issues in American history from the colonial period to the end of Reconstruction. The course will focus upon familiarizing students with the narrative content of the period and with introducing them to the major historiographic trends and debates in early American history.

Prerequisite: Graduate standing.

HIST 6402
American History since 1865
This is a graduate readings course on the second half of American history. We will study American history from 1865 to the present emphasizing important themes of race, class, gender, nationalism, Americanization, imperialism, warfare, dominance of the two party system, and the perceived decline of American civilization and its rebirth.

Prerequisite: Graduate standing.

HIST 6551
Pacific Islands History
This course has two basic goals. First, it intends to outline the historical development of the Pacific (Polynesia, Micronesia, and Melanesia) from the pre-contact period to the present. However, the focus of the class will be on the period following Western contact. The second goal of the course is to present the history of the Pacific in a global context and examine themes that extend beyond the Pacific. In particular, first contact, imperialism, westernization, nationalism, and environmental sustainability will be examined. The thematic focus will be examined on both a regional and national level.

Prerequisite: Graduate standing.

HIST 6556
Hawaiian History
This course has two basic goals. First, it intends to outline the historical development of Hawai‘i from the pre-contact period to the annexation of Hawai‘i to the United States. However, the focus of the class will be on the period following Western contact. The second goal of the course is to present various key historical and historiographical themes in Hawaiian history. These themes are not only particular to Hawai‘i but can also be situated in a contemporary global context. In particular, first contact, cultural conflict, imperialism, westernization, racism, and nationalism will be examined.

Prerequisite: Graduate standing.

HIST 6571
Seminar: African History
This course is an introduction to African history from pre-history to the present. The course will focus on examining major issues and problems in African history and historiography. The course will also be concerned with analyzing Africa’s historic relationship to the non-African world and its connection to global systems.

Prerequisite: Graduate standing.
HIST 6600 Seminar: Military Historiography
A course that introduces the discipline of military history. It looks at the various methodological approaches that military historians have used to the field of military history. Included are discussions of traditional “battle studies” as well as the “new” military history such as viewing military history in the broader context of war and society.
Prerequisite: Graduate standing.

HIST 6601 Seminar: Theory/Practice Diplomacy
A course that links together the historical study of diplomacy in its implementation as national grand strategy. The seminar looks at some of the great diplomatic and military theorists from ancient HTMes through today and then analyzes how their theories were put into strategic practice.
Prerequisite: Graduate standing.

HIST 6611 Seminar: War in the Ancient World
A course that considers the role of warfare from the age of chariot empires in the second millennium B.C. until the fall of the Roman empire. Themes will vary but may include such topics as warfare in the age of the Greek polis, the impact of Alexander the Great, the Roman army as an institution, etc.
Prerequisite: Graduate standing.

HIST 6622 Seminar: The Military Revolution
A seminar that centers on a topic that has engaged historians for the past forty years; the military revolution debate which suggests a revolution in warfare that helped place Europe on to the road of world dominance. This course examines the question as to whether there was indeed a military revolution or rather an evolution.
Prerequisite: Graduate standing.

HIST 6624 Seminar: Revolutionary and Napoleonic Warfare
A seminar that discusses a pivotal period in the development of modern war; the age of the French Revolution and Napoleon. Some of the topics include the impact of nationalism on warfare, the reaction of Europe to Napoleonic warfare, and analysis of Napoleon as a commander.
Prerequisite: Graduate standing.

HIST 6627 Seminar: The First World War
The purpose of this course is to provide an in-depth analysis of World War One in Europe and the world. This seminar will analyze WWI as a watershed event in the formation of modern society. We will discuss the war, diplomacy, battles, tactics, and important personalities during the period 1914-1919.
Prerequisite: Graduate standing.

HIST 6628 Seminar: The Second World War
This graduate readings course introduces students to some of the most recent and influential literature on, as well as the major historical themes and controversies regarding, the Second World War. Topics may include: race and ideology, the Holocaust, campaign analyses, military effectiveness, strategic decision-making, operational art, and coalition war-fighting.
Prerequisite: Graduate standing.

HIST 6631 Seminar: Ways of War in China
A seminar that considers the nature of war and the role of the military in China from earliest HTMes until the present. Some possible topics include the tradition of military thought in China, the military in Chinese society, western military influences in China, and the study of important battles and campaigns.
Prerequisite: Graduate standing.

HIST 6632 Seminar: Ways of War in Japan
A seminar that focuses on the impact of warfare and the military on Japanese history over the past one thousand years. Some of the issues covered in the course may include the development of a warrior class and martial ethic, the impact of the West on Japan’s military forces and rise of militarism.
Prerequisite: Graduate standing.

HIST 6641 Seminar: The American Way of War
A seminar that looks at the conduct of war in the context of the American experience. It does not focus on any particular campaign, but rather looks at how American strategic thought and military doctrines have evolved over HTMes. Some themes that are explored include the image of the citizen soldier, creation of a professional officer corps, etc.
Prerequisite: Graduate standing.

HIST 6643 Seminar: The American Revolution
This seminar encompasses the history of the war for American independence and examines the conflict from contextual, strategic, operational and tactical levels. By considering all perspectives on the war, the student will draw analytical conclusions based on a broad understanding of the political and military imperatives as well as contextual dynamics.
Prerequisite: Graduate standing.

HIST 6645 Seminar: The American Civil War
A seminar that looks at one of the major conflicts of the 19th century and a forerunner of modern warfare. This course deals with the strategies and battles of the war as well as some of the salient issues that arise out of the conflict including its effects on American society and culture.
Prerequisite: Graduate standing.

HIST 6648 Seminar: 20th Century U.S. Military History
A seminar that examines the American military experience during the last one hundred years. Topics may vary but some of the issues covered may include the American involvement in a particular war, the expansion of America’s armed forces during the century, and the impact of technology on American military thinking and doctrine.
Prerequisite: Graduate standing.

HIST 6649 Race, Sex, and War in U.S. History
This seminar will examine the intersection of race, gender, sexuality and war throughout the history of the U.S. Students will be encouraged to consider a broad range of topics including the contributions and minorities to the U.S. military, the impact of war upon “social progress” in the U.S., the military as a medium of social change, the relationship between war and definitions of masculinity, femininity, and Americanism, and the gendered nature of
conflict and the U.S. military itself.  
Prerequisite: Graduate standing.

HIST 6650  
Oil: History, Security and Sustainability  
This course will explore the history of oil, its growth as a crucial strategic commodity and questions about whether the current world oil system is sustainable. Students will study the dominance of Western oil companies, the struggle of nations to secure access to oil, and oil sustainability.  
Prerequisite: Graduate standing.

HIST 6658  
Seminar: 20th Century Naval Warfare  
A seminar that considers the evolution of naval warfare during the 20th century. Some of the topics that may be discussed include the impact of new technologies (e.g., submarines and aviation) on naval warfare, the projection of power on the sea, amphibious operations, and the analysis of particular campaigns.  
Prerequisite: Graduate standing.

HIST 6661  
Seminar: European Diplomatic History  
A seminar that explores the role of diplomatic relations in modern European history, in particular the 19th and 20th centuries. Some of the themes explored may include the concept of the concert of Europe, great power diplomacy and the alliance system at the turn of the century, the Grand Alliance, Cold War politics, etc.  
Prerequisite: Graduate standing.

HIST 6662  
Seminar: U.S. Diplomatic History  
A seminar that considers some of the key themes in the history of United States foreign relations, especially since the late 19th century. Some of the topics covered may include the development of American diplomacy in the age of imperialism, U.S. isolationism in the interwar years, and Cold War foreign relations.  
Prerequisite: Graduate standing.

HIST 6663  
Seminar: East Asian Diplomatic History  
A seminar that examines the history of diplomacy and foreign relations in the East Asian political arena. Topics vary but may include such issues as the Chinese tradition of tributary relationships, the role of militarism in Japanese diplomacy, and the impact of Western imperialism on Asian politics.  
Prerequisite: Graduate standing.

HIST 6664  
Middle Eastern Diplomatic History  
This course provides students an enlarged perspective on contemporary Middle Eastern and Southwest Asian affairs. The course discusses traditional cultures, but concentrates on the twentieth century. We will cover cultural, social, economic, and religious factors as appropriate. The focus of the course, however, is on politics, conflict, and conflict resolution.  
Prerequisite: Graduate standing.

HIST 6665  
International History of the Cold War  
This course considers problems and issues that affected different regions of the world as those problems and issues related to the Soviet-American rivalry, or the Cold War, between 1945 and 1991. Specifically, it explores the origin of the Cold War; its implications for the United States and the Soviet Union; its impact in Europe, Latin America, the Middle East, Sub-Saharan Africa, South and Central Asia, East Asia, and Southeast Asia; and the collapse of Soviet-style communism in Eastern Europe and the Soviet Union itself.  
Prerequisite: Graduate standing.

HIST 6667  
Modern American Cultural Diplomacy: "A Diplomacy of Peoples"  
This seminar explores the power and global influence of modern American cultural diplomacy. Students will study the diplomacy of private citizens and cross-cultural encounters to understand public perception and opinion as well as U.S. governmental projection of cultural power abroad. We will study the rise of U.S. nationalism/internationalism, the growth of U.S. power in continental expansion and the Spanish-American War, interwar citizen activism, public opinion and World War II, post-war occupations and reconstructions, the rising influence of internationalism, the UN, and human rights, as well as the impact of the Cold War, developmentalism, third world revolutions, and rapid globalization.  
Prerequisite: Graduate standing.

HIST 6670  
History of Genocide  
This graduate seminar introduces student to issues and themes in the history of genocide, via a comparative case-study approach. It examines the phenomenon of genocide from the perspective of both perpetrators and Victims for, only by truly understanding past genocide can one hope to help prevent its future occurrence.  
Prerequisite: Graduate standing.

HIST 6860  
History of Military Thought  
A seminar that examines the role of military theorists throughout history and their impact both on the military and political establishments. Some of the theorists who may be considered include Sun-Tze, Machiavelli, Clausewitz, Jomini, and Mahan, and their impact on both strategy and policy is discussed.  
Prerequisite: Graduate standing.

HIST 6866  
Seminar: War and Society in Wilhelmine Germany, 1871-1918  
A seminar that confronts the relationship between the German armed forces and Wilhelmine society. Designed as a reading seminar, the course explores the impacts of the unification of Germany, the rise of a powerful German navy, German colonial warfare, and the Great War on German culture, politics, and society.  
Prerequisite: Graduate standing.

HIST 6996  
Special Topics in World History  
This is a special topics seminar in World History. Course content will vary as set forth in an approved syllabus. Course may be repeated as contents change.  
Prerequisite: Graduate standing.

HIST 6997  
Directed Readings in History  
Directed individualized readings.
This is an objective test of knowledge and skills in the field of homeland security and identify the important components of homeland security. Students review the roles and responsibilities of government agencies, non-governmental organizations, and individual citizens in homeland security. The student will explore the historical events that have impacted homeland security as well as the threats to homeland security, including natural and technological disasters, intentional threats of domestic and international terrorism. Other key issues addressed are civil liberties and diversity, relationship to public safety, private security.

Prerequisite: None

HMLD 2000
Disaster Preparedness & Response
This course considers various concepts, theories, principles, programs and requirements of emergency preparedness, governmental planning, practices, exercises, and hazard/risk assessment. An overview of the relationship of preparedness to response, emergency operations, incident command systems and the role of the private sector will also be provided.

Prerequisite: Any WC & IL I course.

HMLD 2100
Dimensions of Terrorism
This course is designed to introduce and examine domestic as well as international terrorism and present the historical, philosophical, theoretical, cultural, psychologil, religious, political, and ideological motives for terrorism. It will also briefly consider methods of dealing with terrorism.

Prerequisite: Any WC & IL I course.

HMLD 2900
Careers in Homeland Security
This course will give students an overview of the different job tasks used primarily in the field of Homeland Security. It will focus on the structure and development of various careers within the field of Homeland Security. It also is designed to assist students in understanding the employment options available to them as well as the development of programs and policies within the workplace.

Prerequisite: Any WC & IL I course.

HR – Human Resources

HR 6320
Global Human Resource Management
This course examines the impact of globalization on the HR function. Cultural diversity, expatriation, and the role of transnational firms in developing economies receive special attention. Students will investigate the similarities and differences between HR techniques in national and multinational firms.

Prerequisite: Graduate standing.

HR 6400
Human Resource Management
This survey course stresses a systematic approach to human resource management and decision making. The role of HR managers is discussed, focusing specifically on the following functional areas: strategic human resource management, workforce planning and employment, and employee and labor relations. Using discussion, independent research, and objective testing, students build their knowledge of human resource management.

Prerequisite: Graduate standing.

HR 6420
Compensation Management
This is a survey course, in which students explore the contemporary issues and challenges facing compensation managers. Changes in legislation are considered, along with behavioral science theories, social and human factors, and economics. Students investigate the compensation management decision-making process, and the impact of these decisions on stakeholder constituencies.
Prerequisite: HR 6400. Graduate standing.

HR 6460
Human Resource Development
This course investigates the factors that affect adult learning. Theories of motivation, human behavior, and androgyny are explored. Students will investigate mechanistic and traditional training methodologies, and the circumstances under which these methodologies may be effectively employed.
Prerequisite: HR 6400 or 6320. Graduate standing.

HR 6470
Collective Bargaining and Labor Relations
This course examines the processes by which employees unionize their workplaces and provides practice in the labor negotiation process. Through case studies and simulated collective bargaining exercises, students will build their knowledge of, and skills in, labor negotiations.
Prerequisite: HR 6400 and 6420.

HR 6990
(1 to 3)

HR 6991
(1 to 3)

HR 7021
Certification Seminar in Human Resources
A capstone course for graduate students enrolled in the MA/HRM program or MBA students with a human resources management concentration. All of the major areas in the HRM field are generally revisited. The course will be taught through a combination of lectures, in-class discussions, and experiential exercises that should assist the student in successfully completing the Human Resource Certification Institute (HRCI) examination level of Professional in Human Resources (PHR). NOTE: Successfully completing this course will not, in and of itself, guarantee passing the certification examination. Capstone course.
Prerequisite: HR 6400, 6420, 6450, and 6460; LAW 6000.

HTM– Hospitality & Tourism Management

HTM 1010
Introduction Hotel and Travel Industry
An integrated view of the evolution of the hospitality/tourism industry and its various components. The course focuses on the interdependence of hotel/resorts, tour operators, travel agencies, attractions, and transportation modes. The political, social, and economic implications of tourism are also addressed.
Prerequisite: HTM 1010 or Any WCIL I course.

HTM 1020
Applied Methods in the Hotel and Travel Industry
This course focuses on the application of basic concepts and theories to help solve real business challenges facing today’s tourism industry. The course covers quantitative and qualitative methods in the hotel, airline, and food and beverage sectors. Industry exposure is heavily emphasized. Goal issues and industry trends are also analyzed and evaluated.
Prerequisite: HTM 1010.

HTM 3110
Hotel and Resort Management
A study of the organizational structure and operation of hotels and their various departments. Emphasis is on management concepts and the decision-making process. The course has an international orientation, taking into account variations in human and material resources.
Prerequisite: BUS 1000 or Any WCIL I course.

HTM 3210
Food and Beverage Management
An analysis of the principal operating problems and procedures as they relate to the various types of food and beverage operations ranging from fast food to gourmet facilities. Factors to be addressed include: delivery systems, cost controls, menu planning, inventory analysis, and ethnic cuisine and service, and sanitation standards.
Prerequisite: BUS 1000 or Any WCIL I course.

HTM 3220
Special Events Management
A course that focuses both on the theory and practice of management skills that a special events planner should possess. Assisted by the instructor and guest speakers, students have the opportunity to apply their knowledge in a real world situation. This course presents a systematic method of planning, organizing, monitoring, adjusting, and evaluating activities to achieve the objectives. A comprehensive business plan will be developed during the course.
Prerequisite: BUS 1000 or Any WCIL I course.

HTM 3400
Resort Planning and Design
This course focuses on the planning, design, and development of tourism resorts. The material covered includes different resort types, the history of resorts, resort markets and market analysis, feasibility analysis and financing, land use planning and product design, operations and management, and trends and outlook.
Prerequisite: HTM 2010.

HTM 3510
Travel Agency Management
A comprehensive course emphasizing the technical and administrative procedures of managing a travel agency. The course addresses procedures such as ticketing, accounting, sales promotion, creative tour packaging, and pertinent computer applications.
Prerequisite: MGMT 3100 and HTM 1010.

HTM 3535
Psychology of Tourism and Travel
Refer to PSYCH 3150.
Prerequisite: PSY 1000 or HTM 1010; Any WCIL II course.

HTM 3580
Cultural Values and Hotel Management
A course that addresses the impact of tourism on native cultures and communities. Case studies are used to examine the role of management, particularly the principles and techniques of hotel and resort management. An analysis of the relationship between tourism and native cultures is the main focus of this course.
Prerequisite: MGMT 3100 and HTM 1010.

HTM 3610
Travel Industry Marketing
A course that focuses on the resources and variables available in developing a successful marketing strategy in the travel industry: i.e., market research, advertising and promotion, sales techniques, and public relations. The travel industry distribution network and the integrated marketing efforts of the various components of the hotel and travel industry are also addressed. 
Prerequisite: MKTG 3000.

HTM 3645 (3)
Human Resource Management in Travel Industry Management
An overview and survey of human resource management and personnel administration. Course topics include: selection, staffing, remuneration, labor relations, and training and development of human resources in organizational environments such as business, government and not-for-profit agencies. 
Prerequisite: LAW 3000, MGMT 3100, and HTM 1010; COOP 2990, HTM 3990, or HTM 3991.

HTM 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

HTM 3991 (1 to 3)
Paid Internship
See Internship Section.

HTM 4110 (3)
Hotel Rooms Management
An integrated, in-depth overview of a hotel’s front office, also known as the room’s division/department. Topics covered include: the organizational structure of different types and sizes of hotels; the inter/intra relationship of hotel departments; the relationship between the rooms division and external parties; the goal of meeting customer expectations; and operational and profitability concerns. 
Prerequisite: CSCI 3201 and HTM 3110; COOP 2990, HTM 3990, or HTM 3991.

HTM 4210 (3)
Advanced Food and Beverage
This advanced course covers the study of Classical Food and Beverage and provides an investigative look into the history of food and beverage in ethnic cuisines around the world, as well as the customs and practices associated with them. Students develop an awareness of issues confronting the food professional, in particular those relating to quality food and beverage. 
Prerequisite: HTM 3210; COOP 2990, HTM 3990, or HTM 3991.

HTM 4310 (3)
Passenger Transport Management
A survey of surface (rail and highway), passenger ship, and air transportation. This course covers organization, operations, and regulatory and marketing aspects. The intermodal concept is examined as well as the social, economic, and political factors that have influenced government transportation priorities. 
Prerequisite: CSCI 3201 and HTM 3610; HTM 3110 or 3210; and COOP 2990, 3990, 3991, HTM 3990, or 3991.

HTM 4410 (3)
Destination Development and Marketing
A course that focuses on contrasting tourism development from a micro- and macro-prospective. This includes infrastructure analysis and the role and interaction of the public and private sectors. The role and promotional efforts of local, state, and national tourism organizations are also addressed. 
Prerequisite: HTM 3110 and 3610; and COOP 2990, 3990, 3991, HTM 3990, or 3991.

HTM 4620 (3)
Travel Industry Financial Analysis and Controls
The study of hospitality industry financial statements and the uniform system of accounts used in hotel departmental operating statements. The course also emphasizes budget planning, forecasting, and other financial data used in the management decision-making process. 
Prerequisite: ACCT 2010; CSCI 3201; and COOP 2990, HTM 3990, or HTM 3991.

HTM 4635 (3)
Advanced Business Law: Hotel and Travel
This course examines the legal environment of the hotel and travel industry. Focal points include: innkeeper law, tort, contract agency law, and federal, state, city, and county regulatory agencies as they relate to the travel industry. Issues relating to travel agencies, restaurants, and airlines are also covered. 
Prerequisite: HTM 3110 and 3210; COOP 2990, HTM 3990, or HTM 3991.

HTM 4655 (3)
Information Systems Issues in HTM
A course that focuses on the use of Information Systems in the Travel and Hospitality industry. It explores the use of computers to facilitate both the flow and management of information in the industry. The flow and capture of information related to providing travel and hospitality services are studied and discussed. The constant changes in information systems technology and their impact on the channels of distribution are explored. This includes a study of the airline travel information networks (Sabre, Galileo, and Amadeus) and the Central Reservation Systems (CRS) of hotel and car rental companies. This course also focuses on the inter-dependence and cross linking of these systems along with the emergence of the Internet as another channel of information flow. In addition, the use of information from these networks at the local level (hotel, car rental, attraction, and restaurant) and the subsequent use and management of information generated as a result of customers receiving services are also discussed. 
Prerequisite: CSCI 3201; HTM 3110 and 3610; and COOP 2990, 3990, 3991, HTM 3990, or 3991.

HTM 4692 (3)
Management of Customer Service Organizations
A course that provides an integrated and in-depth overview of the management concepts, elements, procedures, and results necessary for service oriented organizations. Management methods are explored with a special emphasis on identifying and understanding the culture of organizations. The focus is on culture and the changes required within the organization’s culture to posture the organization to achieve its vision, mission, and goals. A review of the cultures of service organizations, with particular emphasis on the travel and hospitality industry, is conducted to gain insights into the factors that make a service organization successful. Case studies and experiential methods are utilized to develop an appreciation for proactive service delivery systems as the means to achieving customer satisfaction and improved productivity. 
Prerequisite: HTM 3110, 3610, 3645, or MGMT 3400; and COOP 2990, HTM 3990, or HTM 3991.
HTM 4997 (1 to 3) Directed Readings in Travel Industry Management
Directed individualized readings.

HTM 6110 (3) Seminar in Hotel and Resort Management
A seminar that explores the nature and application of the four basic elements of hotel/resort management: service to the customer; the art of management; sales and marketing; and how to handle business groups.
Prerequisite: Graduate standing.

HTM 6220 (3) Special Events Management
A course that focuses both on the theory and practice of management skills that a special events planner should possess. Assisted by the instructor and guest speakers, students have the opportunity to apply their knowledge in a real world situation. This course presents a systemic method of planning, organizing, monitoring, adjusting, and evaluating activities to achieve the objectives. A comprehensive business plan will be developed during the course.
Prerequisite: Graduate standing.

HTM 6310 (3) Issues in Passenger Management
A seminar on comparative transportation modes, networks, and priorities among selected nations of the world. The impact of political factors and economic and social considerations is also addressed. The contribution that each mode of transportation has made toward the development and growth of tourism is discussed.
Prerequisite: Graduate standing.

HTM 6410 (3) Destination Area Planning
A comprehensive planning approach in evaluating all perspective touristic attributes in a given area. The following are analyzed: the role and interactions of the public and private sectors; transportation modes and accessibility; and image enhancement and advertising as promotional strategies.
Prerequisite: Graduate standing.

HTM 6635 (3) Advanced Business Law: Hotel and Travel
This course examines the legal environment of the hotel and travel industry. Focal points include: innkeeper law, tort, contract agency law, and federal, state, city, and county regulatory agencies as they relate to the travel industry. Issues relating to travel agencies, restaurants, and airlines are also covered.
Prerequisite: Graduate standing.

HTM 6655 (3) Information Systems in Travel Industry Management
A course that focuses on the use of Information Systems in Hospitality and Tourism Management. It explores the use of computers to facilitate both the flow and management of information in the industry. The flow and capture of information related to providing travel and hospitality services are studied and discussed. The constant changes in information systems technology and their impact on the channels of distribution are explored. This includes a study of the airline travel information networks (Sabre, Galileo, and Amadeus) and the Central Reservation Systems (CRS) of hotel and car rental companies. This course also focuses on the inter-dependence and cross linking of these systems along with the emergence of the Internet as another channel of information flow. In addition, the use of information from these networks at the local level (hotel, car rental, attraction, and restaurant) and the subsequent use and management of information generated as a result of customers receiving services are also discussed.
Prerequisite: MGMT 6050. Graduate standing.

HTM 6692 (3) Management of Customer Service Organizations
A course that provides an integrated and in depth overview of the management concepts, elements, procedures, and results necessary for service oriented organizations. Management methods are explored with a special emphasis on identifying and understanding the culture of organizations. The focus is on culture and the changes required within the organization’s culture to posture the organization to achieve its vision, mission, and goals. A review of the cultures of service organizations, with particular emphasis on the travel and hospitality industry, is conducted to gain insights into the factors that make a service organization successful. Case studies and experiential methods are utilized to develop an appreciation for proactive service delivery systems as the means to achieving customer satisfaction and improved productivity.
Prerequisite: Graduate standing.

HTM 6690 (1 to 3) Nonpaid Internship
See Internship Section.
Prerequisite: Graduate standing.

HTM 6691 (1 to 3) Paid Internship
See Internship Section.
Prerequisite: Graduate standing.

HTM 6697 (1 to 3) Directed Readings in Travel Industry Management
Directed individualized readings. Repeatable for credit
Prerequisite: Graduate Standing

HTM 7005 (3) HTM Business Development and Operations
Prerequisite: Graduate standing.

HUM-Humanitiess

HUM 1000 (3) Introduction to the Humanities
Personal and social values such as the meaning of freedom, the nature of truth, the concept of justice, and what makes for a good life will be explored through the arts, literature, religion and philosophy from a wide spectrum of world cultures. Analysis of historical contexts will prove useful for guiding today's life choices.

HUM 1270 (3) Introduction to Women's Studies
An introduction to the key issues, questions and debates in the interdisciplinary field of women's studies, with particular emphasis on the ways women's experiences and identities are shaped by race, class, ethnicity, and sexual orientation within a global context. This course is intended to serve as a foundation for upper-division courses in women's and
gender studies.

**HUM 3000**
The Contemporary Choices
Humanistic works presented and analyzed for their perspectives on the possibility of obtaining individual human happiness in our age of mass communication and ideology. Students choose, define, and present the major alternatives for an area of their individual choice.
*Prerequisite: Any WCIL II course.*

**HUM 3100**
Alternative Futures
An interdisciplinary and cross-cultural attempt to understand the human capacity for free choice, creativity, and wisdom in the transformation of society. History is studied in terms of successes, failures, obstacles, opportunities, and unrealized possibilities in taking responsibilities for the future. Special emphasis is given to global economics and interdependence between the future of humanity and the life of the earth.
*Prerequisite: Any WCIL II course.*

**HUM 3601**
Mythology
An introduction to the myths of ancient Greece and other cultures. The course focuses on the identification of mythic motifs, and on the significance of myth in human cultures. Students will also explore modern approaches to understanding myth’s relation the psyche, society, history, art, and literature.
*Prerequisite: Any WCIL II course.*

**HUM 3900**
Research and Writing in the Humanities
The presentation of analytical techniques for understanding humanistic works and exercises for developing advanced expository writing skills. Progressively intricate library research projects culminating in a major research paper.
*Prerequisite: Any WCIL II course.*

**HUM 3990**
Nonpaid Internship
See Internship Section.

**HUM 3991**
Paid Internship
See Internship Section.

**HUM 4500**
The World Problematique
An interdisciplinary course on how the humanities (history, literature, philosophy, art, etc.) have shaped our world views and how the humanities can offer critical tools for addressing the problems facing the world today. Instructors may focus on a particular theme such as civilization, the environment, social and ethical concerns, etc.
*Prerequisite: Any WCIL II course.*

**HUM 4550**
The Military and Social Change
A consideration of the role of the military in society and how social concerns can affect the military. Some of the issues that may be discussed include the integration of the military in terms of race and gender, the relationship between the military and the government, and ethical concerns of military personnel in dealing with prisoners of war, civilians, etc.

**HUM 4900**
Interdisciplinary Seminar and Integrative Project
A capstone honors seminar, interdisciplinary in approach, culminating in a major integrative project. The project may be either research-connected or creative. Although the course has been designed for students currently enrolled in Hawai‘i Pacific University’s Scholars Program, others may enroll by consent.
*Prerequisite: Senior standing.*

**HUM 6601**
Seminar: Military and a Civil Society
A seminar that examines the concept of civil society and the differing roles and contributions of the military. Some of the topics discussed may include race and gender issues within the military, conflicts between citizen liberties and national security, the impact of military technological advances on the larger society, the impact of the military on popular culture, and the fighting of drug wars.
*Prerequisite: Graduate standing.*

**Internships**

**3990/6990**
Nonpaid Internships
A minimum of 75, 150, or 200 hours (per 1, 2, or 3 credits respectively) of nonpaid work experience in a preprofessional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Comprehensive written reports are required by an assigned HPU instructor. Internships are defined as training and can be offered in all majors. Internships are identified by the alpha for the subject area (e.g., ACCT, ECON, CSCI) followed by either the number 3990 for undergraduate level or 6990 for graduate level.
*Prerequisite: At least a 2.7 GPA for undergraduate level and a 3.0 for graduate*

**3991/6991**
Paid Internships
A minimum of 200, 400, or 600 hours (per 1, 2, or 3 credits respectively) of paid work experience in a preprofessional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Comprehensive written reports are required by an assigned HPU instructor. Internships are defined as training and can be offered in all majors. Internships are identified by the alpha for the subject area (e.g., ACCT, ECON, CSCI) followed by either the number 3991 for undergraduate level or 6991 for graduate level.
*Prerequisite: At least a 2.7 GPA for undergraduate level and a 3.0 for graduate*

**INTR – International Studies**

**INTR 1000**
The International System
This course introduces students to some of the most important and recent thinking on the international system. How should we think about this new world that is marked by the integration of globalization and the division of terrorism and genocide? Students will be introduced to several of the major works by well known thinkers on both previous global systems and new views of what the present and future international system will be. Possible
topics explored can include global ideological conflict, the spread of liberalism, the clash of civilizations, imperial systems, the rise of Asia and the decline of the West, etc.

**INTR 3000** (3)
**International Relations**
An examination of the international political system focusing on relating theoretical approaches for analyzing the behavior of state and non-state actors in the international system. This course explores fundamental concepts like power, autonomy, sovereignty, etc. and connects these to current topics and issues in international society including (but not limited to) international conflict and cooperation, globalization, international law and human rights, arms control and disarmament, terrorism, politics of the global commons, failed states and intervention, and the effects of ideology on international affairs.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3100** (3)
**International Political Economy**
An examination of the political determinants of international economic relations. Different schools of thought like realism, Marxism, and liberalism are analyzed and compared. Topics covered include the politics of international trade, problems and the structural balance of power between and among states and institutions.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3200** (3)
**National and International Security**
The goal of this course is to give students grounding in the field of security studies, including external strategies and internal evolution of government institutions. It will first cover the historical development of American national security followed by an examination of transnational and non-traditional security issues. Comparisons with other countries and/or regions may also be included.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3250** (3)
**Peace-Building and Conflict Management**
The course examines approaches to preventing and managing international conflict, including preventative diplomacy, negotiation, third-party resolution, track-two diplomacy, and evolving collective security arrangements. It analyzes the institutions, both official and nongovernmental, that engage in peacemaking, and provides detailed case studies of conflict management and dispute resolution.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3275** (3)
**Global Governance**
The course examines global governance in an increasingly interdependent world. This include international or transnational structures such as formal international intergovernmental organizations (UN, WHO, WTO, APEC) and international nongovernmental organizations (Oxfam, Doctors Without Borders, Human Rights Watch), international rules or laws, norms or “soft law”, and international regimes in such areas as peacekeeping, disaster management, trade, social, and humanitarian issues.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTERNATIONAL LAW**
This course is an examination of the nature and function of international law in international politics. The course introduces students to the principles and norms governing the contemporary community of nations, as well as questions about the role of international law in shaping international relations.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3350** (3)
**International Human Rights**
A course that introduces students to the development of universal human rights' norms in the international system. The seminar examines contemporary debates concerning the universal implementation human rights, efforts to implement these at the national, regional, and international levels, and the links between human rights and democratization.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3400** (3)
**International Relations of Asia**
An analysis of the changing patterns of Asian international relations and the factors that determine national behaviors of Asian countries. Relations will be examined from multiple perspectives, from both security and conflict to economic interdependence, institutions, alliance, and the role of non-state actors. The course may cover all of East, Southeast and South Asia, or focus on only one or two of these regions of Asia.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3900** (3)
**Contemporary Nations Seminar**
A seminar studying in depth a specific country (to be announced) through readings, research, and interaction with students from the target country. Topics may include political, economic, social, cultural and other areas relevant to understanding this nation from a contemporary, interdisciplinary perspective.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

**INTR 3905** (3)
**Contemporary Nations: European Union**
A study of the history, theory, and practice of European integration. The course provides the historical context of modern Europe to assess the powers, influence, and methods of functioning of the principal institutions and political actors in the European Union. It also reviews the EU’s policy interests and processes, from agriculture to industry, and from social affairs to science and technology. Other topics covered include external relations, monetary union, and future EU expansion.
Prerequisite: Any lower division social science course plus any WCIL II course.

**INTR 3910** (3)
**Contemporary Nations: France**
This is an interdisciplinary course that explores a number of contemporary topics dealing with France. It will start with an overview of modern French history and the political system of the Fifth Republic. It will then examine several contemporary issues in France: Republicanism and Laïcité, social movements, immigration and citizenship, globalization and economy, culture, and foreign policy.
Prerequisite: A grade of C- or higher in any WCIL II course;
PSCI 1400, 2000, or 2500. Undergraduate standing.

INTR 3920 (3)
Contemporary Nations: Central and Eastern Europe
An interdisciplinary survey of Central and Eastern Europe. The countries offer a wide variation of development and change since the fall of communism. Topics explored include problems of democratic transition and consolidation, the challenges of creating market-based economic systems, and integration into the European Union and NATO.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3930 (3)
Contemporary Nations: China
An interdisciplinary look at China in the post-Mao (post-1976) period. Readings and other educational media and activities will offer an understanding of the dramatic changes in the economy, political system, society, and public cultures of the People's Republic of China. The course also includes an investigation of some critical issues in the process of integrating Hong Kong.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3931 (3)
Contemporary Nations: Hong Kong
The exploration of major local and international issues involved in the transfer of sovereignty from Great Britain to China. This course examines the context of Hong Kong's historical and economic role in Asia, with consideration given to post-1997 HK-PRC relationships.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3932 (3)
Contemporary Nations: Taiwan
An in-depth study of major developments (society, politics, economy, culture, foreign relations, etc.) occurring today in Taiwan, explored in the context of the significant historical changes occurring in the post-Chiang Kai-Shek era.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3933 (3)
Contemporary Nations: Southeast Asia
An examination of the cultural history and political economy of mainland Southeast Asia, a region that includes Burma, Cambodia, Laos, Thailand, and Vietnam. Topics include the rise and fall of ancient empires, colonialism, the Vietnam War, as well as some of the region's contemporary problems, including democratization, ethnic conflict, industrialization, and relations with world powers.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3935 (3)
Contemporary Nations: Japan
An interdisciplinary seminar that focuses on the geographical, environmental, social, economic, and political aspects of contemporary Japan. The primary emphasis is on how Japan has changed since World War II and the problems/issues it faces in the near future.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

INTR 3936 (3)
Contemporary Nations: Korea
An examination of the political, economic, and social systems on the Korean peninsula. The course provides an in-depth analysis of changes and continuity in these systems with a focus on the post-World War II period. It also explores U.S.-Korean relations and the challenges and prospects for a peaceful resolution to the Korean conflict.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

INTR 3940 (3)
Contemporary Nations: USA
An investigation by students of certain persistent social and political dilemmas such as race, America's reputation abroad, and social inequality. Students will look at the American culture from domestic and international perspectives. Does America deserve its reputation, good or bad, in other countries?
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

INTR 3945 (3)
Contemporary Nations: Latin America
An interdisciplinary course that explores the geography, contemporary socio-political issues and cultural history of Latin America. Through different case studies, it examines the interlocking relationships of economic, geographic, historical, political and social structures in contemporary Latin America and this regions place in global affairs.
Prerequisite: Any Research and Epistemology A course; Any introductory social science course.

INTR 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

INTR 3991 (1 to 3)
Paid Internship
See Internship Section.

INTR 4110 (3)
Diaspora Cultures
This course examines several different examples of people in Diaspora whether forcibly or through voluntary migration. It seeks to understand the phenomenon of groups of people who are defined and who define themselves as separate entities from some putative mainstreams, with a separate point of origin. Classic Diaspora cultures to be covered include the Jewish Diaspora, the African Diaspora, and the Chinese Diaspora. More recent Diasporas across the Pacific will also be included.
Prerequisite: Any introductory social science course; Any WCIL II course.

INTR 4900 (3)
Senior Seminar in International Studies
A capstone course for international Studies majors that includes an in-depth survey of the major methodologies and theories in the fields of International Relations and International Studies. Students will be responsible for leading a discussion seminar and producing a major research paper. Capstone course.
Prerequisite: Senior status.

INTR 6300 (3)
International and Domestic Emergency Management
A comparative study of international and domestic emergency management. The course provides the basic tools for planning and implementing disaster and recovery plans. Topics include civil-military coordination in complex emergencies, NGO and public health issues, command, control and information management, communication and warning systems, intergovernmental relations, and media relations.
Prerequisite: Graduate standing.
This course provides an overview of enterprise database management with a strong focus on systems based on the relational database model. Topics include conceptual modeling, logical and physical design, SQL programming, application development, data warehouse, data quality and integration, data and database administration, architecture, and security. In addition students will also research alternate database models and emerging trends in the database industry.

Prerequisite: Graduate standing.

Systems Architecture

A survey of basic hardware and data communications principles. The course discusses topics in: machine programming sequencing and data structure addressing methods; processor evolution and design; memory structures; peripherals; fundamental communications concepts; and data communication hardware devices. The course objective is to give students an appreciation for the concepts upon which computer information systems architectures are built. Students are expected to invest substantial amounts of HTMe and energy in: reading from the text and other professional sources; completing homework problems in a thorough and professional manner; and demonstrating mastery of course concepts on quizzes and exams.

Prerequisite: Graduate standing.

Comparative Software Engineering

A rigorous academic experience that will help students master the fundamentals of modern systems analysis and design. Object-oriented methods and tools are introduced, studied, mastered and compared to structured methods in systems analysis and design (SSAD) as a means for establishing a sophisticated knowledge base from which to make decisions regarding appropriate software development strategies. Students are expected to have already mastered SSAD methods before enrolling in IS 6110.

Prerequisite: Graduate standing.

Software Engineering Practicum

A professionally relevant development experience that helps students master the fundamentals of modern systems design, development, and implementation. Working as members of a project team, students produce a software system that solves a nontrivial problem by adhering to a formal set of development techniques (e.g., structured walkthroughs, code inspections, proofs of correctness). Equally important, students plan, schedule, manage, and evaluate the development process using industry standard project management techniques.

Prerequisite: IS 6050, 6065, and 6110. Graduate standing.

Telecommunications

A course in the technical and management aspects of modern telecommunications systems. Topics include: communications fundamentals; data and multiplexing media communications hardware and software; design and management of communications facilities and systems; comparative telecommunications standards and architectures, and migration strategies from existing to new systems.

Prerequisite: Graduate standing.
IS 6230  
Knowledge Management  
The course provides an awareness of current theories and best practices associated with Knowledge Management (KM). Using a seminar approach, IS 6230 will ask students to become expert in the areas of: identifying and valuing knowledge assets, properly managing intellectual capital, choosing and evaluating KM information architectures, and developing appropriate KM strategies for complex organizations.  
Prerequisite: Graduate standing.

IS 6250  
Global Information Systems  
The course examines opportunities and issues associated with the selection, development and best practices of global information systems. Topics include intranets, extranets, mobile and Web-based applications; sustainability and reliability of data centers, infrastructure and related systems; cultural and regulatory issues; mobile computing; security and privacy issues involving users, data, storage, telecommunications, physical and virtual systems.  
Prerequisite: Graduate standing.

IS 6260  
Network Analysis  
Network analysis is used in the study of diverse structures such as the Internet, interlocking directorates, transportation systems, epidemic spreading, metabolic pathways, the Web graph, electrical circuits and project plans. This course focuses on the methodological foundations which have become a prerequisite for researchers and practitioners working with network models.  
Prerequisite: Graduate standing.

IS 6270  
Management of Information Resources  
a course that addresses the problems and issues faced by managers of modern data or information centers. Topics include: organization; site selection; hardware and software acquisition; standards and procedures; job scheduling, IS-user relations, management of distributed data processing; help desk functions, systems security, and the management of technology transfer.  
Prerequisite: IS 6065. Graduate standing.

IS 6280  
Data Mining for Business Intelligence  
Organizations have an ever-increasing availability of information and the area of Business Intelligence provides astute methodologies, technologies, and strategies for mining that enormous volume of data. In this course, participants will gain a better understanding of both well-established and cutting-edge processes being employed to capture that data and to turn this information into key resources for organizations. The technologies and processes of data mining will be discussed, demonstrated, and employed.  
Prerequisite: Graduate standing.

IS 6330  
Advanced Issues in Connectivity  
An advanced course concentrating on contemporary issues in data and telecommunications. The course provides students with an opportunity to compare competing implementations for sharing all forms of information (data, voice, video, etc.) in a large organization. Topics include: comparative LAN/WAN implementations; e-mail; voice-mail; EDI and imaging; groupware; security in a connected environment.  
Prerequisite: IS 6130. Graduate standing.

IS 6340  
Information Systems Security  
A comprehensive introduction to information systems security. Topics include: system security analysis; security system design principles; tools to aid in security analysis; modern security practices; and testing. Using a combination of research and hands-on methods, students become familiar with modern encryption methods, security breach detection, and security audits.  
Prerequisite: IS 6070. Graduate standing.

IS 6360  
Big Data  
This course comprehensively covers methods for the design, implementation, and managing of Big Data analytics. This course is designed to be a hands-on learning experience with a focus on technologies and modeling methods for large-scale, distributed analytics. Upon successful completion of the course, members will become familiar with the fundamental concepts of Big Data management, recognize challenges and understand how Big Data impacts business intelligence including proposing scalable solutions for organizations.  
Prerequisite: Graduate standing.

IS 6370  
Advanced Applications Development  
An advanced course intended for experienced microcomputer users, IS 6370 covers a variety of topics relating to the use of microcomputers in a business context. Topics include: data and applications sharing (OLE, DDE, ODBC); development of sophisticated applications in a GUI (graphical user interface) environment; access and security in a connected environment; and the management of microcomputer-based hardware and software resources.  
Prerequisite: IS 6050. Graduate standing.

IS 6380  
Systems Forensics  
This course will provide the student of information systems with an insight into the complexities of computer systems forensics coupled with hands on experience. The course covers topics related to criminal justice, computer forensics, and computer technology. The course focuses on acquiring evidence from computers, networks, and logs. Legal aspects such as preserving the chain of evidence, and the aspects of search and seizure of technology related equipment and information are also discussed.  
Prerequisite: IS 6070. Graduate standing.

IS 6990  
Nonpaid Internship  
See Internship Section.  
Prerequisite: Graduate standing.

IS 6991  
Paid Internship  
See Internship Section.  
Prerequisite: Graduate standing.

IS 6997  
Selected Topics in Information Systems  
Directed individualized readings. Course content will vary as set forth in an approved syllabus. May be repeated when content has changed.  
Prerequisite: Graduate standing.
IS 7100 Graduate Thesis/Applied Project Proposal
Initial design and development of the MSIS thesis or major research project. Capstone course. 
Prerequisite: IS 6005, 6020, 6070, 6110. Graduate standing.

IS 7200 Graduate Thesis/ Applied Project
Completion of MSIS thesis/applied project. Capstone course. 
Prerequisite: IS 7100. Graduate standing.

IS 7300 MSIS Integrated Capstone
Acapstone seminar that focuses on the strategic perspective for aligning competitive strategy, core competencies, and the design and management of organizational systems consisting of three interacting subsystems: the enterprise; the IS function and its role in marshaling information technologies and assets to support the organization strategy, and the information technology architecture consisting of the networks, hardware, data, and applications. Capstone course. 
Prerequisite: IS 6005; 6010, 6040, 6050, 6070, 6110, 6120, 6130. Graduate standing.

JADM – Justice Administration

JADM 6990 (1 to 3)
Nonpaid Internship
See Internship Section. 
Prerequisite: Graduate standing.

JADM 6991 (1 to 3)
Paid Internship
See Internship Section. 
Prerequisite: Graduate standing.

JOUR – Journalism (RETIRED?)

JOUR 1100 (3)
Writing for the Media
This course provides an introduction to the skills needed to be a critical reader and writer of modern news sources for print, broadcast or digital media. It emphasizes analysis and practice of a variety of new writing styles and distribution methods that are dominating public discourse today. Students develop communications skills that can be used throughout their academic and professional careers regardless of their fields. The course includes a brief historical survey of journalism and an examination of how journalism is changing today. Some students may enroll concurrently in WRI 1101 lab for additional support. Place out option for General Education Program: Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement. 
Prerequisite: A grade of C- or better in WRI 1050 and concurrent enrollment in WRI 1101; or an appropriate score on a placement test

JOUR 3000 (3)
News Writing for Integrated Media
A review of the basic structure of newsrooms and basic news writing for all media. The course reviews career options and social, legal, technical and ethical environments in which news media operate. It distinguishes news from other types of writing and provides instruction and practice in writing designed to enhance student skills and provide opportunities for publication in the digital age. 
Prerequisite: Any WCIL II course.

JOUR 3300 (3)
Reporting
An examination of sources and procedures for gathering information, including surveys, press conferences, speeches, releases, references, and public records, with emphasis on traditional beats: weather, government, police, fire, courts, sports, business and consumer affairs, environment, science, medicine, religion, and multiculturalism. Writing assignments are directed toward publication in the University student newspaper. 
Prerequisite: JOUR 1100 and WRI 1200; or JOUR 3000.

JOUR 3340 (3)
Sports Writing
This course enhances the understanding and application of the basic principles and skills in sports reporting, writing and broadcasting within professional settings and deadlines. Students will attend sporting events and write stories of the action for a variety of media, including online. They will also write sports features, profiles, columns and enterprise stories. 
Prerequisite: JOUR 1100 or 3000.

JOUR 3350 (3)
Advanced Reporting
The aim of this course is to help students enhance their investigations and reporting skills. Topics emphasized will include using observation, interviews, and the Internet to locate, organize, and analyze existing data in order to write ethical, responsible, and meaningful news stories in a variety of media. 
Prerequisite: A grade of C- or higher in any WCIL II course; JOUR 3000 and 3300.

JOUR 3400 (3)
Editing
An introduction to the theory and practice of newspaper editing and modern newspaper procedures. The course prepares students to become print editors and demonstrates how these basic editing skills are applicable to broadcast, digital and online media. The course provides hands-on experience in editing, rewriting and copy editing. It also discusses fairness, balance, ethics, taste and news judgment. The course emphasizes that ethical communicators are essential in the modern, digital news business. 
Prerequisite: JOUR 3300. Undergraduate standing.

JOUR 3420 Publication Design
An introduction to the theory and practice of design for print publication. The course provides practical hands-on production experience in writing and editing copy and integrating it with graphics, photography, typography, and page formats to create inviting and readable newspaper articles, pages, and sections that balance unity and variety and create reader interest and excitement. 
Prerequisite: JOUR 3000 or Any WCIL II course.

JOUR 3430 (3)
Feature Writing
In this course students will learn the elements of feature writ
ing - leads, transitions, voice, description, etc. - and will learn a variety of feature formats, including profile, essay, general interest, and historical.

**Prerequisite:** JOUR 3300.

**JOUR 3455**

**Photography in Journalism**

In this course, students can learn principles of photography in journalism toward producing quality photographs that communicate accurately and meaningfully. Students use Photoshop software as they learn how to prepare photos digitally for journalistic display in print and online. To better learn photography principles and skills, students use "through-the-lens" 35mm cameras that allow manual exposure to control and scan their film, and convert their photos into digital form.

**Prerequisite:** Any WCIL II course.

**JOUR 3500**

**The Journalist as Entrepreneur**

For future publishers and managing editors, new directors, station managers or entrepreneurs who want to start their own publication, radio, TV, or on-line news operation, this course explores the business side of journalism. Topics covered include identifying a market niche, developing a budget, a marketing plan, a production schedule, advertising sales and promotion, sources, and managing facilities, materials, and people.

**Prerequisite:** JOUR 3300. Undergraduate standing.

**JOUR 3555**

**Advanced Photography in Journalism**

In this course, students complete projects based on the assignments and work of professional photojournalists. Students prepare photos digitally as they assemble their own photojournalism portfolio. Students use "through-the-lens" 35mm cameras that allow manual exposure control and scan their film to convert their photos to digital form.

**Prerequisite:** JOUR 3455.

**JOUR 3600**

**Electronic Journalism**

A course that provides fundamentals of page and publication design, layout, and production using QuarkXpress, Adobe Photoshop, Adobe Illustrator software applications. Students produce a variety of publications while learning computer typography, graphic design, computer imaging layout, and studio preparation for printing.

**Prerequisite:** MULT 2460.

**JOUR 3990**

**Nonpaid Internship**

See Internship Section.

**JOUR 3991**

**Paid Internship**

**JOUR 4900**

**Seminar in Journalism**

A course that enlarges students' theoretical understanding and sharpens their practical editing, design, and production skills as senior editors of the University newspaper. The academic focus includes media law, ethics, the environment, politics, freedom of speech, and education addressed in seminar style with oral reports and a written research project.

**Prerequisite:** Undergraduate standing. Senior standing.

**JPE – Japanese**

**JPE 1100**

**Beginning Japanese I**

An introduction to written and spoken Japanese, as well as Japanese culture. This is the first semester of a two-semester sequence.

**JPE 1200**

**Beginning Japanese II**

An introduction to written and spoken Japanese, as well as Japanese Culture. This is the second semester of a two-semester sequence.

**Prerequisite:** JPE 1100.

**JPE 2100**

**Intermediate Japanese I**

Conversation, reading, grammar, and Japanese culture. This is the first semester of a two-semester sequence.

**Prerequisite:** JPE 1200.

**JPE 2200**

**Intermediate Japanese II**

Conversation, reading, grammar, and Japanese culture. This is the second semester of a two-semester sequence.

**Prerequisite:** JPE 2100.

**JPE 3100**

**Advanced Japanese I**

Advanced conversation, reading, grammar, and Japanese culture. This is the first semester of a two-semester sequence.

**Prerequisite:** JPE 2200.

**JPE 3200**

**Advanced Japanese II**

Advanced conversation and Japanese culture, stressing the ability to understand extended conversations and to develop fluency in conversational Japanese on a variety of topics.

**Prerequisite:** JPE 3100.

**JPE 4100**

**Advanced Japanese III**

Advanced course in reading and writing, emphasizing vocabulary development, comprehension skills, and basic writing skills on a variety of topics.

**Prerequisite:** JPE 3100.

**JPE 4200**

**Advanced Japanese IV**

Advanced conversation, reading, grammar, and Japanese culture, emphasizing development of all language skills.

**Prerequisite:** JPE 3100.

**KOR – Korean**

**KOR 1100**

**Beginning Korean I**

An introduction to written and spoken contemporary Korean, as well as Korean culture. This is the first semester of a two-semester sequence.

**KOR 1200**

**Beginning Korean II**

An introduction to written and spoken contemporary Korean, as well as Korean culture. This is the second semester of a two-semester sequence.

**Prerequisite:** KOR 1200.
KOR 2100 (4) Intermediate Korean I
Conversation, reading, grammar, and Korean culture. This is the first semester of a two-semester.
Prerequisite: KOR 1200.

KOR 2200 (4) Intermediate Korean II
Conversation, reading, grammar, and Korean culture. This is the second semester of a two-semester sequence.
Prerequisite: KOR 2100.

LIT – Literature

LIT 6011 (3) World Literature
A study of world literature from the first heroic narrative--the Babylonian epic of Gilgamesh--to the anti-heroic Vietnam War narratives of HTM O’Brien. The course begins with select modern poetry from around the world that identifies themes that command the attention of writers today and proceeds to explore earlier statements and explorations of these themes in selected masterpieces of world literature. A special focus is the examination of the imaginative roots of Western and Islamic cultures. The course culminates in an examination of modern and contemporary world literature as it treats themes of sexual morality and the conduct of war.
Prerequisite: Graduate standing.

LIT 6701 (3) Seminar: Literature and the Experience of War
A course that explores the representation of war in classical, Renaissance, and modern writers including Homer, Shakespeare, Twain, Remarque, Hemingway, James Jones, and Normal Mailer.
Prerequisite: Graduate standing.

MARS – Marine Science

MARS 1000 (3) Introductory Oceanography
An elementary survey of the geology, chemistry, physics, and biology of the oceans. Topics include: ocean basin morphology, plate tectonics, sedimentation, major and minor components of seawater, ocean circulation, waves, tides, plankton, nekton, and benthic organisms.

MARS 1010 (3) Field Experience in Marine Science
This field intensive course is designed to introduce students to Hawai‘i’s unique tropical marine environment with an emphasis on coral reef survey methods and ocean safety. Lecture and lab topics include natural history of the Hawaiian Islands, ocean and surf safety, snorkeling skills, first-aid and CPR, marine life identification, and coral reef survey techniques. Field trips include a pool session, night reef walk and numerous snorkel surveys. Basic swimming skills and personal snorkel gear are required. Recommended for all marine science students and others interested in working in Hawai‘i’s marine environment.

MARS 1020 (3) Oceanographic Field Techniques
An introduction to working safely and efficiently from a coastal research vessel. Topics include: mariHTMe terminology, positioning and navigation, basic mariHTMe weather, shipboard sampling, and measurement techniques. The course includes lectures and field sessions aboard the R/V Kaholo. Required for incoming freshmen and strongly recommended for transfer students.
Prerequisite: A grade of C or better in MATH 1130 or higher (or math SAT of at least 550 or math ACT of 24 or higher). Restricted to Marine Science majors; A grade of C or better in Any WCIL I course.

MARS 1040 (3) Introduction to SCUBA Diving and Marine Life in Hawai‘i
Skin diver and scuba diver skills are taught in the context of using these skills to safely dive in open water in a range of the underwater environments and conditions. As part of the course, students will earn NAUI (National Association of Underwater Instructors) Scuba Diver and Advanced Scuba Diver certifications. The objective of this course is to provide students with intensive training in preparation for continued marine science education and more advanced training Scuba diving. During the course students will learn to identify the major coral reef fauna a several popular dive sites in Hawai‘i.
Prerequisite: No prior Scuba diving experience is required; basic swimming proficiency, proof of medical insurance and no existing medical conditions which may interfere with Scuba diving. Person mask, fins and snorkel (these items can be purchased at a discount through cooperating dive shops). A swimming skills evaluation will be conducted in a swimming pool on the first day of class and all students must pass the following skills before proceeding to underwater activities: 10 minutes treading water, swim 50 ft underwater, swim 400 yards in 10 minutes.

MARS 1500 (3) Marine Biology and Global Oceans
The oceans and atmosphere impact and are impacted by virtually all life on earth and our knowledge of the diversity and consequences of anthropogenic impacts on these systems is growing steadily. This course will provide a foundation of knowledge on marine biological systems and then discuss how the world oceans and surrounding environments affect and are affected by people from an economic, cultural, and political perspective.

MARS 2060 (4) Geological, Chemical, and Physical Oceanography
A rigorous and comprehensive introduction to geological, chemical, and physical oceanography. Topics include: earth structure and composition, plate tectonics, sediments, the hydrosphere, properties of water and seawater, salinity, gases, nutrients, atmosphere circulation, heat budgets, surface ocean circulation, thermohaline circulation, waves, tides, and coastal oceanography.
Prerequisite: BIOL 2052 or CHEM 2052.

MARS 2061 (2) Geological, Chemical, and Physical Oceanography Laboratory
Field and laboratory component of MARS 2060. Topics include: bathymetry, sediment sampling and size analysis, seawater sample collection, temperature, salinity, pH, and dissolved oxygen measurement using in situ instruments, dissolved oxygen and plant nutrient laboratory analyses, in situ light intensity measurements, Lagrangian current measurements.
Prerequisite: CSCI 1011; BIOL 2053 or CHEM 2053; MARS 1020; MARS 2060 or concurrent.
MARS 2062
Marine Biology
A comprehensive introduction to marine biology. Topics will include principles of marine science, life in the marine environment, structure and function of marine ecosystems, and human impacts on the marine environment. 
Prerequisite: BIOL 2052.

MARS 2063
Marine Biology Laboratory
Field and Laboratory component of Marine Biology 2062. This course provides experience with sampling, measurement, and data analysis techniques commonly used for field and laboratory work in marine biology. In addition, students will learn basic identifications of local marine organisms. Prerequisite: BIOL 2053, MARS 1020, and 2062* (* may be taken concurrently).

MARS 2100
Marine Resource Management: Social, Ecological, and Cultural Dimensions
Coastal communities throughout the world are highly reliant on ocean ecosystems, and threats to ocean resources places at risk the livelihoods, cultures, and economies of coastal people. In this course, students will develop and understanding of the key threats to ocean resources such as land-based pollution, overfishing, and climate change adaptation, and critically examine innovative solutions to these threats. Students will gain a deep understanding of cultural resource management approaches, and their application in modern policy contexts, providing a transferable skillset for emerging ocean leaders and professionals. 
Prerequisite: Any WCIL II course.

MARS 2110
Ocean Environment of the Pacific Islands
An introduction to the oceanography and the technologies for operating at sea. The concepts of navigation (piloting, celestial, and electronic), and physics of sail are taught from their bases in astronomy, mathematics, and equipment, the methodologies involved in the collection, reduction, and analysis of oceanographic data, and the attendant operations of sailing an oceanographic research vessel. 
Prerequisite: Any WCIL II course.

MARS 3000
General Oceanography I
The fall semester of a comprehensive introduction to modern oceanography. Topics include: earth history, plate tectonics, geophysics, geochemistry, marine sediments, the hydrosphere, physical properties of salt water, major and minor components of seawater, and ocean-atmosphere interactions. 
Prerequisite: BIOL 2052 or CHEM 2052.

MARS 3001
General Oceanography I Lab
Laboratory and field component of MARS 3000. Prerequisite: CSCI 1011, MARS 1020, and 3000*. BIOL 2053 or CHEM 2053 (* may be taken concurrently).

MARS 3002
General Oceanography II
A continuation of MARS 3000. Topics include: weather and climate, ocean circulation, waves, tides, coastal oceanography, biological productivity, planktonic and benthic organisms, marine communities and ecology. 
Prerequisite: MARS 3000.

MARS 3003
General Oceanography II Lab
Laboratory and field component of MARS 3002. Prerequisite: MARS 3001.

MARS 3010
Underwater Research Techniques
Intermediate and advanced scientific SCUBA diving skills, techniques, and applications are taught in the context of using these skills to perform basic biological surveys of the nearshore marine environment. The course includes lectures and field sessions. Students learn tropical marine species identifications, transecting and quadrating techniques, as well as other underwater surveying methods. Students are required to apply knowledge and techniques taught in lectures during field sessions, keep a field notebook, and conduct a team research project. 
Prerequisite: A grade of C- or higher in any WCIL II course; MARS 2010. Junior standing.

MARS 3050
Biological Oceanography
This course emphasizes interactions of marine organisms with the physical environment. Students will learn how marine biota influence and are in-turn influenced by the chemistry, physics, and geology of the oceans. Topics include marine microbiology, phytoplankton ecology and physiology, zooplankton ecology, biogeochemistry, and global change. 
Prerequisite: MARS 2060, CHEM 3010, 3030, or 3050. Undergraduate standing.

MARS 3084
Descriptive Regional Oceanography
A qualitative treatment of driving forces for water movement, and detailed descriptions of wind-driven and thermohaline ocean circulation patterns in the major regions of the world ocean. 
Prerequisite: BIOL 2052, CHEM 2052, MARS 3002 (or MARS 2060); Any WCIL II course.

MARS 3590
Marine Science Practicum

MARS 3920
Research: Marine Biology

MARS 3950
Marine Science Practicum
Junior practicum for students interested in working on special topics in Marine Science under the direction of the Marine Science faculty. 
Prerequisite: Any WCIL II course.

MARS 3990
Nonpaid Internship
See Internship Section.

MARS 3991
Paid Internship
See Internship Section.

MARS 4030
Marine Mammal Biology
This is a survey course of marine mammal biology. The course covers phylogeny, anatomy, physiology, ecology and behavior of marine mammals. 
Prerequisite: BIOL 2052.
MARS 4031  
Marine Mammal Biology Laboratory  
This course aims to develop traditional laboratory, field, and computer skills to investigate marine mammal physiology and ecology. A broad range of topics will be covered including taxonomy, anatomy, population abundance and distribution, health assessment and marine mammal strandings. Data analyses and scientific writing of reports emphasized.  
Prerequisite: BIOL 2053; MARS 4030 (or concurrent).

MARS 4040  
Marine Ecology  
Survey of the phylogeny, anatomy, physiology, behavior and ecology of marine birds, with an emphasis on North Pacific species. The goal of this course is to provide students with the understanding of the ecology of these marine top predators and their role in marine ecosystems impacts. Hands-on activities in the laboratory, field work and guest lectures by resource managers will augment the course material.  
Prerequisite: MARS 3002.

MARS 4050  
Marine Ecology  
Application of ecological principles and methods to marine habitats are explored. Marine life, including plankton, nekton, neuston, and benthos, are studied in ecological settings from estuaries to the deep sea. Subject matter draws heavily from the original scientific literature. BIOL 3060 is recommended.  
Prerequisite: BIOL 3080, 3081; MARS 3002 (or MARS 2060).

MARS 4051  
Marine Ecology Laboratory  
Laboratory and field component of MARS 4050. BIOL 4090 is recommended.  
Prerequisite: MARS 3003 (or MARS 2061); MARS 4050 or concurrent.

MARS 4060  
Geological Oceanography  
Geological, geophysical, and geochemical principles applied to the oceans. Topics include: origin, structure, composition, and evolution of the earth, morphology of ocean basins and continental margins, plate tectonics, marine sedimentology and stratigraphy, sea level changes, and paleoceanography.  
Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2052; CHEM 2052; GEOL 2000; and MARS 3002 (or MARS 2060).

MARS 4061  
Geological Oceanography Laboratory  
Laboratory and field component of MARS 4060.  
Prerequisite: BIOL 2053; CHEM 2053; MARS 3003 (or MARS 2061), MARS 4060* (* may be taken concurrently); Any WCIL II course.

MARS 4070  
Chemical Oceanography  
Chemical and biological principles applied to the oceans. Topics include: the physical chemistry of seawater, salinity and the major ions, bio-limiting, bio-intermediate, and bio-unlimiting chemicals, dissolved gases, the DIC system, trace metals, hydrothermal processes, radiochemistry, stable isotopes, chemical transport, and chemicals as water mass tracers.  
Prerequisite: BIOL 2052; CHEM 2052; MARS 3002 (or MARS 2060); Any WCIL II course.  
Corequisite: MARS 4071.

MARS 4071  
Chemical Oceanography Laboratory  
Laboratory and field component of MARS 4070.  
Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2053; CHEM 2053; MARS 3003 (or MARS 2061).  
MARS 4070* (* may be taken concurrently). Corequisite: MARS 4070.

MARS 4080  
Physical Oceanography  
Basic physical and mathematical principles applied to ocean dynamics. Topics include: properties of seawater, physical laws and classification of forces, the equations of motion, turbulence, geostrophic flow, wind-driven circulation, thermohaline circulation, waves, and tides.  
Prerequisite: MARS 3000, 3002, MATH 2214.

MARS 4081  
Dynamic Physical Oceanography Laboratory  
MARS 4081 is the laboratory and field component of MARS 4080. Students have the opportunity to get extensive hands-on experience with measurement and data analysis techniques commonly used in physical oceanography.  
Prerequisite: MARS 3001, 3003, and 4080* (* may be taken concurrently).

MARS 4090  
Biological Oceanography  
A survey of biological oceanography with an emphasis on the interactions of organisms with their physical and geochemical environment. Pelagic organisms spanning scales from the microbial loop to fisheries will be examined using energy flow, genetics, and models, with an emphasis on past and present global changes.  
Prerequisite: MARS 3000 and 3002.

MARS 4100  
Marine Resource Management: Culture and Sustainability  
Coastal communities throughout the world are highly reliant on ocean ecosystems, and threats to ocean resources places at risk the livelihoods, cultures, and economies of coastal people. In this course, students will develop strategies and leadership skills to address the key threats to ocean resources such as land-based pollution, overfishing, and climate change adaptation, and critically examine innovative solutions to these threats. Students will gain a deep understanding of cultural resource management approaches, and their application in modern policy contexts, providing a transferable skillset for emerging ocean leaders and professionals.  
Prerequisite: Any WCIL II course and any 3000-level MARS, BIOL or ENVY course.

MARS 4210  
Marine Fisheries and Management  
This course will cover major aspects of marine fisheries including the types of gears and practices used, life histories, the recruitment and population dynamics of harvested
species, and the structure and assessment of stocks. An overarching theme will be the effects of fishing and climate variability on the aforementioned dynamics of individual species and fisheries, as well as ecosystems. UHTMately, the course will focus on how such dynamics present management dilemmas and the consequential management solutions to these problems. Prerequisite: BIOL 2052, 3080; MARS 3000/3002 or ENVS 2000; or consent of instructor.

MARS 4400 (3)
Marine Conservation Biology
This course provides an overview of the ecological foundations of conservation biology, with an emphasis on the management of marine living resources. Lectures and assignments emphasize the theoretical foundations and the practical approaches to marine conservation, and illustrate real-world case studies involving biodiversity conservation, fisheries management, and novel methods for coastal zone planning. Computer simulations, homework sets, and class activities give students the opportunity to apply a variety of quantitative tools, engage in critical thinking, and use scientific results in decision-making. Guest lectures by conservation practitioners illustrate real-world resource management applications in Hawai‘i, the U.S., and internationally. Prerequisite: MARS 3080.

MARS 4500 (1)
Marine Sciences Honors Seminar
Marine Science Honors Seminar prepares students for Honors Research and initially concentrates on the development of hypotheses and experimental design. Later students will use the scientific literature to investigate questions with the purpose of deriving their own hypotheses that will be tested the following semester using facilities available at HPU. Prerequisite: MARS 3002 (or MARS 2060).

MARS 4600 (3)
Honors Research
A supervised research project for students anticipating going on to graduate studies in the marine sciences. The course includes oral status reports, a final written report, a final formal seminar, and a poster presentation of research project results. Prerequisite: MARS 4910 or 4920.

MARS 4910 (3)
Seminar: Marine Biology
A critical analysis of recent marine biological literature. Includes formal seminars, informal group discussions, a comprehensive review article, and a research project proposal. Capstone course. Prerequisite: MARS 4050 or concurrent. Senior standing.

MARS 4920 (3)
Seminar: Oceanography
A critical analysis of recent oceanographic literature. Includes formal seminars, informal group discussions, a comprehensive review article, and a research project proposal. Capstone course. Prerequisite: Any WCIL II course. Senior standing.

MARS 4950 (1 to 3)
Senior Science Practicum
Senior practicum opportunity for students anticipating working in the marine sciences after graduation. Prerequisite: Any WCIL II course. Senior standing.

MARS 6000 (4)
Marine Systems I: Geological and Physical Oceanography
Geological and physical principles applied to the oceans. Topics include: the confi of the ocean basins, paleoceanography, sea level change, oceanic sedimentary resources and sediment production, distribution and transport; atmospheric circulation, the global heat budget, ocean circulation, and wave motion. Prerequisite: Graduate standing.

MARS 6002 (4)
Marine Systems II: Chemical and Biological Oceanography
Chemical and biological principles applied to the oceans. Topics include: chemical composition of seawater, use of isotopes in ocean science, marine microbiology, zooplankton and secondary production, benthic habitats and communities, nutrient and particle fluxes associated with the ocean's biological pump and with marine biogeochemical cycles. Prerequisite: Graduate standing.

MARS 6010 (3)
Toxicology and Stress Responses in Marine Communities
Marine pollution is a problem that degrades habitat and exacerbates all other anthropogenic impacts to the marine environment. Using a case-study approach, this course explores 1) major types of marine pollution 2) the dynamics of specific classes of contaminants, 3) principles that influence toxicity of contaminants in major marine phyla, 3) diversity of metabolic and clearance mechanisms, and 4) impacts at the community and ecosystem levels.

MARS 6020 (3)
Marine Science Field Methods
Marine Science Research will enable students to refine methodology for ship/boat based research and to begin collecting data using HPU's marine resources. This course is required for students requesting Kaholo HTMe for thesis projects. Prerequisite: Graduate standing.

MARS 6030 (3)
Marine Mammal Biology
This is a survey course of marine mammal biology. This course covers phylogeny, anatomy, physiology, ecology and behavior of marine mammals.

MARS 6040 (3)
Seabird Ecology and Conservation
Survey of the ecology of seabirds and their role in marine ecosystems, with an emphasis on North Pacific species. Hands-on activities in the laboratory, field work and guest lectures by resources managers will augment the course material. Students will complete any independent project using observations collected during the course activities. Prerequisite: Graduate standing.
MARS 6050 Marine Ecology
A graduate course emphasizing ecological interactions of marine organisms with their own and other species, and the physical environment. Designed to survey not only what is known about marine ecology, but how that knowledge was acquired, the course strongly emphasizes readings from original scientific literature.
Prerequisite: Graduate standing.

MARS 6060 Geological Oceanography
This course provides students with an in-depth survey of marine systems from a geological perspective. The topics covered will include the configuration of the ocean basins, paleo-oceanography, sea level change, oceanic sedimentary resources as well as sediment production, distribution and transport.
Prerequisite: Graduate standing.

MARS 6070 Chemical Oceanography
Chemical and biological principles applied to the oceans. Topics include: the physical chemistry of seawater, salinity and the major ions, bio-limiting, bio-intermediate, and bio-unlimiting chemicals, dissolved gases, the DIC system, trace metals, hydrothermal processes, radiochemistry, stable isotopes, chemical transport, and chemicals as water mass tracers.
Prerequisite: Graduate standing.

MARS 6080 Physical Oceanography
This course provides students with an in-depth survey of marine systems from a physical perspective. Topics include physical and thermodynamic properties of seawater; temperature, salinity and density distributions, ocean heat budget, ocean effect on climate, geostrophic flow, Ekman balance, potential vorticity and Sverdrup balance, thermohaline circulation, waves, and tides.
Prerequisite: Graduate standing.

MARS 6090 Biological Oceanography
This course provides students with an in-depth survey of marine systems from a biological perspective, emphasizing the interactions of organisms with the physical and chemical environment and biogeochemical variability, and introducing key organisms and their functions (using energy flow, genetics, and models) from microbial loop to fisheries, with an emphasis on past and present global change issues.
Prerequisite: Graduate standing.

MARS 6120 Coral Reef Ecology
Coral reef biology and ecology are broadly covered through lecture and group discussion of current literature and contemporary issues. Emphasizing Hawaiian reef ecosystems, topics include coral taxonomy, anatomy, reproduction, symbioses, biogeography, evolutionary history, reef accretion or loss due to natural and anthropogenic disturbances including global climate change and ocean acidification.

MARS 6210 Marine Fisheries and Management
This course will address a marine science branch of great relevance to Marine Science (MSMS) and Global Leadership and Sustainability (MAGLSD) students, which has not been part of the HPU curriculum to date. This course will be available to graduate students, and will be offered concurrently with a course designed for undergraduate MARS and ENVs (MARS 4210).
Prerequisite: Enrollment in MSMS or MAGLSD program.

MARS 6300 Multivariate Applications in Marine Science
This hands-on workshop focuses on the application and the interpretation of multivariate analyses commonly used by marine scientists. Lectures and assignments emphasize the conceptual understanding and the practical use of these methods, with the goal of providing students with a tool-kit they will use in their thesis research and beyond.
Prerequisite: Graduate standing.

MARS 6400 Marine Conservation Biology
This course provides an overview of the theory and practice of marine conservation. Lectures and assignments emphasize the conceptual foundation and the quantitative tools for the analysis of demography and population trends. Case studies and guest speakers highlight the use of computer simulations in the management of living marine resources. An independent marine protected area project gives students experience in critical thinking, communication skills and the use of science in effective decision-making.
Prerequisite: Graduate standing.

MARS 6500 Geospatial Analysis in Marine Science
This workshop course provides an overview of the spatial analysis and associated modeling techniques used in marine science, including metrics of intensity, quantification of spatial form, and surface modeling. Students will implement these analyses using a variety of software tools and marine datasets. Real-world case studies will augment the lectures.

MARS 6600 Computational Methods in Marine Science
This workshop course provides an overview of the computational methods used for the manipulation and analysis of large datasets using statistically robust techniques (randomization, bootstrapping). Students will practice these techniques using a variety of software tools and datasets, Real-world marine science case studies will augment the class lectures and assignments.

MARS 6910 Current Topics in Marine Science
This is a new graduate seminar course for students in the MSMS program. Current topics seminars are designed to expose graduate students to new developments and discoveries in Marine Science by taking advantage of seminars and other educational opportunities inside and outside HPU. While this flexible structure may vary with instructor and topic, most will be structured as seminar courses. Students will be assigned readings in the current literature of the course topic and required to critique the readings and relate the materials to their own research or the instructor's area of expertise.
Prerequisite: Graduate standing.
MARS 6920 (1 to 3)  
Special Topics in Marine Science  
The specific title, content and prerequisites for this course will vary with instructor and need in the program. The course may be repeated when the title and content have changed.  
Prerequisite: Graduate standing.

MARS 6950 (1-3)  
Practicum in Marine Science  
This course offers MSMS students the opportunity to obtain practical hands-on experience working in a research project or an organizational employment setting. Hosting organizations will provide students with an intellectually challenging task. In turn, each practicum experience will be designed to meet the specific project goals of the host institution.

MARS 6990 (1 to 3)  
Nonpaid Internship  
See Internship Section.  
Prerequisite: Graduate standing.  
MARS 6991 (1 to 3)  
Paid Internship  
See Internship Section.  
Prerequisite: Graduate standing.

MATH – Mathematics

MATH 1101 (3)  
Fundamentals of College Mathematics  
An introductory course in the study of linear and elementary quadratic equations, designed to help students develop critical thinking skills in the area of mathematics. The course emphasizes the importance of algebraic principles, applications and problem solving. Students may enroll concurrently in MATH 1102. Prerequisite for Research and Epistemology B: Numeracy and Quantitative Reasoning courses for students needing additional instruction prior to beginning introductory math courses. Students who place into MATH 1101 are encouraged to take the HPU math placement test to try to place directly into a Research and Epistemology B: Numeracy and Quantitative Reasoning course. Placement testing appointments can be scheduled by contacting an HPU Academic Advisor.
Prerequisite: SAT math score of 440 or higher, ACT math score of 18 or higher, Accuplacer Elementary Algebra score of 39 or higher, or concurrent enrollment in MATH 1102.

MATH 1102 (1)  
Fundamentals of Mathematics Laboratory  
A mathematics lab to be taken concurrently with MATH 1101, the course provides supplementary individual and small group instruction and supervised practice with fundamental algebra skills to help students succeed in MATH 1101. Students enrolled in MATH 1102 must be enrolled concurrently in MATH 1101.  
Corequisite: MATH 1101.

MATH 1105 (3)  
Intermediate Algebra  
An intermediate algebra course connecting the real world to mathematics. Topics include: factoring polynomials and solving equations by factoring, rational expressions and equations; graphing functions; systems of equations; absolute value equations; inequalities; radical expressions and functions; quadratic equations and their graphs; and quadratic formula. Students may enroll concurrently in MATH 1106. Prerequisite for Research and Epistemology B: Numeracy and Quantitative Reasoning courses for students needing additional instruction prior to beginning introductory math courses. Students who place into MATH 1101 are encouraged to take the HPU math placement test to try to place directly into a Research and Epistemology B: Numeracy and Quantitative Reasoning course. Placement testing appointments can be scheduled by contacting an HPU Academic Advisor.  
Prerequisite: An appropriate score on a placement test and a grade of B- or better in MATH 1101; or a grade if C- or better in MATH 1101 and concurrent enrollment in MATH 1106; or an appropriate score on a placement test.

MATH 1106 (1)  
Intermediate Algebra Laboratory  
A mathematics lab to be taken concurrently with MATH 1105, the course provides supplementary individual and small group instruction and supervised practice with intermediate algebra skills to help students succeed in MATH 1105.  
Corequisite: MATH 1105.

MATH 1115 (3)  
Survey of Mathematics  
A general survey course that emphasizes reasoning skills, real-life math applications and non-routine problem solving through individual and team assignments. Topics may include: inductive and deductive reasoning, logic, sequences, systems of numeration, geometry, metric system conversion analysis, personal finance, permutations and combinations, and an introduction to probability, plus individual topics of choice to prepare students for courses in their major or pursue self interests. Place out option for General Education Program: Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.  
Prerequisite: MATH 1105 or an appropriate score on a placement test.

MATH 1116 (3)  
Problem Solving  
This course is designed to improve students' problem solving skills by investigating both traditional and non-traditional mathematics problems. Reasoning, reflection upon the problem solving process and the elements of effective thinking will be emphasized. Students will write and present their ideas both orally and visually. There will also be real-world applications of mathematical problem solving to games and puzzles, the infinite, and the arts. This course will be taught in the style of inquiry-based learning.

MATH 1120 (3)  
Mathematics in the Modern World  
This course takes a mathematical approach to understanding contemporary issues and explores ways to apply mathematics in everyday life. Students will evaluate and interpret
quantitative data through means such as functions, modeling, probability and statistics, and use the results to form opinions and make decisions. Topics and applications may include the arts and entertainment, biological and health sciences, business and economics, education, environmental science, geography, personal finance, physical science, politics, and sports.

**Prerequisite:** Math 1105, Intermediate Algebra

**MATH 1123**

**Statistics**

This course provides an introduction to descriptive and inferential statistics. Topics include describing, summarizing and displaying data, using sample statistics to esHTMate population parameters, evaluating hypothesis using confidence levels with application to the physical and social sciences, logically drawing conclusions based on statistical procedures and the quantifying the possibility of error and bias.

**Prerequisite:** Math 1105 or higher.

**MATH 1130**

**Pre-Calculus I**

This course covers mathematical topics that prepare students for higher-level mathematics courses. Topics include: functions and their properties, polynomial and rational functions and their graphs, transformation method of graphing functions, exponential and logarithmic functions and equations, right-triangle trigonometry, an introduction to trigonometric functions and their graphs, solving systems of inequalities, solving systems of equations. Optional topics: matrices, determinants and Cramer’s rule, linear programming, fundamental counting principle, permutations and combinations, and an introduction to probability.

**Place out option for General Education Program:** Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.

**Prerequisite:** A grade of C or better in Math 1105 or an appropriate score on a placement test.

**MATH 1140**

**Pre-Calculus II**

This course is a continuation of Math 1130 and covers further mathematical topics that prepare students for higher level mathematics courses. Course topics include: a complete development of trigonometry including trigonometric functions and their identities, solving trigonometric equations, applications of trigonometry to vectors, polar coordinates, and polar form of complex numbers, rectangular form and polar form of conic sections, matrices and matrix formulation of solution of systems of equations, determinants and Cramer’s rule, introduction to sequences and series, and the binomial theorem.

**Place out option for General Education Program:** Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.

**Prerequisite:** A grade of C or better in Math 1130 or consent of instructor, or an appropriate score on a placement test.

**MATH 1150**

**Pre-Calculus I and II Accelerated**

A course for well-qualified students who are prepared to complete the pre-calculus sequence in one term. The course includes all the topics covered in Pre-Calculus I, Math 1130, and Pre-Calculus II, Math 1140, but is presented in one term.

**Place out option for General Education Program:** Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.

**Prerequisite:** A grade of A in Math 1105, or a grade of C or better in Math 1130, or an appropriate score on a placement test.

**MATH 1234**

**Introduction to Cryptology**

This course gives an historical introduction to Cryptology, the science of making and breaking secret codes. It begins with the oldest recorded codes, taken from hieroglyphic engravings, and ends with the encryption schemes used to maintain privacy during Internet credit card transactions. Since secret codes are based on mathematical ideas, each new encryption method discussed in this course leads to the study of new mathematical ideas and results. Topics covered include basic modular arithmetic, primes and divisors, permutations and elementary statistics. This course will also cover the social and historical aspects associated to Cryptology.

**Prerequisite:** Math 1105 or higher or instructor consent.

**MATH 2007**

**Mathematics Across the Ages**

A survey of the historical development of mathematical thought from ancient HTMes to the present. Possible topics include: Babylonian, Egyptian, Greek, Chinese, Hindu, and Arabian mathematics; European mathematics in the middle ages and the Renaissance; the development of calculus, number theory abstract algebra, non-Euclidean geometry, set theory, and information theory.

**Prerequisite:** Math 1130 or higher.

**MATH 2214**

**Calculus I**

A course in single variable calculus which emphasizes limit, continuity, derivative, and integral. Primary focus is on the derivative with an introduction to the integral and elementary applications of the integral. Differentiation topics include: chain rule, implicit differentiation, curve sketching and maxima and minima problems. Integration topics include: fundamental differentiation, method of substitution, area between curves, and volumes of revolution.

**Place out option for General Education Program:** Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.

**Prerequisite:** Math 1140 or higher, or an appropriate score on a placement test.
MATH 2215  (3) 
Calculus II 
A continuation of Calculus I, completing the development of the integral. Integration topics include: integration by parts, trigonometric substitution, method of partial fractions, length of curves, surfaces and volumes of revolutions. Other topics include: infinite series, tests of convergence; power series, radius of convergence, and Taylor's series. Other topics may include calculus of conic sections, vector algebra, scalar and vector product. 
Prerequisite: MATH 2214 or higher except MATH 2326/3301 or consent of instructor.

MATH 2216  (3) 
Calculus III 
A course in calculus of several variables. The course begins with vector algebra, scalar and vector product, and elementary applications of vectors. Emphasis is placed on differentiation and integration of functions of several variables with peripheral focus on limits and continuity. Differentiation topics include: partial derivative, directional derivative, chain rule formula, gradient, maxima and minima problems, and Lagrange multipliers, divergence, and curl. Integration topics include: iterated integrals in rectangular, polar, and spherical coordinates, line integrals, Green's theorem, divergence theorem, Stoke's theorem. 
Prerequisite: MATH 2215.

MATH 2220  (3) 
Proof Writing 
An introduction to proof writing and mathematical logic covering Sentential and First Order Logic, Introduction to Sets, Introduction to Formal Proofs and Practical proof writing for a working mathematician. 
Prerequisite: MATH 1105 or higher (except MATH 2326) or consent of instructor

MATH 2326  (3) 
Mathematics for Decision-Making 
A course developing the quantitative skills necessary for the effective formulation and solution of problems in business, management, economics, and the social and life sciences. Topics include: probability and probability distributions, functions and their graphs, differentiation and its application to max-min problems, linear programming, network models, project management with PERT-CPM, and simulation. 
Prerequisite: MATH 1123; MATH 1130 or higher.

MATH 3110  (3) 
Foundations of Mathematical Logic and Applications 
A course in mathematical logic covers Proof Theory, Model Theory, and the theory of Decidability. Topics include Sentential Logic, First order Logic, Deductive Calculus, Completeness and Soundness Theorems, Model theory, Isomorphisms, Compactness Theorem, and Godel's Incompleteness theorem, applications to theoretical computer science and complexity theory. 
Prerequisite: CSCI 1301, MATH 2220, 3301*, or consent of instructor. (* may be taken concurrently).

MATH 3220  (3) 
College Geometry 
This course provides geometry content and process for those planning to become secondary math teachers. The course is also appropriate for other mathematics majors. Included are activities and discussions in inductive and deductive reasoning in Euclidean geometry, classical geometry with constructions, transformations, dynamical geometry software, non-Euclidean Geometries, three-dimensional Geometry, spatial reasoning and miscellaneous topics. 
Prerequisite: MATH 2215.

MATH 3234  (3) 
Mathematical Cryptology 
This course gives a mathematical introduction to Cryptology, the art and science of making and breaking secret codes. It begins with the oldest recorded codes, and ends with the encryption schemes used to maintain privacy during Internet credit card transactions. Topics covered include the classical monoalphabetic ciphers and their cryptanalysis; polyalphabetic ciphers and their cryptanalysis; perfect cipher systems; public-key cryptography; Diffie-Hellman key exchange, RSA, Knapsack codes, and anonymity. The mathematical subjects include permutations, modular arithmetic, statistics, recurrence relations and elementary number theoretic results. 
Prerequisite: MATH 2214 (Calculus I) or higher or consent of instructor.

MATH 3240  (3) 
Math Concepts for Elementary Teachers 
A review of the central concepts, tools of inquiry, and structures of the discipline of mathematics so that elementary teachers can create learning experiences that make aspects of the subject matter meaningful for students. 
Prerequisite: MATH 1115, MATH 3301

Discrete Mathematics 
This course focuses on the theory and application of mathematical principles critical to the computing sciences. Students study and apply key concepts in topics such as set theory, combinatorics, language and grammars, propositional and quantifier logic, boolean functions and circuit design, growth of functions and big-O notation, HTMl complexity of algorithms, mathematical induction and program correctness, recursive definitions and recursive algorithms and solving recurrence relations. 
Prerequisite: MATH 1130, 2220, or consent of instructor.

MATH 3302  (3) 
Elementary Number Theory 
Topics covered include prime and composite integers, factorization, divisibility, number theoretic functions, Diophantine equations, congruence of integers, quadratic reciprocity, mathematical inductions, cryptography, Pythagorean triples, real, complex and p-adic numbers. 
Prerequisite: MATH 2215; or MATH 2214 and 3301. Undergraduate standing.

MATH 3305  (3) 
Linear Algebra 
Elementary linear algebra with applications in the sciences, to computers and economics. Topics include: systems of linear equations; matrix theory, determinants and eigenvalues, geometry of Euclidean n-space; abstract vector spaces, bases, linear independence, and spanning sets, linear transformations, null space and range, diagonalization of matrices; eigenvalues and eigenvectors of symmetric matrices; quadratic forms, inner products and orthonormalization. 
Prerequisite: MATH 2214 or higher except MATH 2326 or consent of instructor.
MATH 3307 (3)
Differential Equations
A course in ordinary differential equations utilizing concepts and techniques from Calculus I, II, and Linear Algebra. Emphasis is on solution to higher order linear equations. First order topics include: separation of variables, exact equations, integrating factors, and homogenous and non-homogenous systems with applications to networks. Higher order topics include: a detailed study of solutions to second order linear equations by reduction of order, variation of parameters, and series solutions; linear independence of solutions, the Wronskian, general solution to linear homogenous and nonhomogenous equations, and linear equations with constant coefficients and the Laplace transform method. Prerequisite: MATH 2214 or higher except MATH 2326/3301. Recommended: MATH 3305.

MATH 3316 (3)
Problem Solving for Mathematics Teaching
This course is designed to improve students' problem solving skills for solving both traditional and non-traditional mathematics problems. Reasoning, communicating mathematics, mathematical representations, and connections between various mathematical topics will be emphasized. Prerequisite: MATH 2214.

MATH 3320 (3)
Set Theory
To provide students with a solid background in set theory and to develop mathematical sophistication in general, this is a course in which covers ZF (Zermelo Frankel Axioms) and ZFC (ZF + the Axiom of Choice), DeMorgan's laws, Power Set, Set Algebra, Zorn's Lemma and other equivalences of AC, equivalence relations, well orderings and partial orderings, bijections. Russell's paradox, con- nal maps, mathematical induction, transfinite induction, ordinals and cardinals, ordinal and cardinal arithmetic, the Continuum Hypothesis, and the Constructible Universe. Prerequisite: MATH 2220, 3110, 3301, or consent of instructor.

MATH 3330 (3)
Abstract Algebra
An introduction to algebra as a deductive system. Topics include: complex numbers; well ordering; groups; cyclic groups; permutation groups; rings; equivalence relations; polynomial rings; division algorithm; unique factorization; zeros of polynomials. Prerequisite: MATH 3305 or consent of instructor. MATH 2220 is strongly suggested but not required.

MATH 3450 (3)
Real Analysis
An introduction to the theory of real analysis. Topics include: completeness of the real numbers; basic topology of the real numbers; continuous functions and compactness; sequences and series; limits; derivatives; mean value theorems; the Riemann integral; Taylor's formula; power series; uniform convergence. Prerequisite: MATH 2215 or consent of instructor. MATH 2220 is strongly suggested but not required.

MATH 3460 (3)
Probability
Discrete and continuous probability with applications. Topics include: finite sample spaces; combinations and permutations; conditional probability; independent events; discrete random variables; continuous random variables; functions of random variables; higher-dimensional random variables; expectation; variance; correlation coefficient; generating function; reproductive properties; sequences of random variables; law of large numbers; central limit theorem. Prerequisite: MATH 2215 or consent of instructor.

MATH 3470 (3)
Applied Statistics
This course is an introduction to the mathematical theory of statistics. Topics covered include discrete and continuous distributions, tests of hypotheses, esHTMation, analysis of variance, regression and correlation, sequential analysis, and rank order statistics. Prerequisite: MATH 2214 or higher except MATH 2326/3301 or consent of instructor. MATH 1123 is strongly suggested but not required.

MATH 3500 (3)
Numerical Methods
The purpose of numerical analysis is two-fold: (1) to find acceptable approximate solutions when exact solutions are either impossible or impractical, and (2) to devise alternate methods of solution better suited to the capabilities of computers. Topics for this course include: elements of error analysis, real roots of an equation, polynomial approximation by finite difference and least square methods, interpolation, quadrature, numerical solution of ordinary differential equations, and numerical solutions of systems of linear equations. Students should expect to program a computer and use a graphing calculator. Prerequisite: CHEM 2050; CSCI 2911; MATH 3305 and 3307*; PHYS 2052. (* may be taken concurrently) MATH 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

MATH 4210 (3)
Topology
An introduction to the basic concepts of topology in the setting of metric spaces and more general topological spaces. Topics include completeness, compactness, connectedness, continuous functions and continuity in terms of nets, Hausdorff spaces, Product spaces, metric spaces, Tychonoff Theorem, Bolzano-Weierstrass theorem, Stone-Weierstrass Theorem, and the Baire Category theorem. Prerequisite: MATH 2215; and MATH 3310 or higher; or consent of instructor.

MATH 4301 (3)
Combinatorics and Graph Theory
This course explains how to reason and model using enumerative combinatorics and applied graph theory. It also stresses the systematic analysis of different possibilities, exploration of the logical structure of a problem, and ingenuity. Combinatorial reasoning underlies all analysis of computer systems. It plays a similar role in discrete operations research problems and in finite probability. Topics covered include generating functions, set partitions, recurrence relations, inclusion-exclusion, trees, graph connectivity, independence, and graph colorings. Additional topics will be chosen from Ramsey theory, planarity, matchings, Polya's Enumeration Formula and Hamiltonian and Eulerian graphs. Prerequisite: MATH 3301.
MATH 4450 Complex Analysis (3)
Complex Analysis is the theory and applications of analytic functions of a single complex variable. Topics include: Taylor and Laurent series representation, Cauchy's integral theorem and formula, residue calculus, harmonic functions, zeros and poles, counting theorem, conformal mappings, linear functional transformations, Schwartz-Christoffel transformation, Laplace's equation, Poisson's equation, Neumann Problems, and the Fourier representation theorem. Prerequisite: MATH 2216, or consent of instructor.

MATH 4470 Methods of Applied Mathematics I (3)
Methods of Applied Mathematics I is the first course in a course sequence exploring analytical methods of solution in various mathematical and scientific areas. The course may review a variety of topics: solution of ordinary differential equations; solution of systems of ordinary differential equations; Laplace transform method; methods of applied linear algebra; and vector calculus. New topics presented in this class include: complex variables; Fourier transform; partial differential equations; Laplace’s equation; and equations of motion and fluids. Prerequisite: MATH 3307*, PHYS 2052; or consent of instructor. (* may be taken concurrently). MATH 3216 is recommended.

MATH 4471 Methods of Applied Mathematics II (3)
Methods of Applied Mathematics II is the second course in a course sequence exploring numerical solutions in various mathematical and scientific areas. Topics for this course include: elements of error analysis, real roots of an equation, polynomial approximation by finite difference and least square methods, interpolation, quadrature, numerical solution of ordinary differential equations, and numerical solutions of systems of linear equations. Additional topics explore partial differential equations and finite-element analysis. Prerequisite: CSCI 2911; MATH 3305, 4470; or consent of instructor.

MATH 4475 Modeling and Simulation (3)
Modeling and Simulation
Material includes the advanced study of mathematical techniques, algorithms, and applications applicable to assist and improve decision-making in the management and behavioral sciences. The course focuses on both the techniques and the use of the computer in facilitating application of these techniques. Prerequisite: CSCI 2912; MATH 1123 and 2214.

MATH 4920 Math Education Practicum (3)
This course combines the study of mathematics problem-solving with practical classroom experience. Students will investigate the issues of teaching mathematics while gaining practical experience as tutors. Students will follow the progress of their own students in mathematics labs. Prerequisite: MATH 3316, or any other MATH 3000-level class, or consent of instructor.

MATH 4950 Practicum (1 to 3)
Practicum
A course that offers actual work experience in Applied Mathematics in a professional setting. The practicum site and the individualized syllabus for each student must be approved by the Academic Coordinator for Mathematics. Supervision is provided by a professional on site and by a member of the HPU Mathematics faculty. Prerequisite: Senior standing.

MATH 4960 Observation/Participation (3)
MATH 4980 Secondary Math Student Teaching
Practicum in Math student teaching.

MC – Mass Communication

MC 1000 Mass Media Today (3)
The course is an introduction to the practices of mass communicators and provides an overview of the history, rationale and landscape of traditional areas of advertising, journalism and public relations-illustrated by reviews of ad examples. The course includes strategies, techniques and applications including an exploration of specific examples and case studies.

MC 1100 Mass Communication Writing (3)
Mass Communication Writing
MC 1100 provides an introduction to the skills needed to be a critical writer for modern mass communication sources. It emphasizes analysis and practice of a variety of distribution methods (print, radio, video, multiMedia) that dominate public discourse today.

MC 1100 Mass Communication Writing (3)
Mass Communication Writing
MC 1100 provides an introduction to the skills needed to be a critical writer for modern mass communication sources. It emphasizes analysis and practice of a variety of distribution methods (print, radio, video, multiMedia) that dominate public discourse today.

MC 2100 Mass Communication Research (3)
Mass Communication Research
Introduction to quantitative and qualitative methods used to study audiences, contents, and effects of mass media. Course content focuses on advertising, journalism, and public relations communication using social science research skills and data analysis. Approaches include content analysis, survey research, focus groups, and other empirical methodologies.

MC 2200 1st Amendments & Intellectual (3)
MC 2200 is designed to introduce students to First Amendment doctrines and issues concerning freedom of expression. Students will be exposed to a survey of major areas of media law; governmental regulation of political speech; defamation; privacy; torts; news gathering rights, and intellectual property issues such as trademark, patent, copyright and fair use. This course can also be seen as an advanced
First Amendment course concentrated on the interplay between "new" media, cutting-edge technologies, privacy, and other civil liberties. Students can expect to engage in a conversation about the ethical and political issues facing the digital media.

MC 3100 (3) Feature Writing
In this course students will learn elements of feature writing—leads, transitions, voice, description, etc—and will learn a variety of feature formats, including profile, essay, general interest, and historical.

MC 3120 (3) Writing for Digital Media
A review of the basic structure of today's news and information practices and basic writing for all media. The course reviews career options and social, legal, technical and ethical environments in which mass media operate. It distinguishes news from other types of writing and provides instruction and practice in writing designed to enhance student skills and provide opportunities for publication in the digital age.

MC 3300 (3) Social Media
This course looks at applications of social media in mass communication and teaches the fundamentals of writing, design, layout, and production for a variety of social media products. Students produce a variety of publications while learning electronic typography, graphic design, computer imaging layout, and studio preparation. The course will also examine social media's effect of privacy as part of the digital age.

MC 3730 (3) News Media Strategies & Sales
This course introduces students to research, planning and relationship development with several media outlets and their representatives who are vital to the development of effective long and short-term strategic communication programs and campaigns. It includes lessons on how to evaluate both advertising and news/editorial media, how to plan a media program, how to develop a media plan, how to work with the various media representatives for purchased space or HTMe and, in other cases working with editorial staff for placement of public relations material - selected media tours

MC 3740 (30) Crisis Communication
This course provides an in-depth study of key aspects of Crisis Communication, and prepares students to anticipate, identify cues, and initiate pre-emptive programs for natural, financial, personnel and domestic terror threats. The course covers related research, strategic planning, presentations, media relations, government relations, and international relations.

MC 3750 (3) Special Events Planning
This is a skills based course designed for students to explore the profession of special event planning, facilitation, execution, promotion and evaluation with a service learning approach. Students will learn foundational concepts and professional skills of event planning through hands on application of learned theories. Essential topics learned will include event planning, coordination, strategic sponsorship, programming, marketing, communications, volunteer and vendor management, risk management, event research and event evaluation.

MC 3760 (3) Integrated Campaigns
An overview of organizational promotional strategies including planning, budgeting, media selection, message design, and HTMing. Case studies illustrate using mass media special events, in-store displays, advertising, public relations, and visual communication to affect audience behavior. Industry dynamics, controversies, trends and implications are analyzed.

MC 3910 (3) Special Topics in Mass Com.

MGMT – Management

MGMT 1050 (3) Writing for Management
The course focus is on improving comprehension, vocabulary, and reading.

MGMT 2000 (3) Principles of Management
A primer for the manager, this course lays out the underlying process for planning, directing, and controlling organizational resources for accomplishing the goals of the firm. This study of the functions of management includes how to develop a plan, how to organize resources of the firm, how to motivate employees to execute organizational initiatives, and how to set up a feedback system. Prerequisite: BUS 1000. Undergraduate standing.

MGMT 2050 (3) Introduction to Personnel Administration
A survey of the selection, training, and placement of personnel. The course features units on: performance evaluation and compensation; counseling and career development; grievances; and disciplinary procedures. Case incidents are employed. Students cannot receive credit for both this course and MGMT 3400.

MGMT 2060 (3) Office Management
A survey of the principles and problems of office management. Topics include: professionalism; organizing for effective operations; selecting, training, and developing the office work force; handling complaints and grievances; delegation; job expansion and enrichment; office change and automation; and effective decision-making.

MGMT 2300 (3) Psychology for Supervisors
Applications of psychology for use by supervisors. Course topics include: job design; employee productivity and morale; individual differences in motivation, learning, and perception of work; formal and informal work groups; approaches to organizational development. Cases, exercises, and simulations are employed.

MGMT 2500 (3) Supervisory Leadership
An exploration of the nature and responsibilities of the supervisor-as-leader. Topics covered include: work environments; technologies and leadership styles; tools for decision-making; supervisory functions; scheduling, staffing, directing, and controlling. Cases, exercises, and simulations are employed.
MGMT 3000
Management and Organization Behavior
Accurate that stresses the principles and concepts of general systems theory and human behavior as applied to the management of organizations. Various approaches to systems thinking are explored by the students through case studies and exercises that emphasize substantive theories needed for integrating different disciplines.
Prerequisite: A grade of C- or higher in any WCIL II course; BUS 1000.

MGMT 3060
The Legal and Regulatory Context for Managers
This course illustrates how law impacts daily management decisions and business strategies. This includes topics on how managers can use legal knowledge to minimize risk and create value, create solutions to attain business objectives, identify and resolve legal issues, and assist in managing legal disputes that may arise. Students will learn some of the key legal dilemmas that often arise in business and analyze solutions from a manager’s perspective by integrating law and management. The relationship between law and business will be illustrated in class lectures, case discussions, experiential activities, and selected readings.
Prerequisite: A grade of C- or higher in any WCIL II course; BUS 1000 (previously MGMT 1000).

MGMT 3100
Business in Contemporary Society
This course is a study of concepts, issues, and themes surrounding the dynamic relationship between business and society, and their impact and influence on each other. Student’s knowledge of business and management are enhanced with a focus on understanding the role and influence of the various business stakeholders, learning about the environmental forces affecting the organization and its stakeholders, and integrating these concepts in formulating socially responsible business policies and strategies.
Prerequisite: BUS 1000; Any WCIL II course.

MGMT 3110
Production and Operations Management
An analysis of the OPHMization of production resources; measurement and evaluation of man-machine systems; management principles applicable to the technical care of the organization.
Prerequisite: A grade of C- or higher in any WCIL II course; BUS 1000.

MGMT 3200
Small Business Management
A basic course in small business and entrepreneurship. The course examines the place and function of small business in the American economy and focuses on principles and problems of establishing, financing, operating, and expanding a small business.
Prerequisite: BUS 1000; Any WCIL II course.

MGMT 3210
Contemporary Entrepreneurship
A seminar on the nature and dynamics of entrepreneurship. Topics include: conceptualization of "entrepreneurship"; its history and affinities as a theory and a phenomenon; the practicalities of risk-taking and the mechanics of success; and the psychology of entrepreneurship.
Prerequisite: MGMT 3200.

MGMT 3220
Franchising
A comprehensive study of the principal elements of franchising. Topics include: concepts of marketing the franchise; managerial aspects of franchising to include the overall administrative package of the franchise system; franchising from the franchisee's viewpoint; and the franchise/franchisee relationship. Information is provided through hypothetical business incidents as well as actual case studies.
Prerequisite: MGMT 3200.

MGMT 3230
Seminar: Small Business Consulting
A Small Business Institute (SBI) program providing practical business and academic experience. The course consists of lectures, weekly meetings, and student consultant teams on small company assignments. A substantial amount of independent work is required.
Prerequisite: Any WCIL II course.
Senior standing.

MGMT 3300
International Business Management
An introduction to the problems of environment and structure that international managers face. Topics in comparative management and international business operations are covered, and the impact of the multinational firm is analyzed.
Prerequisite: A grade of C- or higher in any WCIL II course; BUS 1000.

MGMT 3310
Contemporary Japan - United States Relations
A one-semester course that addresses contemporary social, economic, political, and national security relations between the two most significant powers in the free world. The focus of the course is on the growing interdependency of the two nations and the challenges of managing the relations between these two major powers.
Prerequisite: MGMT 3300.

MGMT 3400
Human Resource Management
An overview and survey of human resource management and personnel administration. Course topics include: selection, staffing, remuneration, labor relations, training, and development of human resources in organizational environments such as business, government, and not-for-profit agencies.
Prerequisite: BUS 1000; Any WCIL II course.

MGMT 3410
Public Personnel Administration
A course that considers the contribution of organizational theory to an appreciation of practical personnel problems in public organizations. Representative topics include: socialization and utilization of personnel in public employment; impact of collective bargaining in public bureaucracy; analysis of work methods; organizational behavior; and affirmative action and equal opportunity.
Prerequisite: BUS 1000 or PSCH 3200; Any WCIL II course.

MGMT 3420
Compensation Management
A survey course examining contemporary concepts and processes for developing, implementing, and managing a compensation system. Topics include: direct and indirect compensation in a total compensation system; governmental

385
regulations; relevant behavioral science theories; and other external social factors affecting compensation.

**Prerequisite:** MGMT 3400.

**MGMT 3421**  
Managing Employee Benefit Plans  
(3)  
Students learn to better understand and appreciate the intricacies of employee benefits. It prepares students to administer and evaluate employee benefit plans. Topics include: understanding the environment of employee benefits, health and other welfare benefits, flexible benefits, defined benefit and defined contribution retirement plans, and benefit plan administration and communication.

**Prerequisite:** MGMT 3400.

**MGMT 3430**  
Negotiation  
(3)  
A course that reveals the art and science of negotiation through both theory and practice.

**Prerequisite:** MGMT 3400.

**MGMT 3440**  
Organizational Change and Development  
(3)  
An exploration of the process of change in organizations and models thereof. The course emphasizes the need for change in the development process. Topics include: overcoming resistance to change; skills in developing change models; and organizational, group, and individual development. Several units are experiential in nature.

**Prerequisite:** BUS 1000; Any WCIL II course.

**MGMT 3441**  
Managing Organizational Performance  
(3)  
A course that provides a solid foundation for understanding the new global developments in recent decades that have created ideological and strategic changes for the way organizations operate and are managed. It reviews the principles of QM, including continuous improvement, reengineering, productivity, and customer focus. Traditional and contemporary paradigms of organizational and management practices are analyzed in a perspective of global competition, assets, resource management, and culture.

**Prerequisite:** MGMT 3400.

**MGMT 3442**  
Managing Organizational Culture  
(3)  
A course that examines managing organizational culture, one of today's most important leadership challenges. Successful improvements in an organization's performance requires design and implementation strategies appropriate to organizational culture, assets concepts and strategies, goals, and context. Key concepts include: organizational culture; design models for culture; and cultural models for performance management, assessment, and improvement. Discussions and assignments enable the students to assess organizational culture and its influence on models and designs for how people relate and perform in workplaces.

**Prerequisite:** MGMT 3440.

**MGMT 3443**  
Designing Organizational Change  
(3)  
Quality management and other contemporary changes required for performance improvement cannot be successful or sustained without changes in the way things get done: i.e., the organizational culture. Students learn to design innovations for organizational culture change. They also develop implementation plans based on the analysis of specific organizational and national culture. Case study data are used to understand effective methods for measuring organizational culture and comparing it to organizational goal attainment.

**Prerequisite:** MGMT 3440.

**MGMT 3444**  
Training and Development in Organizations  
(3)  
This course is designed to familiarize students with the training, development, and career management functions in organizations. Course topics include human resource development; the relationship of training to other human resource functions; identifying training needs; maximizing learning; evaluating training programs; and training methods.

**Prerequisite:** MGMT 3400.

**MGMT 3500**  
Strategic Planning  
(3)  
An analysis of modern strategic planning, thought, and practice for the manager; systems approach to planning and decision-making, including management processes, informational support, and public relations evaluation.

**Prerequisite:** A grade of C- or higher in any WCIL II course; BUS 1000.

**MGMT 3510**  
Backgrounds of Business  
(3)  
An analysis of the historical foundations of business, the effects of changes in technology and economic ideas, the implications of modern management practices, and the major responsibilities and opportunities presented by the private enterprise system.

**Prerequisite:** BUS 1000; Any WCIL II course.

**MGMT 3550**  
Business Research Methods  
(3)  
Research process and design, data collection, hypothesis testing, and reporting. The course features econometrics and other quantitative applications in business research.

**Prerequisite:** ECON 2010, 2015; and MATH 1123; Any WCIL II course.

**MGMT 3600**  
Natural Resource Management  
(3)  
Sound management principles applied to limited resources such as energy, water, and food.

**Prerequisite:** A grade of C- or higher in any WCIL II course; BUS 1000.

**MGMT 3650**  
Employment and Labor Law for Business  
(3)  
This course addresses law and employment decisions from a managerial perspective. It provides guidelines on how to manage effectively and efficiently with full comprehension of the legal ramifications of their decisions. Students are shown how to analyze employment and labor law facts using concrete examples of management-related legal dilemmas that do not present clear-cut solutions. Topics include a comprehensive survey of employment and labor laws and its impact on management relationships, including the discipline and termination process, employee and employer rights and duties, grievance and labor management relationships.

<tbody>
<tr>
<td>MGMT 3700</td>
<td>Human Resource Planning and Staffing</td>
<td>Undergraduate standing</td>
<td>This course provides an in-depth study of the strategies involved in staffing an organization. The focus is on the creation of competitive advantage through strategic staffing plans, recruitment, and assessment of these challenges. Topics include cost analysis of staffing, turnover analysis, strategic uses and composition of an organization's work force, personnel and performance testing, how to combine procedures and data for personnel decisions, selection and recruitment strategies, selection criteria for staffing multinational companies and overseas assignments, succession planning, and analysis of work force productivity. <strong>Prerequisite:</strong> Undergraduate standing.</td>
</tr>
<tr>
<td>MGMT 3750</td>
<td>International Human Resource Management</td>
<td></td>
<td>This course explores the human resource management issues and concepts that exist in the international or global business environment. Students will be introduced to the differences and similarities of human resource systems globally. The course presents the impact of culture, economy, the law, and other factors in contributing to these differences in HR systems to help students devise effective strategies to managing people in today's global society. <strong>Prerequisite:</strong> MGMT 3400. Undergraduate standing.</td>

MGMT 6011
Organizational Behavior
(3)
Organizational behavior (OB) is the study of how individu-
als, groups, and structure affect human behavior in modern
organizations. This course provides HPU graduate students
with a broad survey of the field and an opportunity to
examine current theoretical and practical understandings
of OB resulting from contemporary research. A variety of
topics are considered including concepts of motivation,
individual and group decision-making, communication
processes, leadership and power, conflict and negotiation,
technology and work design, human resource policies, and
others. One objective of the course is for students to be able
to relate the course content to leadership and management
in a dynamic global context.
Prerequisite: Graduate standing.

MGMT 6020
The Regulatory and Ethical Enviornment of Business
(3)
This course focuses on ethical responsibilities of managers
and how the legal environment impacts business decisions.
Topics include regulations within the functional areas of risk
management internally and externally. It covers contempo-
rary cases such as local and international current issues that
offer a foundation in ethical thought.
Prerequisite: Graduate standing.

MGMT 6050
Information Systems Management
(3)
This course covers several broad areas: key IS and IT sys-
tems concepts; aligning technology strategy with business
strategy; strategic management models; commonly used
metrics for evaluating the performance, feasibility, and
financial value of existing and emerging IS and IT solu-
tions; professional, legal and ethical issues as they relate
to information technology.
Prerequisite: BUS 5000 and 5200. Graduate standing.

MGMT 6100
Research Methods and Writing
(3)
This course is designed for international students entering
graduate studies and meant to enhance their research skills.
It stresses reading business journal articles and graduate
level texts, writing cases study analysis reports, and
producing professional research papers on contemporary
business issues. Required of all non-native speakers of
English who are candidates for a graduate degree but who
have not earned a previous baccalaureate degree from a
U.S. college or institution.
Prerequisite: Graduate standing.

MGMT 6101
Corporate Information Systems
(3)
A required course for many graduate students at Hawai‘i
Pacific University. Its purpose is twofold: one, to ensure that
all graduate students understand the building block concepts
associated with modern computer and communications
systems; and, two, to sensitize students to the business and
management implications of information systems. Using a
case-study approach, students investigate the effects of
technology-enabling changes on the health and welfare of
corporate entities and learn to evaluate the appropriateness
of competing IS-based solutions to commonly occurring
opportunities in a modern global economy. All students
learn to use online research services.
Prerequisite: Graduate standing.

MGMT 6120
Competitive Intelligence
(3)
A course that provides a theoretical overview and practical
techniques for the discipline of competitive intelligence.
Topics include the importance of intelligence in business,
legal and ethical issues, the intelligence cycle (collection,
direction, processing, and dissemination), managerial and
marketing intelligence, foreign intelligence collection, and
business security/counterintelligence.
Prerequisite: BUS 5200. Graduate standing.

MGMT 6210
Entrepreneurship
(3)
A seminar that investigates current innovative entreprene-
urial issues. Topics include: knowledge-based innovation;
calculated risk taking; management of economic resources;
market planning; social areas of responsibility and ethics;
legal issues; portfolio management; and the political aspects
of entrepreneurship. A venture/business plan is developed
during this course.
Prerequisite: MGMT 6000 and MKTG 6000. Graduate
standing.

MGMT 6230
Small Business Consulting Seminar
(3)
A Small Business Institute (SBI) program providing practi-
cal business and academic experience. The course consists
of lectures, weekly meetings, and student consultant teams
on small company assignments. A substantial amount of
independent work is required.
Prerequisite: MGMT 6000 and MKTG 6000. Graduate
standing.

MGMT 6300
International Business Management
(3)
The study of the applications of management principles to
multinational and international business. The course focuses
on problems and issues in: social responsibility and ethics;
cultural parameters; the legal environment; management
information systems; strategic planning; research and
development; international market development; inter-
national financial management; and political trends. The
course uses the case-method of study and evaluates current
multinational organizations.
Prerequisite: MGMT 6000 and MKTG 6000. Graduate
standing.

MGMT 6310
Contemporary Japan - United States Relations
(3)
An examination of the contemporary social, economic,
political, and national security relations between the two
most significant powers in the free world. The focus is on
the growing interdependency of the two nations and the
challenges of managing the relations between these two
major powers.
Prerequisite: Graduate standing

MGMT 6320
Southeast Asian Business: Theory & Practice
(3)
This course emphasizes the leading business issues con-
fronting small- and medium-scale enterprises, as well a
successful Asian MNCs. Presented are case studies reflect-
ing regional challenges to businesses. Illustrations include
Southeast Asian environmental considerations, management
theory, successful business practices and essential business

388
skills. This course also strengthens the understanding of business and economic theory and concepts, and their application to contemporary international business activity. Prerequisite: MGMT 3300 or 6300*. (* must have a grade of C or higher). Graduate standing.

MGMT 6321 (3)
HRM: A Global Perspective
An examination of the functions, processes, and key issues in contemporary human resource management from the perspective of a continuously internationalizing business environment. The importance of HRM in multinational organizations, in establishing of new markets and branch offices abroad, and in developing countries of the world are all considered. Prerequisite: Graduate standing.

MGMT 6330 (3)
Comparative Management Systems
National, regional, ethnic, and other influences are common in how we lead and manage. A conceptual framework within which students can access the problems of a changing global environment is provided. Globalization and the universal desire for economic development has led both corporations and governments to seek successful models for capitalism and creating wealth. The influence of belief and values on how we manage and organize is the focus of discussion and assignments. Prerequisite: Graduate standing.

MGMT 6340 (3)
International Environmental Management
Prerequisite: Graduate standing.

MGMT 6350 (3)
Global Markets in Transition
Prerequisite: Graduate standing.

MGMT 6360 (3)
Global Competition and Strategy
Prerequisite: Graduate standing.

MGMT 6400 (3)
Human Resource Management
Prerequisite: Graduate standing.

MGMT 6410 (3)
Public Personnel Administration
Prerequisite: Graduate standing.

MGMT 6420 (3)
Compensation Management
Prerequisite: Graduate standing.

MGMT 6430 (3)
International Negotiations
This course will allow students the opportunity to learn fundamental skills of negotiation and mediation which are applicable across countries and cultures. Learning is accomplished through theoretical understanding, regular practice in simulations, and insight from experts in the field. Prerequisite: Graduate standing.

MGMT 6431 (3)
Seminar: Negotiation and Wage Determination
Prerequisite: Graduate standing.

b MGMT 6441 (3)
Managing Organizational Performance
Prerequisite: Graduate standing.

MGMT 6442 (3)
Organizational Culture
Prerequisite: Graduate standing.

MGMT 6443 (3)
Change Leadership Strategies
Prerequisite: Graduate standing.

MGMT 6445 (3)
Management for Healthcare Professionals
This course introduces MBA and professional students to healthcare's complex landscape, exploring operational and strategic factors such as finances, human resources, information technology, health services, and external issues involving law, compliance, and community health needs. The student may tailor the course to specific needs, and is taught by industry professionals. Prerequisite: MGMT 6020 or 6050. Graduate standing.

MGMT 6450 (3)
Safety and Health Management
Prerequisite: Graduate standing.

MGMT 6460 (3)
Human Resource Development
Prerequisite: Graduate standing.

MGMT 6500 (3)
Strategic Planning
Prerequisite: Graduate standing.

MGMT 6510 (3)
Managerial Communications
A course that focuses on identifying, understanding, articulation, and management of the communication policies, processes, and practices essential to achievement of organizational objectives, both internal and external. Topics include: image; formal and informal systems; internal and external communication; contingency plans; negotiation; and information management. Prerequisite: MGMT 6000 and MKTG 6000. Graduate standing.

MGMT 6520 (3)
Professional Ethics
A course that encompasses both the theory and practice of professional ethics. The philosophical roots of ethics codes are examined, and the practical application of those principles by executives and administrators are analyzed. The course features guest speakers with special knowledge of ethics principles and practices in the business and governmental sectors; these individuals discuss ways of aligning the demands of business with the principles of ethical standards. Prerequisite: Graduate standing.

MGMT 6530 (3)
American Business History
An analysis of the historical foundations of business, the effects of changes in technology and economics ideas, the.
MGMT 6601 Management - Not-for-Profit Organizations
An examination of history of American philanthropy and legal and ethical issues relevant to the nonprofit sector. Economic issues, marketing, fund raising, and strategic management issues are also studied. Special attention is given to capital campaigns, and special guest lecturers from the community are called upon to lend diversity to the class.
Prerequisite: BUS 5200. Graduate standing.

MGMT 6611 Strategic Planning for Not-For-Profit Organizations
A strategic planning course for executive directors, staff members, board members, and volunteers for not-for-profit organizations. This course includes an overview of strategic planning concepts, contemporary issues faced by not-for-profit organizations, the strategic planning process, and effective implementation methods. Practical techniques are emphasized. Students are required to develop and assess a comprehensive strategic plan for a not-for-profit organization.
Prerequisite: Graduate standing.

MGMT 6632 E-Business and Information Systems
Prerequisite: Graduate standing.

MGMT 6910 MBA Seminar I - Managerial Communications
A seminar that focuses on effective verbal and written presentation techniques for managers. Some of the topics covered are: do's and don'ts in making effective presentations; how to write a professional report to communicate ideas and articulate policies, processes and practices.
Prerequisite: Graduate standing.

MGMT 6920 MBA Seminar II - An Intergrated Approach to Global Trade
This seminar will assess students’ understanding of the knowledge, skills and attributes obtained in the core courses. Through in-class activities and out-of-class integrative assignments, students will have opportunities to deal with various situational scenarios. Issues related to exporting, importing, franchising, licensing and direct overseas investment will be addressed.
Prerequisite: MGMT 6910. Graduate standing.

MGMT 6930 MBA Seminar III - Leadership
A survey various leadership styles (structural, political, symbolic, human resource), exploring the effectiveness of each through real-world examples. Students will regularly meet with leaders from the Hawai'i business community, discussing the challenges those leaders have faced and analyzing the type of leadership style(s) they have employed

MGMT 6991 Paid Internship
See Internship Section.
Prerequisite: Graduate standing.

MGMT 6997 Directed Readings in Management
Directed individualized readings.
Repeatable for credit
Prerequisite: Graduate Standing

MGMT 7001 Strategic Management I
An overview of planning, policy formulation and methods of strategy development in various types of organizations will be presented. Economics, social, political, technological and environmental conditions that impact on a firm will be assessed. The development of this plan for a specific organization will become the basis for the course components. Capstone course.
Prerequisite: ECON 6000, FIN 6000, IS 6005, MGMT 6000, MKTG 6000, and MS 6000. Graduate standing.

MGMT 7002 Strategic Management II
One of the major failures of business plans in that they breakdown in the implementation phase. The objective of this course is to provide the student with the knowledge and experience of having to identify those areas in which the plan can fail. The student will design an action plan that shows how to implement the plan inside and outside the organization. The student will present the plan in written and verbal form to the class and then possibly to the organization itself. Capstone course.
Prerequisite: ACCT 6000, MGMT 6020 and 7001. Graduate standing.

MGMT 7011 Creating Innovations
Innovation and creativity are critical aspects of organizational change and development in contemporary societies. This course explores the significance of innovation and creativity to the human experience. Relationships among creativity, change, and innovation are discussed within a multidisciplinary perspective. Practical methods for creating innovation in organization and group processes are illustrated via cases and simulations.
Prerequisite: Graduate standing.

MGMT 7021 Professional Certification Seminar in Human Resource Management
Prerequisite: PSHR 6120, 6450, 6460; PSHR 6420 or LAW 6420; PSMA 6400 or PSHR 6400. Graduate standing.

MGMT 7050 Professional Paper I
The design and development of a major research paper. The professional paper should be of the highest quality and should reflect the student's best efforts in applying skills and knowledge gained in graduate studies. This course is for students in the Weekend MBA Program.
Prerequisite: ACCT 6000, ECON 6000, FIN 6000, LAW 6000, MGMT 6300, MKTG 6000, and MS 6000; IS 6100 or MGMT 6101; PSMA 6400, MGMT 6400, or PSHR 6400. Graduate standing.
MGMT 7051 (3)
Professional Paper II
The design and development of a major research paper. The professional paper should be of the highest quality and should reflect the student's best efforts in applying skills and knowledge gained in graduate studies. Students in the on-campus and satellite campus MBA programs will take MGMT 7051 only. Students in the Weekend MBA program will take MGMT 7050 and MGMT 7051.
Prerequisite: ACCT 6000, ECON 6000, FIN 6000, MGMT 6000, 6020, 6050, MKTG 6000, MS 6000. Graduate standing.

MGMT 7060 (3)
Integrated Management Seminar
The capstone course of the weekend MBA program. The course requires the participants to apply the knowledge and skills learned from the various MBA core and concentration courses to a business situation. An individual comprehensive written case analysis is required in the course.
Prerequisite: Graduate standing.

MIL – Military Science

MIL 1000 (1)
Introduction to Physical Fitness
Hands-on participatory course following the Army's physical fitness program. Classes conducted three days per week with Army ROTC cadets. Focus is on aerobic conditioning, muscular strength and endurance.

MIL 1050 (2)
Introduction to Military Science I
An introduction to the Army ROTC program, providing instruction in military-related subjects of general student interest. Topics covered include: the organization and role of the Army, customs and courtesies of the Army, the Army writing style, and an introduction to military briefings. Basic skills including map reading, orienteering, rifle marksmanship, first aid, and tactics are also emphasized (2 hours lecture per week).

MIL 1051 (1 to 2)
Introduction to Military Science I Lab
The practical application of classroom instruction. Activities emphasized include: drill and ceremony, first aid, rifle marksmanship, physical fitness, and small unit tactics. (1.5 hours lab per week).

MIL 1060 (2)
Intro to Military Science II
The continuation of MIL 1050. Topics covered previously are explored in more detail. In addition, instruction is given in military leadership, professional ethics, developing a physical fitness program, and the role of officers in the Army. Students have the opportunity to participate in adventure training activities including rappelling, helicopter operations, water operations, water survival, construction of one-rope bridges, and field training exercises. (2 hours lecture per week).

MIL 1061 (1)
Introduction to Military Science II Lab
The practical application of classroom instruction. Activities emphasized include drill and ceremony, first aid, rifle marksmanship, physical fitness, and small unit tactics. (1.5 hours lab per week).

MIL 2050 (3)
Intermediate Military Science I
Instruction emphasizing the basic concepts of military leadership to include the military decision making process and the types and styles of leadership. Basic skills that include map reading, first aid, and rifle marksmanship are further developed. Students are given the opportunity to experience a variety of leadership positions within the ROTC battalion and are encouraged to participate in field training exercises and other extracurricular activities. (2 hours lecture, 1.5 hours leadership lab per week).

MIL 2060 (3)
Intermediate Military Science II
The continuation of MIL 2050. Topics introduced include: military operations orders, wilderness survival skills, individual and squad level tactics, and the key jobs and responsibilities of Army officers. Further expertise in basic skills is developed. Students are encouraged to improve their physical conditioning, to seek a leadership position in the ROTC battalion, and to participate in field exercises and other extracurricular activities. (2 hours lecture, 1.5 hour leadership lab per week).

MIL 2070 (6)
ROTC Basic Camp
A five-week summer course conducted at Fort Knox, Kentucky. It substitutes for ROTC basic course (1050,1060,2050, and 2060) and fulfills course requirement for admission to ROTC advanced courses. Credit will be given for 2070 or basic courses, but not both.

MIL 3070 (4 to 6)
ROTC Advanced Camp
A five-week summer field training exercise conducted at Fort Lewis, Washington. Arduous and intensified leadership training is conducted throughout the fi e-week period. Required for U.S. Army commissioning.
Prerequisite: MIL 3050 or 3060.

MIL 3910 (3)
History of Military Warfare

MIL 4997 (1 to 4)
Directed Reading and Research
Directed individual reading.

MIS – Management Information Systems

MIS 2000 (3)
Information Tools for Business
In this hands-on course you will learn to use the tools of a knowledge worker to help you take raw data and transform it into compelling information to be used for business decision making. You will sharpen your analytical and problem solving skills using spreadsheet and database software.
You will also be exposed to the tools and best practices for communicating your information using tables, charts, and graphs. Upon successful completion of this course you will have the basic technical skills to be more productive in your future business courses as well as in an actual business environment. Prerequisite: Any COM A course and CSCI 1011 or 1041.

MIS 3000 (3)
Foundations of Information Systems
Information systems are an integral part of all business activities and careers. This course is designed to introduce
students to contemporary information systems and demonstrate how these systems are used throughout global organizations. The focus of this course will be on the key components of information systems – people, software, hardware, data, and communication technologies, and how these components can be integrated and managed to create competitive advantage. Through the knowledge of how IS provides a competitive advantage students will gain an understanding of how information is used in organizations and how IT enables improvement in quality, speed, and agility.  

Prerequisite: MIS 2000 (can be taken concurrently).

MIS 3020  
Information Systems Project Management  
This course introduces the basics of project management in an information systems context. Students will become familiar with the project life cycle and the supporting processes and knowledge areas. Particular emphasis is placed on the foundation principles as well as the latest trends guiding project management in organizations. Students will be introduced to a variety of tools supporting project management.  

Prerequisite: MIS 2000 (can be taken concurrently) and any WCIL II course.

MIS 3050  
Application Development  
The purpose of this course is to introduce the students to the fundamental concepts and models of application development so that they can understand the key processes related to building functioning applications and appreciate the complexity of application development. Students will learn the basic concepts of program design, data structures, programming, problem solving, programming logic, and fundamental design techniques for event-driven programs. Program development will incorporate the program development life cycle: gathering requirements, designing a solution, implementing a solution in a programming language, and testing the completed application.  

Prerequisite: MIS 2000 (can be taken concurrently) and any WCIL II course.

MIS 3060  
Systems Analysis and Design  
This course discusses the processes, methods, techniques and tools that organizations use to determine how they should conduct their business, with a particular focus on how computer-based technologies can most effectively contribute the way business is organized. The course covers a systematic methodology for analyzing a business problem or opportunity, determining what role, if any, computer-based technologies can play in addressing the business need, articulating business requirements for the technology solution, specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements, and specifying the requirements for the information systems solution.  

Prerequisite: MIS 2000 (can be taken concurrently).

MIS 3065  
Data and Information Management  
This course provides an introduction to the core concepts in data and information management. It is centered around the core skills of identifying organizational information requirements, modeling them using conceptual data models/ing techniques, converting the conceptual data models into normalized relational data, and implementing a relational database using an enterprise database management system. The course will include coverage of database administration, data quality, security, data warehouse, and business intelligence. In addition, the course helps the students understand how large-scale packaged systems are highly dependent on the use of DBMSs. Taking MIS 3050 prior to this course is strongly recommended.  

Prerequisite: MIS 2000 (can be taken concurrently).

MIS 3070  
IT Infrastructure  
This course provides an introduction to IT infrastructure issues for students majoring in Information Systems. It covers topics related to both computer and systems architecture and communication networks, with an overall focus on the services and capabilities that IT infrastructure solutions enable in an organizational context. It gives the students the knowledge and skills that they need for communicating effectively with professionals whose special focus is on hardware and systems software technology and for designing organizational processes and software solutions that require in-depth understanding of the IT infrastructure capabilities and limitations.  

Prerequisite: MIS 2000 and any WCIL II course.

MIS 4000  
Enterprise Architecture  
This course explores the design, selection, implementation and management of enterprise IT solutions with a focus on applications, infrastructure and their fit in business. Topics include frameworks and strategies for infrastructure management, system administration, data/information architecture, content management, distributed computing, middleware, legacy system integration, system consolidation, software selection, total cost of ownership calculations, IT investment analysis, and emerging technologies. Addressed from within and beyond the organization, attention is paid to managing risk and security within audit and compliance standards while concisely communicating technology architecture strategies to a general business audience. Taking MIS 3050 prior to this course is strongly recommended.  

Prerequisite: MIS 2000 (can be taken concurrently).

MKTG – Marketing  

MKTG 3000  
Principles of Marketing  
A general introduction to fundamental marketing principles and policies. Course units include: marketing functions; price policies and controls; trade channels, merchandising, and market research; competitive practices and government regulations; product development; and integration of marketing with other activities of the business enterprise.  

Prerequisite: BUS 1000; Any WCIL II course.

MKTG 3100  
Consumer Behavior  
A course that explores how consumers have changed relating to their purchase behaviors and explore trends for the future. Students learn how to design a winning customer behavior survey and analyze the data. Several state-of-the-art techniques, such as Internet research, are discussed to apply survey results to increase customer satisfaction and loyalty, and subsequently sales.  

Prerequisite: MKTG 3000; MATH 1123 or 3323.

MKTG 3110  
Market Research  
This course examines the fundamental techniques and methods of analysis used to successfully examine produc
service potential, consumer senHTMent, market saturation, or segmentation. Students present results in a professional manner that will support strategic planning initiatives. 

Prerequisite: MKTG 3000; MATH 1123 or 3323.

MKTG 3200 (3)

Product Development
Students are challenged with distinguishing selected products or services to consumers in crowded competitive markets. Methods are then analyzed to manage the brand successfully into the market.

Prerequisite: MKTG 3000.

MKTG 3410 (3)

Integrated Marketing Promotion
Students are introduced to the concepts of Promotion strategy and management as a part of the marketing mix. The course develops the understanding of various domestic and international strategy and management procedures and issues underlying marketing promotion. Topics include the basic elements, strategy, planning and management of promotion and integrated marketing communication, explored through current trends, models, theories, structures and protocols in the marketing process.

Prerequisite: MKTG 3000. Undergraduate standing.

MKTG 3420 (3)

International Marketing
A course that focuses on problems and issues in: marketing management; strategic planning; research and analysis; advertising; and product distribution in international business.

Prerequisite: MKTG 3000.

MKTG 3500 (3)

Web Advertising
A survey of advertising theory, techniques, and applications. Topics include: targeting specific markets; deciding on particular advertising strategies and media; applicable communication theory; management and evaluation of advertising campaigns; the technical aspects of layout and design; and writing copy.

Prerequisite: MKTG 3000.

MKTG 3520 (3)

Sales Force Management
Principles of selling and salesmanship. Selling techniques, the social psychological principles of persuasion, and pertinent facets of interpersonal communication are analyzed. Instruction includes lectures, discussions, and the application of relevant principles and techniques.

Prerequisite: MKTG 3000.

MKTG 3600 (3)

Guerrilla Marketing
Certain situations and products often require extraordinary initiatives. The basic marketing process is reviewed with any eye toward understanding when and how tactical disruptions can be effective means of presenting unique products and services. Case studies are a cornerstone of the course.

Prerequisite: MKTG 3000.

MKTG 3610 (3)

Sports Marketing
With sports marketing a multibillion dollar a year business, marketers need to pay special attention to the media coverage, general marketing mix, public relations, visual communications, pricing strategy and merchandise con
nections that are relevant in this expanding industry. The course uses both text and cases for reference.

Prerequisite: MKTG 3000.

MKTG 3620 (3)

Services Marketing
Unlike manufacturing, services are processes that involve customers in their production. This calls for a whole new method of analyzing producer-consumer interactions. Services account for almost 70 percent of the U.S. GDP and over 75 percent of its non-farm jobs yet are rarely studied as a separate subject. This course studies the nature of services as products, their pricing, promotion, and placement strategies. Course work includes case studies, class discussions, and primary research for a written project.

Prerequisite: MKTG 3000.

MKTG 3630 (3)

Global Distribution and Supply Chain Marketing
The study of the principles and function ofretailing and retail management. The course features analysis of various fundamental problems in retailing, location, and layout; merchandise planning; buying and selling organizations; expense analysis and control; and coordination of store activities.

Prerequisite: MKTG 3000.

MKTG 3700 (3)

Electronic Marketing
A course that discusses the technique and tools used by marketers to harness the marketing potential of the Internet. Current methods of incorporating online marketing into the overall strategy of a business are analyzed, including the use of the Internet for customization, personalization, real-HTM pricing, and customer relationship management.

Prerequisite: MKTG 3000.

MKTG 3710 (3)

Data Base Marketing
A course that discusses the technique and tools used by marketers to harness the marketing potential of the Internet. Current methods of incorporating online marketing into the overall strategy of a business are analyzed, including the use of the Internet for customization, personalization, real-HTM pricing, and customer relationship management.

Prerequisite: CSCI 3201 and MKTG 3000.

MKTG 3950 (1 to 7)

Practicum

MKTG 3990 (1 to 3)

Nonpaid Internship
See Internship Section.

MKTG 3991 (1 to 3)

Paid Internship
See Internship Section.

MKTG 4000 (3)

Integrated Marketing
An introduction to the incorporation of marketing strategy within a business with the focal discussion point being the customer and the marketing mix (product, price, promotion, placement). Internal and external factors impacting an organization's marketing strategy are explored.

Prerequisite: MKTG 3000.
MKTG 4100  
Customer Relationship Marketing  
A vast repertoire of techniques for maximizing customer satisfaction, and therefore establishing the long run relationship with the business/service are examined. Businesses and service organizations which are particularly noted for their service are examined and benchmarked. Analysis is conducted with regard to cost and benefits of enhancing customer service.  
Prerequisite: MKTG 3000.

MKTG 4400  
Marketing Management  
A basic “marketing for managers” course, providing for discussion and solution of problems and current issues involving product strategy, pricing, distribution, promotion, and marketing research from a management viewpoint. Emphasis is on social and economic responsibilities for the marketing function.  
Prerequisite: MKTG 3000.

MKTG 4410  
Advertising Management

MKTG 4950 (1 to 6)  
Practicum

MKTG 4997  
Directed Readings in Marketing  
Directed individualized readings.

MKTG 6000  
Marketing Strategy for Managers  
A marketing systems course using the case-study method, designed to provide a comprehensive orientation to both marketing theory and practice. Various contemporary problems and solutions in marketing are covered from the perspective of the marketing manager. Major units of study include: the marketing mix; the legal environment; pricing strategy; research and analysis; the marketing information system; product/service promotion; distribution channels; consumer behavior; and strategy implementation.  
Prerequisite: Graduate standing.

MKTG 6100  
Global Consumer  
This course will target the consumer with access to the global market place. The course will focus on the changing demographics of the consumer. In addition, the impact of technology and changes needed in promotion strategy will be addressed. Students will conduct comparative studies as part of the course requirements.  
Prerequisite: MKTG 6000. Graduate standing.

MKTG 6110  
Market Research  
A distinctive marketing perspective on strategic management issues, building on the functional foundations of marketing. The course covers the basic methods of analysis such as life cycle, experience curves, Profit Impact on Market Strategies (PIMS), portfolio models, and decisions support systems that help support the strategic planning process.  
Prerequisite: MKTG 6000 and MS 6000. Graduate standing.

MKTG 6200  
Strategic Brand Management  
This course examines the product management process from the perspective of the brand manager. It covers the strategic product decisions which must be made in the areas of: (1) the development and introduction of new products/brands, from the idea of commercialization; (2) the marketing of existing brands, with emphasis on building, managing, and leveraging brand equity; and (3) the marketing of product modifications, product line extensions, brand extensions, and product deletions.  
Prerequisite: MKTG 6000. Graduate standing.

MKTG 6310  
Sales Force Management  
This course provides an understanding of the unique decisions regarding the organization and deployment of a sales force and the role of selling in a firm’s overall marketing strategy. Beginning with an overview of professional selling concepts, the course proceeds to the discussion or prospecting, determining customer wants and needs, making sales presentations, overcoming objections, and closing the sale. The managerial components of the course include HTMs and territory management, recruiting and training salespeople, sales forecasting, motivating and leading the sales force, and compensating and evaluating salespeople.  
Prerequisite: MKTG 6000. Graduate standing.

MKTG 6410  
Marketing Promotion Management  
Students are acquainted with the concepts of Advertising Management. The course develops the understanding of various domestic and international management procedures and issues underlying the management of advertising. Topics include the planning and managing, the environmental and legal issues, and the social and economic effects of advertising. Case studies and contemporary examples are used.  
Prerequisite: MKTG 6000. Graduate standing.

MKTG 6420  
International Marketing  
A seminar exploring the nature and environment of international marketing with an analysis of international opportunities. Strategies for production, distribution, promotion, and pricing in overseas markets are studied within a framework of the constraints and advantages of international marketing, economic, and cultural systems.  
Prerequisite: MKTG 6000. Graduate standing.

MKTG 6445  
Healthcare Marketing  
This course introduces MBA and professional students to healthcare’s complex marketing landscape. The course generally reviews marketing concepts, explores and analyzes current healthcare issues and challenges then develops strategic solutions for hospitals, clinics and specialty issues including managed care and social marketing. The student may tailor the course to specific needs.  
Prerequisite: Graduate standing.

MKTG 6500  
Integrated Marketing  
A strategic approach to incorporation of marketing strategy within the corporate plan, emphasizing the importance of uniform positioning. This course includes the integration of customer and the marketing mix (product, price, promotion, placement) as well as the marketing plan's integration with other corporate functional areas: research, R and D, production, HRM, and finance.
Prerequisite: Graduate standing.

**MKTG 6600 Marketing for Non-Profits**
A course that focuses on marketing strategies for public and not-for-profit organizations. Issues include: design and implementation of marketing strategies tailored to specific organizations and programs; the enhancement of client and public interaction; the management of internal retail operations; obtaining marketing services; and management of the marketing activity.
Prerequisite: Graduate standing.

**MKTG 6700 Electronic Marketing**
This course examines the impact of the Internet on current marketing theory and practice. Of particular interest are the opportunities information technology offers for interacting with customers and business partners. Business models and strategy are discussed from the perspective of both business-to-business and business-to-consumer marketing. To keep abreast of emerging technology, the course has a strong application tone with hands-on Web activities and projects.
Prerequisite: MKTG 6000. Graduate standing.

**MKTG 6710 Data Base Marketing**
Every marketing strategy and decision requires the knowledge and application of data. This course provides a practical demonstration of using data to target, increase and grow a customer base. It includes the research aspects (collection, establishment, and management of databases), the analytical aspect (what is it and what does it mean) and the application (what to do with it, how can it help).
Prerequisite: BUS 5000 and MKTG 6000*. (* must have a grade of C or higher). Graduate standing. MKTG 6900 (3)

**Marketing Seminar (Sales Force)**
A course which examines the management of an outside sales force. Topics include: 1) the field of sales management; 2) planning the sales team's efforts including budgets, quotas, and territories; 3) recruiting and training the sales team including selling skills and knowledge of the sales process; and 4) directing and controlling the sales team including issues related to motivation, compensation, and evaluation.
Prerequisite: MKTG 6000. Graduate standing.

**MKTG 6910 Marketing 2000**
An exploration of evolving issues in marketing and marketing management. The course is meant to go beyond traditional marketing considerations and challenges the student to recognize and respond to continual change.

. Contemporary marketing issues and problems are discussed and analyzed as case studies. Students will be expected to develop perspectives on the future of marketing that can serve them through a marketing career.
Prerequisite: MKTG 6000. Graduate standing.

**MKTG 6990 Nonpaid Internship**
See Internship Section.
Prerequisite: Graduate standing.

**MKTG 6991 Paid Internship**
See Internship Section.
Prerequisite: Graduate standing.

**MKTG 6997 Directed Readings in Marketing**
Directed individualized readings.
Repeatable for credit.
Prerequisite: Graduate Standing

**MS – Management Science**

**MS 6000 Decision Models for Managers**
This course introduces multivariate data analysis, forecasting and Management Science techniques as they are applied to managerial decision making. Applications will be drawn from the production, service and planning context as well as distribution and transportation to demonstrate how opHTMization and simulation models can improve the performance of an organization.
Prerequisite: MATH 1123 or equivalent. Graduate standing.

**MS 6110 Data Management Using Excel**
A course for developing a practical working knowledge of fundamental data management concepts that can be applied without using specialized statistical software. The content focuses on developing practical computer-based analytical skills and includes - identifying statistical problems; analyzing and presenting raw and polished data; using statistics in managerial decision making; and utilizing more available spreadsheet software functions.
Prerequisite: MS 6000.

**MS 6210 Management Decision Models**
This course focuses on the development of practical decision making skills, the analysis of real life problems, and the utilization of those skills in providing answers to those problems and includes - structuring and modeling decision problems; defining and quantifying risk; analyzing trade-offs between alternatives; and examining financial, social, economic, and medical decision making problems.

**MS 6997 Directed Readings in Management Science**
Directed individualized readings.
Repeatable for credit.
Prerequisite: Graduate Standing
MSL – Military Science  MSL 3010 (4)
Leading Small Organizations I
Challenges cadets to study, practice, and evaluate adaptive leadership skills and demands of ROTC Leader Development Assessment Course (LDAC). Challenging scenarios related to small unit operational/warfare will develop self-awareness and critical thinking skills. Cadets will receive systematic, specific feedback on their leadership abilities, and analyze/evaluate their leadership values, attributes, skills and actions. (2.5 lecture, 1.5 hours lab)
Prerequisite: MIL 1050, 1060, 2050, and 2060.

MSL 3020 (4)
Leading Small Organizations II
Intense situational leadership challenges to build cadet awareness and skills in leading small units. Decision-making, persuading, and motivating team members under fire are explored, evaluated, and developed. Military operations are review to prepare for the ROTC LDAC. Cadets apply principles of Law of Land Warfare, Army training, and motivation to troop leading procedures; and are evaluated on what they know and do as leaders. (2.5 lecture, 1.5 hours lab)
Prerequisite: MIL 1050, 1060, 2050, 2060, and MSL 3010; or MSL 3020.

MSL 4010 (4)
Leadership Challenges an Goal Setting
Develops proficiency to plan, execute, and assess complex operations; function as a staff member, provide leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC cadets; challenged to analyze, evaluate, and instruct younger cadets.(2.5 Lecture, 1.5-hours Lab)
Prerequisite: MIL 1050, 1060, 2050, 2060, 3050, and 3060.

MSL 4020 (4)
Transition to Lieutenant
Explores dynamics of leading in complex situations of current military operations. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interaction with non-government organizations, civilians on the battlefield, and host nation support are examined and evaluated. Case studies, scenarios, and What Now, Lieutenant? exercises prepare cadets to lead as commissioned officers in the U.S. Army. (2.5 Lecture, 1.5-hours Lab)
Prerequisite: MIL 1050, 1060, 2050, 2060, 3050, 3060, and 4050.

MULT – Multi Media

MULT 1050 (3)
Point, Shoot, Edit
This course introduces still photography, videography and nonlinear digital editing to beginners or those seeking to improve their production and editing skills. Instruction provides students with the technical knowhow and context necessary to set up a production shoot, operate and HD/SLR camera in still and video modalities, record sound and edit with digital, nonlinear software. Students will create original intellectual property and build digital portfolio material. The use and purpose of the static and moving image, composition, color, lighting and proxemics will be explored through in-class instruction and home-based experimentation.

MULT 1100 (3)
Foundations of MultiHMedia Production
This course introduces foundational software tools and writing systems used in modern multiHMedia communication and design. Instruction provides students with the technical know-how and context necessary to proceed in the multiHMedia program through software tutorials as well as the creation of physical and web-based portfolio material. The use and purpose of the static image, composition, color, fonts and motion graphics will be explored through in-class instruction and home-based experimentation.

MULT 2000 (3)
Introduction to Cinema Studies
This course provides an overview of the foundational elements of cinema studies, covering the technical, historical, and theoretical aspects of the field. Subjects we will survey include cinematography, editing, production design, primitive and classical cinema, the function of genre, avant-garde and documentary film. Components emphasized include the language of film studies and the early history of film. Prerequisite: Any WCIL II course.

MULT 2060 (3)
Modern Media Systems
This course explores the history of the media, the technology, regulations, programming, ratings, the international scene, sales and advertising, the audience and its effects. Prerequisite: ; Any WCIL II course.

MULT 2460 (3)
Graphic Design Studio
In this course, students learn graphic design principles and desktop publishing concepts and skills, and design materials for their portfolio efforts, including advertisements, letterheads, logos, brochures, flyers, newsletters, posters, and pamphlets. Students receive instruction on the use of Adobe InDesign, Adobe Photoshop and Illustrator software, and other pertinent programs to complete class projects. Principles of good design (emphasis, sequence, proportion, balance, and unity) will be taught as well as principles for the use of typography, color, photography, etc., in publishing.
Prerequisite: CSCI 1011, 1041, or MULT 1100. Undergraduate standing.

MULT 2465 (3)
Motion Picture Production
This course provides an introduction to digital video and audio production concepts and techniques. Theory is integrated with practical applications in motion picture analysis, video capture, lighting, audio production, and nonlinear editing. The course focuses on developing visual storytelling skills and fosters individual responsibility for course projects and deliverables in a collaborative environment. Prerequisite: A grade of C- or higher in any WCIL II course; MULT 1100. Undergraduate standing.

MULT 3360 (3)
Writing for New Media
A course that focuses on the skills and style necessary for creating a variety of messages for radio, television, and new media. Prerequisite: COM 1200, JOUR 3000, or MULT 2060; Any WCIL II course.

396
MULT 3400 (3)
Design Systems and Portfolio
Students assemble their own graphic design portfolio as they complete design projects toward print and digital display. Students use Adobe InDesign, Photoshop and Illustrator software amongst other tools to complete course projects. Theories and concepts of design, visual communication, audio, typography and use of color are expanded upon in this course.
Prerequisite: MULT 2460.

MULT 3470 (3)
TV Studio Production
An introduction to the skills required in television studio production. Areas covered will include filming and composition continuity, and character, theme development and denouement. Samples of these elements will be presented to students in the form of video presentations and demonstrations. Students will learn to identify the complex functions of a variety of video, audio and lighting equipment. They will perform as professionals and learn how to produce, direct, and crew live-on-tape studio productions.
Prerequisite: MULT 3360 or 3465. Undergraduate standing.

MULT 3475 (3)
Web Interface and Design
Lecture-lab combined course exploring theories of design and providing a basic introduction to the production and publication of multiHTMedia Web content. Students will incorporate theory, interface design and advertising consideration to create projects ready for Web publication.
Prerequisite: MULT 2460.

MULT 3480 (3)
Digital Imaging
This course offers instruction in PhotoShop. Images are created for the internet and print daily. Students will learn the software, and also the concepts of developing graphics that create aesthetically digital images for print. Students gain real life experience by creating digital illustrations for publication in the HPU newspaper, "The Kalamalama."
Prerequisite: MULT 2460 and 3470.

MULT 3490 (3)
Motion Graphics
Motion graphics are a key component to moving visual images as seen on the internet and television. Many documentaries and commercials make use of the software: After Effects. Panning the still image to create the image to create the illusion of movement, animating typefaces as they are superimposed over video and creating a 3-D space using cameras and lights within the software are examples of some of the skills taught. Students complete assignments that reinforce software skills and demonstrate creativity.
Prerequisite: MULT 2460 and 3480.

MULT 3500 (3)
Cinematography Workshop
This course covers the fundamentals of cinematography. Students will meticulously review the functions of the single lens reflect still camera and the digital video camera. By the end of this course students will understand the cornerstones of photography and cinematography. Students will address the quality and manipulation of light, shadow, color, and composition while working with various cameras and attendant technology. Students will be able to artistically manipulate the camera’s capabilities and lighting to create images which achieve courses and student creative goals.
Prerequisite: MULT 2465.

MULT 3510 (3)
Non-linear Audio-Visual Editing
This course covers the history, theory and practice of digital non-linear editing. It concentrates on both the technical skills needed to produce a competently edited audio-video program and the aesthetic concerns an editor faces for different types of projects.
Prerequisite: MULT 1050 or 1100. Undergraduate standing.

MULT 3560 (3)
Documentary Production
This project-based course explores documentary production from a hands-on experiential perspective. Designed to expand on the knowledge acquired in MULT 2465 Motion Picture Production, students must write, produce, and direct and digitally edit fact-based documentary projects. Along with production, the course covers the theory, history and scriptwriting of documentaries.
Prerequisite: MULT 3465 or WRI 3320.

MULT 3600 (3)
Creative Narrative Production
Creative Narrative Production will strengthen the student’s cinematic storytelling abilities through the creation of several short digital video productions and a short screenplay. This class is designed to encourage an organic exploration of storytelling, to strengthen trust in one’s own ideas and instincts, and heighten student curiosity about human nature and the world at large. The heart of the course involves exploration of visual language on a practical level while keeping in mind our technical, epochal and cultural contexts.
Prerequisite: MULT 2465; JOUR 3000 or WRI 3320.

MULT 3651 (3)
Game Design
An introduction to the many types of computer game design. This course reviews the design and theory behind classic games such as Tetris and Space Invaders, genre creators such as SimCity and Civilization, as well as modern techniques behind sophisticated games such as Quake, Grand Theft Auto and Red Dead Redemption. Students get hands-on experience designing 2D games in JavaScript/HTML5 and 3D games in systems such as the Unreal Engine. Course also briefly covers interactive narrative text adventures, mobile games, and game Artificial Intelligence.
Prerequisite: MULT 3475.

MULT 3675 (3)
Advanced Web Design
This course covers the design of dynamic and highly interactive web sites as corporate identity and communication tools. Particular attention is paid to combining visual appeal and functionality as well as incorporating multiHTMedia modules such as audio and video to enhance media richness. Introductory and intermediate skill levels of Flash are addressed.
Prerequisite: MULT 2460 or 3475.
MULT 3700 (3) Radio and Audio Production
A lecture-laboratory course that includes basic issues in radio broadcasting, an overview of station operations, planning, FCC rules and regulations, script preparation, production, and guest lectures.
Prerequisite: ADPR 2000; COM 1200; JOUR 3000; and MULT 2060; A grade of C- or higher in any WCIL II course.

MULT 3750 (3) Motion Graphics and Compositing
This course covers motion graphics and compositing using Adobe After Effects and other related software. The Motion Graphics and Compositing course instructs students in how to learn to use one’s creativity to produce attention-grabbing, integrated communication design for film, television, and the Web. Motion Graphics are responsible for many effects found in movies, opening film credits, television commercials, animated television network identities, short promos, and advertising of all types.
Prerequisite: MULT 2460 and 2465.

MULT 3780 (3) Global Documentary
Global Documentary Filmmaking offers students the opportunity to create a documentary in a location outside of Oahu. Students will experience cross-cultural awareness and collaboration as they produce a digital audio-visual documentary. The theme and location of the documentary project will vary from offering to offering, but in general the production and narrative will be grounded on intercultural communication and good will vis-a-vis the host cultures and location.
Prerequisite: MULT 1100.

MULT 3910 (1 to 3) Selected Topics in MulHTMedia
Course title, content, and prerequisites will vary. May be repeated for a total of 9 credits when title and content have changed.
Prerequisite: Undergraduate standing.

MULT 3950 (3) Contemporary Cinema Studies
This course explores current trends in cinematic studies. Critical methods including psychoanalytic studies, cognitive approaches, auteur theory, Lacanian analysis and postmodernism will be utilized to analyze films from the last forty years. Students will be able to distinguish between different critical approaches and creatively apply contemporary theory.
Prerequisite: MULT 2000.

MULT 3990 (1 to 3) Nonpaid Internship
See Internship Section.

MULT 3991 (1 to 3) Paid Internship
See Internship Section.

MULT 4000 Advanced Cinematic Production
This is a capstone production course that provides students the opportunity to create an advanced audio-visual production. Projects can be fact-based documentary productions, or fictional cinematic narrative productions. Projects require a pitch presentation that includes a treatment, script, student crew members, and a production plan. The production must be approved by a panel of Communication faculty.
Prerequisite: MULT 3560 or 3600.

MULT 4040 Documentary and Corporate Video Part 2
The second part of a course that allows advanced video students to use acquired production skills on a longer in-depth program. This course concentrates on the technical skills needed to produce a documentary. It follows Documentary Part 1 consecutively. Can be taken in lieu of COM 4900.
Prerequisite: MULT 4040.

MULT 4100 Visual Culture and Media Theory
This course surveys contemporary media theory, develops critical media analysis skills, and serves as a gateway course to advanced work in critical, literary and communication studies. The course requires students to actively engage with ongoing changes in how meaning circulates through visual culture. Students are required to address a broad spectrum of theoretical models and applications as they engage in analysis of film, TV, the Internet, and other audio-visual artifacts.
Prerequisite: MULT 2000 and 2060.

MULT 4100 Visual Culture and Media Theory
MUL 4100 Visual Culture and Media Theory is an advanced critical media studies course, a capstone for the Critical Media Studies major, and an elective in the MulHTMedia Cinematic Production degree program. Critical analysis of media culture demands engagement across a broad spectrum of theoretical models and applications. This course surveys contemporary trends in media theory and guides students in research methods and interdisciplinary approaches to visual and mediated culture. As a capstone, the course provides an opportunity for students in the CMS major to reflect upon their course of study in the major.
Prerequisite: MULT 2000 or COM 3260 and ENG 2301 or 3330.

MULT 4590 Feature Film Screenwriting
Feature Film Screenwriting introduces long form narrative screenwriting for the cinema. Students in this course will study narrative design and screenwriting techniques. The course is project-oriented and the final deliverable is a feature-length narrative screenplay. The course explores story structure, synopsis, step-outline, treatment writing, character development, characterization, plot strategy, narrative theory, screenplay format, building scenes, genre analysis, subplot, dialogue, future-building and other screenwriting techniques and conventions. Participants will engage in a rigorous process of close textual analysis of their own and other screenplays. The course encourages the screenwriter to write about things they know and care passionately about.
Prerequisite: WRJ 3320.
MULT 4702 Mobile Design (3)
An introduction to interface and application design for mobile platforms such as SmartPhones, iPads, and Tablets. This course will review the general interface design and prototyping process, with special focus on the restricted mobile environment. A significant portion of the course is organized around critical engagement with the latest academic and design literature in the field. This course will at HTMees include joint projects with students in the mobile application programming course, CSCI 4702.
Prerequisite: MUL 3475.

MULT 4900 Seminar in Visual Communication (3)
A "capstone" course that allows senior multHTMedia students to use acquired skills in longer, in-depth projects. This course gives students the chance to use their skills in the area of multHTMedia communication to create a portfolio quality project and analysis.
Prerequisite: MUL 2465; Any WCIL II course.

MUS – Music

MUS 1000 Introduction to Western Classical Music (3)
An introductory exploration of the evolution of Western classical music (WCM) from the Middle Ages to the present in relation to the background of life and art. Major historical movements in WCM are covered as well as the basics of reading western music notation. In addition, the impact and influence of non-western music on WCM will be examined. Field trips will be made to local performing groups.

MUS 1400 Music Fundamentals I (3)
An introduction to the fundamental workings of tonal music; reading and notating music; rudiments of music theory and terminology; elementary formal analysis; development of aural skills, including interval recognition, sight-singing, and rhythmic, melodic and harmonic dictation. Individual listening lab work required outside of class.

MUS 1600 Beginning Hula Performance (3)
Beginning Hula Performance enables students to develop proficiency in basic hula movements and perform chants and hula of Hawai’i. Students will express their dance and vocal talents through hula and chant, develop an appreciation for the stories and beloved places of Hawai’i, and learn about the performance practices and traditions of hula. Performance venues may include campus events andshows for the wider community. This course is repeatable for credit MUS 1710 (1)

International Chorale
International Chorale is designed to enable students to perform choral repertoire from multietnic sources. The course will provide a way for students to express their vocal talents. Performing venues include campus events as well as concerts in the broader community. Special attention will be taken to develop healthy vocal production and basic music reading skills. An audition is required.

MUS 2101 Music in World Culture (3)
A course that deals with a wide variety of musical traditions from around the world, including "classical," "folk," and "popular." Students learn to differentiate between different types of music and often have the opportunity in hands-on sessions to play instruments from around the world such as the Chinese Luogu (percussion ensemble). (This course may substitute for GEOG 2721.)
Prerequisite: Any WCIL I course.

MUS 2400 Music Theory I (3)
Music Theory I is the study of music notation, the basic principles of part-writing, voice leading, chord progression, and music form and analysis. Students will develop skill in note and chord recognition, scales, intervals, and melodies. Integral to the course are the development of skills in music reading, ear-training, sight-singing, and melodic and harmonic dictation. A required course for students enrolled in the Music Minor curriculum.
Prerequisite: MUS 1400 or consent of instructor.

MUS 3010 Jazz History (3)
An introduction to the evolution of jazz, from its roots in West Africa, the journey through New Orleans and its eventual development into what many now consider "America’s classical music." Social and cultural factors contributing to the music’s growth will also be examined. The course identifies major figures who helped shape the future of jazz, as well as important trends and stylistic developments. Field trips will be made to live performances.
Prerequisite: Any WCIL II course.

MUS 3030 History of American Musical Theater (3)
History of American Musical Theater is a survey course that examines the history and masterworks of musical theater, beginning with the birth of opera but focusing on musicals in the United States. The course will consist of lecture/discussions, guided and independent listening, a course paper and periodic examinations.
Prerequisite: Any WCIL II course.

MUS 3100 Theater Music of the World (3)
Theater Music of the World is an ethnomusicology course with an emphasis on theater. Modern and historical musical theatre traditions are examined through a sight and sound exploration of cultures throughout the world such as Japanese Noh drama and Kabuki theatre, Chinese Jingju opera, Indian Kathakali theatre, Indonesian dance drama and puppet theatre, Western opera, Broadway musicals, and so forth. In addition, the impact and inter-influence of non-western music and western operatic music will be examined.
Prerequisite: Any WCIL II course.

MUS 3210 Applied Music (1 to 2)
Applied Music consists of private or group lessons on a musical instrument or voice with a faculty member of the Arts and Humanities Department for academic credit. Students must furnish their own instruments, except piano. Students will be evaluated on their level of improvement.
Other means of earning Applied Music credit(s) include choosing one of the following: 1) attend and perform at recitals; 2) attend and perform at a joint concert with performance ensembles; 3) attend a performance and write a concert report; 4) write a research paper with a topic from an applied professor.

**Prerequisite:** MUS 1400 or consent of instructor.

**MUS 3700**

**Sea Warrior Band**
Intensive training in ensemble and instrumental (classical and jazz) band repertoire. Performing venues may include campus events and performances around the state, US Mainland and abroad. Repeatable for credit.

**Prerequisite:** An audition is required.

**MUS 3710**

**International Vocal Ensemble**
Intensive training in ensemble and choral singing. Enables students to perform choral repertoire from multiethnic sources. Explores choral music from historical and cultural perspectives. Performing venues may include campus events and performances around the state, U.S. mainland, and the world. Special attention devoted to developing healthy vocal production and improving music reading skills. Repeatable for credit. An audition is required.

**MUS 3720**

**Chamber Orchestra**
Intensive training in ensemble and instrumental (classical) orchestral repertoire. Performing venues may include campus events and performances around the state, US Mainland and abroad. Repeatable for credit. An audition is required.

**MUS 4000**

**Topics in Music**
Course is designed as an exploration of music topics in music history, music literature, music theory, applied music, music education, and ethnomusicology. The topic will change each HTMe the course is offered.

**Prerequisite:** Any WCIL II course.

**NSCI – Natural Sciences**

**NSCI 1000**

**Freshman Science Seminar**
An introduction to all aspects of majoring in College of Natural Sciences degree programs. Students learn how to take responsibility for their academic progress by learning how to plan course schedules and succeed in science courses. Career and graduate school information is also covered. Students participate in service learning project sponsored by science-related student organizations.

**NSCI 2000**

"Lessons" for Building Sustainable Communities
This course will allow students to develop critical thinking skills in a real world environment. Students will refine these skills by addressing concrete community concerns through hands-on problem solving through the application of a science-based approach to generate evidence-based sustainable solutions. This course will involve team problem solving and mentoring by upper-division students (see NSCI 3000). This course is designed to introduce students to investigating the sustainability of the HPU and local Hawai'i communities and to identifying potential solutions to the problems these communities face.

**NSCI 2100**

**Biotechnology: Problems and Solutions**
Biotechnology uses biological principles or products to solve problems or produce valuable commodities. This course will cover the basic scientific principles involved and give non-science majors the knowledge and vocabulary they need to appreciate and evaluate the benefits and risks of biotechnology. Students will develop their ability to evaluate the competing influences and range of consequences involved in different types of biotech problems and solutions and to explore their own ethical and moral values and choices in these areas.

**Prerequisite:** Any WCIL I course.

**NSCI 3000**

**Building Sustainable Communities**
This course will allow students to develop critical thinking skills in a real world environment. Students will have an opportunity to refine these skills by addressing concrete community concerns through hands-on problem solving and the application of a science-based approach to generate evidence-based sustainable solutions. This course is designed to draw students into investigating the sustainability of the HPU and local Hawai'i communities and, in perceiving the problems these communities face, to work with them to develop sustainable solutions for their concerns.

**Prerequisite:** A grade of C- or higher in any WCIL II course; Any Global Systems A course.

**NSCI 3950**

**Natural Sciences Practicum**
An introductory research experience for students interested in working on special topics under the direction of a science faculty mentor.

**NSCI 6110**

**Graduate Seminar I**
Graduate students develop skills and strategies for independent research. Students may attend scientific seminars at HPU or other venues as appropriate and prepare a written and oral presentation of their proposed thesis research. Capstone course.

**Prerequisite:** Graduate standing.

**NSCI 6112**

**Graduate Seminar I**
This course is a continuation of NSCI 6110 Graduate Seminar I. The course is designed to help graduate students plan their thesis research project by writing a detailed proposal outlining their proposed research projects. This will include describing a problem, developing a testable hypothesis, designing a sampling and analytical plan, and developing a HTMe-line for data collection and analysis.

**Prerequisite:** NSCI 6110 Graduate standing.

**NSCI 6120**

**Graduate Seminar II - Thesis Presentation**
MSMS students attend scientific seminars at HPU or other venues as appropriate, evaluate scientific styles, practice presentation techniques, and present a seminar on their completed thesis research. Capstone course.

**Prerequisite:** NSCI 6110. Graduate standing.
NSCI 6130
Communicating Marine Science (2)
This course is designed to give graduate students the skills necessary to communicate foundational scientific concepts and specific details of their research to diverse audiences in both oral and written format. To this end, students will practice their written and oral communication skills by completing in-class activities and written assignments.

NSCI 6450
Teaching Undergraduate Science (3)
An introduction to the pedagogy of science teaching, including lesson planning, assessment, technology, and inquiry-based methods. The modern college classroom is high tech, experiential, and flexible, to match the needs of modern students. Engagement in classroom technology and field experiences will be used to introduce students to a diversity of teaching approaches.

NSCI 6900
Master’s Research (1 to 3)
MSMS students do research towards their thesis under the supervision of a research mentor, contributing to the initial research proposal or to the masters thesis. Variable credits. Capstone course. Prerequisite: Graduate standing.

NSCI 7000
Master’s Thesis (1 to 3)
This course serves as a capstone course for the MSMS program. Students enrolled in this course will work closely with the instructor to improve their scientific writing skills. During this course students will develop a written thesis that describes their research in standard scientific format. Students are expected to enroll in this course after a majority of their thesis research is completed and as approved by the student's thesis committee. Capstone course. Prerequisite: Graduate standing.

NUR – Nursing

NUR 2300 (3)
Pharmacology
An introduction to the use of drugs to diagnose, prevent, or treat disease using a neurologic integration concept and model as a framework for understanding. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2030*, 2031*, BIOL 2032*, BIOL 2033*, CHEM 1000, CHEM 2030. (* must have a grade of C- or higher).

NUR 2301 (1)
Math for Meds
An exploration of the principles of medication administration and calculation. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2010*, 2030*, 2031*, 2032*, 2033*, CHEM 1000, 2030; MATH 1115 or 1130. (* must have a grade of C- or higher).

NUR 2930 (3)
Pathophysiology
A course that emphasizes the alterations of processes that affect the body’s dynamic integration as interpreted by cultural health beliefs and values, and uses a conceptual approach based on Gordon's Functional Health Patterns. Prerequisite: NUR 2300*, 2301*, 2950*, 2951*, 2960*/2961* or 2963*, 2970*, and 2971*. (* must have a grade of C or higher; ).

NUR 2950 (3)
Nursing Concepts and Processes
An introduction to the concepts and processes inherent in the philosophy and conceptual framework of the Hawai‘i Pacific University Nursing program, including basic clinical “hands-on” skills. The skills lab component (NUR 2951) must be taken concurrently. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2030*, BIOL 2031*, BIOL 2032*, BIOL 2033*, CHEM 1000, CHEM 2030. (* must have a grade of C- or higher). Corequisite: NUR 2951.

NUR 2951 (2)
Nursing Concepts and Processes Laboratory
Lab component for NUR 2950. Prerequisite: BIOL 2030*, BIOL 2031*, BIOL 2032*, BIOL 2033*, CHEM 1000, CHEM 2030. (* must have a grade of C- or higher); Any WCIL II course. Corequisite: NUR 2950.

NUR 2955 (3)
Nursing Transition: International Student
This course focuses on transitioning the international student to the Nursing Program at HPU. The course concentrates on diagnostic reasoning, critical thinking and synthesis of concepts to enhance the international nursing in caring for patients in varying states of wellness to illness across the life span.

NUR 2963 (1)
Communication for Health Care Professionals
An introduction to professional and therapeutic communication concepts and techniques integral to the relationship between the nurse and professional colleagues and the nurse and patients and families. Included are basic communication and interpersonal theories, the role of self in communication, and group process. The course integrates theory, concepts, and skills development. Prerequisite: BIOL 2030*, BIOL 2031*, BIOL 2032*, BIOL 2033*, CHEM 1000, CHEM 2030. (* must have a grade of C- or higher).

NUR 2965 (3)
Nursing Transition: LPN-to-BSN
This course will focus on filling the gaps in the Licensed Practical/Vocational Nurses’ (LPN/LVN) educational background and experience by allowing selected students to acquire concepts deemed essential to the role of the Professional Nurse (BSN). The course will also discuss procedures and expectations specific to the School of Nursing. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2030*, BIOL 2031*, BIOL 2032*, BIOL 2033*, CHEM 1000, CHEM 2030. (* must have a grade of C- or higher). Corequisite: 2966.

NUR 2966 (1)
Nursing Transition: LPN-BSN Laboratory
This is the clinical co-require of NUR 2965. Students function in the BSN student role in a hospital setting by applying the knowledge learned in NUR 2965 to assigned patients and their families, peers and other members of the health care team. The focus of the experience is differentiating and performing in the BSN role, rather than the LPN/LVN role. The conceptual framework for NUR 2965, as for all nursing
Courses at HPU, is the Dungan Dynamic Integration Model. This course will also discuss procedures and expectations specific to the Hawai‘i Pacifi University School of Nursing. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2030, BIOL 2031, BIOL 2032, BIOL 2033, CHEM 1000, CHEM 2030. Corequisite: NUR 2965.

NUR 2970
Comprehensive Health Assessment
A holistic health assessment that introduces physical assessment skills and refines therapeutic communication skills. Emphasis is on the recognition of acceptable norms for health of children, adolescents, and adults. Alab component (NUR 2971) must be taken concurrently. Prerequisite: BIOL 2030*, 2031*, 2032*, 2033*; CHEM 1000, 2030; NUR 2950**, 2951**, 2960**/2961** or 2963***. (* must have a grade of C- or higher; ** must have a grade of C or higher; ^ may be taken concurrently). Any WCIL II course. Corequisite: NUR 2971.

NUR 2971
Comprehensive Health Assessment Laboratory
Lab component for NUR 2970. Prerequisite: A grade of C- or higher in any WCIL II course; BIOL 2030*, 2031*, 2032*, 2033*; CHEM 1000, 2030; NUR 2950**, 2951**, 2960**/2961** or 2963***. (* must have a grade of C- or higher; ** must have a grade of C or higher; ^ may be taken concurrently). Corequisite: NUR 2970.

NUR 2972
Non-Degree Health Assessment
This course focuses on transitioning the non-degree seeking international student to the Nursing program at HPU. The course concentrates on health assessment including physical, emotional, and spiritual. The laboratory component incorporates subjective and objective data as it relates to the health and wellness of the individual. Corequisite: NUR 2973.

NUR 2973
Non-Degree Health Assessment Laboratory
This course focuses on transitioning the non-degree seeking international student to the Nursing program. The course concentrates on practicing the assessment skills that are taught on another student in the lab setting. It is expected that the student will incorporate the subjective and objective data in their write-ups. Corequisite: NUR 2972.

NUR 3120
Health Care Informatics
At the undergraduate level, this course is an introduction to the use of computer systems in various health care settings, as pertains to the areas of research, administration, education, and patient care. Students will be introduced to the concept of evidenced-based practice at the beginning level. Prerequisite: NUR 3962 and 3963. Junior or Senior standing.

NUR 3360
Nursing Concepts of Professional Nursing
A course that facilitates the transition to baccalaureate level nursing practice by introducing the concepts and processes inherent in professional nursing. Topics addressed includes legal and ethical concerns, utilization of scarce resources, and the political process to effect change. (May substitute for NUR 3050.) Prerequisite: Any WCIL II course.

NUR 3890
Interventions Lab
This interventions lab course provides students with the opportunity to learn and practice the skills and procedures used in everyday nursing practice with accuracy and increasing speed and confidence in a mock-hospital environment. The course is intended to provide the student varied lab experiences so that he/she can integrate theory, clinical judgement, technical skills, and competencies prior to their application in the clinical setting, and thereby assist the student in transitioning from the classroom to the clinical setting. Co-Requisite: NUR 3964/3965, Adult Health II Pre-Requisites: NUR 3962/3963; NUR 3980/3981; NUR 2985/2986.

NUR 3900
Leadership and Management in Nursing
A course that provides practical assistance to the future nurse manager in the development of effective leadership and management skills in order to assure the best possible environment for the provision of high-quality care. Prerequisite: ECON 2010 or 2015; NUR 3964**, 3965**, 3970*, 3971*, 3980*, 3981*, 3985*, and 3986*. (* must have a grade of C or higher; ^ can be taken concurrently).

NUR 3910
Dynamics of Family Violence
A nursing elective. The course examines widespread problems of family violence with a focus on historical background, prevention programs, and treatment. Emphasis is on health related issues. Prerequisite: PSY 1000; Any WCIL II course.

NUR 3922
Managing our Mortality
Dying in America is often described as a lonely, isolating, and painful experience. Explore new approaches for changing how we die in this lively seminar. Whether you are a family member of someone dying, are a caregiver, attorney, health care professional, student, or just interested, then this course is for you! Prerequisite: One 3000-level social science or nursing course; Any WCIL II course.

NUR 3930
Complementary Healing Methods
A nursing elective. The course provides a forum for the critical exploration of alternative methods of treatment and healing body, mind, and spirit. Emphasizes the integration of alternative methods with currently accepted healing modalities. Prerequisite: Any WCIL II course.

NUR 3931
Rehabilitation Nursing
An introduction to the concepts and processes inherent in the practice of rehabilitation nursing, covering the multidisciplinary approach to physical and spiritual care, teaching, counseling, and social support. Prerequisite: NUR 3962*. (must have a grade of C or higher).
NUR 3941  
Women’s Health  
A nursing elective. An interdisciplinary forum for the critical exploration of current issues related to the health and health care of men and women. The goal is for participants to become informed consumers and, if appropriate, providers of health care to women and men.  
Prerequisite: Any WCIL II course.

NUR 3942  
Nursing in Japan  
An intensive two-week experiential course that explores the culture of nursing in Japan. Experiences include studying with student nurses in Japan, home stay when available, and tours of various clinical settings. Some understanding of Japanese culture is essential.  
Prerequisite: NUR 2950.

NUR 3943  
Transcultural Nursing  
This course serves as an introduction to the application of the concepts and process of nursing in a transcultural and global context. Students will apply Transcultural Nursing Theory in order to study and establish transcultural rapport and communication with a selected population.  
Prerequisite: NUR 2950, 2951, 2970, and 2971.

NUR 3944  
Transcultural Nursing: People of Hawai’i  
The study of transcultural nursing as a formal area of practice. Content includes theoretical perspectives, concepts and practices as well as different beliefs and health practices within Hawai’i. The goal is to improve health outcomes and the quality of health care to diverse cultures through the development of cultural competency.  
Prerequisite: Any WCIL II course.

NUR 3945  
Theoretical Foundations of Transcultural Nursing  
A study of transcultural nursing theory and culture care models that have been developed internationally. The purpose of this course is to learn how transcultural nursing theory can be used with a variety of models to provide culturally competent nursing care to a diverse clientele.  
Prerequisite: NUR 2950 and 2951.

NUR 3952  
Gerontologic Nursing  
Prerequisite:  
Prerequisite: BIOL 3040; CHEM 2030; NUR 2300*, 2301*, 2930*, 2950*, 2951*, 2960*/2961* or 2963*, 2970*, and 2971*, 2952**, and 2953**. (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3952.

NUR 3953  
Gerontologic Nursing Laboratory  
Clinical component for NUR 3952.  
Prerequisite: BIOL 3040; CHEM 2030; NUR 2300*, 2301*, 2930*, 2950*, 2951*, 2960*/2961* or 2963*, 2970*, and 2971* (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3952.

NUR 3962  
Adult Health Care I  
Introduction to Medical/Surgical Nursing. Focuses on nursing care of adults in an acute illness crisis and at risk for chronic illness. A clinical component (NUR 3963) must be taken concurrently.  
Prerequisite: BIOL 3040*; CHEM 2030*; NUR 2300*, 2301*, 2930*, 2950*, 2951*, 2960*/2961* or 2963*, 2970*, and 2971*, 2952**, and 2953**. (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3963.

NUR 3963  
Adult Health Care I Laboratory  
Clinical Component for NUR 3962.  
Prerequisite: BIOL 3040*; CHEM 2030*; NUR 2300*, 2301*, 2930*, 2950*, 2951*, 2960*/2961* or 2963*, 2970*, and 2971*, 2952**, and 2953**. (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3962.

NUR 3964  
Adult Health Care II  
Nursing care of adults in their generative and productive years, in acute illness crisis and at risk for chronic illness. A clinical component (NUR 3965) must be taken concurrently.  
Prerequisite: NUR 3970*, 3971*, 3980*, 3981*, 3985*, and 3986* (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3965.

NUR 3965  
Adult Health Care II Laboratory  
Clinical Component for NUR 3964.  
Prerequisite: NUR 3970*, 3971*, 3980*, 3981*, 3985*, and 3986* (* must have a grade of C or higher; ** may be taken concurrently).  
Corequisite: NUR 3964.

NUR 3970  
Altered Mental Health Patterns  
An examination of the conceptual base, principles, and practice of mental health and psychiatric nursing across the life span in a holistic approach. Nursing modalities include: psychotropic medications, milieu therapy, crisis intervention, and therapeutic communication skills within the acute psychiatric hospital setting. Individual and family coping with acute mental health alterations are explored. A clinical component (NUR 3970) must be taken concurrently.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, 3963*, and PSY 3600. (* must have a grade of C or higher).  
Corequisite: NUR 3971.

NUR 3971  
Altered Mental Health Patterns Laboratory  
Clinical Component for NUR 3970.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, 3963*, and PSY 3600. (* must have a grade of C or higher).  
Corequisite: NUR 3970.

NUR 3972  
Introduction of Forensic Science  
This course is an overview of forensic health sciences. It uses a multidisciplinary approach to examine Victims and perpetrators of trauma and/or abuse. The role of the provider is also explored. Forensic photography, injury patterns, and evidence collection and preservation are also included.  
Prerequisite: A grade of C- or higher in any WCIL II course*; PSY 1000. (* must have a grade of C- or higher)
NUR 3973  
(3)  
Criminalistics and the Investigation of Injury and Death  
Developing empirical knowledge in forensics related to the investigation of injury and death. Specialized topics in Forensic Pathology and clinical practice will be discussed.  
Prerequisite: A grade of C- or higher in any WCLIL II course*, PSY 1000. (* must have a grade of C- or higher).

NUR 3974  
(2)  
The internship is arranged to expand clinical application of theory content in forensic science. Clinical sites will be arranged with the coroner's office, emergency rooms, crime investigation units, prisons, or other clinical settings to support students' goals.  
Prerequisite: A grade of C- or higher in any WCLIL II course*, NUR 3972*, 3973*, PSY 1000, and 3310*. (* must have a grade of C- or higher).

NUR 3970  
(2)  
Childbearing Family  
A focus on childbearing families. The course addresses physical, psychosocial, cultural/spiritual and developmental needs related to pregnancy, birth, and care of the postpartum woman and newborn. A clinical component (NUR 3981) must be taken concurrently.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, and 3963*. (* must have a grade of C or higher). Corequisite: NUR 3981.

NUR 3981  
(1 to 2)  
Childbearing Family Laboratory  
Clinical component for NUR 3980.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, and 3963*. (* must have a grade of C or higher). Corequisite: NUR 3980.

NUR 3985  
(3)  
Child and Family Health  
This course addresses normal growth and development, developmental variations, and family structure. This course provides the theoretical basis for NUR 3986, where knowledge and skills are applied. A concepts-based approach to learning enables the student to apply knowledge in a variety of pediatric settings and develop critical thinking skills inherently necessary for the care of children and their families. The ability to apply previously learned concepts to new situations is critical in pediatric nursing.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, and 3963*. (* must have a grade of C or higher). Corequisite: NUR 3986.

NUR 3986  
(1)  
Child and Family Health Lab  
Clinical component for NUR 3985.  
Prerequisite: NUR 2930, 3952*, 3953*, 3962*, and 3963*. (* must have a grade of C or higher). Corequisite: NUR 3985.

NUR 3990  
(2)  
Interventions Lab  
Provided to assist student to learn and practice the skills and procedures used in everyday nursing practice with accuracy and increasing speed and confidence in a mock-hospital environment. These courses are intended to provide an opportunity to integrate theory, clinical judgement and technical skills prior to their application in the clinical setting, and thereby assist the student in transitioning from the classroom to the clinical setting.

NUR 3991  
(1 to 3)  
Paid Internship  
See Internship Section.

NUR 4700  
(3)  
Research Proposal Development  
Reflective nursing practice and education pose questions that challenge students to examine human responses, healing, and management of care. Students progress systematically through the scientific inquiry process in order to develop a nursing research proposal.  
Prerequisite: MATH 1123, NUR 3964*, 3965*, 3970*, 3971*, 3980*, 3981*, 3985*, 3986*. (*must have a grade of C or higher, * can be taken concurrently).

NUR 4950  
(2)  
Comprehensive Health Care  
NUR 4950 Comprehensive Health Care facilitates the student's understanding the higher level of patient care in acute and post-acute settings. It encompasses application of the physiologic, psychosocial, spiritual, and cultural aspects of nursing care. NUR 4950 is the didactic portion of NUR 4951 and both must be taken concurrently.  
Prerequisite: NUR 3964*, 3965*, 3960*, and 4700* (* must have a grade of C or higher). Corequisite: NUR 4951.

NUR 4951  
(4)  
Comprehensive Health Care Laboratory  
NUR 4951 is a clinical component of NUR 4950 and must be taken concurrently with NUR 4950.  
Prerequisite: NUR 3964*, 3965*, 3960*, and 4700* (* must have a grade of C or higher). Corequisite: NUR 4950.

NUR 4960  
(2)  
Developing a Healthy Community  
A focus on the community as client. Students use the nursing process to assess, plan, implement, and evaluate health services given to marginally functional families and other vulnerable aggregates within the community. A clinical component (NUR 4961) must be taken concurrently.  
Capstone course.  
Prerequisite: NUR 3964*, 3965*, 3960*, and 4700* (* must have a C or higher). Corequisite: NUR 4961.

NUR 4961  
(4)  
Developing a Healthy Community Laboratory  
Clinical component for NUR 4960.  
Prerequisite: NUR 3900*, 3964*, 3965*, and 4700* (* must have a grade of C or higher). Corequisite: NUR 4960.

NUR 4971  
(1)  
NCLEX-RN Preparation  
Preparation for taking the NCLEX-RN. The process of the course is to enhance the graduate's ability to pass the NCLEX-RN on the first try. Includes test-taking and study skills as well as content information related to the NCLEX-RN. Will include an orientation to the procedures for registering for and taking the NCLEX-RN.  
Prerequisite: NUR 4950*, 4951*, 4960*, and 4961*. (* must have a grade of C or higher) (all courses may be taken concurrently).
NUR 4973  
Nursing Preceptorship
This elective, clinical course provides focused study utilizing critical thinking and the nursing process in a selected clinical setting. This course is designed as a preceptorship; the opportunity to work one-on-one with an RN preceptor as a transition to professional nursing practice. It is an opportunity for the student nurse to learn roles and responsibilities of the registered nurse in a general or specialty setting. Learning will occur as the student practices alongside the expert nurse with a clinical faculty as a facilitator.
Prerequisite: NUR 3964, 3965, 3980, 3981, 3985, and 3986.

NUR 6000  
Advanced Practice Roles in a Diverse Society
The definitions of advanced practice nursing (APN) roles in community environments. Theoretical content includes ethics, multicultural population-focused care, community coordination strategies and interdisciplinary collaboration, critical thinking, problem solving, creativity, and leadership. Roles of the nurse as case manager, administrator, educator, researcher, consultant, and practitioner are explored. Communication issues including assertive behavior, conflict resolution, and the dynamics of change are examined.
Prerequisite: Graduate standing in nursing.

NUR 6005  
Epidemiology
Community health issues, research and conceptual theoretical foundations are utilized in the study of the distribution and determinants of health and disease in the community. Analysis of factors that alter the course of disease and health problems is addressed.
Prerequisite: Graduate standing in nursing.

NUR 6010  
Advanced Pathophysiology
The student will explore selected complex topics in pathophysiology involved in processes affecting the body’s opHTMal functioning. Students will enhance their abilities to implement diagnostic reasoning, critical thinking, and the integration of scientific knowledge with the psychosocial and spiritual aspects of the human condition across the lifespan. Students will incorporate current health care practice into their learning using an Evidenced-Based research approach, including use of online access to the most current information.
Prerequisite: Graduate standing in nursing.

NUR 6015  
Community/Public Health Policy and Program Planning
This course analyzes the relationships between health policy, the organization of U.S. health care systems, and the health status of culturally diverse communities. Health care policy issues and trends, population-based community needs assessment and analysis, program planning, and grant writing are examined. Emphasis is placed on the role of the advanced practice nurse in influencing policy decisions.
Prerequisite: Graduate standing in nursing.

NUR 6020  
Advanced Nursing Research
As part of the core curriculum, this course explores a broad range of quantitative and qualitative methods of inquiry. These methods of inquiry are used to encourage the student to investigate nursing phenomena and incorporate research into advanced clinical nursing practice.
Prerequisite: Graduate standing in nursing.

NUR 6025  
Applied Drug Therapies for the APRN
This course is designed to prepare advanced practice nurses for prescribing drugs within the scope of their practice. Basic and advanced pharmacological principles and pharmacological actions of major drug classes will be discussed and explored in relation to physiologic systems. A focus on application of these agents to the individuals, families, and communities will be developed by the learner.
Prerequisite: Graduate standing in nursing.

NUR 6030  
Advanced Physical Assessment
This course will give the graduate student an opportunity to practice and advance their physical assessment skills by performing complete health assessments. Skills are taught and practiced on a class partner via the body systems approach with weekly integration of previous skills. Students will take complete histories and provide comprehensive documentation of the history and physical assessment obtained on lab partners, or persons brought in from the outside. Specialized skills and techniques will be incorporated into the learning specific to pediatrics, geriatrics, and women's health as HTMe allows.
Prerequisite: Graduate standing in nursing.

NUR 6105  
Health Care Informatics
At the Graduate level, the course is taught from an evidence-based model of clinical practice and research, in addition to being an introduction to the issues and computer use in patient records and clinical practice.
Prerequisite: Graduate standing in nursing.

NUR 6110  
Teaching Nursing in Cyberspace
This course provides participants with experience in applying instructional design principles and concepts and evaluation strategies in the cyberspace environment. Students will experience online classroom first hand and interact with peers and facilitators while developing a course for online instruction. There will be ongoing discussions regarding how online teaching differs from the classroom setting. Participants will critique peer course development and facilitate selected lessons.
Prerequisite: NUR 6956.

NUR 6950  
Human Resource Management
An analysis of the roles of agencies, personnel, payers, and regulators in the delivery of health care. Human resource issues of recruitment, performance appraisal, compensation, benefit management budgeting, contract negotiations, staff development and the supervision of unlicensed personnel are addressed as issues for the APN.
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6951.
NUR 6951  
Agency Management Practicum  
Theories of management and health care systems in a community practice setting are applied to the role of the APN.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6950.

NUR 6952  
Analysis of Communities and Vulnerable Populations  
An examination of community structure and dynamics, including citizen participation, power, decision-making structures, and communication patterns that govern a community's functioning. The community dimensions of location, population, and social systems are used to develop strategies for improving the health of the various aggregates and the community as a whole. The student is expected to understand the cultural, behavioral, and organizational factors affecting the access, use, and organization of health services.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6953.

NUR 6953  
Community Analysis Practicum  
A course that studies and identifies a specific problem or content area within the scope of nursing practice or management in a selected community health care setting. Course activities include the in-depth assessment of the health needs, development, implementation, and the evaluation of strategies to address these needs. (4 credits)  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6952.

NUR 6954  
Defined Option Seminar  
An area of special interest, such as home health, long term care, substance abuse, children with special needs, mental health, etc., is selected as the focus of this in-depth investigation and discussion.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6955.

NUR 6955  
Defined Option Practicum  
The area of special clinical interest defined in NUR 6954 is the setting for this contracted and preceptor clinical experience.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6954.

NUR 6960  
Advanced Theory: Primary Care of Children  
Disease prevention, health promotion, and illnesses in children and adolescents are comprehensively analyzed for the individual and within the context of their family and community.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6961.

NUR 6961  
Practicum I  
Applied advanced practice nursing knowledge, reasoning, and intervention skills for the prevention of disease, health promotion, and illness appropriate to children, their families, and community are developed within this laboratory and clinical experience.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030 and 6960. Graduate standing in nursing.

NUR 6962  
Advanced Theory: Primary Care of Women  
Disease prevention, health promotion, and illnesses in women are comprehensively analyzed for the individual and within the context of their family and community.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6963.

NUR 6963  
Practicum II  
Disease prevention, health promotion, and illnesses in children and adolescents are comprehensively analyzed for the individual and within the context of their family and community.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030, 6960. Graduate standing in nursing.

NUR 6964  
Advanced Theory: Primary Care of Adults  
Health promotion, disease prevention, and illnesses of the adult are comprehensively analyzed for the individual and in the context of their families and community.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6025, and 6030. Graduate standing in nursing. Corequisite: NUR 6965.

NUR 6965  
Practicum III  
Advanced practice nursing knowledge, reasoning, and intervention skills for the prevention of disease, health promotion, and illness appropriate to the adult, their families, and community are developed within this laboratory and clinical experience.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030, 6962, 6964 and 6966. Graduate standing in nursing.

NUR 6966  
Advanced Theory: Primary Care of the Geriatric Adult  
Health promotion, disease prevention, and illness of geriatric adults are comprehensively analyzed for the individual and within the context of their family and community.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020 and 6030. Graduate standing in nursing.

NUR 6967  
Practicum IV: Primary Care of the Geriatric Adult  
Advanced practice knowledge, reasoning, and intervention skills for the prevention of disease, health promotion, and illness appropriate to the older adult, their families, and community are developed within this laboratory and clinical experience.  
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030, 6962, 6964 and 6966. Graduate standing in nursing.
NUR 6969 Practicum V
Advanced practice nursing knowledge, reasoning, and intervention skills for the prevention of disease, health promotion, and treatment of illness of family practice to include adults, children, or geriatric adults.
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030, 6960, 6962, 6964 and 6966. Graduate standing in nursing.

NUR 6980 Fundamentals of Acute Care I
This evidence based course investigates the evaluation and management of adult and gerontologic populations experiencing acute and critical illnesses, including disease classification, epidemiology, pathogenesis, clinical manifestations, assessment and diagnostic evaluation. An emphasis is placed on advanced clinical decision making integrating advanced pharmacology, psychosocial, cultural, spiritual factors, genetics and the impact of aging.
Prerequisite: completion of the core courses: NUR 6000, 6005, 6010, 6015, 6020, 6025, 6030 or the equivalent for those in the Post-Masters’ Certificate

NUR 6981 Advanced Clinical Decision-making
Simulation experiences are designed to assist students in developing proficiency in physical assessment, diagnosis and management of acutely ill and injured patients. Principles and procedures related to managing and monitoring patients with advanced technology are integrated and applied. Seminars focus on decisions made to incorporate advanced technologies into patient management.
Prerequisite: completion of the core courses: NUR 6000, 6005, 6010, 6015, 6020, 6025, 6030 or the equivalent for those in the Post-Masters’ Certificate

NUR 6983 Fundamentals of Acute Care II
This evidence-based course investigates the evaluation & management of adult & gerontologic populations experiencing acute and critical illnesses, including disease classification, epidemiology, pathogenesis, clinical manifestations, assessment and diagnostic evaluation. An emphasis is placed on advanced clinical decision making integrating advanced pharmacology, psychosocial, cultural, spiritual factors, genetics and the impact of aging.
Prerequisite: NUR 6980, 6981, 6982

NUR 6984 A-GACNP Practicum I
This first practicum course will explore and apply the Adult-Gerontological ACNP role within the infrastructure of American Health Care. The focus will be on the development of ACNP competencies and clinical decision making. Discussions will include reimbursement, billing, role development, nursing and medical interventions and other activities implemented in the clinical practicum.
Prerequisite: NUR 6980, 6981, 6982

NUR 6985 Fundamentals of Acute Care III
This third evidence based course investigates the evaluation & management of adult & gerontologic populations experiencing acute and critical illnesses, including disease classification, epidemiology, pathogenesis, clinical manifestations, assessment and diagnostic evaluation. An emphasis is placed on advanced clinical decision making integrating advanced pharmacology, psychosocial, cultural, spiritual factors.

NUR 6986 A-GACNP Practicum II
This second practicum course will explore the expansion and development of ACNP clinical competencies and clinical decision making. Clinical experiences will explore governmental, social and clinical resources to manage the acutely ill populations. The application of advanced nursing, medical, psychosocial and interdisciplinary communication in patient management will be emphasized.
Prerequisite: NUR 6980, 6981, 6982, 6983, 6984

NUR 6987 A-GACNP Practicum II
The third practicum course will solidify the ACNP role with the expansion of advanced clinical competencies and clinical decision making. Clinical experiences will focus and substantiate the utility of comprehensive patient assessment, management and intervention strategies across the continuum of acute care. Seminars will focus on a variety of professional role development.
Prerequisite: NUR 6980, 6981, 6982, 6983, 6984, 6985, 6986

NUR 6990 Nonpaid Internship
See Internship Section.
Prerequisite: Graduate standing in nursing.

NUR 6991 Paid Internship
See Internship Section.
Prerequisite: Graduate standing in nursing.

NUR 7000 Professional Paper/Project
This course is a rigorous culminating scholarly endeavor in which the student will integrate theoretical knowledge, clinical experience, and research in a faculty guided project proposal.
Capstone course.
Prerequisite: NUR 6000, 6005, 6010, 6015, 6020, 6030, 6060
Graduate standing in nursing.

NUR 8010 Biometry
This course is designed to provide an introduction to experimental design, hypothesis testing, analysis of data and data presentation. Topics covered include ANOVA, regression and correlation analysis, experimental design, power analysis, and multivariate analysis. Instruction on statistical methods and theories will be enhanced by conducting analyses using SPSS software and examples drawn from the biological sciences.
Prerequisite: Graduate standing in nursing.

NUR 9010 Project Development
In this course the DNP student will refine and make preparations for implementation of the project proposal from NUR7000 (or equivalent) at a site in Hawaii. The final project proposal will be submitted to the HPU IRB and the research review process of the project site.
Prerequisite: Admission to the DNP Program.
NUR 9020  
Project Implementation  
In this course the doctoral student will implement the project in a practice setting in Hawaii or in the state of the student’s FNP licensure, with multiple stakeholders, as approved by the IRBs, the faculty and community advisors. Applies clinical investigative skills to improve health outcomes. This is the second course in the practicum series of 3.  
Prerequisite: NUR 9010  

NUR 9030  
Data Analysis and Project Findings  
In this course the doctoral student will analyze the results of the project by analyzing data, evaluating project outcomes, and disseminating results within the organization, the university, and the professional community. Findings will be disseminated in the form of a completed scholarly paper, an oral community presentation (accessible live online if remote) and a publishable paper ready for submission to a professional nursing journal. This is the last course in the practicum series of 3.  
Prerequisite: NUR 9010, NUR 9020, Admission to the DNP Program  

OC – Organizational Change  

OC 6005 (3)  
Scope and Methods of Research  
OC 6005 is a course designed for MAOC graduate students. The course acquaints students with the theories of current and historical importance; introduces or reinforces the tenets of the scientific method; introduces the faculty, and previews key concept areas being taught in the program; discusses research designs and methods appropriate in graduate programs; and introduces students to research materials, knowledge technology, communications skills, and both quantitative and qualitative methods to be used throughout the MAOC program of studies. OC 6005 provides a foundation in applied research that will be used to complete applied research assignments in all of the remaining OC courses. OC 6005 must be completed no later than in the second semester in a student’s program of studies.  
Prerequisite: Graduate standing  

OC 6440 (3)  
Organizational Change and Development  
OC 6440 is the foundation for all MA/OC and Professional Certificate in OCD courses. Students first learn the basic nature of human culture and organizational change. Then the practice of OCD is studied within larger holistic and comparative contexts for global and local change. Discussions and assignments are designed to assist the student in differentiating between change and adaptation. Change and development initiatives in governments, communities, and corporations are discussed.  
Prerequisite: Graduate standing  

OC 6441 (3)  
National and Community Change and Development  
National and community-level change and development is being experienced in almost every area of our contemporary world. Resolving ethnic and religious conflicts, developing market economies for global competition, resource acquisition, technology transfer, education, and creating new approaches to governance are some of the related issues. This course presents a holistic perspective on the issues of change and development at the macro levels of government and community organization. Models for change and development are reviewed as well as their applications in various human and environmental contexts. Specifically, change and development initiatives in economic development, public health improvement projects, stakeholder reconciliation, urban and environmental planning and educational programs are reviewed and analyzed.  

OC 6442 (3)  
Culture and Human Organizations  
OC 6442 includes discussions and assignments intended to develop a working understanding of the influence of culture in various human organizations. Culture is presented as the fundamental knowledge we use to create adaptive solutions for human problems. National, corporate, community, and group organizations are fundamental expressions of culturally influenced world views and values. Frameworks for observing, analyzing, measuring, and changing culture are presented. Approaches for reconciling conflicts among stakeholders with seemingly different culture values and models for behavior are used in simulations and case discussions.  
Prerequisite: Graduate standing.  

OC 6443 (3)  
Change Leadership Models and Methods  
OC 6443 presents a globally relevant perspective for understanding the dynamics of change leadership. Issues such as power, stakeholders, and conflict are discussed via case studies. Students learn how their own world views, values, and personal behaviors can influence their effectiveness as leaders in different social and organizational contexts. Self-reflection is balanced with group and organizational understanding to analyze the appropriateness and utility of various models and methods for leading change.  
Prerequisite: Graduate standing.  

OC 6444 (3)  
Innovations and Creativity  
Innovation and creativity are critical aspects of organizational change and development in contemporary societies. This course explores the significance of innovation and creativity to the human experience. Relationships among creativity, change, and innovation are discussed within a multidisciplinary perspective. Practical methods for creating innovation in organization and group processes are illustrated via cases and simulations.  
Prerequisite: Graduate standing.  

OC 6445 (3)  
Organizational Behavior  
This course provides HPU graduate students with a broad overview of the OB field. Theoretical and methodological understandings of OB are discussed and analyzed via a combination of practically based cases and research studies. Fundamental aspects of human behavior, such as motivation, communication, decision making, problem solving, power, leadership, conflict resolution, and technology transfer are discussed in a globally appropriate perspective. Both non-Western and Western approaches to OB are compared and discussed.  

OC 6446 (3)  
Consulting Theory and Practice  
Consulting has become a global industry, with a wide range of professional disciplines involved. This course provides a comprehensive overview of the consulting profession, with particular focus on organizational structures and processes for providing consultation services, product development
and marketing, and approaches for implementing effective projects and initiatives. Learning will be enhanced by the use of cases, simulations, and experiential assignments. Prerequisite: Graduate standing.

OC 6447 Consulting and Group Process Facilitation (3) Participants in this integrative seminar will learn approaches for creating change interventions in organizational settings. Group process, facilitation methods, dealing with stakeholders' resistance, aligning power systems, and organizational design will be among the issues to be discussed. Learning will be enhanced by cases, simulations, and experiential assignments. Prerequisite: Graduate standing.

OC 6448 Assessing Culture (3) This course explores the perspective and methods for measuring culture. Included are cases from national, organizational, community, and group contexts. Professional and disciplinary differences in defining and measuring culture will be compared and evaluated. Methods reviewed include traditional psychometric approaches such as surveys and interview, culturally-appropriate approaches such as ethnography, scenarios and dilemmas, simulations, and document analysis. Assessing cultural competency will also be a focus in the course. Students will be expected to develop instruments or processes to apply in professional situations. Prerequisite: Graduate standing.

OC 6449 Applications of Cultural Competence (3) This course explores the applications of cultural competence in various professional contexts. Cases from organizational change, ethnic conflict, diversity, international business, education and training, international and community development, and leadership will be discussed. Students will be expected to develop a project to apply in professional situations. Prerequisite: Graduate standing.

OC 7000 Applied Research (3) Applied Research requires the development of a publishable quality applied research project/paper at the graduate level. Students enrolled in this course should be in the MAOC program. Prerequisite: OC 6005 and 21 additional credits in MAOC courses. Graduate standing.

PADM- Public Administration

PADM 1000 Introduction to Leadership (3) This course is an introduction to the administrative processes needed in government. It introduces students to the theories of human behavior, cognition, and emotion. Students will be able to explore self-leadership using a psychometric questionnaire such as the Myers-Briggs Type Indicator. Prerequisite: None

PADM 2000 Supervisory Leadership (3) This course is an exploration of the nature and responsibilities of the supervisor. Topics covered include: work environments; technologies and supervisory styles; tools for decision-making; supervisory functions; scheduling, staffing, directing, and controlling. This includes career skills involving both personal planning and interpersonal relations and skill areas as HTMe keeping, goal setting, negotiations, assertiveness, and networking. Prerequisite: PADM 1000 and any WC & IL II course.

PADM 3000 Analytical Techniques and Methods (3) This course studies statistical techniques and quantitative methods for decision-making in an administrative environment. Topics include numerical and graphical descriptive statistics, probability and probability distributions, statistical inference, decision making under uncertainty, forecasting, correlation, and regression analysis, linear programming, project management, and simulation. Prerequisite: MATH 1105 or higher

PADM 3300 Public Policy (3) This course examines the making of public policy in the United States. Our study of policymaking will be based on the proposition that an understanding of policymaking depends upon an understanding of institutions and political behavior. The course begins with an overview of the public policy process, examining the stages of policymaking and theories of the policy process. These theories are discussed in the context of specific public policies and public policy controversies, including social welfare, defense, tax policy, and other important issues. Prerequisite: PSCI 3200

PADM 3400 Public Personnel Administration (3) This course examines the administration of the civil service system. Representative topics include civil service reform and the relationship of public personnel administration and organizational performance. The rights and responsibilities of public employees, patterns of discrimination and the changing workforce will also be discussed in the context of public policies, law and court rulings. Students will have an understanding of public personnel administration necessary to steward a valuable public resource competently within the limitations on the exercise of government authority while adhering to the values enumerated in the U.S. Constitution. Prerequisite: HRD 1000 OR PADM 1000 course; and CJ 3000

PADM 3500 Public Finance and Budgeting (3) This course provides an overview of the processes, techniques, and political/administrative aspects of public budgeting and finance for federal, state, and local governments in the United States. The purpose of this course is to introduce students to the theories, concepts, and practice of government budgeting and finance and to wpose them to the current issues and challenges in this field. This course also provides students with both theoretical perspectives and practical analytical skills involved in understanding, analyzing and preparing budgets. Prerequisites(s): PADM 3000 and any WC & IL II course with a grade of C- or higher.
PADM 3600 Non-Profit Management
This course is designed to provide an introduction to the leadership skills needed to be successful in the nonprofit sector in the United States. Topics covered in this course include the nature and scope of non-profit organizations. Other topics include mission statements, ethics and cohesion, leadership, building organizational capacity, fundraising and revenue generation; building and sustaining relationships with external constituencies; finding, training, and supervising volunteers, governance and boards of directors, evaluation of operations and programs; and sustainability of nonprofit organizations.
Prerequisite(s): any WC & IL II course with a grade of C- or higher.

PADM 3700 Urban Government
The study of urban governance provides a valuable insight into economic, social, and political forces and how they shape city life. This innovative course casts new light on the issues and re-examines the state of urban governance at the start of the twenty-first century. Models of urban governance such as corporatist, pro-growth and welfare are assessed in terms of implications for the major issues, interests and challenges in the contemporary urban arena.
Prerequisite(s): PSCI 3415

PADM 4000 Strategic Planning for Government Organizations
This course is a capstone, a summary and integration of knowledge and skills gained in the Public Administration program. It is a strategic planning course at the city, state, and federal level with issues from the City and County of Honolulu, the State of Hawaii, the U.S. Federal Government and/or other government entities located in the Pacific basin. Topics include a clarification of mandates, mission, vision, and values; a situational analysis involving both the internal and external environments; the identification of the strategic issues facing those government entities, and the strategic plan for achieving the goals of the organization.

PE- Physical Education

PE 1700 First Aid for Sports
Introduction to basic first aid and safety with an emphasis on recognizing common sport-related injuries and administering appropriate first aid. The roles and responsibilities of coaches and athletes in preventing accidents and injuries and administering first aid are addressed. Topics also include anatomy, sports medicine terminology, and injury evaluation.

PE 2110 Sports and Fitness - Aerobic Exercises

PE 2111 Sports and Fitness - Cardio Kickboxing
Repeatable for a total of 2 credits.

PE 2112 Beginning Yoga
Introduces popular styles of yoga and common positions. Focus will currently be aikido. No previous martial arts experience required. Repeatable for a total of 2 credits.

PE 2113 Sports & Fitness: Martial Arts
Introduces the basics of martial arts and self defense techniques as fun way to exercise. The martial art of primary

PE 2130 Sports and Fitness - Beginning Tennis
Repeatable for a total of 2 credits.

PE 2140 Sports/Fitness - Golf

PE 2150 Sports and Fitness - Recreational Sports

PE 2160 Sports and Fitness - Strength Development

PE 2161 Sports and Fitness - Weight Training Repeatable for a total of 2 credits.

PE 2170 Sports and Fitness for Wellness

PE 2180 Sports/Fitness: Volleyball

PE 2500 Methods of Coaching
A course that provides insight and examines the many facets in coaching along with suggested guidelines that a beginning coach will find useful.

PE 2600 Contemp Issues in Coaching
This course examines many of the challenges and issues that affect coaches in today's sports environments. Students will investigate coaching as a profession, as well as some of the motivational, managerial, and media-related skills required being a successful coach.

PH- Public Health

PH 1000 Introduction to Personal and Community Health
This is an introductory course in the study of health science content areas that familiarizes students to the study of health and wellness involving mental and emotional, family/social, spiritual, physical, and environmental health. Key components of the course emphasize personal responsibility and healthy behaviors. Students will also examine how Hawaiian culture relates to health promotion, disease and disability prevention, treatment and control.
Prerequisite(s): Any COM Skill A; may be taken concurrently.

PH 1100 Introduction to Human Sexuality
This course will introduce students to the subject of human sexuality from a broad perspective with particular attention to the multiple dimensions of sexual health: physical, psychological, developmental, and interpersonal. Topics include reproductive anatomy/physiology, gender identity, love and intimacy, pregnancy and birth, sexually transmitted infections, and sexuality across the lifespan. Course goals are to present factual information, emphasize healthy behaviors, and promote scholarly examination of
person, social, and ethical factors in sexual expression. Sex is an appropriate and important topic of study, and our understanding will be enhanced by reading about, thinking about, and discussing many aspects of human sexuality.

PH 2000
Introduction to Human Physiology
This is an introductory course in human physiology for non-biology majors that covers all systems of the human body. The course is organized around four integrated processes: (1) Basic cell processes: integration and coordination, (2) Homeostasis and control, (3) Integration of function, and (4) Metabolism, growth, and aging.

PH 2020
Human Disease
This course reviews normal human anatomy and physiology and then integrates abnormal human anatomy and physiology by organ systems. Pathology, clinical manifestations, medical diagnosis, medical treatment, and public health interventions to prevent and control diseases are discussed. Prerequisite(s): Any COM A course.

PH 2030
Clinical Techniques in Public Health
Introduction to public health secondary level prevention programming and medical reserve corps training. Connecting theory and practice in Hawaiʻi public health and emergency preparedness are emphasized. Prerequisite(s): Any COM A course.

PH 3000
Community Health Theory and Practice
This community health course examines research and practice areas within community health, such as epidemiology, community organization, program planning, health promotion, minority health, health care, mental health, environmental health, drugs, safety, and occupational health. Best practices are highlighted through case studies.

PH 3001
Research, Evaluation, and Planning for Public Health
Evidence-based research in public health. Students will develop and apply the basic skills in scientific reasoning, research methodologies, evaluation and planning for their application to public health practices, critically assess research in the public health literature, develop appropriate research questions, apply theoretical frameworks, employ qualitative and experimental research methodologies for evidence-based practice, consider ethics questions, and construct an evidence-based research protocol for practice.

PH 3020
Epidemiology
An overview of the relationships between potential risk factors and health outcomes and how causal relationships are interpreted for public health decision making. This course will provide a comprehensive understanding of sources of population data in terms of morbidity, mortality, and other vital statistics. Scientific methods for approaching population data and identifying public health problems and empirical analysis of data will be emphasized. Critical evaluation of medical and public health literature is included. Prerequisite(s): MATH 1123, SOC 3200, or any statistics course.

PH 3030
Health Promotion and Wellness Management
The study of the major ideologies and theories which serve to underpin health promotion and wellness management. The course will highlight the analysis and application of these theories on management programs for multicultural, special and vulnerable populations. The importance of using evidence to support all aspects of health promotion and wellness management will be emphasized throughout the course. Prerequisite(s): PH 4010, PH 3020.

PH 3040
Health Education Planning, Theory and Practice
The analysis and application of teaching and learning with a health care context. Theories and principles of health education, integrating sociocultural, physical, psychological, and developmental dimensions across the lifespan will be examined. Through a variety of activities, students learn how to assess learning needs, develop teaching plans, apply specific teaching strategies and evaluate the effectiveness of health education for individuals and groups in various settings. Students will apply teaching and learning concepts and principles through completion of a community service-learning educational program. Prerequisite(s): PH 4010, PH 3020.

PH 3050
International Health
A comparative analysis of global health systems and how those systems influence morbidity and mortality statistics. Examine the effects of evidence-based global health promotion and disease prevention programs. Determinants of health status will be discussed such as genetics, access to health care, diseases and disabilities, sustainability, vital statistics, and social justice. Prerequisite: PH 3040
PH 3060 (3)  
Global Aging  
This course uses epidemiological methods to examine aging according to HTMe, place, and person variables. The impact of global aging and challenges to public health and health care systems will be discussed. The shifting structure of support systems such governmental health agencies, United Nations, and non-governmental organizations will be examined.  
Prerequisite: PH 3040

PH 3070 (3)  
Gerontology Theory & Practice  
Exploration of changing health status and needs in middle age and older adult years. Discussion of psychological, social, spiritual, and physical health issues such as depression, drug use and abuse, social isolation, sexuality, and chronic illness. Health promotional and disease prevention approaches to aging discussed. Discussion on the health care delivery system, including long term care.  
Prerequisite: PH 1000.

PH 3080 (3)  
Practicum I  
This is the first of three required practicum courses designed for students to apply theory and to master skills necessary for entry-level positions in public health. A minimum of 200 hours (3 credits) of nonpaid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Students will focus on the first two Areas of the Certified Health Education Specialist Responsibilities and Competencies (Area I: Assess Needs, Assets, and Capacity for Health Education; Area II: Plan Health Education). Clinical Component for PH 3030 and PH 3040.  
Prerequisite(s): PH 3000, PH 3001

PH 3990 (2 to 3)  
Nonpaid Internship  
A minimum of 150 to 200 hours (per 2 or 3 credits respectively) of nonpaid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Comprehensive written reports are required by an assigned HPU instructor. Internships are defined as training and can be offered in all majors.  
Prerequisite(s): Completion of all upper-division courses in the major (PH 3001, PH 3020, PH 3030, PH 3040, and PH 4010).

PH 3991 (2 to 3)  
Paid Internship  
A minimum of 400 or 600 hours (per 2 or 3 credits respectively) of paid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Comprehensive written reports are required by an assigned HPU instructor. Internships are defined as training and can be offered in all majors.  
Prerequisite: Completion of all upper-division courses in the major (PH 3001, PH 3020, PH 3030, PH 3040, and PH 4010).

PH 4000 (3)  
Environmental Health  
Environmental health is a branch of public health that is concerned with how the environment, both natural and human-made, influences human disease, disability, and premature death. The course focuses primarily on the prevention and control of diseases and disabilities, and how the environment may be modified to reduce risk. Topics such as sustainability, infectious agents, product and food safety, pollution, injuries, waste management, and occupational health will be examined. Service-learning activities are an integral part of this course.  
Prerequisite: PH 1000, Any WC&IL

PH 4010 (3)  
Health Policy Analysis  
An overview of the health care system in the United States and its challenges and instruction in the core elements of health policy and analysis including problem definition; background; political, economic, and social landscape; development of policy options; and recommendations. Emphasis will be on major health policy institutions and important issues that intersect these institutions. The key components include the major insurers, Medicare, Medicaid, Congress, and state legislatures. In addition, special focus will be given to the uninsured, quality of care and long term care.

PH 4020 (3)  
Social Gerontology  
Examines how health-related theories and social determinants of health are applied in gerontology to explain the health status of middle aged and older adults. US health care system, epidemiological factors, and life course perspective model will be examined.  
Prerequisite(s): PH 3070.

PH 4030 (3)  
Practicum II  
This is the second of three required practicum courses. A minimum of 200 hours (3 credits) of nonpaid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. This course is the clinical component for PH 4010 and PH 4600. Comprehensive written reports are required by an assigned HPU instructor. Prerequisite: PH 3080.

PH 4600 (3)  
Grant Writing in the Health Professions  
This course covers the foundations for grant writing in the health professions, and covers assessment, planning, implementation, and evaluation of the grant writing process. It also examines skill development in matching community/school need with grant-funding sources.  
Prerequisite: PH 1000.

PH 4910 (3)  
Practicum III  
This is the third of three required practicum courses designed for students to apply theory and master skills necessary for entry-level positions in health education and health promotion. A minimum of 200 hours (3 credits) of nonpaid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Students will focus on the last three Areas of the Certified Health Education Specialist Responsibilities and Competencies (Administer and Manage Health Education; Serve as a Health Education Resource Person; Communicate and Advocate for Health and Health Education). Clinical Component for PH 3030, PH 3040, PH 4010, PH 4600.  
Prerequisite: PH 3040  
Co-requisite: PH 4920.
PH 4920 (3)
Public Health Capstone Seminar
This capstone course for Public Health majors is designed to provide a framework for students to integrate health related topics and issues into a culminating experience. Students will analyze and reflect on individual and sociocultural health issues, and problems involving the promotion and maintenance of psychological, social, and physical states of health and well-being based on relevant physical and social sciences, skills and knowledge of health education as they apply to diverse and vulnerable populations. Critical thinking, project planning and management, communication and analytic skills are integrated. Capstone course.
Prerequisite: PH 4030

PH 6990 (2)
Nonpaid Internship
A minimum of 150 hours of nonpaid work experience in a pre-professional, managerial, supervisory, or technical setting in a career related area under supervised conditions. Comprehensive written reports are required by an assigned HPU instructor. Internships are defined as training and can be offered in all majors. Prerequisite: MGMT 6000, 6445; MKTG 6445; FIN 6445; and in the last semester of certificate program. Graduate standing. Requisite: MGMT 6930.

PHIL – Philosophy

PHIL 1000 (3)
Philosophies of Hawaii and the Pacific
An introductory study of the intellectual traditions of civilizations native to the Asian-Pacific region. Primary attention is on the intellectual traditions of Polynesia, China, and Japan. These are encountered through translated works, oral traditions, secondary sources, and field experiences. Topics include critical understandings of personal and communal identity, value, spirituality, theories of reality, and ways of knowing in Asian-Pacific traditions.

PHIL 2090 (3)
Principles of Logic
The study of the elements of logic. The course promotes critical thinking and sound decision-making by clarifying the nature and importance of logical consequences, and by providing intensive practice in recognizing examples of logical consequences. The development of logic as a discipline, and its affinities with quantitative reasoning are stressed. This course satisfies the General Education requirement Research and Epistemology B: Numeracy and Quantitative Reasoning for some majors only in the College of Humanities and Social Sciences. Contact an HPU Academic Advisor for more information. Place out option for General Education Program: Students who score 630 or above on the SAT math or 28 or above on the ACT math may place out of the Research and Epistemology B: Numeracy and Quantitative Reasoning category. Students will not receive course credit for a course in this category, though will have satisfied the Research and Epistemology B: Numeracy and Quantitative Reasoning course requirement.
Prerequisite: Any WCIL I course.

PHIL 2301 (3)
Philosophies of Yoga, Karma, and Rebirth
An introductory study of yoga practice and thought in classical Indian philosophy. Emphasis is on reading original texts (e.g., Upanishads, Bhagavad Gita, Yoga Sutra, Hatha Yoga Pradipika, and seminal tantric writings) in English translation accompanied by secondary source writings and lectures on key philosophical concepts such as karma and rebirth. To demonstrate the relation between physical practice and philosophical ideas students will be instructed, to a limited degree, in the practice of meditation and yoga postures when possible.
Prerequisite: Any WCIL I course

PHIL 2500 (3)
Introduction to Ethics
In this course you will be introduced to several ethical theories (virtue ethics, utilitarianism, and deontology), you will critically engage several topics in applied ethics (ranging from terrorism, just war, and environmental ethics, to abortion and euthanasia), and you will give consideration to the nature of moral language.
Prerequisite: Any WCIL I course.

PHIL 3200 (3)
History of Western Philosophy
An examination of the development of philosophical thought in the Western world from ancient Greece and Rome, through Medieval and Renaissance Europe. The modern period of Renaissance Europe, the Rationalists, Empiricists, Kant, Hegel, and other nineteenth century thinkers are also examined.
Prerequisite: Any WCIL II course.

PHIL 3260 (3)
Exploring Film
An exploration of film: its power, potential, and limits as a medium of philosophic thought, as a means to moral and social insight, and as a tool in international understanding.
Prerequisite: Any WCIL II course.

PHIL 3300 (3)
History of Asian Philosophies
The study of major developments of philosophical thought in India, China, and Japan including Hinduism, Confucianism, Taoism, and Zen. Where possible, emphasis is on reading original texts in English translation.
Prerequisite: Any WCIL II course.

PHIL 3501 (3)
Philosophy of Art and Aesthetics
The study of the traditional and contemporary issues in the philosophy of art: definition of art, truth in art, art and emotion and interpretation, and evaluation of works of art in literature, music, painting, and film.
Prerequisite: Any WCIL II course.

PHIL 3651 (3)
Environmental Ethics
An examination of ethical issues in the resolution of conflicts between individual and societal needs and wants and environmental well-being.
Prerequisite: Any WCIL II course. PHIL 3721 (3)
Philosophy in Contemporary Literature
A consideration of literature as a means of expressing philosophic ideas: questions, answers, and speculations about the nature of reality and meaning of life. Short and long fiction are featured, but other literary genres are covered as well.
Prerequisite: Any WCIL II course
PHIL 3731 Philosophy of Social Sciences
An examination of the key working assumptions held by social scientists about: one, the kinds of factors that influence human behavior; two, the extent to which human behavior can be studied scientifically; and three, the alternative approaches to attaining a scientific knowledge of human behavior patterns.
Prerequisite: Any WCIL II course.

PHIL 3741 Philosophy of Law
An introduction to legal studies examining three questions: how laws differ from other social norms; what important needs of the individual and society get satisfied through the development of a legal system; and how the most influential legal systems have differed with respect to suppositions about the rights of society and the individual and the means of protecting such rights.
Prerequisite: Any WCIL II course.

PHIL 4500 Global Justice
This course will focus on concepts, dilemmas, and ideals which give rise to perplexities regarding social justice. Topics include: conflicts between nationalism and cosmopolitanism, human rights and the dangers of interventionism, global poverty and considerations of distributive justice, women and global justice, and international environmental justice.
Prerequisite: Any WCIL II course.

PHIL 4501 Rethinking Social Values
A consideration of important shifts in attitude about the role, the rights, the obligations, and the goals of both the individual and the community (national as well as global) in the first quarter of the 21st century. Particular attention is given to issues such as abortion, euthanasia, the death penalty, global justice, animal rights, and the environment.
Capstone course.
Prerequisite: Any WCIL II course.

PHIL 4721 Philosophy of Education
A consideration of important shifts in attitude about the role, the rights, the obligations, and the goals of both the individual and the community in the latter quarter of the twentieth century. Particular attention is given to attitudes about family structure, the environment, war, individual liberties, work, aging, and the pursuit of happiness.
Prerequisite: Any WCIL II course.

PHIL 4997 Directed Readings in Philosophy
Directed individualized reading.
Prerequisite: Any WCIL II course

PHIL 6011 Seminar: World Philosophies
This course is concerned with those philosophers and schools of philosophy significantly influencing the conceptual orientations, values, and ideals foundational to Eastern and Western Cultures respectively.
Prerequisite: Graduate standing.

PHIL 6600 Seminar: Professional Ethics and the Military
This course is concerned with the ethics of warfare and professional conduct. Attention will be paid to ethical theory, the tradition of military virtues, and the moral imperatives that distinguish the profession of arms. Topics may include legal and illegal orders, just war, and the treatment of noncombatants.
Prerequisite: Graduate standing.

PHIL 6611 Seminar: Political Philosophy
A seminar that focuses, from Plato to Rawls, on major political philosophers throughout history while emphasizing more recent schools of political thought: liberalism, anarchism, libertarianism, and socialism. Attention will be paid to key concepts of justice, rights, and state of nature theories.
Prerequisite: Graduate standing.

PHYS – Physics

PHYS 1000 Physical Science
An introductory survey of the major areas of the physical sciences designed to equip students with information that will enable them to make rational, informed decisions about relevant scientific issues. Includes topics in chemistry, physics, geology, and astronomy.
Prerequisite: MATH 1105 or higher.

PHYS 1020 Astronomy
A study of the planets, stars, galaxies and their origins. Students will also learn how telescopes, stellar spectra and other methods of astronomical observation are used in research. Topics include the planets and their moons, the sun, galaxies, black holes, pulsars, and the life history of a star. No laboratory.

PHYS 1030 Introductory Physics
A qualitative and quantitative exploration of the major ideas of physics with a discussion of appropriate technological applications for students who need to be scientifically literate in physics but who are not planning careers in science or technology.
Prerequisite: MATH 1130 or higher.

PHYS 2030 College Physics I
The first semester of an algebra-based study of mechanics, thermodynamics, and wave phenomena with an emphasis on problem solving.
Prerequisite: MATH 1140, 1150 or higher. Corequisite: PHYS 2031.

PHYS 2031 College Physics I Laboratory
Lab component of PHYS 2030.
Corequisite: PHYS 2030.

**HYS 2032**  
College Physics II  
A continuation of PHYS 2030. Includes electricity and magnetism, optics, and topics in modern physics.  
Prerequisite: PHYS 2030. (* must have a grade of C or higher).  

**HYS 2033**  
College Physics II Laboratory  
Laboratory component of PHYS 2032.  
Prerequisite: A grade of C or better in PHYS 2031; PHYS 2032 or concurrent.  

**HYS 2050**  
General Physics I  
The first semester of a rigorous, calculus-based study of mechanics, thermodynamics, and wave phenomena with an emphasis on problem solving.  
Prerequisite: MATH 2214 or higher except MATH 2326/3301. Corequisite: PHYS 2051.  

**HYS 2051**  
General Physics I Laboratory  
Laboratory component of PHYS 2050.  
Prerequisite: PHYS 2050 or concurrent. Corequisite: PHYS 2050.  

**HYS 2052**  
General Physics II  
This course is a continuation of PHYS 2050 covering electricity and magnetism, optics, and topics in modern physics.  
Prerequisite: A grade of C or better in PHYS 2050 and MATH 2215.  

**HYS 2053**  
General Physics II Laboratory  
Laboratory component of PHYS 2052.  
Prerequisite: A grade of C or better in PHYS 2051; PHYS 2052 or concurrent.  

**HYS 2054**  
General Physics III Modern Physics  
This course is a rigorous, calculus-based study of modern physics. Topics include relativity, wave nature of particles, quantum mechanics, atomic structure, molecules and condensed matter, nuclear physics, particle physics, and cosmology.  
Prerequisite: MATH 2251 and PHYS 2052.  

**HYS 4950**  
Physics Practicum  
(1 to 3)  

**PMED – Pre-Medical Studies**  

**PMED 3900**  
Premedical Studies Seminar  
Seminar for students in health-related fields.  
Prerequisite: CHEM 2052.  

**PMED 3950**  
Pre-Medical Studies Practicum  
Students apply and integrate classroom theory in a research situation under close faculty supervision.  

**PMED 3990**  
Non-Paid Internship  
(1 to 3)  

**PSCI 1400**  
American Politics  
An analysis of the American political system. Topics include the central theme of democracy in American politics as well as structural factors including the Constitution, our federal system, media, public opinion, interest groups, and social movements. Additional topics deal with how federal institutions such as the Congress, the Presidency, the Bureaucracy, and the Supreme Court work. The course looks at federal policy in civil rights and liberties, the economy, social welfare, foreign policy, and national defense.  

**PSCI 2000**  
Introduction to Politics  
This course is designed to help the student better understand the political world. It surveys the central analytical concepts of political science that help explain the realities of the political world in the early 21st century. The level of analysis ranges from the individual’s political beliefs and actions to the political orientations of groups and states, as well as the dynamics of the international political system.  

**PSCI 2500**  
World Politics  
A course that provides a survey of the trends and major issues confronting the world today in the early 21st century. It examines trends such as the rise of nationalism, the revival of religion as a political factor, and economic changes like regionalism within the emerging global economy. Contemporary issues of conflict and cooperation such as terrorism, pollution, human rights, global cultural integration and trade are examined.  
Prerequisite: Any WCIL I course.  

**PSCI 3010**  
History of Political Thought  
A survey of contemporary political thought to include philosophic and popularized treatments of communism, anarchism, and democratic theory (e.g., conservatism and liberalism). The relationship between political theory and both political institutions and political behavior is emphasized.  
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 2000.  

**PSCI 3000**  
History of Political Socialization  
An analysis of the institutions that socialize the individual into the political system. The course focuses on political culture, political participation, attitudes and their behavioral roots, and ramifications for the political system.  
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.  

**PSCI 3200**  
Public Administration  
A general introduction to the administration of and in the public bureaucracy. Topics include: theories of administrative organization; principles and methods of administrative management; executive leadership; interpersonal and intergroup relationships; levels of decision-making; public personnel management; public finance; ethics and responsibilities.  
Prerequisite: Any lower division social science course plus any WCIL II course.  

415
PSCI 3250 (3)
Public Policymaking
Politics begins with ideas, complaints, and demands. How does an idea become a law? What is the process? What are the strategies for trying to forward one’s concerns? These matters are the focus of this course.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

PSCI 3401 (3)
Issues in American Politics
A course that provides students with immediate understanding and analysis of current political issues, trends, dilemmas, processes, and problems. Students read a variety of approaches to the issues that are the focus of the course, and they become conversant with terminology and philosophies that inform the solutions to topics in American politics.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

PSCI 3411 (3)
The United States Presidency
A course that focuses on the institution of the presidency in both historical and contemporary political context. Students become familiar with political behavior as well as presidential decision-making. The role of the President is examined from several perspectives that include: Commander-in-Chief, Head of State, Chief of State, Chief Legislator, Voice of the People, Manager of Prosperity. In addition, the presidency is studied in relationship to the Congress. Students also consider what the dynamics are among the White House, the Capitol, and the executive bureaucracy.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

PSCI 3412 (3)
American Foreign Policy
A survey of the variety of forces that shape foreign policy for the United States. It highlights major policy problems on the agenda and addresses questions of grand strategy, regional and bilateral relations, and the ways in which domestic forces affect the content of American foreign policy. The course also examines the key institutions and actors involved in foreign policy making, a wide range of recent foreign policy decisions, and the economic and military issues confronting the United States in the early 21st century.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

PSCI 3413 (3)
Constitutional Law
This course is a survey of American constitutional law, as it has evolved over two hundred years of our nation’s history, with an emphasis on that law’s profound impact on American politics. As such it focuses primarily on the United States Supreme Court, which is the ultimate interpreter of the Constitution. This course also explores the relationship between the judicial branch of government and the other two branches.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

PSCI 3415 (3)
State and Local Government
A survey of state and local government and politics. The course includes units on: constitutions and charters; executives, legislatures, and judiciary; parties and pressure groups; elections; styles of local and state politics; urban problems and the response of state and local government thereto; and the dynamics of federalism.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 2000.

PSCI 3416 (3)
Elections in Hawai‘i
The study of the electoral process in general, particularly at the state and local levels; and analysis of past and current political races in Hawai‘i. Candidates are invited to be guest speakers. This course is given only in election years.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

PSCI 3430 (3)
America: Images From Abroad
A course that looks at and evaluates other cultures’ views of America from various perspectives. The angles of vision include: American government, popular culture, economic system, social problems, and social movements. Students read critiques and comments from other perspectives including Asian, Latin American, and European on American culture and politics.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

PSCI 3500 (3)
Comparative Politics
The course explores how different political systems are formed, maintained, and then change. It examines politics in democratic, democratizing, and authoritarian nations, and highlights issues such as governmental systems (parliamentary and presidential systems), types of electoral systems, unitary vs. federal states, political economy, social movements, and political change. It focuses on a broad political analysis of several countries in such regions as Asia, Europe and the Americas.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3510 (3)
Political Development
An analysis of the political development of emerging and recently emerged nations of the world within the context of international politics and economics. The idea of political development will be explored comparatively in terms of basic political institutions, attitudes, behaviors, aspirations, ideologies, and economic realities. This course may focus on a particular country to illustrate political development in a more narrow case study.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3520 (3)
Politics and Government in Asia
This course provides a broad overview of the different governmental structures and organizations, as well as history and political cultures, of a range of states in Asia, including (but not limited to) Japan, the Koreas, China, the countries of structure and economic development, party systems, transitions to democracy, social movements, contrasting conceptions of human rights, and integrating minority groups.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3525 (3)
Islam and Politics
This course introduces students to a variety of political movements that purport to be based on an interpretation of Islam. These interpretations, the movements' ideologies, objectives and strategies will be compared in order to artic
Precipitate the range of political movements organized under the banner of "Islam."
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3540 (3)
The Politics of Terrorism
This course will examine the phenomenon of terrorism from various perspectives: historical, philosophical, theoretical, cultural and psychological. Each student will write an extensive research paper of a terrorist organization.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3550 (3)
Women and Politics
This course examines women in various countries around the world in respect to their access to power and decision-making. The course is predicated upon the history of women in the U.S. political system. Comparisons are made between and among women in various religious and political cultures.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3560 (3)
The Politics of Culture and Race
This course will focus on the concept of Race as it functions and is experienced in Latin America, North America, South Africa, the Pacific, and East Asia. We will investigate the ways in which race serves to express, negotiate, and challenge power relations in the political, economic, and social spheres.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3580 (3)
Comparative Political Economy
An exploration of the comparative political economy of newly industrializing economies (NIEs) in Asia, the Americas, and East-Central Europe. Topics include the effects on governments and people in NIEs of the new global economy, the emergence of regional trading blocs, and a range of economic policy changes and political issues.
Prerequisite: Any lower division social science course plus any WCIL II course.

PSCI 3610 (3)
Politics in Literature
A consideration of various Asian, European, and American writers whose works have attempted to create political consciousness in the reader. A key theme of the course is the power of literature to move individuals, groups, and societies. The political novel is featured, but other literary genres are covered as well.
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000.

PSCI 3620 (3)
Politics in Film
An interpretive examination of various Asian, European, and American films, with a view to understanding how the director, as a political actor, sends his message. The course intends to demonstrate the power of film as a political medium, and to consider various major political themes expressed via film.
Prerequisite: PSCI 1400 or 2000; Any WCIL II course.

PSCI 3650

Intelligence Studies
This course gives students grounding in the academic field of intelligence studies, including both the intelligence community and the uses of intelligence. It will first cover the historical development of the modern intelligence community. Then it will review major issues and types of intelligence with historical case studies. Finally, contemporary debates in intelligence reform and the Global War on Terrorism (GWOT) will be examined in detail.
Prerequisite: PSCI 1400, 2000, or 2500; Any WCIL II course.

PSCI 3950 (1 to 15)
Political Science Practicum
Repeatable for a total of 9 credits.

PSCI 3990 (1 to 3)
Nonpaid Internship
See Internship Section.

PSCI 3991 (1 to 3)
Paid Internship
See Internship Section.

PSCI 4900 (3 to 6)
Senior Seminar
A capstone course for International Relations and Political Science majors that includes an in-depth survey of the major methodologies and theories in the fields of American, Comparative, and International Relations. Students will be responsible for leading a discussion seminar and producing a major research paper. Attention will also be given to career and graduate school planning beyond graduation.
Capstone course.
Prerequisite: Senior standing.

PSCI 6151 (3)
Global Governance
This course examines global governance in an increasingly interdependent world. This includes international or transnational structures such as formal international intergovernmental organizations (UN, WHO, WTO, APEC) and international nongovernmental organizations (Oxfam, Doctors Without Borders, Human Rights Watch), international rules or laws, norms or “soft law,” and international regimes in such areas as peacekeeping, disaster management, trade, social, and humanitarian issues.
Prerequisite: Graduate standing

PSCI 6300 (3)
Indian Foreign and Security Policy
In this course, students explore the foreign and security issues dealing with the rise of India in both Asia and the wider world. The course will cover India from independence to the present, with an emphasis on the post-Cold War period. Equal attention will be given to both internal politics and security and external foreign and security issues. Potential topics will include the structure of the important actors (the Prime Minister and Government, the bureaucracy, the military, etc.), internal violence and revolutionary movements, Indo-Pakistani security issues, Sino-Indian relations, India’s relationship with the rest of the Indian Ocean region, the Indo-US relationship, economic and energy issues, and other related topics.
Prerequisite: None

PSCI 6400 (3)
Chinese Foreign Policy
An overview of the foreign policy of the People’s Republic of China (PRC) since 1949, emphasizing the post-Cold War period, and its role as a regional power in Asia. The PRC-US relationship will also be explored, with reference to their shared and conflicting interests in Asia.

Prerequisite: Graduate standing.

PSCI 6451 (3)
Seminar: The Military in Latin American Politics
An examination of the role of the military and the experience of military governments in Latin American politics. It emphasizes both a historical perspective and an analysis of current trends in civil-military relations, guerrilla insurgencies, and U.S.-Latin American relations. Special emphasis is placed on recent transitions from authoritarian rule in the Americas and issues of rule of law, human rights, and governance.

Prerequisite: Graduate standing.

PSCI 6601 (3)
Seminar: Diplomacy and International Relations
A graduate-level seminar that highlights the changing nature of international relations in a new era of Globalization and Terrorism. The course introduces students to the “classical” study of international relations using the opposing paradigms of modern IR theory: realism and liberalism. It looks at specific theoretical issues (the role of institutions, globalization, terrorism, etc.) through the lens of regions and specific countries. Students explore through research and their own presentations/participation a contemporary conflict.

Prerequisite: Graduate standing.

PSCI 6605 (3)
Seminar: Islam and Politics
This course introduces students to a variety of political movements that purport to be based on an interpretation of Islam. These interpretations, as well as the movements, ideologies, objectives and strategies will be compared in order to appreciate the range of political movements organized under the banner of Islam.

Prerequisite: Graduate standing.

PSCI 6610 (3)
Seminar: Politics of Developing Nations
A survey of political, social, and economic change in less developed countries and the relationship among elements of change. The course provides a critical overview of dominant theories of development, highlighting international and internal forces affecting less-developed countries, and North-South relations in the post-Cold War world.

Prerequisite: Graduate standing.

PSCI 6620 (3)
Peacemaking and Conflict Management
A graduate-level course that examines approaches to preventing and managing international conflict, including preventative diplomacy, negotiation, third-party resolution, track-two diplomacy, and evolving collective security arrangements. It analyzes the institutions, both offi and nongovernmental, that engage in peacemaking, and provides detailed case studies of conflict management and dispute resolution.

Prerequisite: Graduate standing.

PSCI 6630 (3)
National and International Security
This course explores how conceptions of national security have changed from the Cold War to the Global War on Terror, and how institutions of American government have adapted to these new conceptions. Theoretical discussion will be linked to such practical concerns as airpower, intelligence reform, homeland security, and reform of the defense establishment.

Prerequisite: Graduate standing.

PSCI 6650 (3)
Seminar: Foreign Intelligence
The course is a graduate level introduction to U.S. intelligence, its practice, effectiveness, and rationale. It explores the relationship between intelligence and U.S. national security, both during and after the Cold War. The course will address such issues as intelligence analysis, organization and oversight, as well as the concerns and perspectives of producers and consumers.

Prerequisite: PSCI 6601. Graduate standing.

PSCI 6660 (3)
Seminar: Resistance and Rebellion
An analysis of various patterns of resistance and rebellion in developing countries. Using a multidisciplinary approach, the course places them within the political, social, economic, and cultural context. Topics may include indigenous resistance against various aspects of colonial rule; resistance and revolution in the twentieth century; sources of rebellion; and efforts to incorporate guerrilla groups into the political system.

Prerequisite: Graduate standing.

PSCI 6661 (3)
Seminar: The Politics of Terrorism
Clausewitz argued that war was “an extension of politics by violent means.” If we substitute terrorism for war we confront one of the major challenges facing the world today. This course explores the historical context, the theoretical origins, and “political” acts of terrorism from their origin until the present.

Prerequisite: Graduate standing.

PSCI 6670 (3)
Seminar: Democratization and Human Rights
A course that introduces students to the development of universal human rights norms in the international system. The seminar examines contemporary debates concerning the universal implementation of human rights, efforts to implement these at the national, regional, and international levels, and the links between human rights and democratization.

Prerequisite: Graduate standing.

PSCI 6671 (3)
Seminar: Transitions to Democracy
An examination of the recent transitions to democracy (successful or still in process) in European, Latin American, and Asian countries. The first part of the course considers a number of theoretical questions, among them the nature and weaknesses of authoritarian regimes as well as the general causes of their disintegration. The second part focuses on the processes of transition in Eastern and Southern Europe, Latin America, and Asia.

Prerequisite: Graduate standing.

PSCI 6680 (3)
Seminar: International Negotiating
The theory and practice of negotiating in the world arena. The emphasis is on negotiations with foreign governments. With the end of the Cold War, multilateral negotiations have acquired primary importance and provide additional complications. Students select a specific current or prospective
negotiation, analyze the important elements and how they may appear to the parties, suggest an effective approach, and speculate on the possible results.

**Prerequisite:** Graduate standing.

**PSY 6990**
**Nonpaid Internship**
See Internship Section.

**PSY 6991**
**Paid Internship**
See Internship Section.

**PSY 6997**
**Special Topics in International Relations**
This is a special topics seminar in political science. Course content will vary as set forth in an approved syllabus. Course may be repeatable as contents change (up to 6 credits).

**PSY – Psychology**

**PSY 1000**
**Introduction to Psychology**
An introductory course in psychology, covering the major processes underlying human behavior, cognition, and emotion. Specific units covered include: consciousness; sensation and perception; thought and language; human development; personality; social psychology; abnormal psychology; and the realization of human potential.

**PSY 2100**
**Statistics in Psychology**
Provides skills necessary for data analysis in preparation for research methods course, and prepares students to analyze and interpret social science research findings. Students study descriptive and inferential statistics and parametric and nonparametric methods. Includes selection of proper statistical measures and techniques, and use of popular computerized statistical packages.

**Prerequisite:** A grade of C- or higher in any WCIL II course; PSY 1000; MATH 1123, 1115, or 1130.

**PSY 2200**
**Research Methods in Psychology**
Familiarizes students with principal research approaches, including descriptive, correlational, and experimental techniques and the strengths and limitations of each methodology. Includes hands-on experience in the formulation of proper research design, data collection and analysis, and professional communication of results and conclusions.

**Prerequisite:** PSY 2100.

**PSY 2220**
**Social Psychology**

**PSY 3100**
**Learning and Cognitive Processes**
A survey of the psychology processes in learning and cognition. This includes coverage of perception, attention, associative conditioning and other forms of learning, memory, language, creativity, reasoning, problem solving, and decision making. Students perform experiments to understand the methods of inferring these processes.

**Prerequisite:** PSY 1000, 2100, and PSY 2200.

**PSY 3111**
**Human Development II**
A continuation of the examination of the emotional, mental, physical, and social development of individuals from adulthood to death. The process of human development is examined along with contemporary research focusing on human abilities and potential at different age levels.

**Prerequisite:** PSY 1000; Any WCIL II course.

**PSY 3120**
**Group Dynamics in Organizations**
An introduction to theories of group dynamics and to current practices of modern management that utilize effective group processes in performing personnel management functions.

**Prerequisite:** BUS 1000, PSY 1000, SOC 1000, 2000, or 2100.

**PSY 3121**
**Applications of Psychology to Management**
An examination of the use of psychological theory for understanding and managing people at work. Major topics include: identifying individual strengths and weaknesses; assigning work tasks; communicating effectively; and reinforcing/rewarding behavior in a way that is meaningful to the worker. Problem solving and team building are emphasized.

**Prerequisite:** BUS 1000 or PSY 1000.

**PSY 3122**
**Industrial/Organizational Psychology**
A survey of theory and research in the field of industrial/organizational psychology. Topics include: personnel psychology (recruitment, selection, training, and performance appraisal); leadership; team building and dynamics; psychological dimensions of organizational management; and human performance psychology (job design and specification).

**Prerequisite:** BUS 1000 or PSY 1000.

**PSY 3133**
**Learning and Behavior**
An examination of the behaviorist approach to understanding and influencing learning. Included are reviews of historical stimulus-response models and more current cognition-based models. Ethical questions associated with the goal of systematically studying and applying behavior influence principles are addressed, including questions of whether behaviorists seek to stifle “free will,” and who decides what behaviors should be reinforced.

**Prerequisite:** A grade of C- or higher in any WCIL II course; PSY 1000.

**PSY 3134**
**Educational Psychology**
An introduction to the psychological foundations of education. The course includes units on motivation, learning, individual differences, and classroom management. It surveys major theorists in the field, and confronts several contemporary controversies dealing with learning theory. The course is intended both for the would-be or practicing teacher and the psychology student.

**Prerequisite:** A grade of C- or higher in any WCIL II course.
PSY 3135 (3) Cognitive Psychology
A study of the processes by which sensory input is transformed, reduced, elaborated, stored, recovered, and used. Major topics include: pattern recognition, attention, memory, visual language, language, problem-solving, and decision-making. This course systematically describes these topics, explains their theoretical foundations, and reviews the empirical support for each. Practical applications to improving memory, thinking about people, and designing computer interfaces are also covered.
Prerequisite: A grade of C- or higher in any WCIL II course; PSY 1000.

PSY 3140 (3) Psychology of Substance Abuse
A liberal arts survey of all aspects of drug abuse including pharmacology, physiology, history, culture, philosophy, and treatment.
Prerequisite: PSY 1000.

PSY 3150 (3) Psychology of Tourism and Travel
A course designed to acquaint the travel industry student with the consumer-traveler. Understanding the traveler in psychological instead of demographic terms provides new insights into travel behavior for the future professional. The course focuses on why an individual traveler behaves in a particular manner. It differs markedly from the tourism literature that focuses on descriptions of the mass behavior rather than explanations of individual behavior.
Prerequisite: HTM 1010 or PSY 1000

PSY 3155 (3) Sports Psychology
A systematic discussion and practice of the major mental skills required for oHTMAl performance in physical sports. These include the relaxation response, directing attentional focus, becoming proficient in mental imaging, promoting positive thoughts, awareness of pain and pain control, and the effortless regulation of movement.
Prerequisite: PSY 1000; Any WCIL II course.

PSY 3160 (3) Psychology of Music
This course introduces students to the psychology of music. A survey of topics in this field will include development of musical preferences, emotional responses to music, perception of musical elements, cultural values in music, and music therapy.
Prerequisite: PSY 1000 and Any WCIL II course.

PSY 3170 (3) Psychology of Emotion
A survey of theories, models and research on the psychological aspects of human emotion. Will present social, cognitive, behavioral, and biological perspectives. Will explore how current understandings of human emotions and motivations apply to areas such as achievement, health, relationships, addictions, and creativity.
Prerequisite: PSY 1000; MATH 1125 or PSY 2100; PSY 2200*, SOC 2100, or 3100. (* may be taken concurrently).
Prerequisite: A grade of C- or higher in any WCIL II course; PSY 1000.

PSY 3200 (3) Biopsychology
Introduces the biological bases of human and nonhuman behavior, with emphasis on underlying physiological mechanisms, and on the development, evolution, and function of behavior. Topics include neuroanatomy, neurochemical communication, sensation and perception, learning and memory, motivation, drugs, emotion, movement, sleep, consummatory behavior, reproduction, and abnormal behavior.
Prerequisite: PSY 1000, 2100, and 2200.

PSY 3211 (3) Adolescent Psychology
An introduction to the field of adolescent psychology that covers both theory and research on emotional growth, family and peer relations, cognitive development, and other aspects of the maturation process. Theories examined in this course derive from the works of Anna Freud, Piaget, Kohlberg, Erikson, Sullivan, and others.
Prerequisite: A grade of C- or higher in any WCIL II course; PSY 1000.

PSY 3235 (3) Cross-Cultural Psychology
A study of cross-cultural differences in perception, motivation, expression, verbal and nonverbal behavior, and values and meaning systems, and the implications of these differences for cross-cultural interaction and understanding.
Prerequisite: PSY 1000; Any WCIL II course.

PSY 3240 (3) Client Counseling and Interviewing
Interviewing and counseling methods for work with clients on a one-to-one basis. The focus is on basic skills that can be used to assess a wide range of situations and engage clients in problem solving. Also covered are factors relating to the human services worker-client relationship, including ethical issues associated with using relationship for therapeutic purposes.

PSY 3245 Group Counseling
Issues and methods in the use of small groups to promote personal growth, therapeutic interaction, and social change. Group formation, maintenance, and termination; group dynamics; and roles/skills appropriate to group leadership and membership.
Prerequisite: PSY 1000; PSY 2200, SOC 2100, or 3100.

PSY 3300 (3) Social Psychology
An exploration of major theoretical paradigms as they are used to understand topics in social psychology, including social perception, attribution of causality, the self, emotions, attraction, prejudice and discrimination, attitude change, altruism, aggression, social influence, exchange and strategy, and physical well-being.
Prerequisite: PSY 1000, 2100, and 2200.

PSY 3310 (3) Forensic Psychology
This course will provide a comprehensive overview of the forensic psychological research and the practice of forensic psychology. The student will become familiar with the forensic psychological literature, forensic psychologica
l approaches and techniques in assessment and treatment, and many of the clinical/professional/ethical/legal issues surrounding the practice of forensic psychology.  
Prerequisite: PSY 1000; Any WCIL II course.

PSY 3320  
(3)  
Health Psychology  
This course introduces students to the field of health psychology. Beginning with historic ideas from the Greeks through psychosomatic medicine, current thoughts and approaches from a biopsychosocial understanding of disease and its meaning (psychological and social) will be developed, with a focus on applied issues.  
Prerequisite: PSY 1000; Any WCIL II course.

PSY 3330  
(3)  
Personal Relationships  
Introduces students to theories and research in the study of personal relationships. Will focus on the development, maintenance and functions of both friendship and in/intermarriage.  
Prerequisite: PSY 1000; PSY 2100 or MATH 1123; and PSY 2200*; SOC 2100, SOC 2300, or any three biology or chemistry courses (* may be taken concurrently).

PSY 3340  
(3)  
Human Sexuality  
Explores the biological, neurological, psychological, sociological, and historical bases of human sexuality; sexual development and reproduction; and the issues and challenges related to sexuality in a contemporary society. Maintaining objectivity within the context of personal value systems is also addressed.  
Prerequisite: PSY 1000 and WRI 1200  
PSY 3350  
(3)  
Clinical Psychology  
An introduction to the methods, rationale, and empirical foundations of the field of clinical psychology, including historical roots, conceptual models, professional issues, current controversies, and career options. Prerequisite: PSY 1000; PSY 2100 or MATH 1123; and PSY 2200*; SOC 2100, 3100, or any three BIOL or CHEM courses (* may be taken concurrently).

PSY 3360  
(3)  
Military Psychology  
An overview of the use of psychology applied to military settings. Main topics include the history of military psychology, the military as sub-culture, clinical psychology and behavioral health in the military, and operational psychology. Special attention will be given to ethical considerations in the practice of military psychology.  
Prerequisite: PSY 1000 and Any WCIL II course.

PSY 3400  
(3)  
Lifespan Development Psychology  
Examines the physical, cognitive, emotional, and social development of individuals from birth to death. Theories and research evidence concerning factors such as heredity, early experience, parenting styles, peers, school, societal values, work, retirement, leisure, aging processes, death and bereavement will be assessed in the context of development through the lifespan.  
Prerequisite: PSY 1000; PSY 2100 or MATH 1123; and PSY 2200 (or concurrent) or SOC 2100 or SOC 3100 or any three biology or chemistry courses.

PSY 3440  
(3)  
Psychology of Gender  
Survey of topics in psychology relevant to gender and its impact on the lives of women and men, including major psychological theories of gender-role development; gender bias and stereotypes; biological and environmental influences that determine and maintain gender differences in behavior; distinctions between sex and gender. Reviews empirical findings that support or fail to support common beliefs about gender. Students will learn to understand the complexity and diversity of gendered experiences in the social settings of their own and other cultures.  
Prerequisite: PSY 1000; Any WCIL II course.

PSY 3500  
(3)  
Tests and Measurements in Psychology  
Covers the fundamentals of measurement theory and practice upon which all psychological testing rests. Major topics include: types of measurement, correlation, reliability, validity, test development and norms. Major individual and group tests of intelligence, personality, aptitude, and interests are examined and evaluated in terms of these concepts.  
Prerequisite: MATH 1123, 3323, PSY 2100, or SOC 3200; PSY 2200, SOC 2100, or 3100.

PSY 3550  
(3)  
Advanced Statistics in Psychology  
A brief, pragmatic survey of advanced statistical concepts for non-mathematicians. Topics will include fundamental concepts/assumptions and use of statistical software for computing analysis of variance for factorial and repeated-measures designs, multivariate analysis of variance and covariance, partial correlation, multiple regression, and discriminant analysis. Examples from psychology.  
Prerequisite: MATH 1123, 3323, PSY 2100, or SOC 3200; PSY 2200, SOC 2100, or 3100.

PSY 3600  
(3)  
Abnormal Psychology  
A study of the etiology, development, manifestations, and treatment of psychological disorders. Psychodynamic, behavioral, humanistic, systems, and cross-cultural theoretical perspectives are used to understand stress and anxiety-based disorders, psychoses, social and personality disorders, and organic and developmental disorders. Normality/abnormality are treated as concepts, as are legal and ethical issues related to deviant behavior.  
Prerequisite: PSY 1000; PSY 2100 or MATH 1123; and PSY 2200 (or concurrent) or SOC 2100 or SOC 3100 or any three biology or chemistry courses.

PSY 3700  
(3)  
Personality  
A study of the nature and development of human personality from different theoretical perspectives. Foci include: the conceptualization and meaning of "personality"; modes of assessing personality characteristics; and the relationship of personality to culture and society. Cases, contemporary research, and topics of current interest in personality are featured.  
Prerequisite: PSY 1000, 2100, and 2200.
PSY 3750
Well-Being and Positive Psychology
Explores factors that make life worth living and the human strengths that enable individuals to confront challenges, appreciate others, and regard daily experiences as meaningful. Provides a distinct contrast to the negative focus of the disease-model approach that traditionally dominated much of the discipline. The focus will be on current issues in positive psychology, including definitions of happiness and the nature of the good life, subjective well-being, human strengths and virtues, finding meaning, emotions, flow, and opHTMism.
Prerequisite: PSY 1000, 2100 and 2200. Determination and authenticity; integration, choice and responsibility; the dynamics of feelings; defensive processes; dreams; meditation; changing unwanted behavior; and living-in-relationship.
Prerequisite: Any WCIL II course.

PSY 4240
The Psychology of Dreams
A study of the theoretical perspectives and practical skills in dream recall, interpretation, and understanding. Topics include: sleeping and dreaming research; history of dream interpretation; Freudian, Jungian, existential, and functional explanations; and lucid dreaming. Students keep a dream journal and work with their own dreams.
Prerequisite: PSY 3110, 3300, 3400, 3600, 4132, or 4340.

PSY 4340
Psychotherapies
An overview and critical analysis of contemporary psychotherapies and of psychotherapy as an institution in society. Therapies studied may include: existential, behavior modification, psychoanalysis, transactional analysis, cognitive, gestalt, and family systems.
Prerequisite: PSY 3600 or 3700.

PSY 4900
History and Systems of Psychology
This is a capstone course for psychology majors. As an advanced discussion course for seniors majoring in Psychology or allied disciplines, this course will examine the historical progression of ideas central to psychology, their philosophical and empirical roots, and the convergence of those ideas into the various systems present today.
Capstone course.
Prerequisite: PSY 2200; any three of the following PSY courses: 3100, 3200, 3300, 3400, 3500, 3550, 3600, or 3700.

PSY 4910
Advanced Topics in Psychology
A capstone course for psychology majors. Provides an advanced, integrative review of a significant theme or topic in psychology that supplements regularly offered electives. A selected area within the discipline will be given intensive study through lectures, readings, reports, papers, and discussion. Topics may vary from semester to semester and could include aging, social cognition, psychology of religion and spirituality, family systems, psychology of stereotypes and prejudice, animal behavior, and developmental psychopathology. May be taken more than once with different topics.
Prerequisite: PSY 2200; any three of the following PSY courses: 3100, 3200, 3300, 3400, 3500, 3550, 3600, or 3700.

PSY 4925
Psychology Research Seminar
This is a capstone course for psychology majors. Students will review an area of scientific literature, as determined by Faculty each semester. Students will present a portion of the topic to the class. Concurrently, students will engage in empirical research: collecting and analyzing data, and presenting results professionally.
Prerequisite: PSY 2200; any three of the following PSY courses: 3100, 3200, 3300, 3400, 3500, 3550, 3600, or 3700.

PSY 4935
Senior Thesis
As a senior-level psychology capstone course, students will review an area of scientific literature related to psychology as determined by student interest and faculty approval. Students will write a research paper that integrates existing theory and data, and give a formal presentation. Review papers are critical evaluations of published material. Students will consider the progress of research toward clarifying a problem. They will draw on existing research literature to advance theory and will examine the development of theory to expand and refine theoretical constructs, present a new theory, or analyze existing theory.
Prerequisite: PSY 2200; any three of the following PSY courses: 3100, 3200, 3300, 3400, 3500, 3550, 3600, or 3700. Permission of the instructor.

PSY 4950
Counseling/Community Practicum
A capstone course for psychology majors that prepares students for entry-level positions in the mental health field as well as graduate school. The course is a means for enhancing, unifying, and applying the knowledge and experience acquired as a psychology major to this point. The practicum is a field and classroom course that requires placement in a community social service setting. Emphasis is placed on teaching professional standards and clinical services models; helping students develop their own professional identities; and addressing relevant clinical, legal, ethical and moral issues. Capstone course.
Prerequisite: PSY 2200; any three of the following PSY courses: 3100, 3200, 3300, 3400, 3500, 3550, 3600, or 3700; and the approval of the instructor.

PSY 4970
Research Practicum
Research experience under mentorship. Student activities involve significant responsibilities in the research process, including literature review, conceptualization of the study, design of data collection methods and instruments, data collection, data analysis, and interpretation of research results.
Prerequisite: PSY 2200.

PSY 4997
Directed Readings in Psychology
Directed individualized readings.

PSY 6000
Ethical and Professional Issues in Clinical Mental Health Counseling
Focuses on the legal, ethical and professional issues that influence the research and professional practice of clinical mental health counselors. The primary goal is to provide
students with a thorough knowledge of the ethical and legal issues related to the counseling profession so that sound ethical decisions can be made.

Prerequisite: Admission to the MA-CMHC program or permission of the program director.

PSY 6100  
Applied Statistics in Clinical and Counseling Psychology  
A review of univariate statistical techniques and a survey of multivariate techniques used in clinical and counseling psychology. These methods are essential for interpretation evaluation and application of published research in professional settings, as well as for treatment evaluation.  
Prerequisite: Admission to the MA-CMHC program or permission of the program director.

PSY 6200  
Research Methods in Clinical and Counseling Psychology  
Covers methods of empirical research particularly applicable to clinical and counseling situations primary emphasis on interpretation, evaluation and application of published research in professional settings.  
Prerequisite: PSY 6000 and 6100.

PSY 6310  
Learning, Cognition, and Behavior  
A study of processes involved in human learning and cognition. Covers areas in the fields of learning and cognitive psychology, and presents the current thinking in these disciplines. Includes: learning, perception, attention, memory, language, problem solving, reasoning, and cognitive development. Application to counseling and clinical psychology are examined across all topics.  
Prerequisite: PSY 6000. PSY 6320

Biological Bases of Behavior & Foundations of Psychopharmacology  
An examination of the biological substrates of behavior from the cellular to the systemic to the behavioral level. Includes a review of human physiological processes as these relate to biobehavioral models of normal and abnormal functioning in appetitive, motor cognition and affective systems, and introduction to psychopharmacology.  
Prerequisite: PSY 6000.

PSY 6330  
Social Psychology and Cultural Diversity  
Development of diversity awareness and knowledge including systems of power and privilege. Introduction to methods/skills for working with clients who are diverse in culture, race, ethnicity, gender, age, sexual orientation, or physical or mental ability. Focus is on helping students become capable therapists in varied environments, including becoming aware of their own beliefs, biases, and prejudices.  
Prerequisite: PSY 6200 or permission of program director.

PSY 6340  
Life Span Development for Mental Health Counselors  
Explores life span development through the lenses of social, cultural, cognitive, biological, and learning theories and research. Normal or typical developmental tasks are reviewed, as well as principles related to developmental psychopathology. Theoretical models of development including biological/physical, social, and psychological development are discussed. The course provides students with an understanding of developmental theory across the life span as it relates to client assessment, counseling, and treatment.  
Prerequisite: PSY 6200 or permission of program director

PSY 6341  
Career and Lifestyle Development  
Exploration of models and theories of career development and forces that shape career decision making throughout the lifespan. Available resources for educational and occupational assessment, procedures to enhance career exploration, planning and placement. Emphasis is on the decision-making process and issues of career counseling with special populations.  
Prerequisite: Admission to MA in Clinical Mental Health Counseling program or permission of program director.

PSY 6350  
Forensic Psychology for Counselors  
This course will provide a comprehensive overview of forensic psychological research and the practice of forensic psychology. The student will become familiar with the forensic psychological literature, forensic psychological approaches and techniques in assessment and treatment, and many of the clinical/professional/ethical/legal issues surrounding the practice of forensic psychology. The student will learn to apply forensic research to the practice of clinical mental health counseling.

PSY 6360  
Psychopathology  
This course provides an in depth, evidence-based review of a broad spectrum of psychopathological conditions as defined in the current DSM. The focus of this review includes etiology, prevalence and incidence, and symptoms, criteria for differential diagnosis, and potential treatment for each disorder.  
Prerequisite: Admission to the MA in CMHC or permission of the program director.

PSY 6450  
Child and Adolescent Development for Educators  
Provides an overview of the major concepts, principles, theories, and research related to development of children and adolescents so that teacher candidates can construct learning opportunities that are adapted to diverse learners and support individual students’ development, acquisition of knowledge, and motivation.

PSY 6500  
Psychological Assessment in Mental Health Counseling: Theory  
Basic concepts in the construction, selection, administration, scoring, and interpretation of assessment procedures commonly used in mental health counseling. This course will cover psychometric properties and proper use of these instruments, as well as factors affecting their reliability and validity. Additional focus is on synthesizing data, diagnostic interviewing, report writing skills, and ethical considerations.  
Co-requisite: PSY 6501.

PSY 6700  
Therapeutic Interventions  
Surveys major theories of counseling and psychotherapy from both clinical and research viewpoints.  
Prerequisite: PSY 6100 and 6360.
PSY 6701  (3)  
Therapeutic Interventions: Practice  
Covers major elements of empirically validated intervention strategies, case conceptualization, treatment planning and therapeutic process through lecture, discussion, demonstration, and role playing with feedback on behavioral performance. Emphasis is on an ecological perspective that focuses on viewing the person within context.  
Prerequisite: PSY 6700.

PSY 6730  (3)  
Crisis Intervention and Trauma Counseling  
Provides an overview of the psychological impact of crisis and trauma across the lifespan. Includes the history and current theories in the field, the nature of trauma (sexual abuse, combat, and natural disasters), how trauma affects individuals and systems, grief reactions, and traumatic stress. Reviews trauma-related evidence-based assessment and intervention.  
Prerequisite: PSY 6701 or permission of program director.

PSY 6740  (3)  
Assessment & Treatment of Substance Abuse & Addiction  
This course examines substance abuse as a clinical problem. The psychological and physical effects of drug use and abuse will be examined and the process of addition development explored. The role of sociocultural factors in substance abuse will be discussed. Diagnostic criteria and empirically based treatment approaches will be reviewed.  
Prerequisite: PSY 6701 or permission of graduate director.

PSY 6750  (3)  
Group Interventions: Theory & Practice  
This is a graduate course that covers the theories, approaches and techniques used in group psychological treatment.  
Prerequisite: PSY 6360 and 6700.

PSY 6760  (3)  
Assessment and Treatment of Children and Adolescents  
Prerequisite: PSY 6100 and 6200.

PSY 6970  (3)  
Research Practicum  
Advanced research experience under mentorship. Student activities involve comprehensive responsibilities in the research process, including literature review, conceptualization of the study design of data collection methods and instruments, data collection, data analysis, and interpretation of research results.  
Prerequisite: PSY 6100, 6200 and permission of instructor.

PSY 7100  (3)  
Clinical Practice and Supervision I-Community Internship  
Applied professional experience in approved community training sites. Students will provide direct clinical services to adults and/or children; participate in supervision and training sessions; and attend internship class sessions which will allow for group supervision. A capstone course.  
Prerequisite: PSY 6000, 6500, 6501, 6700; 6701 or concurrent enrollment, and permission of graduate director.  

PSY 7101  (3)  
Clinical Practice and Supervision II-Community Internship  
Applied professional experience in approved community training sites. Students will provide direct clinical services to adults and/or children; participate in supervision and training sessions; and attend internship class sessions which will allow for group supervision. A capstone course.  
Prerequisite: PSY 7100; and permission of graduate director.

PSY 7102  (3)  
Clinical Practice and Supervision III-Community Internship  
Applied professional experience in approved community training sites. Students will provide direct clinical services to adults and/or children; participate in supervision and training sessions; and attend internship class sessions which will allow for group supervision.  
Prerequisite: PSY 7100, 7101.

PSY 7200  (3)  
Master's Thesis  
The course is intended for those students who elect to complete a master’s thesis as part of their MA-CMH degree requirements. The option requires the student to investigate a topic relevant to Clinical Mental Health Counseling, develop a research question or hypothesis, and test it by conducting original research under the supervision of a faculty member.  
Prerequisite: PSY 6100, 6200.

RE - Real Estate  
RE 3000  (3)  
Principles and Practice of Real Estate  
The study of basic aspects of real estate; definition of land; real estate and real property; types of estates in land; types of ownership; types of conveyances and documents; certain Hawai’i statutes; physical and economic characteristics; agency; financing; development; investments; appraising; and management.  
Prerequisite: Any WCIL II course.

RE 3300  (3)  
Real Estate Finance  
A basic course in real estate finance, focusing on methods, processes, and caveats. Course units include: money markets, interest rates, real estate financing, case illustration demonstrating lending policies; typical problems involved in financing real property; and evaluation of income property investment alternatives.  
Prerequisite: FIN 3000.

RE 3400  (3)  
Real Estate Law  
The study of property and brokerage law, and application of these to both personal real property investments, and reagent management. Course topics include: property rights and limitations; conveyancing; brokerage operations under state law; and current topics in real estate law.  
Prerequisite: LAW 3000 and RE 3000.

<td>REL 1000</td>
<td>Introduction to World Religions</td>
<td>(3)</td>
<td>A comparative and interdisciplinary study of the world's oral and text-based religious traditions.</td>
</tr>
<tr>
<td>REL 1001</td>
<td>Islam: A Short Course</td>
<td>(1)</td>
<td>Introduction to the core principles of Islam, its different religious sects (i.e. Shia, Sunni, Sufi), cultural mores in the Middle East, and Islamic revitalization movements of the last century.</td>
</tr>
<tr>
<td>REL 2001</td>
<td>Search for Meaning</td>
<td>(3)</td>
<td>Various ideas and writings concerning the meaning of human existence both inside and outside the perspectives of specific religious and philosophical traditions. Emphasis is mainly on nineteenth and twentieth century writers. The course provides students with the opportunity to develop their own perspectives on the meaning of human existence.</td>
</tr>
<tr>
<td>REL 2151</td>
<td>The Hebrew Bible as Literature</td>
<td>(3)</td>
<td>The writings of the Hebrew scriptures within the framework of Near Eastern history and literature. The course examines themes such as God, humanity, gender, and nation as set forth in the early writings of the Judeo-Christian traditions.</td>
</tr>
<tr>
<td>REL 3000</td>
<td>Religion, Sacrifice, and Violence</td>
<td>(3)</td>
<td>Sacrifice and violence are persistent themes in the world's religious traditions and have invited scrutiny from anthropological, sociological, psychological, political, theological and other perspectives. This course will explore some classical examples of those perspectives as well as a variety of historical and literary phenomena to which they have been applied. Readings to include Freud, Girard, Burke, Marx, and Juergensmeyer, among others.</td>
</tr>
<tr>
<td>REL 3001</td>
<td>Religion and Social Change</td>
<td>(3)</td>
<td>An interdisciplinary approach to problems of social order, integrating religion, ethics, and science. The course develops the evaluative process as a primary tool in the study of social problems and examines the relevance of institutionalized religion in a world of rapid social change.</td>
</tr>
<tr>
<td>REL 3007</td>
<td>On Death and Dying</td>
<td>(3)</td>
<td>An overview of the legal, moral, medical, and pastoral attitudes surrounding death. Personal reflection, preparation, and acceptance of death as a liberating act of life are emphasized. Prerequisite: Any WCIL II Course</td>
</tr>
<tr>
<td>REL 3152</td>
<td>Understanding Early Christian Literature</td>
<td>(3)</td>
<td>Course will focus on the historical emergence of Christian doctrine as revealed by texts. Readings may address Jewish scriptures, Dead Sea scrolls, New Testament gospels, gnostic gospels, apocalyptic expectations, early Christian letters, martyr narratives, Greco-Roman mysteries, and historical writings up through the fall of the Roman empire. Prerequisite: Any WCIL II Course</td>
</tr>
<tr>
<td>REL 3200</td>
<td>Abrahamic Traditions</td>
<td>(3)</td>
<td>Judaism, Christianity and Islam are all Abrahamic religions because their originating legends derive from the figure of Abraham, father of Ishmael and Isaac in the Bible. Consequently, they are considered religious cousins. Exploring the histories of the three traditions together allows us to see and compare founding stories, themes, and historical developments and interactions among the three. Prerequisite: Any WCIL II Course</td>
</tr>
<tr>
<td>REL 3310</td>
<td>Asian Traditions</td>
<td>(3)</td>
<td>Survey of the literature, history, and cultural traditions associated with Asian religions, such as Hinduism, Jainism, Buddhism, Bo, Confucianism, Daoism, Shinto, and numerous folk traditions. Course begins in ancient India and expands into Nepal, Tibet, Sri Lanka, China, Korea, Japan, and Hawai‘i. Prerequisite: Any WCIL II Course</td>
</tr>
<tr>
<td>REL 3500</td>
<td>Indigenous Traditions</td>
<td>(3)</td>
<td>Course explores religious and mystical traditions of indigenous peoples primarily from Aboriginal Australian, Pacific island, mainland Native American, and African cultures. Readings focus on autobiographical and fictional accounts of traditional people at the crossroads between contemporary and traditional cultures. Prerequisite: Any WCIL II Course</td>
</tr>
<tr>
<td>REL 3600</td>
<td>War in World Religions</td>
<td>(3)</td>
<td>A survey of the historical link between religion and war, from antiquity to the present, from west to east. Students will pursue literature justifying war, imagining war, and condemning war from different cultures, religions, and historical periods.</td>
</tr>
<tr>
<td>REL 3700</td>
<td>Female Figures in the Bible</td>
<td>(3)</td>
<td>Course will explore female figures in stories from the first and second testaments and also in apocryphal literature associated with Judaism and Christianity extending into the early 4th century CE. Where applicable, Islamic versions of the same tales will be explored. Students will use a variety of perspectives to explore these stories, i.e. narratology anthropology, and feminist hermeneutics. Prerequisite: Any WCIL II Course</td>
</tr>
</tbody>
</table>
REL 3997
Directed Readings
Directed individualized readings.

REL 4002
Religion, Sustainability, and Globalization
Course examines the critical links between religion, sustain-
ability, and globalization. Students will be acquainted with
the impact of religious teachings on sustainability and with
the impact of globalization on religious traditions. Students
will examine how religious ideologies generate views of
ecosystems and our place in them, as well as religion’s
influence on applied ethics in a shrinking world.
Prerequisite: Any WCIL II Course and Junior or Senior
Standing

REL 4900
Seminar in Religious Studies
The seminar offers students opportunities for in depth
study of a specific topic in religious studies. Presentation
of a thesis on an aspect of the topic is required. Effective
research, analytical composition and oral communication
are expected. Capstone course.
Prerequisite: Any WCIL II course and junior or senior
standing

REL 6002
Religion, Sustainability, and Globalization
This course will address two broad but interrelated sets
of topics. The first is a comparison of traditional religious
teachings regarding our place on earth, farming, animals,
commerce, as well as cooperation and competition with
outsiders. The other set deals with the changes in these
attitudes subsequent to globalization.
Prerequisite: Graduate standing.

REL 6011
Religion in World History
An objective and non-partisan survey of the role religion has
played in the course of human events. A basic knowledge of
the principle tenets and sects of Judaism, Hinduism, Bud-
dhism, Christianity, and Islam is recommended; per-
sonal adherence to a particular religion or lifestyle is not.
Emphasis is given to the historical context of contemporary
religious concerns and conflict.
Prerequisite: Graduate standing.

SOC – Sociology

SOC 1000
Introduction to Sociology
An examination of how various social structures and pro-
cesses influence the well-being of individuals and society.
Topics include: theory and methods used to study society;
the relationship between self and society; social differences
and inequality; institutions; contemporary issues such as
popular culture and urbanization; and social change through
collective behavior and modernization.

SOC 2000
Social Problems and Policy
A survey of important social problems confronting Ameri-
cans today, their causes, and solutions. Particular attention
is directed toward understanding how and why social prob-
lems are created and the controversies surrounding them.
Prerequisite: Any introductory social science/political sci-
ence course; Any WCIL I course.

SOC 2100
Fundamentals of Research
This course will introduce students to the field of scientific
research with special emphasis on their roles as consumers
of research in their intended majors.
Prerequisite: Any WCIL II course.

SOC 2600
Peace Studies
Peace Studies provides students with an introduction to
the dynamics of conflict and peace at the personal, local,
national, and international levels. The course surveys inter-
disciplinary research that analyzes the causes of violence,
war, and peace in the contemporary world.
Prerequisite: Any WCIL II course.

SOC 3100
Methods of Inquiry
An overview of the major methods for seeking and orga-
nizing knowledge in the social sciences. Topics include
research design, ethics, selection of subjects, and presenta-
tion of results.
Prerequisite: A grade of C- or higher in any WCIL II course;
Any three social science courses.

SOC 3200
Social Statistics
Descriptive and inferential statistics for data analysis in
the social sciences. Techniques for analysis of data from
experimental and nonexperimental research include: levels
of measurement; central tendency; variability; internal esHTMation; and tests of hypotheses. Other topics covered
include: parametric and nonparametric statistics, including
t-test, correlation and regression, analysis of variance, and
chi-square.
Prerequisite: SOC 2100 or 3100.

SOC 3320
Marriage and the Family
A comprehensive view of marriage and the family in a
social context. The course employs both psychological
and sociological perspectives and deals with such topics as:
family forms, functions, interaction; impact of social
change on family and individual goals; human inHTMacy;
and successful marriage.
Prerequisite: A grade of C- or higher in any WCIL II course;
Any two social science courses.

SOC 3329
Sociology of Gender and Sexuality
This course explores the development of gender, sexuality
and sexual identities and their distinctive places in society
today. Emphasis is placed on social construction of gender
categories and gender systems, and the interplay of gender
with social institutions such as families and political/
economic systems.
Prerequisite: SOC 1000 or 2000; Any WCIL II course.

SOC 3350
Collective Behavior
A course that describes collective behavior: the role of in-
teraction among individuals in a social movement; the
phenomenon of social organization despite deviant crowd
behavior; and appropriate governmental or business
responses to acute crises or to cumulative social change
phenomena.
Prerequisite: Any WCIL II course.

SOC 3380 (3)
Cross-Cultural Relations
A course that addresses problems of residents of multiethnic societies and immigrants and sojourners in a foreign country. Topics include how characteristics of the individual, group, situation, and host society affect transcultural relations; and principles which maximize cross-cultural adjustment, work effectiveness, and successful interaction. Special focus on the immigrant experiences of ethnic groups in Hawai‘i.
Prerequisite: Any two social science courses; Any WCIL II course.

SOC 3420 (3)
Family Dynamics: Violence
Refer to NUR 3910.
Prerequisite: PSY 1000.

SOC 3440 (3)
Criminology
Refer to JADM 3050.
Prerequisite: A grade of C- or higher in any WCIL II course; SOC 1000.

SOC 3450 (3)
Drug Abuse and Justice
Refer to JADM 3520.
Prerequisite: SOC 1000, 2000, or 2100; Any WCIL II course.

SOC 3460 (3)
Crime Victims and Justice
Refer to JADM 3510.

SOC 3470 (3)
Advanced Criminological Theory
This course focuses on an in-depth study of the sociological, biological, and psychological theories of crime and criminology. The course explores how these theories result in the real-life practices of how criminals are handled in the various stages of the criminal justice system to include criminal investigation and apprehension, pre-trial and conviction, sentencing and incarceration. Specific real-life practices examined are substance abuse, street gangs, family violence, and sexual exploitation, among others.
Prerequisite: Any WCIL II course.

SOC 3510 (3)
Baseball in American Culture
American society as seen through America's national sport. Topics include demographic changes, war, race relations, gender issues, generational and labor-management relations, all as revealed in and affected by the evolution of amateur and professional baseball.
Prerequisite: Any WCIL II course.

SOC 3540 (3)
Corrections: Processes and Programs
Refer to JADM 3320.
Prerequisite: SOC 1000, 2000, or 2100; Any WCIL II course.

SOC 3560 (3)
Community Intervention
Basic skills in community intervention in a broad range of medium and large-group settings. The course emphasizes working effectively within existing community systems as well as making changes.
Prerequisite: SOC 1000, 2000, 2100, or PSY 1000; Any WCIL II course.

SOC 3570 (3)
American Social Welfare Policy
The study of society's policy response to social problems such as poverty, illness, and abuse. Special attention is given to social welfare programs.
Prerequisite: PSCI 1400 or 2000; SOC 1000, 2000, or 2100; Any WCIL II course.

SOC 3600 (3)
Sociology of Work
Cross-national comparisons of selected questions in the sociology of work and occupations. Considers macro-level issues such as the interaction between business organizations and government as well as micro-level issues such as organizational innovation and workplace structure. Analysis of selected professions.
Prerequisite: Any two courses in social science or management; Any WCIL II course.

SOC 3640 (3)
Urban Sociology
A comprehensive overview of urban sociology and urban studies. Provides an overview of the nature and growth of cities, and their effects on people's lives in the United States and internationally. The "urban revolution" and growth and effects of suburbs are also considered.
Prerequisite: Any two social science courses; Any WCIL II course.

SOC 3650 (3)
Global Systems and Development
The content of the course focuses upon development and social change in global systems. A combination of international conditions and domestic endowments explain strategies for economic development and social change in different countries and are documented with case studies. Additional units covering global social problems complete the global view. Issues of poverty, human rights, gender, population growth, environment, war and militarism, global media, survival of indigenous peoples, racial/ethnic conflicts, global crime, and world health are included.
Prerequisite: Any WCIL II course.

SOC 3651 (3)
Intergenerational Programs
This is the first of a two-course introduction to the world of intergenerational programs, which are designed to increase cooperation or exchange between young people and seniors. Students will learn about the origins, policy issues, methods, and settings associated with such programs.
Prerequisite: PSY 1000, SOC 1000, 2000, or 2100; Any WCIL II course.

SOC 3660 (3)
Sociology of Terrorism
This course is designed to introduce and examine domestic as well as international terrorism form a sociological per
Sociological Theory
This course will familiarize students with historical, economic, political and cultural forces that have influenced our attitudes and behaviors today. Students will learn how these developments and related topics can be explained in the context of sociological theory.
Prerequisite: A grade of C- or higher in any WCIL II course; SOC 1000.

SOC 4500
Program Design for the Human Services
Capstone course for Human Services majors. Designed to teach the process of establishing and running a small program or project within a human services agency, recreational organization, or public organization.
Prerequisite: SOC 3530.

SOC 4971
Research Practicum I
Practical experience in the conduct of social research under the supervision of a faculty mentor, emphasizing the role of practice in modifying sociological theory and methods while identifying and resolving individual and social problems. Students may work with faculty in ongoing research or may design and carry out their own work under faculty supervision.

SOC 4972
Research Practicum II
Optional continuation of SOC 4971. With prior approval, students may complete research and analysis of a complex project begun in Research Practicum I or design and carry out a new research project under faculty supervision.

SPAN – Spanish

SPAN 1100
Beginning Spanish I
An introduction to written and spoken Spanish. This is the first semester of a two-semester sequence.

SPAN 1200
Beginning Spanish II
An introduction to written and spoken Spanish. This is the second semester of a two-semester sequence.
Prerequisite: SPAN 1100.

SPAN 2100
Intermediate Spanish I
Conversation, reading, grammar, and introduction to Spanish culture. This is the first semester of a two-semester sequence.
Prerequisite: SPAN 1200.

SPAN 2200
Intermediate Spanish II
Conversation, reading, grammar, and introduction to Spanish culture. This is the second semester of a two-semester sequence.
Prerequisite: SPAN 2100.

SPAN 3100
Advanced Spanish Speaking and Listening
Advanced conversation, stressing the ability to develop fluency on a variety of topics, formal presentation, and listening, stressing the ability to understand extended discourse.
Prerequisite: SPAN 2200.

SPAN 3200
Advanced Spanish Writing and Grammar
Advanced writing, stressing the ability to write in various genres, including letters and e-mail, short reports, summaries and reflections, review of advanced grammatical forms, with emphasis in producing these forms in original writing.
Prerequisite: SPAN 2200.

SPAN 3310
Culture and Literature of Spain
Reading, discussion, and written analysis and response to various forms of literature and contemporary media of Spain.
Prerequisite: SPAN 2200.

SPAN 3320
Culture and Literature of Mexico and Central America
Reading, discussion, and written analysis and response to various forms of literature and contemporary media Mexico and Central America.
Prerequisite: SPAN 2200.
SPAN 3330 (4)  
Culture and Literature of South America  
Reading, discussion, and written analysis and response to various forms of literature and contemporary media of South America.  
Prerequisite: SPAN 2200.

SPAN 3340 (4)  
Culture and Literature of Caribbean  
Reading, discussion, and written analysis and response to various forms of literature and contemporary media of the Caribbean.  
Prerequisite: SPAN 2200.

SPAN 3350 (4)  
Culture and Literature of Spanish-speakers in the U.S.  
Reading, discussion, and written analysis and response to various forms of literature and contemporary media of the Spanish-speaking United States.  
Prerequisite: SPAN 2200.

SPRT – Sport  
SPRT 2000 (3)  
Contemporary Issues in Sports Leadership  
This course introduces concepts of leadership and team dynamics to export contemporary issues through sports and the culture of athletics. Students examine the influence of leadership in organized sports on many levels from a historical perspective through the present, addressing topics ranging from sportsmanship and ethical conduct to diversity, inclusion, and accessibility. Students also consider the effects of culture and society through its portrayal through various forms of media.

STSS – Strategic and Security Studies  
STSS 2601 (3)  
War and Civilization  
A survey of the importance of violence, war, and peace on national and international security, strategy, and policy formation. This class explores themes such as the role of war and peace as they relate to the rise and fall of states, national security, societies, and technological development. The course looks at these and other themes from a global perspective.  
Prerequisite: Any WCIL I course.

STSS 6301 (3)  
China’s National Security and Modern Military Doctrine  
The course provides an in-depth analysis of China’s present and future and national security requirements and how that shapes their modern military thought and doctrine. We will discuss China’s economic developments, trade and national security concerns, and latest military developments against the backdrop of traditional and evolving Chinese military thought.  
Prerequisite: Graduate standing.

STSS 6600 (3)  
20th-Century Intelligence Operations  
The course provides an in-depth analysis of intelligence operations during the 20th Century, examining how changes in technology, cultures, economies, and strategic situation affected intelligence requirements and operations and impacted nations’ security and decision making. The seminar will focus on how nations shaped their intelligence requirements and procedures to meet those changes.

Prerequisite: Graduate standing.

STSS 6666 (3)  
Theory and Practice of Counterinsurgency  
This seminar aims to familiarize DMS students with the challenges posed by counterinsurgency warfare in the past, present, and future. Students will consider historical case studies of counterinsurgency, read and discuss major theorists, including Mao Tse-tung, Che Guevara, David Galula, and current U.S. Army and Marine COIN doctrine.  
Prerequisite: Graduate standing.

STSS 6990 (1 to 3)  
Unpaid Internship  
See Internship Section.

STSS 6991 (1 to 3)  
Paid Internship  
See Internship Section.

STSS 6997 (3)  
Special Topics in Strategic and Security Studies  
This is a special topics graduate seminar in strategic and security studies. Course content will vary as set forth in an approved syllabus. Course may be repeatable as contents change (up to 6 credits).  
Prerequisite: Graduate standing.

Student Exchange Program  
Hawai‘i Pacific University offers undergraduate and graduate students opportunities to study at foreign partner universities through the Student Exchange Program. Credits earned abroad are applied to one’s HPU degree program through enrollment in various SE (Student Exchange) courses. Generally, undergraduate exchange students enroll in 15 credits of SE courses each semester or in 3-6 credits during the summer. Graduate students enroll in 3-12 credits of SE courses, depending upon the total number of courses selected during a semester. Graduate summer exchange program students enroll in SE 6020 and/or SE 6022. Exchange students pay HPU tuition and are officially registered at the University while studying abroad. Descriptions of student exchange partner universities and courses offered are on the HPU Internet site, under “Student Exchange Program.”

Undergraduate Student Exchange (SE) Courses:  
Fall Semester: SE 3000, 3002, 3004, 3006, 3008  
Spring Semester: SE 3001, 3003, 3005, 3007, 3009  
Summer Sessions: SE 3020, 3022

Graduate Student Exchange (SE) Courses:  
Fall Semester: SE 6000, 6002, 6004, 6006  
Spring Semester: SE 6001, 6003, 6005, 6007  
Summer Sessions: SE 6020, 6022

SWRK – Social Work  
SWRK 2000 (3)  
Profession of Social Work  
An introduction to the profession’s knowledge base, generalist methods, goals, and fields of practice. Students are encouraged to view the profession and themselves in realistic terms and to examine their appropriateness for continued study in social work. Required for admission to social work major.
Prerequisite: Any WCIL I course.

SWRK 3000  
Methods of Social Work I  
(3)
An orientation to the principles and overview of the problem-solving process of generalist social work practice (intake, engagement, data collection, assessment, planning, contracting, intervention, evaluation, termination, follow-up). 
Prerequisite: SWRK 3003 or concurrent

SWRK 3003  
(3)
Human Behavior in the Social Environment I  
This course will employ theories, models, and perspectives to understand individuals, families, and their interpersonal and group relationships, life span development, and well-being, stress, coping, and adaption. This course will emphasize knowledge about individuals and small social systems and the implications of this knowledge for all domains of social work practice. The knowledge presented will include the interrelationships between smaller and larger social systems, and in particular, how biological factors and the larger social and physical environments shape and influence individual and family well-being. 
Prerequisite: Admission to the BSW Program or SWRK 2000.

SWRK 3005  
Human Behavior in the Social Environment II  
(3)
This course examines theory and research knowledge about political economic and societal structures and process related to communities, groups and organizations within contemporary society. Consideration is given to ways in which these social systems have significant social, political, economic, and psychological impacts on the functioning of individuals, families and social group. The course provides a framework for understanding the influences of medium to large social systems on individuals, families and groups with whom social workers practice. There is a focus on oppression, discrimination, prejudice and privilege and their relationship to social and economic justice for populations served by social workers. 
Prerequisite: Admission to the BSW Program or SWRK 2000.

SWRK 3010  
(3)
Methods of Social Work II  
A closer examination of the social work skills and methods with individuals including diverse/special populations. 
Prerequisite: SWRK 3000 or 3005 (may be taken concurrently).

SWRK 3300  
(3)
Writing and Research in Social Work  
This course focuses attention on two essential skills of social work: (1) clear, correct, and professionally/legally sound documentation, and (2) integrating the results of social science research into professional practice/practice evaluation. 
Prerequisite: MATH 1123 or SOC 3200; Any WCIL II course.

SWRK 3570  
American Social Welfare Policy  
(3)
This course involves an exploration of the development of social welfare programs. It includes content about the history of social work, the history and current structure of social welfare services and the role of policy in service delivery, social work practice, and the attainment of individual and social well-being. Students will understand and demonstrate social policy skills in regard to economic, political, and organizational system. 
Prerequisite: A grade of C- or higher in any WCIL II course; PSCI 1400 or 2000; SOC 1000, 2000, or 2100.

SWRK 3700  
Special Topics in Social Work  
(1 to 3)
This is a special topics seminar in social work in which students participate in class discussions and give oral presentations on contemporary social work issues. Course content will vary as set forth in the approved syllabus. Course may be repeatable as content changes. 
Prerequisite: SWRK 2000 or permission of the BSW program director and any Research and Epistemology A course.

SWRK 3900  
Social Work Practicum I  
(3)
Students apply and integrate classroom theory in a social agency under close supervision. Required for all social work majors. 
Prerequisite: SWRK 3010 or concurrent.

SWRK 3990  
Nonpaid Internship  
(1 to 3)

SWRK 3991  
Paid Internship  
(1 to 3)

SWRK 4000  
Methods of Social Work III  
(3)
A closer examination of the social work skills and methods with families and groups, including diverse/special populations. 
Prerequisite: SWRK 3005, 3010, and 3900^; (^ may be taken concurrently).

SWRK 4010  
Methods of Social Work IV  
(3)
A closer examination of the social work skills and methods with organizations and communities, with special attention to evaluation. This course also serves as a "capstone," in which students return to the generalist model as a whole. 
Prerequisite: SOC 2100 or 3100; SWRK 3000, 3003, 3005, and 3100.

SWRK 4900  
Social Work Practicum II  
(3)
Students apply and integrate classroom theory in social agencies under close supervision. Required for all social work majors. 
Prerequisite: Completion of all 3000-level SWRK courses.

SWRK 4910  
Social Work Practicum III  
(3 to 4)
Students apply and integrate classroom theory in social agencies under close supervision. Required for all social work majors. 
Prerequisite: SWRK 4900 or concurrent.
SWRK 4960 (3)  
Social Work Capstone  
The social work capstone is intended to provide senior, Social Work students with an opportunity to integrate and apply previous learning (academic and field) through the creation and implementation of project at their practicum agency in order to demonstrate mastery of the knowledge, skills, ethics and values necessary for evidence-based generalist social work practice.  
Prerequisite: SWRK 3000, 3010, 4000, 4010 and 4900 or permission of program director.

SWRK 6001 (3)  
Fundraising and Resources Development for Non-Profit Organizations and Agencies  
Fundraising and Resources Development for Non-Profit Organizations and Agencies is a macro elective that covers resource development and grant writing for non-profit agencies. It affords students to assist agencies to expand their funding base in difficult economic times.  
Prerequisite: Graduate standing.

SWRK 6002 (3)  
Crisis Intervention and Prevention  
This course provides specific application of crisis theory onto generalist practice relevant to conducting the practice of social work during a crisis situation, immediately following a crisis, and in situations where the social worker may be faced with the task of assisting an individual, family, group, or community in dealing with the long term effects of a crisis experience.  
Prerequisite: Admission to the MSW program.

SWRK 6003 (1 or 3)  
Global Social Work Practice  
This is an elective course that will provide opportunities for one-to-one direct practice within a host culture. Students will be provided the foundation knowledge about the importance of how globalization has impacted social work practice and what are the developing trends. This course will allow students to examine the global dimensions of social work profession while directly engaging with individuals, families, and groups while at the same time becoming exposed to social justice and policy.  
Prerequisite: Admission to the MSW program or with permission from the MSW Program Director.

SWRK 6050 (3)  
Graduate Study of Social Work for Advanced Standing Students  
A transition course for students with the BSW who will begin second year MSW courses in the following semester. Differences between undergraduate and graduate social work education. Review topics not covered in depth in the BSW. Literature research methods necessary for success at the graduate level.  
Prerequisite: Admission to Advanced Standing MSW program.

SWRK 6100 (3)  
Generalist Social Work Practice with Individuals  
This course is designed to teach students about methods of generalist social work practice at the micro level, with individuals.  
Prerequisite: SWRK 6200 or concurrent. Graduate standing.

SWRK 6102 (3)  
Generalist Social Work Practice with Families and Groups  
This course is designed to teach students about methods of generalist social work practice at the mezzo level, with families and small groups.  
Prerequisite: SWRK 6200 and 6201^ (* may be taken concurrently).

SWRK 6103 (3)  
Generalist Social Work Practice with Organizations and Communities  
This course is designed to teach students about methods of generalist social work practice at the macro level, with organizations and communities  
Prerequisite: SWRK 6100.

SWRK 6200 (3)  
Human Behavior in the Social Environment I  
This course is designed to teach MSW students about human development from birth to death, including physical, cognitive, and social aspects. The course will focus especially on aspects of development that have implications for social work practice.  
Prerequisite: Admission to the MSW program.

SWRK 6201 (3)  
Human Behavior in the Social Environment II  
This course is designed to teach MSW students about family, group, and community influences on the behavior of individuals.  
Prerequisite: Admission to the MSW program.

SWRK 6300 (3)  
Social Work Research I  
This course is designed to introduce MSW students to the principles of practice evaluation and "evidence-based practice."  
Prerequisite: Admission to the MSW program.

SWRK 6500 (3)  
Social Welfare Policy I  
This course is designed to introduce MSW students to the field of social welfare policy. And to specific policy issues and programs in the United States and abroad.  
Prerequisite: Admission to the MSW program.

SWRK 6510 (3)  
Legal and Ethical Issues in Social Work  
Consideration of current laws/legislation affecting the practice of social work. Application of ethical principles to practice dilemmas.  
Prerequisite: Admission to the MSW program.

SWRK 6900 (3)  
Graduate Practicum I  
This course is designed to give students the opportunity to put social work values, skills, and knowledge into practice through supervised work in a social services agency.  
Prerequisite: Admission into the MSW Program.

SWRK 6901 (3)  
Graduate Practicum II  
This is the second semester of practicum for students in the MSW program. This course is designed to give students the continuing opportunity to put social work values, skills, and knowledge into practice through supervised work in a social services agency.
Prerequisite: SWRK 6900.

**SWRK 6990**  
Nonpaid Internship  
(1 to 3)

**SWRK 6991**  
Paid Internship  
(1 to 3)

**SWRK 6997**  
Directed Readings in Social Work  
Directed individualized readings.

**SWRK 7100**  
(3)  
Culture and Diversity in Advanced Generalist Practice  
Social Work approaches to meet the needs of special and diverse population. Students will also study the elements of "cultural competence" as defined by the National Association of Social Workers.  
Prerequisite: SWRK 6100, 6102, 6103, 6200, 6201, 6900, and 6901; or SWRK 6050. Graduate standing.

**SWRK 7101**  
(3)  
Advanced Practice with Diverse Individuals  
Introduction to counseling knowledge, ethics, and skills appropriate for multicultural advanced social work practice.  
Prerequisite: SWRK 6100, 6102, and 6200; SWRK 6050 or 7100*. (* may be taken concurrently).

**SWRK 7102**  
(3)  
Advanced Practice with Diverse Families and Groups  
The focus of this course is on the knowledge, ethics, and skills appropriate for culturally competent advanced social work practice with diverse families and groups.  
Prerequisite: SWRK 6100, 6102, and 6200; SWRK 7100 or concurrent.

**SWRK 7103**  
(3)  
Advanced Practice with Diverse Organizations and Communities  
Knowledge, ethics, and skills for culturally competent advanced social work practice with organizations and communities.  
Prerequisite: SWRK 7100.

**SWRK 7300**  
(3)  
Social Work Research II  
Research methods applied to knowledge generation in social work.  
Prerequisite: SWRK 6050 or 6300.

**SWRK 7350**  
(3)  
Integrative Seminar in Advanced Generalist Practice  
A capstone course in which MSW candidates synthesize their work and research relating to social work practice with a cultural group and create a paper suitable for publication.  
Prerequisite: SWRK 6300 and 7300*. (* may be taken concurrently).

**SWRK 7500**  
(3)  
Social Welfare Policy and Services II  
A continuation of SWRK 6500, this course focuses on policy analysis. Special emphasis is placed on public policies affecting diverse clients/client groups, and on the role of the social worker as a public policy change agent.  
Prerequisite: SWRK 6050 or 6500.

**SWRK 7900**  
(3)  
Graduate Practicum III  
Supervised work in a community social agency with special focus on a cultural group.  
Prerequisite: SWRK 6050 or 6901. agency with special focus on a cultural group.  
Prerequisite: SWRK 7900.

**THEA – Theater**  
**THEA 1000**  
(3)  
Introduction to Theater  
A comprehensive survey course of all aspects of theater
score on a placement test

WRI 1101
Analyzing and Writing Arguments Laboratory
A writing workshop lab to be taken concurrently with Any WCIL I course. Provides supplementary instruction and practice in critical reading and analysis and in research, writing, and editing techniques for students needing additional support in these areas of first-year writing courses. May be repeated for credit.
Prerequisite: Concurrent enrollment in Any WCIL I course.

WRI 1150
Literature and Argument
This course combines an introduction to literature with instruction and practice in college-level writing tasks. WRI 1150 fulfills the Communication Skills A requirement and substitutes for WRI 1100.
Place out option for General Education Program:
Students who score 630 or above on the SAT Critical Reading or 28 or above on the ACT English may place out of the Communication Skills A category. Students will not receive course credit for a course in this category, though will have satisfied the Writing and Critical Thinking course requirement.
Prerequisite: an appropriate score on a placement test.

WRI 1200
Research, Argument, and Writing
This course continues WRI 1100’s focus on argument as the cornerstone of academic writing, emphasizing organization, logical reasoning, and critical thinking. Students prepare a major argumentative research paper by locating and evaluating sources; summarizing, synthesizing, and incorporating them; and attributing ideas to their sources.
Prerequisite: An appropriate score on a placement test and a grade of B- or better in Any WCIL I course or a grade of C- or better in Any WCIL I course (JOUR 1100, WRI 1100, 1150) and concurrent enrollment in WRI 1201; or an appropriate score on a placement test.

WRI 1201
Research, Argument, and Writing Lab
This lab is a revising and editing workshop which is taken concurrently with writing 1200 or any Research and Epistemology A course. The lab provides additional instruction and practice in written language skills and editing techniques to help students succeed. While working one-on-one or in groups with tutors, students will examine their writing course assignments and readings, receive guidance through the writing and research process, review grammar and mechanics, and develop self-editing skills. The emphasis of this lab is to help students gain the confidence and skill needed for them to write well independently.
Prerequisite: Concurrent enrollment in any WCIL course.

WRI 1310
Grammar Workshop
This course offers to members of the university community a systematic review of the essentials of English grammar and style. Appropriate for all writing skill levels from first-year students to those in graduate programs. It teaches syntactical structures, mechanics, editing and proofreading skills.

WRI 2601
Introduction to Creative Writing
In this course students will analyze and practice fundamental techniques of the major genres of creative writing.

Students will study and work in all or most of the following genres: fiction, poetry, drama, and creative nonfiction. For each of the genres covered, students will be expected to produce a draft original work to be workshopped by their peers.
Prerequisite: Any WCIL I course.

WRI 3310
Poetry Workshop
An introduction to the study and composition of poetry. As a foundation to the craft of poetry writing, prosody is studied and discussed, and British and American poetry is surveyed. Students submit poems to the class for critique, and they may prepare pieces for the University literary magazine as well as for submission to other magazines.
Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3311
Childhood and Poetry Workshop
This course is a poetry workshop in which students develop a portfolio of about 25 poems on the subjects of childhood and identity. Students will become familiar with poetry writing techniques and how to teach them, the role of childhood in literature, and a number of well-known poets. Students will also become familiar with Romantic and other trends in poetry, and will apply techniques learned to their own poetry writing.
Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3313
The Sacred and the Erotic in Lyric Poetry
This is an upper-division poetry writing class that will blend creative writing with an investigation of a variety of selected sacred and erotic texts, both ancient and modern. Students will work seminar fashion, examining both required poetry collections and theoretical texts in addition to producing their own lyrics for workshop discussion.
Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3320
Scriptwriting
A course that teaches students the fundamental principles of writing for both the stage and screen including basic drama and film theory and proper script formats. Students analyze texts and view scenes from plays and films and perform a series of exercises in dialogue, character development, segment development, spectacle and mise-en-scene, stage and film conventions, tragedy and comedy structure, and other archetypal plot formulae. Students will write a short script for the stage or screen that demonstrates a practiced understanding of these elements.
Prerequisite: WRI 1150, 2601, or any introductory ENG course; or permission of instructor.

WRI 3330
Fiction Writing
A workshop designed to introduce the student of fiction to techniques and concepts such as characterization, plotting, point of view, theme, setting, and tone. The focus of the course is on writing the short story, although other fictional forms may be explored. Markets for fiction and preparing manuscripts for submission are also discussed. Enrollment is limited to 15 students.
Prerequisite: WRI 1150, 2601, or any introductory ENG course; or permission of instructor.

WRI 3340

Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3320 (3)
Scriptwriting
A course that teaches students the fundamental principles of writing for both the stage and screen including basic drama and film theory and proper script formats. Students analyze texts and view scenes from plays and films and perform a series of exercises in dialogue, character development, segment development, spectro and mise-en-scene, stage and film conventions, tragedy and comedy structure, and other archetypal plot formulae. Students will write a short script for the stage or screen that demonstrates a practiced understanding of these elements.
Prerequisite: WRI 1150, 2601, or any introductory ENG course; or permission of instructor.

WRI 3330 (3)
Fiction Writing
A workshop designed to introduce the student of fiction to techniques and concepts such as characterization, plotting, point of view, theme, setting, and tone. The focus of the course is on writing the short story, although other fictional forms may be explored. Markets for fiction and preparing manuscripts for submission are also discussed. Enrollment is limited to 15 students.
Prerequisite: WRI 1150, 2601, or any introductory ENG course; or permission of instructor.
Creative Nonfiction Writing Workshop

WRI 3340 is a creative writing workshop focusing on how to apply literary techniques to nonfiction writing. The class is conducted in workshop format, with students revising their essays in response to feedback. Students also analyze the techniques of professional creative nonfiction, keep a reflective journal, and prepare a portfolio.

Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3391 (3)
Wanderlust: Student Literary Magazine

In this class, students serve as editors for Wanderlust, the student literary magazine of Hawai‘i Pacific University. In addition, students polish their own creative writing skills in order to produce publishable poetry, prose, or drama.

Prerequisite: WRI 1150, 2601, or any 2000-level ENG course; or permission of instructor.

WRI 3510 (3 or 4)
Composition Studies

This course combines the study of composition theory with practical classroom experience. Topics of discussion, among others, include conferencing techniques, assignment and test composition, revision and editing strategies, writing-process theory, voice and style, and class dynamics. Students follow the progress of their own students in writing labs, present oral reports, and write a short research paper.

Prerequisite: A grade of C- or higher in any WCIL II course and permission of instructor.

WRI 3950 (3)
Professions in Writing Practicum

This class includes practical experience at either a commercial or non-profit site where substantial writing is being done. Students will be introduced to the epistemology, history, and politics of writing, as well as to the changing role of writing in contemporary cultures.

Prerequisite: Any WCIL II course.

WRI 3951 (1)
Staff Reader, Hawai‘i Pacific Review

In this practicum course, students act as Staff Readers for Hawai‘i Pacific Review, the university’s national and international online literary journal. Their main responsibility involves reading submissions in the principal creative genres published in the journal. Students will communicate with each other, with the Managing Editors of the magazine, and with the Faculty Editor to recommend which submissions will be published. Students will also help to solicit submissions, to edit submissions selected for publication, and to publicize the magazine. Staff Readers will be in constant communication with the Editors, and will participate in editorial meetings several times a semester.

Prerequisite: ENG 1500, WRI 1150 or any 2000-level ENG course.

WRI 3953 (3)
Managing Editor, Hawai‘i Pacific Review

In this practicum course two students will act as Managing Editors for Hawai‘i Pacific Review, HPU’s online literary journal. Managing Editors will be responsible for managing the magazine’s Staff Readers and their workloads. They will work closely with the Faculty Editor to make final decisions regarding published content and assume administrative responsibilities associated with soliciting submissions, publicity, copy-editing, and securing rights to published work. Managing Editors should expect to meet often with the Faculty Editor and to be constant communication with the staff; they should expect to plan and convolve several editorial meetings with the entire staff.

Prerequisite: WRI 3951 and instructor approval.

WRI 3990 (1 to 3)
Nonpaid Internship

See Internship Section.

WRI 3991 (1 to 3)
Paid Internship

See Internship Section.

WRI 4990 (3)
Professional Writing Portfolio Seminar

The capstone course for the Writing Minor, WRI 4990 is designed to serve students with a range of experiences in a variety of academic disciplines. Students will develop an understanding of the discourse within which their academic or professional writing is being interpreted and evaluated, and will synthesize a collection of writing into a coherent, compelling portfolio that they may successfully carry forward to their professional or graduate school careers.

Prerequisite: Three 3000-level writing courses; or permission of instructor.

WRI 4997 (1 to 3)
Directed Reading in Writing

Directed individualized reading.
